ACKNOWLEDGMENTS

This report was prepared jointly by the Bureau of the Census and the Law Enforcement Assistance Administration. In the Law Enforcement Assistance Administration, general supervision was supplied by Charles R. Kindermann, assisted by Sue A. Lindgren and Marilyn Marbrook, all of the National Criminal Justice Information and Statistics Service.

In the Bureau of the Census, Governments Division, general supervision was provided by Alan R. Jones. Carolyn Y. Thompson directed the project. Significant contributions were made by Victoria E. Campbell, Purnell E. Johnson; Helen M. Kneeland, Edward C. Malloy Jr., Joan B. Taylor; Operations units under the supervision of Howard S. Sales and Richard Neach; the Publication unit under the supervision of Helen D. Files including Corrine Davis; and the Data Preparation Division.

TABLE FINDING GUIDE

Subjects by Type of Government and Table Designation

This guide lists all subjects covered in this report, but does not indicate all the detail shown in some tables, e.g. percent distributions, capital outlay, employment by full-time and full-time equivalent, etc. Unless otherwise noted, expenditure data are for FY 1974 and employment and payroll data for October 1974. Symbols appear with some table designations to indicate that only U.S. summary data are shown. A guide to the symbols appears at the end of the matrix.

¹ Exhibit Tables A and B in Appendix 1 present expenditure and employment data for large special police forces which are part of independent school districts or special districts. These data are not included in other police protection data in this report.

*Table shows total data for combined state or local governments only; it does not give data for individual state or local governments.

†Table shows data for combined county governments only; it does not give data for individual counties.

‡Table shows data for combined municipal governments only; it does not give data for individual municipalities.

**Table shows data for 17 SMSA's combined; it does not give data for individual SMSA's.

IMPORTANT

We have provided a User Evaluation Questionnaire at the end of this publication. It will assist us in improving future reports if you will complete and return it at your earliest convenience. The questionnaire is a self-mailing form and requires no postage.

INTRODUCTION

This publication is the eighth in a series of annual reports that present public expenditure and employment data on criminal justice activities in the United States. In this report, expenditure data cover the fiscal year 1974, and employment data refer to the month of October 1974.¹

As in previous years, specific data are supplied for the Federal Government, each of the 50 State governments, and the aggregate local level of government within each State. Survey coverage was designed to produce reliable estimates for each State of the percent of State and local law enforcement expenditure funded and expended by units of general local government. These estimates, shown in table 1, are necessary for compliance with the provisions of the Omnibus Crime Control and Safe Streets Act of 1968 as amended by the Omnibus Crime Control Act of 1970 (further discussion with table 1). For the fourth year, data are published separately for the aggregate county governments and the aggregate municipal governments (cities and townships) within each State, and for each of 312 counties with a 1970 population of 100,000 or more, as well as 384 cities with a 1970 population of 50,000 or more. Also, data are shown for the 17 largest standard metropolitan statistical areas (SMSA's). Reports for fiscal year 1970 through fiscal year 1972 displayed data for the 15 largest SMSA's.

The presentation of the tables is organized into two major parts—the summary "Criminal Justice System" section showing the interrelationship of the various sectors of the system, and the six "Sector" sections providing, where possible, a further breakdown of data on a particular criminal justice activity. The six sectors of criminal justice activity covered in this report are: police protection, judicial, legal services and prosecution, indigent defense, corrections, and "other criminal justice." In addition, appendix 1 presents two tables that show expenditure and employment data for special police force activities in selected school districts and special districts not included in the summary totals.

¹This series of reports is based on an annual fiscal period that ends June 30 for most governments. In the first seven volumes, the designation for this fiscal period used in the title and tables included the two calendar years involved; e.g., Fiscal Year 1971-72. In this volume and subsequent volumes, the designation will refer only to the year in which the fiscal period ended; e.g., Fiscal Year 1974 instead of Fiscal Year 1973-74.

Definitions for concepts, categories and terms used in this report are contained in appendix 2.

Historical overview

Although this annual series of reports began in fiscal year 1967, caution should be exercised in comparing data in the FY 1971 and later volumes with data in earlier volumes. Beginning with FY 1971, the survey was greatly expanded: The survey sample of governmental units was increased by a third, and the number of units for which data are compiled in the field by specially trained agents was more than doubled. Data collection further benefited from a growing familiarity with the criminal justice systems of the various States and of the individual units within the States.

Data from the FY 1971, 1972, 1973, and 1974 volumes are essentially comparable; these data were collected in each year from the same sample of governments and were edited and processed in a uniform fashion. (See the section on Survey Methodology for more detail.) Table A shows the steady rise in expenditure for criminal justice activities at all levels of government over the 4 years.

The number of full-time equivalent criminal justice employees also increased at all levels of government but at a much slower rate than expenditure (see table B). A report entitled Historical Statistics on Expenditure and Employment for the Criminal Justice System 1971 to 1973, which summarizes data from the annual publications, is available. A second historical report, covering fiscal years 1971 to 1974, is being prepared.

General, fiscal year 1974

Local governments continued to spend more than the Federal and State governments combined for all criminal justice activities. Figure 1 shows that local governments accounted for 60.8 percent of all direct criminal justice expenditure, while State governments contributed 26.1 percent and the Federal government 13.1 percent. However, when each activity is examined separately, the proportion accounted for by the different levels of government varied throughout the criminal justice system.

Table A. Total criminal justice expenditure and percent change by level of government, fiscal years 1971, 1972, 1973, and 1974

Level of government	Amount (millions of dollars)				Percent increase		
	1974	1973	1972	1971	1973 to 1974	1972 to 1973	1971 to 1972
Federal ¹	\$2,603	\$2,261	\$1,910	² \$1,449	15.1	18.4	² 31.8
State.....	4,546	3,855	3,342	2,921	17.9	15.4	14.4
Local.....	9,130	8,094	7,373	6,663	12.8	9.8	10.6

¹Federal Government data for fiscal years 1971, 1972, and 1973 have been revised upward to reflect expenditures of the Law Enforcement Assistance Administration inadvertently excluded. See table 4, footnote 5.

²The Federal expenditure amount shown for 1971 does not include data for the Office of Building Security Services for the Federal Reserve System, the Judicial, Prevention and Enforcement Services Division of the Bureau of Indian Affairs, and the Center for Studies of Crime and Delinquency at the National Institute of Mental Health, as these agencies were not canvassed in the 1971 survey. These agencies were canvassed in the 1972, 1973, and 1974 surveys and their expenditure is reflected in the data. The 31.8 percent increase from 1971 to 1972 is, therefore, overstated to the extent that these agencies, which expended 31.3 million in 1972, were not included in the 1971 base year.

Table B. Total full-time equivalent criminal justice employees and percent change, by level of government, October 1971, October 1972, October 1973, and October 1974

Level of government	Number of employees				Percent increase		
	Oct. 1974	Oct. 1973	Oct. 1972	Oct. 1971	Oct. 1973 to Oct. 1974	Oct. 1972 to Oct. 1973	Oct. 1971 to Oct. 1972
Federal.....	93,755	87,139	85,222	¹ 77,523	7.6	2.2	¹ 9.9
State.....	252,588	232,299	216,603	205,859	8.7	7.2	5.2
Local.....	664,862	625,871	596,480	578,394	6.2	4.9	3.1

¹The Federal employment figure shown for October 1971 does not include employees of the Office of Building Security Services for the Federal Reserve System, the Judicial, Prevention and Enforcement Services Division of the Bureau of Indian Affairs, and the Center for Studies of Crime and Delinquency at the National Institute of Mental Health, as these agencies were not canvassed in the 1971 survey. These agencies were canvassed in the 1972, 1973, and 1974 surveys and their employees are reflected in the data. The 9.9 percent increase from October 1971 to October 1972 is, therefore, overstated to the extent that these agencies, which had 2,005 full-time equivalent employees in October 1972 were not included in the October 1971 base.

As seen in table C, three of the activities—police protection, judicial, and legal services and prosecution—were supported mainly by local governments. For the first time in 1974, local governments also expended the largest amount for indigent defense; in previous years, the Federal government had been the principal supporter in this sector. State governments contributed the largest amounts for corrections and those activities included in the “other criminal justice” sector.

Relationships similar to those found for expenditure among the levels of government also apply to the employment situation. Figure 2 shows that almost two-thirds of the total full-time equivalent criminal justice employees of all governments were employed by local governments. As seen in table D, the proportion of workers employed by the three levels of government in each sector generally approximated the proportion of expenditures made in the sector. An exception to this

pattern is seen in the indigent defense sector, where the Federal government accounted for 37.5 percent of the total expenditure, but only 2.5 percent of the employees. This is because the Federal government makes more extensive use of court-appointed counsel systems whereby fees are paid to private counsel to defend indigent clients accused of crimes than do State and local governments, which more frequently hire employees directly to provide indigent defense services.

Federal Government (tables 4 and 5)

General expenditure by the Federal government totaled \$223,483 million in fiscal year 1974. Of this amount, \$2,603 million, or 1.2 percent, was expended on criminal justice activities. The \$2,603 million represents an increase of \$342 million, or 15.1 percent, of the \$2,261 million expended in FY 1973. This is somewhat less than the 18.4 percent increase from 1972 to 1973.

The police protection sector accounted for the largest portion of the \$342 million overall increase: \$135 million or 39.4 percent. Substantial expenditure increases occurred in the U.S. Capitol Police unit, the Drug Enforcement Administration, the Internal Revenue Service Intelligence Division, and the Postal Inspection Service. The Hospital Protective Services Staff in the various Veterans Administration hospitals more than doubled its expenditure, from \$7.1 million in FY 1973 to \$15.0 million in FY 1974, a 109.3 percent increase. Expenditure in the “other criminal justice” sector increased by \$145.9 million, 42.6 percent

of the total Federal expenditure increase. The Law Enforcement Assistance Administration accounted for virtually all of the increase, representing increased grants to State and local governments and contractual services with other Federal agencies and private organizations.

While the police protection and “other criminal justice” sectors showed the largest increases in absolute dollars expended, the fastest growing sector was corrections: expenditure rose from \$189 million in FY 1973 to \$237 million in FY 1974, a 25.5 percent increase. Only the legal services and prosecution sector showed a decrease; \$5.7 million less, a 4.8 percent decrease. The decrease reflected a widespread reorganization in the Department of Justice offices and divisions that comprise this sector. Percent increases in expenditure in the other sectors were: police protection, 12.4 percent; judicial, 15.0 percent; indigent defense, 1.3 percent; and “other criminal justice,” 12.5 percent.

Figure 3 shows that as in previous years, the largest share of Federal criminal justice money was expended for police protection activities, including those agencies that enforce Federal law and those that provide security and police services to Federal property and buildings. Of the \$2,603 million in total Federal criminal justice expenditure, nearly half, \$1,225 million, was for agencies in the police protection sector, including the Federal Bureau of Investigation (\$372 million), the Bureau of Customs (\$232 million), the Postal Inspection Service (\$98.1 million), and the Drug Enforcement Administration (\$92.9 million). As noted earlier,

Table C. Percent distribution of total direct expenditure for the criminal justice system by activity and level of government, fiscal year 1974

FIGURE 4. Federal Government full-time equivalent employment, October 1974
93,755

the second largest block of Federal criminal justice expenditure was reported by agencies in the "other criminal justice" sector, \$796 million or 30.6 percent, primarily LEAA with FY 1974 expenditure of \$770 million. The other four sectors accounted for the remaining 22.4 percent of Federal criminal justice expenditure.

If Federal grants to State and local governments are not included, the increase in Federal criminal justice direct expenditure (current operating expenses and capital outlay) was 15.7 percent.

The number of full-time equivalent Federal employees in criminal justice activities increased 7.5 percent from October 1973 to October 1974. There were 93,755 full-time equivalent employees in October 1974, including 68,504 (73.1 percent) in the police protection sector; 9,967 (10.6 percent) in the corrections sector; 6,845 (7.3 percent) in the legal services and prosecution sector and 6,734 (7.2 percent) in the judicial sector (see figure 4). Indigent defense and "other criminal justice" together accounted for only 1,705 full-time equivalent employees (1.8 percent) although these two sectors accounted for more than 34 percent of the total Federal criminal justice expenditure. As previously mentioned, the greatest portion of the indigent defense money was paid to court-appointed counsel who are not considered regular public employees, and the greatest portion of the "other criminal justice" expenditure was in the form of intergovernmental grants.

The 93,755 Federal employees drew an October 1974 payroll of \$130.8 million; each sector's percentage of the total payroll was generally proportionate to its percentage of total employees (see table E). There is a slight disparity in some sectors because of a concentration of higher paid employees. For example, the judicial sector with only 7.2 percent of the employees, received 8.0 percent of the payroll; similarly, the legal services sector drew 8.0 percent of the payroll with only 7.3 percent of the employees. Average monthly salaries by sector are shown in table F.

Table E. Percent distribution of Federal full-time equivalent employment and payroll, October 1974, by activity

Activity	Full-time equivalent employees	October 1974 payroll	Percent distribution

State governments (tables 6-10)

The total general expenditure of State governments in FY 1974 was \$120 billion. Of this amount \$4.5 billion, or 3.8 percent, was expended on criminal justice activities. This represents an increase of \$691 million, or 17.9 percent, in criminal justice expenditure from the previous fiscal year, slightly more than the 15.4 percent increase from 1972 to 1973.

From FY 1971 to FY 1973, the indigent defense and "other criminal justice" sectors each year made substantially larger proportionate increases than the other four sectors. In the case of indigent defense, the increases reflected the expansion of existing programs and the initiation of new programs to provide counsel for the poor. In some States, also, expanded efforts are underway to provide counsel not only to those accused of crime but also to those convicted persons still in need of an attorney's services, either in the appellate process or in disputed situations within the penal institutions. The indigent defense sector at the State level continued to expand in FY 1974, showing a 38.8 percent increase; but this increase was considerably less than the 63.6 percent increase in FY 1973 and the 48.1 percent increase in FY 1972.

In the case of the "other criminal justice" sector, the large proportionate increases in previous years reflected expanding intergovernmental payments to local governments for criminal justice purposes. Again, as with indigent defense, the "other criminal justice" sector continued to expand, but at a much slower rate, a 23.3 percent increase in FY 1974 compared to a 48.6 percent increase in FY 1973 and a 104.3 percent increase in FY 1972. The rate of expansion over the 4 years, in this sector more than any other, reflects the growth pattern of the Law Enforcement Assistance Administration: several years of rapid growth followed by a gradual leveling off as the program matured. Intergovernmental grants to local governments continued to increase, \$94.6 million more in FY 1974 than in FY 1973 for all criminal justice sectors, but at a less spectacular rate.

Two other sectors, legal services and corrections, showed fast growing rates of expansion. Legal services expenditure increased by 24.5 percent in FY 1974 compared to a 14.0 percent increase in FY 1973. Corrections increased by 17.5 percent in FY 1974 compared to a 9.9 percent increase in FY 1973. The 16.5 percent increase in police protection and the 13.5 percent increase in judicial were more typical of increases in previous years.

While indigent defense, legal services, and "other criminal justice" were the fastest growing areas of State criminal justice expenditure, the correction sector, as in past years, accounted for the largest portion of State criminal justice expenditure (\$1,895 million or 41.7 percent); these expenditures included the operation of State prison systems and, in many States, the operation of the probation and parole systems as well. The balance of State criminal justice expenditure was distributed as follows: police protection, \$1,383 million, or 30.4

percent; judicial, \$476 million, or 10.5 percent; legal services and prosecution, \$182 million, or 4.0 percent; indigent defense, \$58 million or 1.3 percent; and "other criminal justice," \$552 million or 12.1 percent (see figure 5).

Increases in expenditure were accompanied by increases in criminal justice employment and payroll in all sectors. The number of full-time equivalent employees in State criminal justice agencies increased 8.7 percent, and the payroll increased 15.4 percent, between October 1973 and October 1974. The 252,588 employees (8.5 percent of the total 2,968,020 full-time equivalent employees on State payrolls) received \$252 million in salaries, wages, fees, and commissions in the month of October 1974. The percentage of total employees in each sector was generally proportionate to the percentage of total expenditure in each sector (see figures 5 and 6).

Indigent defense, which showed the greatest increase in expenditure, also showed the greatest proportionate increase in full-time equivalent employees, from 2,102 employees in October 1973 to 2,625 employees in October 1974, a 24.9 percent increase. The other sectors experienced considerably more modest increases in employment, ranging from a 4.2 percent increase in judicial employees to a 12.3 percent increase in legal services and prosecution employees.

The October 1974 payroll of \$252 million was divided among the six criminal justice sectors roughly in proportion to the number of employees in the sector (see table G). For those sectors characterized by higher-paid employees (see table H), namely judicial, legal services, and indigent defense, the sector's share of payroll, of course, exceeded the sector's share of employees

Table G. Percent distribution of State full-time equivalent employment and payroll, October 1974, by activity

Local governments: counties and municipalities
(tables 6-10 and 13-22)

Total expenditure for criminal justice by local governments in fiscal year 1974 was \$9,130 million, a \$1,036 million or 12.8 percent increase from FY 1973, slightly higher than the 9.8 percent increase from 1972 to 1973. As in past years, approximately two-thirds of this expenditure occurred in the police protection sector (\$5,984 million or 65.6 percent). The judicial sector and the corrections sector each accounted for slightly more than 13 percent of expenditure, while the other three sectors accounted for relatively smaller percents (see figure 7). Direct criminal justice expenditure by local governments (i.e., all expenditure except inter-governmental payments) amounted to \$9,092 million in fiscal year 1974, a 12.9 percent increase from FY 1973. Direct expenditure of local governments was distributed among the six criminal justice sectors in virtually the same proportions as total expenditure.

Total local full-time equivalent employment was also distributed among the six sectors roughly in the same proportions as total expenditures (see figures 7 and 8). Two slight exceptions to this generalization are the indigent defense sector, where payments are frequently made to private court-appointed counsel who are not direct employees of the government, and the "other criminal justice" sector, where expenditures are frequently grant funds used to assist with operations of private agencies connected with criminal justice activities or used for construction of criminal justice facilities. In both instances, large expenditures may be made without the governments involved directly employing the workers.

Analyzing local criminal justice expenditure in total, however, tends to obscure important differences between the county level of government and the municipal level. Municipal governments (cities and townships)

outspent county governments on criminal justice by almost 2 to 1 overall (\$5,867 million to \$3,226 million), but the difference can be attributed almost exclusively to the police sector, where the municipal governments outspent the county governments by better than a 4 to 1 margin. Municipal governments spent \$4,885 million (or 83.3 percent of all their criminal justice expenditure) on police protection, more than county governments spent on all six sectors altogether. On a sector-by-sector basis, however, county governments spent substantially more than municipal governments for judicial activities, indigent defense, and corrections. No one sector dominates county criminal justice expenditure as police protection does municipal expenditure (see figures 9 and 11).

County criminal justice expenditure increased for all activities over FY 1973. Proportionately the greatest increase occurred in the "other criminal justice" sector, \$16.9 million or 63.0 percent. As last year, counties received and expended increasing amounts of grant funds. Additionally, for the past few years, expenditure in the "other criminal justice" sector have reflected significant capital outlay for the construction of multi-functional criminal justice buildings, e.g., a police-jail facility or a police-court facility. In FY 1974, \$19.4 million of the \$43.8 million spent in the "other criminal justice" sector, by counties, was for construction of such buildings. Expenditure increases were smaller for the other five sectors, ranging from 11.2 percent in the police protection sector to 28.8 percent in the indigent defense sector.

At the municipal level, also, the largest proportionate increase year to year was in the "other criminal justice" sector, 56.1 percent. Construction played a less significant role than at the county level. Only \$4.4 million of the total \$55.1 million spent for "other criminal justice" at the municipal level was for construction purposes. The increase generally reflected new programs and grants being administered by the cities. Municipal expenditure for the other sectors ranged from a 10.6 percent increase in police protection to a 24.6 percent increase in the indigent defense area. However, indigent defense represented only a small portion of municipal criminal justice expenditure, 0.4 percent, and the increase reflected expansion of programs in a limited number of large cities having significant judicial responsibilities (primarily consolidated city-county governments) rather than a general trend.

At both the county and municipal levels, employment and payrolls were distributed throughout the various sectors in nearly the same percentages as expenditure (see tables I and J). There were 239,171 full-time equivalent county criminal justice employees in October 1974 drawing a monthly payroll of \$216 million. As at the State level, in those sectors with a concentration of higher-paid employees, such as legal services and indigent defense (see table K), the percentage of total

payroll exceeded the percentage of total employees. There were 425,691 full-time equivalent municipal criminal justice employees in October 1974 with a monthly payroll of \$444 million. At the municipal level, the "other criminal justice" employees received the highest average monthly salaries (see table L) but their numbers were limited—only 1,190 employees. Among the sectors with a significant number of employees, the legal services and police sectors paid the highest average salaries.

Overall, the number of county full-time equivalent employees in October 1974 increased by 19,277, or 8.8 percent over October 1973; the judicial sector added the

greatest number of employees, 6,913 (an 11.2 percent increase) and the "other criminal justice" sector showed the greatest proportionate increase, 24.9 percent (124 employees). The number of municipal full-time equivalent employees increased by 4.9 percent compared with October 1973. The police sector added the greatest number of employees, 15,956 (a 4.6 percent increase) and the legal services sector showed the greatest proportionate increase, 8.5 percent (974 employees) among the sectors with significant numbers of employees. Indigent defense employees increased by 23.4 percent, but their numbers were very small—145 employees in October 1973, 179 employees in October 1974.

FIGURE 10. County full-time equivalent employment, October 1974
239,171

Separate data are presented in tables 18-22 for the 312 county governments with a 1970 population of 100,000 or more and in tables 13-17 for the 384 city governments with a 1970 population of 50,000 or more. Only 57.1 percent of the total United States population lives in the 312 largest counties, but these counties accounted for more than three-fourths (\$2,494 million) of the total direct expenditure for criminal justice activities at the county level. These counties employed 71.9 percent of all county level full-time equivalent criminal justice employees (171,965), and paid these employees 78.9 percent of the total county criminal justice payroll for October 1974. These figures, of course, reflect the greater need for criminal justice services and the larger salaries in densely populated areas.

third (35.6 percent) of the total United States population, but accounted for more than two-thirds of the municipal criminal justice expenditure, 68.6 percent. These same 384 cities employed 64.2 percent of all municipal full-time equivalent employees working in the criminal justice system and paid them 69.7 percent of the total municipal criminal justice payroll. Again, as with the large counties, the proportion of payroll exceeded the proportion of employees reflecting the generally larger salaries in the large metropolitan areas.

The distribution of expenditure and employment throughout the various criminal justice sectors in the 312 counties and the 384 cities reflects the distribution for all county governments and for all city governments respectively.

Table K. Average monthly salaries for county full-time equivalent employees in the criminal justice system, by activity, October 1974

Activity	October 1974
Police protection.....	\$ 944
Judicial.....	821
Legal services.....	1,051
Indigent defense.....	1,218
Corrections.....	881
Other criminal justice.....	887

It should be noted that in the individual city tables, certain cities are either independent, being wholly outside any county area, or operate wholly or in part as a consolidated city-county. In general, these cities are more similar to large counties than to other large cities in the scope of their criminal justice responsibilities; that is, in addition to police protection which is the primary criminal justice function in most cities, these cities also operate extensive court and corrections systems and may have significant indigent defense expenditures. The independent cities are: Washington, D.C.; Baltimore, Md.; St. Louis, Mo.; and all displayed cities in Virginia. The consolidated city-county governments are: San Francisco, Calif.; Denver, Colo.; Jacksonville, Fla.; Columbus, Ga.; Honolulu, Hawaii; Indianapolis, Ind.; Baton Rouge, La.; New Orleans, La.; Boston, Mass.; New York City, N.Y.; Philadelphia, Pa.; and Nashville-Davidson, Tenn.

Local governments in the 17 largest SMSA's (tables 11 and 12)

Data are presented on criminal justice expenditure and employment of all governments in the 17 largest standard metropolitan statistical areas (SMSA's) and within the individual SMSA for each of its component county areas. The county area data include aggregate figures for the county government and for all municipalities within that county. In a few instances, data for individual cities are listed separately in the SMSA tables because the city is either the only government within a county area, e.g., consolidated city-county governments such as Philadelphia or New York City, or the city is organizationally independent and within no recognized county boundary, e.g., St. Louis, Mo. or Washington, D.C. The State Economic Area (SEA) rather than the SMSA is shown for Boston because the SMSA's in New England are made up of the towns rather than the counties, a deviation from the general SMSA concept. The SEA, on the other hand, is made up of counties.

Direct criminal justice expenditure by the 384 large city governments amounted to \$4,026 million, and full-time equivalent criminal justice employees numbered 273,401. These 384 cities have slightly over one-

FIGURE 11. Municipal direct expenditure for criminal justice, fiscal year 1974

¹ Because of rounding, detail may not add precisely to total shown.

FIGURE 12. Municipal full-time equivalent employment, October 1974

As seen in table I, the 17 largest SMSA's expended \$4,454 million for criminal justice activities in FY 1974. Almost half (49.0 percent) of the Nation's total local criminal justice direct expenditure was made by governments in these areas where 30.3 percent of the United States population resides. On a sector-by-sector basis, governments in these SMSA's accounted for 49.0 percent of all local government direct expenditure for police protection; 48.1 percent of local expenditure for judicial activities; 44.1 percent of local expenditure for legal services and prosecution activities; 50.1 percent of local expenditure for indigent defense activities; 51.3 percent of all local expenditure for corrections activities; and 53.7 percent of local expenditure for "other criminal justice" activities (see table M).

As in previous editions of this annual series, several tables show comparisons of criminal justice expenditure and full-time equivalent employment with the total general expenditure and full-time equivalent employment for all functions of the particular government or level of government. Prior to the FY 1971 report, these figures, total expenditure and full-time equivalent employment, included data for independent school districts and special districts.

The local governments in the 17 largest SMSA's employed 286,897 full-time equivalent personnel in criminal justice, or 43.2 percent of the total number of local government employees working in criminal justice. The percentage of all local government employees working in each criminal justice sector in these SMSA's was: police protection, 43.3 percent; judicial, 41.2 percent; legal services and prosecution, 40.2 percent; indigent defense, 42.5 percent; corrections, 45.7 percent; and "other criminal justice," 58.6 percent.

The "variable pass-through" provisions of the Omnibus Crime Control Act of 1970, however, required that the concept of "local" government be confined to units of general local government only, i.e., counties, cities, and townships, in determining the ratio of State-to-local government criminal justice expenditure. Beginning with the FY 1971 report, therefore, the same concept was applied consistently throughout the publication to reflect the intent of the law, and the total general expenditure and total full-time equivalent employment figures shown for the "local" level of government in these comparisons include data for units of general local government only and do not include data for independent school districts or special districts. This change may result in significant differences from the percentages shown in years prior to FY 1971 in those States where education is largely the responsibility of independent school districts, or where there are large special districts. Criminal justice expenditure and employment data in this series, however, have always been for units of general local government only, i.e., no data on the criminal justice activities of independent school districts or special districts have ever been included. (As in previous reports, however, appendix 1 provides supplementary data for those independent school districts and special districts having significant special police expenditure and employment.)

SURVEY METHODOLOGY—SOURCES AND LIMITATIONS OF THE DATA

General

Survey coverage and collection methods are described in detail later in the text, and the definitions applied in the collection of data are presented in appendix 2.

Table M. Total criminal justice direct expenditure of all local governments and local governments in the 17 largest SMSA's, fiscal year 1974

¹ Percentages based on unrounded figures shown in tables 7 and 11.

Survey coverage

The survey through which basic figures for this report were collected covered the Federal government, all State governments, and a representative sample of local governments within each State. Data were collected for all county governments (regardless of size), for all municipalities (including townships in the New England and Middle Atlantic States) having a 1970 population of 10,000 or more, and for a sample of the remaining cities and townships with less than 10,000 population, selected according to the relative size of their annual expenditures as reported in the 1967 Census of Governments. The survey panel therefore included the Federal government, the 50 State governments, and 9,036 local governments (the 3,044 county governments, and 5,992 municipalities, including 1,706 townships).

The survey period

Federal Government data are shown for FY 1974, which ended June 30, 1974.

The State expenditure data presented in this report cover the fiscal year ending June 30, 1974, for all States except three whose fiscal years end as follows: New York, March 31, 1974; Texas, August 31, 1974; and Alabama, September 30, 1974. However, there are some State agencies that operate on a different fiscal year basis from the rest of the State government. In such instances, figures shown are for the agency's fiscal year that ended within the State's regular fiscal year.

For local governments, the 1974 fiscal years reported are those that closed between July 1, 1973, and June 30, 1974. Most municipalities and counties ended their fiscal years on December 31, 1973, or June 30, 1974.

Employment data shown for Federal, State, and local governments are for October 1974.

Data collection

The survey was accomplished using two methods of data collection: field compilation and mail canvass. Trained field representatives compiled expenditure and employment data from the governments' own records for the 50 States, 312 largest counties, 384 largest cities, and selected smaller units. The compilation work was done between July 1974 and June 1975 in accordance with the definitions presented in appendix 2. All other units in the sample were canvassed by mail for expenditure and employment data, over a 5-month period beginning in January 1975 and ending in May 1975. Response for field-compiled units was 100 percent. The response from mail canvass units was 92.4 percent. The mail canvass questionnaires are included as appendix 3.

The field survey efforts and mail canvass were supplemented by reference to a variety of published government documents such as budgets, financial statements, and audit reports. In some cases, such sources were the basis for breakdowns of totals into more detailed employment and expenditure figures.

The expenditure and employment data for the Federal Government were collected through a special mail survey, with telephone followup, of Federal criminal justice agencies, in accordance with definitions used for State and local governments (see appendix 2). For reports prior to 1971, expenditure data were derived from the Budget of the United States Government, and employment figures were obtained from the U.S. Civil Service Commission.

Data limitations

The sample selected to develop local government figures is one of all possible samples of the same size that could have been chosen using the same sampling design. Estimates derived from these different samples would differ from each other and also from a complete census using the same data collection procedures. This variation among all possible estimates is sampling error.

Since all State and county governments were included in the survey, State and county figures are not subject to sampling error. The local government sample was designed to produce an estimate for each State of the ratio of State-to-local government criminal justice expenditure with a sampling error of less than one-half of 1 percent at the 95 percent confidence level.

The relative sampling error of the State-by-State estimates of local government criminal justice expenditure has also been calculated at the 95 percent confidence level. All States had a relative error of less than 1 percent except Wyoming (with 2.5 percent). The implication of this calculation is that there is a 19 out of 20 probability that the estimated State-by-State criminal justice total for the local level of government (except in Wyoming) is within 1 percent of the total that would result from a complete enumeration of local governments.

The estimated data are also subject to the inaccuracies in classification, response, and processing that would occur if a complete census had been conducted under the same conditions as the sample. Every effort was made to keep such errors to a minimum through care in examining, editing, and tabulating the data submitted by government officials. Followup procedures were used extensively to clarify inadequate and inconsistent survey returns.

Readers should be generally cautious in comparing governments, since other differences in functional responsibilities from State to State and government to government can also affect the comparability of expenditure and employment data. For example, some State governments directly administer certain activities that elsewhere are undertaken by local governments, with or without fiscal aid, and the same variation in the division of responsibilities exists for counties and cities.

The available source documents did not consistently provide full itemization of expenditure or employment for the sector subcategories presented in this report. As a result, sector breakdowns may be incomplete for particular governmental units.

Because of rounding, the detail data in some tables may not add precisely to the totals shown.

Changes in survey methodology

As discussed earlier, this series of annual reports dates back to FY 1967. The survey originated in the Bureau of the Census as a special in-house study in which police protection, judicial, and corrections data were extracted for selected large governments from data compiled in the Bureau's regular annual finance and employment sample surveys. In the FY 1969 survey, prosecution and indigent defense were added to the original three criminal justice categories, coverage was extended to the entire regular annual survey sample of counties and municipalities, and a mail canvass questionnaire designed specifically to elicit criminal justice data was used for all but the largest governments, which were canvassed by field agents. These changes must be taken into account in making year-to-year comparisons from FY 1967 through FY 1970.

In the FY 1970 report, individual unit data were published for 128 large counties (as compared to 55 counties in earlier reports) and for 158 large cities (compared to 48 cities in earlier reports). The Federal expenditure data presented in all reports through FY 1970 were extracted from the Budget of the United States Government, and the employment data was provided by the U.S. Civil Service Commission.

For the FY 1971 survey, a new and enlarged sample of local governments was drawn specifically for the criminal justice expenditure and employment survey, to produce more reliable estimates for use by LEAA in the allocation of block grant funds between State

and local governments. The data presented in reports since FY 1971 are therefore essentially comparable, because they are derived from the same sample using the same methods of data collection and processing. The only significant variations occurred in classification of certain expenditure items discussed in detail in the following section. In each year since 1971, as noted earlier, all States had a relative error for local criminal justice expenditure estimates of less than 1 percent except Wyoming (with 2.5 percent).

Since FY 1971, Federal data have been collected by a special mail canvass.

Changes in classification

In the FY 1971 report, police protection expenditure included amounts expended for traffic safety and related traffic engineering. Beginning with the FY 1972 report, these expenditures were excluded from the police protection figures. Also, data for special police forces administered by general purpose governments (such as airport police, park police, housing police, etc.) were included in the police protection figures if the force employed 10 or more full-time sworn officers with general arrest powers. Beginning with the FY 1972 report, data for these forces were included regardless of size.

In the FY 1971 report, corrections expenditure figures covered a number of drug and alcohol abuse facilities and programs administered by assorted agencies, departments, and private organizations receiving public funding. Beginning with the FY 1972 report, these institutions and programs were included only if administered by a corrections agency of the criminal justice system.

In many States, statutes either require or permit local governments to supplement the salary of State-paid judges of major trial courts. In the FY 1971 report, an attempt was made to count these judges and their total payroll only at the State level. However, this effort was not uniformly successful. Therefore, beginning with the FY 1972 report, judges actually receiving a check from both the State and local governments were counted as part-time employees at both levels.

ACKNOWLEDGMENT

The Bureau of the Census is indebted to the many Federal, State, and local government officials who provided the information and gave other assistance for the preparation of this report.

Section I. VARIABLE PASS-THROUGH DATA

The data in this table were developed to comply with the Omnibus Crime Control and Safe Streets Act of 1968 as amended, which requires that the block grants made by the Law Enforcement Assistance Administration to each State be allocated between the State and local governments according to the ratio of State-to-local law enforcement expenditure from their own revenue sources.

The concept of "expenditure from own sources" specified in the law and used in the data collection means that the expenditure figures from which the State-to-local ratio was developed do not include amounts expended from revenue received from other governments. For example, State or local government expenditure from sales or property tax revenue are included but not amounts expended from intergovernmental revenue, such as Federal grant monies. (It should be noted that this is the only table in this publication based on this concept. All other expenditure tables reflect expenditure from all sources.)

Specifically for local government, any expenditure from revenue received from another local government, or received directly from the Federal Government or from the State government must be excluded. Likewise for State governments, expenditure from revenue received from local governments or from the Federal Government must be excluded.

The following items were deducted from total criminal justice expenditure of local governments to arrive at local government expenditure from own revenue sources: Revenue received directly from the Federal Government for criminal justice purposes, State payments to local governments for criminal justice purposes, and payments from local government(s) to other local government(s) for criminal justice purposes. The same procedure was followed to arrive at State government expenditure from own revenue sources. Criminal justice revenue received directly from the Federal Government and local criminal justice payments to the State government were deducted from the total State expenditure for criminal justice. This procedure assumes that all intergovernmental payments received by a government will be expended during the same fiscal year they were received. While this may not be the case in a particular year, any discrepancy will cancel out over time.

* Represents zero or rounds to zero. X Not applicable. ¹All governments data for total criminal justice system and direct expenditure and other criminal justice and direct expenditure for fiscal years 1971, 1972, and 1973 are revised as follows: 1971--\$10,513,854 and \$79,708; 1972--\$11,724,840 and \$160,846; and 1973--\$13,050,545 and \$236,187. Federal Government data for total criminal justice system and direct expenditure and other criminal justice and direct expenditure for fiscal years 1971, 1972, and 1973 are revised as follows: 1971--\$1,448,729/1,211,628 and \$239,094/13,364; 1972--\$1,878,803/1,495,501 and \$400,857/33,673; and 1973--\$2,260,891/1,694,705 and \$649,633/102,708. Dollar amounts are shown in thousands. Percent distributions for direct expenditure should be revised accordingly. ²For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

¹ Represents zero or rounds to zero.
² Estimated criminal justice activities only.
³ Total expenditures allocated to police protection, judicial, corrections, and other criminal justice based on information supplied by the U.S. Marshals Service.
⁴ Total expenditures for all three lines combined are comparable to total for Office of the Deputy Attorney General in previous reports of this series since 1970-71.
⁵ Effective January 4, 1975 the Legal Services Program transferred to newly created Community Services Administration, successor agency to OED.
 Law Enforcement Assistance Administration data presented in the fifth (FY 1971), sixth (FY 1972), and seventh (FY 1973) reports in this series for total expenditure, total direct expenditure and direct current expenditure are revised as follows: 1971--\$233,332, \$7,602, and \$7,554; 1972--\$379,748, \$12,886, and \$12,839; 1973--\$824,006, \$77,429, and \$77,375. Dollar amounts are shown in thousands. Data for Other criminal justice, total and Total criminal justice system should be revised accordingly.

¹ Represents zero or rounds to zero.

² Less than half the unit of measurement shown.

³ The relation of criminal justice total expenditure to total general expenditure is based on data for general purpose governments only and does not include data for independent school districts or special districts.

⁴ For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

- Represents zero or rounds to zero.
 1 Less than half the unit of measurement shown.
 2 The relation of criminal justice full-time equivalent employees to total full-time equivalent employees is based on data for general purpose governments only and does not include data for locally operated utility systems or for independent school districts and special districts.

- Represents zero or rounds to zero.

2 Less than half the unit of measurement shown.

The total direct expenditure data, shown in the first column, are for fiscal year 1973; therefore, the percent of total direct expenditure accounted for by total criminal justice direct expenditure, shown in the third column, is overstated.

- Represents zero or rounds to zero.

2 Less than half the unit of measurement shown.

3 Payroll for city-operated utilities is excluded.

4 The total October payroll data for all general governmental functions, shown in the first column, is for October 1973; therefore, the percent of total payroll used for criminal justice functions, shown in the third column, is overstated.

- Represents zero or rounds to zero.

Z Less than half the unit of measurement shown.

The total general expenditure data shown in the first column, are for fiscal year 1973; therefore, the percent of total general expenditure accounted for by total criminal justice expenditure, shown in the third column, is overstated.

- Represents zero or rounds to zero.

Z Less than half the unit of measurement shown.

The total direct expenditure data, shown in the first column, are for fiscal year 1973; therefore, the percent of total direct expenditure accounted for by total criminal justice direct expenditure, shown in the third column, is overstated.

¹ Represents zero or rounds to zero.
* Not applicable.
² For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then rounded again when the recipient government(s) ultimately expend(s) that amount.

- Represents zero or rounds to zero.

X Not applicable.

¹For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

- Represents zero or rounds to zero.

X Not applicable.

¹ For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

^a Represents zero or rounds to zero.
^b Not applicable.
 For each state, and the United States summary, the expenditure figures shown on the "local, total" line and the combined state-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for the government is calculated and then counted again when the recipient government(s) ultimately expend(s) that amount.

- Represents zero or rounds to zero.

X Not applicable.

¹For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

¹ Represents zero or rounds to zero.
² Less than half the unit of measurement shown.
³ Because of rounding, the detail figures may not add precisely to the totals shown.
⁴ As of January 1, 1974, the governments of Fayette County, Kentucky and Lexington city, Kentucky merged to form the Lexington-Fayette Urban County Government. All employees of the joint government are now shown as employees of Lexington city, Kentucky in the city tables presented elsewhere in this report.

X Not applicable.

¹For each State, and the United States summary, the expenditure figures shown on the "Local, total" line and the combined State-local total line (the data shown opposite the names of the individual States) exclude duplicative intergovernmental expenditure amounts. This was done to avoid the artificial inflation which would result if an intergovernmental expenditure amount for one government is tabulated and then counted again when the recipient government(s) ultimately expend(s) that amount.

¹ Represents zero or rounds to zero.

² Where the name of the unit of government does not reflect the city where the unit's administrative headquarters are located, this information appears in parentheses after the unit name.

³ Unit of government does not directly employ police personnel. Police services are provided by contract with another government or with a private security firm.

APPENDIX 2: DEFINITIONS OF TERMS

Following is a glossary of terms, concepts, and categories used in this report and comments concerning their limitations.

The definitions are those applied in the field compilation of data for the 50 States, 312 largest counties, and 384 largest cities. These definitions were necessarily summarized for inclusion in the survey questionnaires (see appendix 3) sent to governments in the mail portion of the survey.

Government expenditure

Expenditure is all amounts of money paid out (net of any correcting transactions) other than for retirement of debt, investment in securities, extensions of loans, or agency transactions. It includes only external cash payments and excludes any intragovernmental transfers and noncash transactions, such as the provision of meals or housing of employees. It also includes any payments financed from borrowing, fund balances, intergovernmental revenue, and other current revenue. In several instances, two or more governments share the expense of maintaining a court or other criminal justice agency. In these cases, the allocable direct expenditure amount is reported for each government in the appropriate category. When a government pays pensions directly to retired employees from appropriated funds, such payments are included as expenditure of the government concerned. However, State and local government contributions to retirement systems and various other employee benefits are not included in expenditure data, since the majority of governments make lump-sum contributions to plans covering all government employees and cannot report for criminal justice employees separately. Neither in government's basic accounting records (from which criminal justice expenditure figures are drawn) nor in the records of their general-coverage employee benefit systems is there usually any breakdown of amounts contributed in terms of the various agencies or functions involved. Nor has an adequate procedure for calculating the proportion of such contributions allocable to criminal justice employees been developed because of the wide variation in the coverage of various plans, employee status requirements, benefit rates, etc.

For those governments whose records reflect contributions of criminal justice employees separately, separate data were obtained. However, these data are subject to the same variation referred to above, and

neither the amount nor the quality of the data reported would permit any attempt to estimate total contributions for all similar governments in a given State. Given the problems involved, no estimation procedure seems feasible. Such data as were reported separately were therefore excluded from total criminal justice expenditures to provide a consistent data base for administering the variable pass-through requirement.

Expenditure is divided into two major categories by character:

1. Direct expenditure is all expenditure except that classed as intergovernmental and is further divided into two principal object categories:

a. Current operation, which includes salaries, wages, fees, and commissions, purchase of supplies, materials, and contractual services.

b. Capital outlay, which includes expenditure for the three subcategories below:

Construction: Production of fixed works and structures, and additions, replacements and major alterations thereto undertaken either on a contract basis by private contractors or through force account construction by the employees of the government. Included are the planning and designing of specific projects, the grading, landscaping, and other site improvement, and the provision of equipment and facilities that are integral parts of the structure.

Equipment: Purchase and installation of apparatus, furnishings, office equipment, motor vehicles and the like having an expected life of more than 5 years. This includes both additional equipment and replacements. Rentals for equipment, including rental payments that may be credited on the purchase price if purchase options are exercised, are classified as current operation expenditure. Equipment and facilities that are integral parts of constructed or purchased structures are classified respectively under construction or purchase of land and existing structures.

Purchase of land and existing structures: Purchase of these assets as such, purchase of rights-of-way, and title search and similar activities associated with purchase transactions.

The other object categories—interest on general debt, securities and equities, and insurance benefits—are not applied to special functions.

2. Intergovernmental expenditure is payments from one government to another, including grants-in-aid, shared revenues, payments in lieu of taxes, and payments for services performed by one government for another on a reimbursable or cost-sharing basis (for example, payments by one government to another for boarding prisoners).

Total expenditure is direct and intergovernmental expenditure of a government or level of government for criminal justice activities.

Total general expenditure is all expenditure of a government or level of government for all government functions, including criminal justice activities, but excluding utility system expenditure, liquor store expenditure, and insurance trust expenditure. Total general expenditure shown for the local level of government includes expenditure only of general purpose governments and excludes expenditure of special districts and school districts.

Government employment

Employee includes all persons paid for personal services performed, including all paid officials and persons in paid leave status, and excludes unpaid officials, persons on unpaid leave, pensioners and contractors. Under this definition are two classes:

1. Full-time employees, who are all persons employed during the pay period including October 15, 1974, on a full-time basis, including all full-time temporary or seasonal workers employed during this pay period, as well as persons having permanent status.

2. Part-time employees, who are persons employed during the pay period including October 15, 1974, on a basis other than full-time, and persons paid by more than one government.

Derived from these two classes is:

Full-time equivalent employees, which means the total number of employees, discounted by applying average full-time earning rates. This is calculated by dividing the total payroll (full-time plus part-time) by the full-time payroll and multiplying this by the number of full-time employees.

Payroll is the gross payroll before deductions and includes salaries, wages, fees and commissions paid to employees as defined above for the month of October 1974.

Governmental functions

Police protection is the function of enforcing the law, preserving order, and apprehending those who violate the law, whether these activities are performed by a police department, a sheriff's department, or a special police force maintained by an agency whose prime responsibility is outside the criminal justice system, but which has a police force to perform these activities in its specialized area (geographic or functional).

Included in this activity are regular police services, the maintenance of buildings used for police purposes, and such specialized police forces (including public and private contract forces) as airport police, free and toll highway police, free and toll bridge and tunnel police, housing police, maritime police, park police, transit and other utility system police, college and university campus police, and alcoholic beverage control agents. Coroners and medical examiners are also included. Excluded are vehicular inspection and licensing, traffic safety and engineering, fish and game wardens, fire marshals, and the like.

The special police forces included in the data are only those which are part of general purpose governments. Security forces and building guards without the power to make a police arrest were excluded. Those special police forces that are part of independent school districts or special districts are not included in the data, inasmuch as these districts are not general purpose governments. However, data for selected larger special police forces of these districts are displayed in appendix 1, tables A and B.

In many States, sheriffs' departments are multifunctional agencies providing police protection, judicial, and/or correctional services. In past years, the lack of needed information has prevented the consistent proration of expenditure or employment of sheriffs' departments among the appropriate functions. This year's report reflects a more accurate proration made possible by a special survey of sheriffs' departments conducted in the summer of 1973. This one-time survey asked the sheriffs themselves to prorate their employees and expenditures among the functions performed in their individual departments. The proration factors developed in this special survey were then applied in the collection of data for the 1973-74 annual survey.

Short-term custody and detention have traditionally been considered part of the police protection function, and in editions prior to the 1969-70 report, were treated as such. However, beginning with the 1969-70 report, the concept was modified on the basis of information obtained from the 1970 National Jail Census. Data for institutions with authority to hold prisoners 48 hours or more are included in the "corrections" sector. Data for lockups or "tanks" holding prisoners less than 48 hours are included in the "police protection" sector.

Judicial activities encompass all courts and activities associated with courts such as law libraries, grand juries, petit juries, and the like. Since the names of courts with similar functions and legal jurisdiction vary from State to State and even within States, data have been categorized by types of court rather than by court name.

1. Appellate courts include courts of last resort and intermediate appellate courts. These are courts having jurisdiction of appeal and review, with original jurisdiction conferred only in special cases.

a. Court of last resort is the court of final appeal within the judicial structure of each State. It is called the "Court of Appeals" in the District of Columbia, Kentucky, Maryland, and New York; the "Supreme Court of Appeals" in West Virginia; the "Supreme Judicial Court" in Maine and Massachusetts. In Texas and Oklahoma two courts of last resort are authorized—the "Court of Criminal Appeals" for criminal cases and a "Supreme Court" for civil cases. In every other State the court of last resort is titled the "Supreme Court."

b. Intermediate appellate courts are those that are limited in their appellate jurisdiction by State law or at the discretion of the court of last resort. In 15 of the 24 States with a court of this type operating in fiscal year 1973-74 the name "court of appeals" is used. These States are:

Arizona	Missouri
California	New Mexico
Colorado	North Carolina
Florida	Ohio
Georgia	Oklahoma
Indiana	Oregon
Louisiana	Washington
Michigan	

In Illinois the title is "Appellate Court"; in Maryland, "Court of Special Appeals"; in Massachusetts, "Appeals Court"; in New Jersey, "Appellate Division of the Superior Court"; in New York¹, "Appellate Division of the Supreme Court"; and in Texas, "Court of Civil Appeals." In Alabama the civil and criminal cases are heard on appeal by separate courts—a "Court of Civil Appeals" and a "Court of Criminal Appeals." In Tennessee the "Court of Appeals" hears only civil appeals; a separate "Court of Criminal Appeals" reviews criminal cases before review by the court of last resort.

¹There are also three appellate terms of the Supreme Court that have jurisdiction in specific cases that would otherwise be heard by the appellate division.

In Pennsylvania the "Commonwealth Court" reviews all cases brought by or against the State government or its agencies; the "Superior Court" reviews all other appeals except those within the exclusive jurisdiction of the court of last resort.

2. Major trial courts are trial courts of general jurisdiction having unlimited original jurisdiction in civil and/or criminal cases, the names of which vary considerably. The list below shows the title of the courts of general jurisdiction in each State. Several States are listed more than once because local situations led to the development of separate courts, either to hear cases involving different types of pleadings or to hear cases in particular local jurisdictions.

In many States, statutes either require or permit local governments to supplement the salary of State-paid judges of major trial courts. These judges were counted as part-time employees at both the State and local levels when actually receiving a check from both governments.

Circuit courts

Alabama	Mississippi
Arkansas	Missouri
Florida	Oregon
Hawaii	South Carolina
Illinois	South Dakota
Indiana	Tennessee ²
Kentucky	Virginia
Maryland	West Virginia ²
Michigan ²	Wisconsin

District courts

Colorado	Nevada
Idaho	New Mexico
Iowa	North Dakota
Kansas	Oklahoma
Louisiana	Texas
Minnesota	Utah
Montana	Wyoming
Nebraska	

Superior courts

Alaska	Indiana ²
Arizona	Maine
California	Massachusetts
Connecticut	New Hampshire
Delaware	New Jersey
District of Columbia	North Carolina
Georgia	Rhode Island
	Washington

²In these States, the above-named courts are supplemented in some counties and cities by major trial courts with varying names.

Chancery courts

Arkansas	Mississippi
Delaware	Tennessee

County courts

New Jersey	Vermont
New York	Wisconsin

Common pleas courts

Missouri
Ohio
Pennsylvania

Supreme court

New York

3. Courts of limited jurisdiction are courts whose legal jurisdiction covers only a particular class of cases or cases where the amount in controversy is below a prescribed sum or is subject to specific exceptions. These courts are tabulated under three subcategories: probate, juvenile, and other. Juvenile court and probate court data are reported in separate subcategories when such jurisdiction is exercised by an independent court having only juvenile or probate jurisdiction.

a. Probate courts are also called orphans courts, surrogate's courts, or courts of ordinary. The subject jurisdiction varies from place to place, but generally includes estate settlement, probate and contest of wills, adoption, commitment of the insane, administration of the affairs of orphans, mental defectives and incompetents, guardianship of minors, apprenticeship, receivership, change of name proceedings, and the administration of trusts. Data were tabulated separately only for independent probate courts. Where probate matters are part of the jurisdiction of another court, either generally or in a separate division or branch, the data are not tabulated separately but are included with the court exercising jurisdiction.

b. Juvenile courts are those that deal primarily with delinquent and neglected children regardless of the name of the court. In various places such courts are called juvenile courts, family courts, juvenile and domestic relations courts, domestic relations courts, or other similar names. The jurisdiction of these courts can include crimes committed by persons under legal age, juvenile status offenses, offenses against children, probation of minor delinquents, adoption, custody, or disposition of minor and mentally incompetent children, child

neglect or abandonment; child and wife support; and paternity. Data were tabulated separately only for independent juvenile courts. Where juvenile cases are handled by another court, either generally or in a separate division or branch, the data are not tabulated separately but are included with the court exercising jurisdiction.

c. Other courts includes various other State and local courts with limited jurisdiction such as justices of the peace, district magistrates, justice courts, county courts of limited jurisdiction, municipal courts, city courts, etc. Also included in this category are data on specialized courts such as tax courts, courts of claims, and courts having jurisdiction over more than one type of case (e.g., a court that handles both juvenile and probate cases).

4. Miscellaneous judicial includes data on judicial activities that could not be reported under any of the above court categories, such as judicial councils and conferences, court administration offices (where identifiable), law libraries, jury commissions, and grand juries.

Legal services and prosecution includes the civil and criminal justice activities of the attorneys general, district attorneys, State's attorneys, and their variously named equivalents; corporation counsels, solicitors, and legal department with various names. It includes providing legal advice to the chief executives and subordinate departmental officers, representation of the government in lawsuits, and the prosecution of accused violators of criminal law. These activities are included whether performed by one office or several, because in some jurisdictions a single officer provides all legal services, whereas in others a prosecutor's office handles only criminal matters, and a separate attorney's office performs all civil legal services. The operations of various investigative agencies having full arrest powers and attached to offices of attorneys general, district attorneys, or their variously named equivalents are also included.

Indigent defense includes activities associated with the right of persons to have legal counsel and representation, office of the public defender, and other government programs that pay the fees of court-appointed counsel. These include court-paid fees to individually retained counsel, fees paid by the court to court-appointed counsel, government contributions to private legal aid societies and bar association-sponsored programs, and the activities of an established public defender office or program. Employment data are included only for public defender offices, because fee-paid counselors are not considered government employees, nor are counselors working for bar associations or legal aid societies.

Corrections is that function of government involving the confinement and rehabilitation of adults and juveniles convicted of offenses against the law and the confinement of persons suspected of a crime and awaiting adjudication. Data for institutions with authority to hold prisoners 48 hours or more are included in this sector. Data for lockups or "tanks" holding prisoners less than 48 hours are included in "Police Protection." Correction includes the operation of prisons, reformatorys, jails, houses of correction, and other institutions. It also includes institutions, facilities and programs exclusively for the confinement of the criminally insane or for the examination, evaluation, classification, and assignment of inmates and institutions and programs for the confinement, treatment, and rehabilitation of drug addicts and alcoholics if the institution or program is administered by a correction agency of the criminal justice system. Pardon boards and parole and probation agencies, including resettlement or halfway houses for those not in need of institutionalization, are included in the correction sector as a separate subcategory.

1. Correctional institutions are prisons, reformatorys, jails, houses of correction, penitentiaries, correctional farms, workhouses, reception centers, diagnostic centers, industrial schools, training schools, detention centers, and a variety of other types of institutions for the confinement and correction of convicted adults and juveniles and for the incarceration of those accused of a crime and awaiting adjudication. When an institution maintains a prison industry or agricultural program, data on the cost of production or the value of prison labor used by agencies of the same government, if identifiable, are excluded (and classed as expenditure for the function using the products or services). Expenditure for the manufacture, production, sale, and distribution of goods produced for sale or use outside the government are included under this heading.

a. Institutions for men includes identifiable expenditure and employment data for institutions exclusively for adult male offenders. This category also includes institutions for young adult offenders, described as "youthful offenders." (All such institutions presently known hold males only.)

b. Institutions for women includes identifiable expenditure and employment data for institutions exclusively for adult female offenders. Where there is no separate women's prison, women offenders are either maintained in a prison complex that also houses other offenders or are boarded in private facilities or institutions in another State. No attempt was made to prorate data on institutions housing more than one type of inmate, but where females are boarded in private institutions or in another

State, available expenditure data was tabulated. Employment data were not tabulated because the personnel were employees of another government.

New Hampshire boards its female offenders in the Massachusetts Correctional Institution (for Women). Montana operates a split system, housing some females at the Warm Springs State Hospital and contracting with Nebraska for the rest. Vermont also operates a split system, housing some females and contracting with Massachusetts for the rest. North Dakota and Wyoming house all of their female offenders in the Nebraska Reformatory for Women and Idaho contracts with the State of Oregon for boarding its female offenders in the Oregon Women's Correctional Center.

c. Institutions for juveniles are those institutions identified by the 1973 Juvenile Detention and Correction Facility Census as housing primarily juveniles. These institutions include those under the control of a juvenile court, a probation department, or a youth authority or other similarly designated administrative body, as well as independently administered institutions. Also included are government payments to private agencies for the detention or treatment of delinquent juveniles.

There is considerable variation from State to State in the legal definition of a juvenile, particularly in regard to the age at which a person is no longer considered a juvenile. Institutions for juveniles have been classified individually in accordance with the laws and age designations of their respective States. Institutions housing youths treated as adults by the courts or other authority were included in the institutions for men category.

d. Other and combined institutions are those institutions holding a combination of inmates. Where expenditure or employment data for physically separate institutions for juveniles, adult females, and adult males were not separable by institution or type of institution, the entire amounts were included under this category.

2. Correctional administration consists of data for the administration of the correctional system, including data on the central administrative office (for example, the department of corrections or a youth authority) and available data on the administration of individual correctional institutions. For some individual institutions, administration data were not segregable from data on the operation of the institution.

3. Probation, parole, and pardon includes data on probation agencies, boards of parole, boards of pardon, and their variously named equivalents. Although probation agencies frequently function under the administration of the major trial court, the data are presented here after having been deducted from the judicial data, because of the correctional nature of the probation function. If the probation, parole, and pardon activities, or any of them individually, were part of the correctional administrative office, data were deducted and shown separately here, and the balance was shown under the correctional administration category. The overlapping character of the probation, parole, and pardon activities prevented the separate presentation of these data.

4. Miscellaneous correction includes expenditure and employment data that could not be classified under one of the other subcategories.

Other criminal justice activities, shown in some tables, includes expenditure or employment data that are not elsewhere classified, that cut across more than one category, or that are not allocable to separate categories; e.g., expenditure on a general curriculum in educational institutions, the operation of State criminal justice agencies, crime commissions, etc. Such data are included in the totals, where they are not shown separately.

APPENDIX 3: SURVEY FORMS

Form CJ-6 Survey of Expenditure and Employment for Civil and Criminal Justice Activities of Local Governments

This form was mailed to the chief financial officer of the counties and municipalities surveyed.

Form CJ-6D Survey of Expenditure and Employment for Civil and Criminal Justice Activities of Local Governments (Fee-Supported Offices)

This form was mailed to the fee-supported offices of Sheriff and/or Clerk of Court in the States of Florida, Kentucky and Louisiana. Data for these fee-supported offices were incorporated in the appropriate criminal justice function data for the county where located.

Form CJ-23 Survey of Expenditure and Employment for Selected Special Police Forces

This form was mailed to special police forces serving colleges and universities, special districts, and independent school districts. Data for college and university forces were incorporated in the police protection data for the parent government. Data for special police forces serving independent school districts or special districts were not included in the regular police protection data, inasmuch as these districts are not general purpose governments. However, data for selected large police forces serving such districts are displayed in appendix 1, tables A and B.

Form CJ-25 Survey of Expenditure and Employment for Civil and Criminal Justice Activities of the Federal Government

This form was mailed to the chief financial or administrative officer of the individual Federal agencies, bureaus, and offices identified as part of the criminal justice system. A list of the units canvassed in the survey for this year is presented in tables 4 and 5.

Dear friends:

On behalf of the Law Enforcement Assistance Administration, U.S. Department of Justice, the Bureau of the Census annually collects public expenditure and employment data for various criminal justice activities. Since the fee-supported offices of Sheriff and Clerk of Court are included as part of the civil and criminal justice system, we will appreciate your cooperation in again providing information for three of these activities as they apply to your office: police protection, judicial, and corrections.

If your office has converted from a fee-supported to a county or State-supported office, please follow the instructions at the top of Page 2 of this questionnaire.

The data collected in this voluntary survey are utilized by the Law Enforcement Assistance Administration in implementing and administering the planning and action grant programs of the Omnibus Crime Control and Safe Streets Act of 1968 as amended. The data are published annually in a report entitled **Expenditure and Employment Data for the Criminal Justice System**.

Please complete and return the questionnaire in the pre-addressed envelope. If you have any problems in filling out this questionnaire, you may call collect for assistance on (301) 763-7825 or (301) 763-2843.

Sincerely,

Vincent P. Barabba

Enclosures

Please check here if you would like to receive a free copy of the current report **Expenditure and Employment Data for the Criminal Justice System**

INSTRUCTIONS

Before completing Parts I and II and Items A and B below, please complete the following question. Regardless of your answer to this question please complete the rest of the questionnaire.

Is your office a fee-supported office now? That is, is it financed and staffed in whole or in part by fees collected and retained?

- Yes - Answer a
 No - Answer b
 Never was a fee office

a. Will your office convert from a fee-supported to a county or State-supported office on or before June 30, 1975? Yes No

Enter date

b. When did your office convert from a fee-supported to a county or State-supported office?

Enter date

ACTIVITIES

Count a person only one time in the activity where he works the largest part of his time.

Part I - EMPLOYMENT AND PAYROLL

Enter employment and payroll for your office's one pay period which included October 15, 1974. Do NOT report ANNUAL payroll data.

Part II - EXPENDITURES

Enter annual expenditures for the activities listed below for your office's fiscal year which ended between July 1, 1973 and June 30, 1974. See instructions on cover of questionnaire.

ACTIVITIES	FULL-TIME EMPLOYEES		PART-TIME EMPLOYEES		CURRENT OPERATION	CAPITAL OUTLAY	INTERGOVERNMENTAL EXPENDITURE		EMPLOYER CONTRIBUTIONS FOR EMPLOYEE BENEFITS
	Number of employees (a)	Payroll amount (pay period which included October 15, 1974) (Omit cents) (b)	Number of employees (c)	Payroll amount (pay period which included October 15, 1974) (Omit cents) (d)	Exclude employer contributions to employee benefits; (Enter in col.(f)) (e)	Construction, equipment and land (f)	Payments to other local governments (g)	Payments to the State government (h)	Exclude employer contributions (j)
1. POLICE PROTECTION (Sheriffs only) - In addition to all regular police activities, include also coroners and medical examiners if paid by your office. Exclude jails holding adults or juveniles more than 48 hours and report under "Corrections." Exclude also school crossing guards.									
2. JUDICIAL (Sheriffs and Clerks of Court) - All civil and criminal courts and court-related activities (e.g., jury fees and law libraries). Exclude probation and parole and report under "Corrections." Exclude also fees to court-appointed counsel and prosecution.									
3. CORRECTIONS (Sheriffs only) - Jails, prisons, reformatories, detention homes and the like holding adults or juveniles for more than 48 hours. Also, probation and parole including halfway houses. Include alcohol and narcotic addiction programs only if administered by the correctional authority. Exclude institutions solely for dependent or neglected children.

DEFINITIONS

▶ Part I — SWORN POLICE OFFICERS

SPECIAL POLICE FORCE — A group of law enforcement officers other than the regular police which serves a special area or jurisdiction, e.g., campus police, park police, transit police, harbor police, airport police. Though a special police force usually cooperates fully with the regular local police force, it is administratively independent.

▶ Part II — EMPLOYMENT AND PAYROLL

A. EMPLOYEES — All persons in your special police force unit (officers and employees) paid for personal services performed, including all officials, salary workers and other persons in paid leave status in your unit.

Exclude unpaid officials, persons on unpaid leave, pensioners, contractors, and their employees and persons paid entirely by another government for services performed for your unit.

FULL-TIME EMPLOYEES (Part II, column a) — Persons employed during the one pay period which included October 15, 1974, on a full-time basis. Include all full-time temporary or seasonal workers employed during this pay period.

PART-TIME EMPLOYEES (Part II, column c) — Persons employed during the one pay period which included October 15, 1974, on a part-time basis.

PAYROLL (Part II, columns b and d) — Gross payroll before deductions including salaries, wages, fees, or commissions earned during the one pay period which included October 15, 1974, by employees as defined above. If some employees are paid on some basis different from the predominant pay period, please include amounts for them on an adjusted basis.

B. Report the pay period interval for which all or most of the full-time (or part-time) employees are paid.

▶ Part III — EXPENDITURES

CURRENT OPERATION (Part III, column a) — Salaries and payroll of your unit's officers and employees and the purchase of supplies, materials, and contractual services with individuals and firms in the private sector.

Exclude all capital outlay (see below), debt retirement, securities investment, loan extension, within-government transactions and employer contributions to employee benefits (see below).

CAPITAL OUTLAY (Part III, column b) — Direct expenditure for contract or force account construction of buildings and other improvements, and for the purchase of equipment, land, and existing structures.

INTERGOVERNMENTAL EXPENDITURE — All money paid to other governments as fiscal aid, or payment for services rendered, or for contracts or compacts with another government (e.g., purchase of police services).

PAYMENTS TO LOCAL GOVERNMENTS (Part III, column c) — Payments to a county, city, town, special or school district or any of their departments or agencies.

PAYMENTS TO THE STATE GOVERNMENT (Part III, column d) — Payments to the State government or any of its departments or agencies.

Exclude money paid to a government for the purchase of commodities, property, utility services, any taxes imposed and paid as such, and contributions for social insurance.

GOVERNMENT CONTRIBUTIONS FOR EMPLOYEE BENEFITS (Part III, column e) — Any employer contributions, separable for your unit, to the Federal Social Security system, State and local retirement systems, commercial or mutual insurance plans, workmen's compensation funds, and insurance premiums paid by your parent government for health, hospital, disability, and life insurance programs.

Exclude payments made directly to individuals and contributions made by employees to any of the above programs.

▶ Part IV — REVENUE DIRECT FROM THE FEDERAL GOVERNMENT

Enter only the revenue received directly from the Federal Government. Do not enter amounts passed from the Federal Government through the state or its departments or agencies to your unit.

This report has been cleared in accordance with FPMR 101-11.11 and assigned interagency report control number 1076-DGC-AN.			Form CJ-25 (8-26-74)	Form Approved: O.M.B. No. 41-R2702 U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS

► Part I — EXPENDITURES ◀
(FOR FISCAL YEAR 1974, JULY 1, 1973 THROUGH JUNE 30, 1974)

***NOTE** — If unable to show actual cash disbursement, please show total obligations incurred minus the sum of unliquidated obligations payable and undelivered orders.

1. What was your total CASH disbursement for CURRENT OPERATIONS; i.e., salaries, wages, and expenses of officers and employees, purchase of supplies and materials, and contractual services with other Federal agencies or private organizations? (Do not include government contributions to employee benefits — see item 5 below for further details.)	\$
2. What was your total CASH disbursement for CAPITAL OUTLAY; i.e., direct expenditure FROM YOUR OWN BUDGET for acquisition of land, construction, renovation and repairs of buildings and facilities, and purchase of equipment?	\$
3. What was your total INTERGOVERNMENTAL CASH disbursement to STATE GOVERNMENTS for fiscal aid (e.g., grants, including amounts which were "passed through" State governments to local governments) or for services rendered?	\$
4. What was your total INTERGOVERNMENTAL CASH disbursement to LOCAL GOVERNMENTS for fiscal aid (e.g., grants) or for services rendered, made DIRECTLY to local governments and NOT "passed through" State governments or their departments or agencies?	\$
5. What was your total CONTRIBUTIONS FOR EMPLOYEE BENEFITS; i.e., payments made to the Federal Social Security program, Federal retirement systems, commercial or mutual insurance plans, or premiums paid for accident and health, hospital and other insurance programs? (Do not include payments made directly to and contributions made by employees for any of the above programs.)	\$

► Part II — EMPLOYMENT AND PAYROLL ◀
(FOR THE ONE PAY PERIOD WHICH INCLUDED OCTOBER 15, 1974 — NOT ANNUAL DATA)

***NOTE** — Please report all employees, executives, managers, operatives, and support personnel. Temporary employees should be reported as full- or part-time on the basis of number of hours worked.

1. How many FULL-TIME (40 hours or more a week) employees did you have on your payroll during the ONE PAY PERIOD WHICH INCLUDED OCTOBER 15, 1974?	Full-time employees
2. What was the total payroll amount for all FULL-TIME employees noted in item 1 for the ONE PAY PERIOD WHICH INCLUDED OCTOBER 15, 1974?	\$
3. What is the pay period interval which applies to the payroll reported in item 2? 1 Monthly 2 Twice a month 3 Every 2 weeks 4 Weekly 5 Other — Specify _____	CENSUS USE ONLY
4. How many PART-TIME (less than 40 hours a week) employees did you have on your payroll during the ONE PAY PERIOD WHICH INCLUDED OCTOBER 15, 1974?	Part-time employees
5. What was the total payroll amount for all PART-TIME employees noted in item 4 for the ONE PAY PERIOD WHICH INCLUDED OCTOBER 15, 1974?	\$
6. What is the pay period interval which applies to the payroll reported in item 5? 1 Monthly 2 Twice a month 3 Every 2 weeks 4 Weekly 5 Other — Specify _____	CENSUS USE ONLY
