Global demand for oil, gas and petroleum-based products has reached record levels. OCC's harsh environment solutions for Oil and Gas applications provide consistent communication architectures based on high-quality products that boost reliability, availability, and performance, throughout the entire life cycle of an asset. Developed on OCC's experience with extreme environments and our history of exceptional performance, our integrated solutions support DCS/PLC automation/control architectures, SCADA systems, CCTV /IPTV/CATV networks and numerous other applications essential to the oil and gas industry.

FIBER OPTIC CONNECTORS

These hermaphroditic (genderless) fiber optic connectors offer a wide variety of connectivity solutions suitable for harsh environments. Available from 2-48 channel configurations and multiple plating options. Compatible in all OCC assemblies.

COTS M83526 (TFOCA-II®) CONNECTORS (UP TO 12 CH)

This tactical fiber optic connector is the standard connector for the US DoD and can be used in any deployable application. Available in either 4- or 12-channel shell size configurations.

TFOCA-II® is a trademark from Amphenol Fiber Systems International

EZ-MATE™ CONNECTORS (UP TO 24CH)

The OCC EZ-MATE family of connectors provides a comprehensive solution for quick mating in a tactical footprint. Available in 4-, 6-, 12- or 24-channel configurations.

MHC®-T3 CONNECTOR (UP TO 48 CH)

OCC's patented MHC-T3 is the next generation in compact, high-density, fiber optic connectors. Utilizing MT ferrule technology, the MHC-T3 can deliver up to 48 single-mode or multimode fibers in an environmentally-protected, hermaphroditic connector with a smaller footprint than traditional cylindrical connectors.

HYBRID (FIBER & ELECTRIC) CONNECTORS

Combining fiber optic and electrical power in one connector, OCC hybrid connectors offer a cost effective solution suitable for harsh environments. Compatible in all OCC assemblies.

F-LINK™ CONNECTOR (UP TO 33 CH)

F-LINK™ fiber optic termini are designed to provide exceptional optical performance using 1.25mm ceramic ferrule technology while delivering cost effective solutions. The termini are designed to the same mating plane as MIL-DTL-38999 electrical pin and socket contacts, enabling application of popular M39029 electrical contacts.

MHC®-T2 CONNECTOR (UP TO 8 CH)

OCC's MHC-T2 is the next generation in tactical single terminus connectors. Due to the small form factor, it allows for reduced weight and size while maintaining a rugged connection. Available in 2-, 4-, 6-, and 8-channels. Fiber/copper configurations available in 8 channel shell size.

EZ-MATE™ HYBRID CONNECTOR (12 CH)

OCC's EZ-H is a server-duty 12-channel hybrid connector. This connector combines power and communication into a single connector. Includes 8 fiber optic termini and (4) 12 AWG electrical contacts.

MODULAR ADVANCED REEL SYSTEM (MARS™)

MARS™ REEL

OCC's Modular Advanced Reel System (MARS) is a lightweight, modular system that is easily transported. It is ideal for applications where cable needs to be deployed, reeled in quickly, and stored efficiently. OCC MARS reels were tested and approved to the US Army CECOM specification A336463A and, have been named as the preferred reel for US Army applications.

MARS™ TRIPOD

OCC's Tripod Design allows for disassembly into three components for easy shipping and storage. Pin latches are tethered to base and lock into place. Axles are easily interchanged and available in 100M, 300M, and 500M sizes. The axle latch can easily be positioned to retain or remove the reel.

CUSTOMER SUPPORT & WARRANTY INFORMATION

TECHNICAL AND DESIGN-BUILD EXPERTISE

Instead of relying on OCC just for products, more and more of our customers rely on our design-build expertise. Our design engineers and technical staff provide unprecedented service, support, and assistance.

ONE-STOP SHOP

Since we provide one of the largest network-solutions portfolios in the industry, many of our customers rely on OCC as their one-source solutions provider. From the most reliable end-to-end cabling and connectivity systems, down to the shortest patch cable, we can meet your every network need.

CUSTOMER-DERIVED INNOVATIONS

We partner with you, our customer, and listen to your needs. Thanks to our customers, we've designed, innovated, and customized some of the best solutions in the industry, providing the speed, immediate scalability, space savings, and ultra-high performance demanded by zero-downtime networks of all sizes.

COMPETITIVE WARRANTY PROGRAMS

OCC, in conjunction with certified Multimedia Design and Integration Specialist (MDIS) installers around the world, is able to offer various competitive warranty and extended warranty programs. OCC has developed warranty plans that offer a flexible approach to long-lasting network installations.
