OVERVIEW

The Oregon Department of Transportation (ODOT) prepares the Excess Land Inventory Report for the Oregon Transportation Commission pursuant to O.R.S. 184.627.

This inventory report includes a description of each excess property and its current use, an evaluation of future plans for the property, and an assessment of the property's value. O.R.S. 184.627 directs the Oregon Transportation Commission to review the inventory periodically and direct the department to dispose of any parcels not anticipated to be needed for transportation purposes in the foreseeable future and that would result in a substantial net benefit to the state.

The 2023 Excess Land Inventory is an update to the first report delivered to the OTC in 2021, which was originally prepared pursuant to House Bill 2017 – Section 9. This report contains following updates:

- Properties that have been sold, transferred or otherwise removed from the state's land inventory since the 2021 report
- Properties that are no longer considered excess and were reclassified as "in reserve" or "in use" due to an identified use or future need
- Properties that currently approved for and pending surplus disposition
- Real property currently identified as "excess"

Updates Since 2021 Report – Parcels by Region and Type

Region	Sold/ Transferred	Changed in Status	Pending Surplus Disposition	Current Excess
Region 1	7	2	5	121
Region 2	12	9	27	271
Region 3	4	1	4	187
Region 4	6	4	4	66
Region 5	5	0	2	102

Summary of the Real Property Management Program

Right of Way Section Mission

The Oregon Transportation Commission (OTC) requires properties acquired by the Oregon Department of Transportation (ODOT) for right-of-way, or other related transportation purposes be managed in a manner that will maximize its long-term public benefit. The mission¹ of the Right of Way Section is the timely and cost-effective acquisition of real property necessary for the improvement of Oregon's transportation system, and to maximize the return on the Highway Trust Fund's real property investment through management and sale of Highway Division excess real property.

The Program's property disposal objectives are:

- 1) Generate funding from sales, leases and land use permits for the Department to return to the Highway Trust Fund.
- 2) Reduce the maintenance and administrative burden of managing excess property.
- 3) Place properties back onto County property tax rolls to generate property tax revenue for state and local agencies.

The objective of the Property Management program is to sell, lease, or otherwise dispose of surplus real property in the best interest of the State by achieving maximum value, facilitating historic preservation and reuse, and returning property to local tax rolls where they can be used to maximize job creation, and help create affordable housing. In addition, the Property Management program generates revenue from leases and land use permits of property that are not excess to ODOT's operating needs, as long as those uses are compatible with ODOT's operating needs, such as the land below overpasses leased for parking.

To achieve these goals, the Engineering and Technical Services Branch, Right of Way Section maintains an inventory of real property acquired, and an accounting of related costs and expenses in the management and disposition of those properties. The Right of Way Section, Property Management Unit is also responsible for the methods used in managing property data on surplus and excess property. The Excess Land Inventory is one tool used for achieving the program's objectives.

¹ ODOT Right of Way Manual, August 31, 2018 (rev. 9/15/20)

Program Goals

The program currently has a revenue goal of \$9 million per biennium, which it achieves through leasing, permitting and sales of ODOT surplus real property. Since 1999, it has averaged \$11 million in sales and lease/permit revenues per biennium. The total revenue collected during the 2021 - 2023 biennium was \$9.27 million, which includes \$7.82 million rent/permit revenues, and \$1.45 million from surplus land sales.

Lease revenue continues to be a steady source of revenue for the program, with total rents collected increasing by 14.6% from the previous biennium. Surplus land sale transactions remain steady in terms of number of transactions, but total revenue continues to lag due to the preponderance of lower value parcels. There is still a significant backlog of properties still pending disposal. The potential impact to surplus sales transactions due to the Governor’s executive order 23-02 are yet to be determined.

Biennium Comparison of Total Revenue

	2003-2005	2005-2007	2007-2009	2009-2011	2011-2013	2013-2015	2015-2017	2017-2019	2019-2021	2021-2023
LEASE/PERMIT REVENUE	\$3,823,390	\$4,019,495	\$4,606,587	\$4,435,292	\$5,076,969	\$5,729,120	\$5,660,483	\$6,014,742	\$6,819,360	\$7,816,284
SALES REVENUE	\$6,602,774	\$10,837,978	\$14,435,348	\$2,219,593	\$2,765,295	\$6,776,057	\$8,329,578	\$5,329,123	\$1,928,386	\$1,454,136
TOTAL REVENUE	\$10,426,165	\$14,857,473	\$19,041,934	\$6,654,885	\$7,842,264	\$12,505,177	\$13,990,061	\$11,343,865	\$8,747,746	\$9,270,420

Balancing Current Demand vs. Future Needs

A parcel's status of being "excess" is a transitory state. What is considered excess today, is a function of what information we know, and changes in the future can have a material impact. ODOT has a surplus review process that is methodical and comprehensive, but there will be occasions where selling surplus property prematurely may result in costing the state more in the long run. ODOT must always be mindful of future transportation needs. We must prevent situations where there is immediate pressure to sell, to avoid needing the same property for a future STIP project.

Opportunities to repurpose excess land abound, but ODOT must balance the demands of stakeholders who have a current need (private parties, public agencies, tribal and local communities, the Governor's Office, and District and House representatives) with the potential for a future need from ODOT. Like the Strategic Action Plan, the Excess Land Inventory report merely represents the first step in a larger initiative to ensure the best use of ODOT excess land.

Pursuant to ORS 184.627, the ODOT Right of Way Program is prepared to submit periodic updates to the OTC on its progress, which will include: details on which properties have been sold, new excess parcels, excess parcels placed back in reserve for future ODOT use, and any other changes to the Excess Land Inventory; and revenue generated from sales and leasing. This information may be used to display how our efforts supported social equity, community development, and climate change initiatives.

Information about ODOT's Property Sales Program, properties currently available for sale or lease, and a link to ODOT's Excess Land Inventory GIS map can be found on ODOT's [Property Management](#) website.

Questions or comments regarding the 2023 Excess Land Inventory report can be directed to:

Voice: 503.910.8324

Where Did Excess Come From?

The state's roads and highway system began from an assemblage of trails, territorial roads, military wagon roads, private toll roads, stage lines, county market roads, dedicated city streets and resolute county roads. The Rural Post Road Act of 1916 also added forest roads, which belonged to the County, ODOT or the Federal Government.² Originally designed for different and slower forms of transportation, many older roads and highways eventually needed to be redesigned or replaced. Higher speeds required the straightening of highways, and population growth and increased automobile usage necessitated widening.

Photo by Oregon State Archives, Oregon Department of Transportation OHG/RS

To build and maintain these highways, ODOT also acquired land for use as stockpile sites, maintenance facilities, quarries/material source sites, and environmental mitigation sites. Acquisition of real property for these projects occurred over the last 100+ years. Those same acquisitions became the source of ODOT excess land as project construction was completed, and as the state's transportation needs and environmental laws changed over time. Changes in environmental laws have made permitting for quarries in near wetland and riparian habitats more challenging.

Acquisition of state right-of-way must comply with federal and state acquisition laws, which require that State DOT's offer to purchase the remainder of a property, when a proposed partial acquisition results in an uneconomic remnant to the owner. These remainders are considered excess to the needs of the project and wind up in the excess land inventory. Some may be utilized as additional stockpile sites during construction, and Operations and Maintenance may request to retain them to use for stockpiling material to repair and maintain the highways. These sites become excess once they are no longer needed.

Findings

The main categories of excess property found include:

- Uneconomic remnants from past acquisitions
- Right of way from canceled projects
- Abandoned highway alignments
- Depleted or nonviable material source sites
- Closed and inactive maintenance stations
- Stockpile sites no longer needed
- Mitigation lands which can be sold with deed restrictions

² History of Highways in Oregon, March 2020

Terms and Definitions

Parcel ID – This is a system-generated unique identifier for the parcel within the Section 9 database.

TRS-Lot – This is a parcel identification number using Township, Range, Section and assessor tax lot number. If the property does not have a County Tax Assessor lot number, the parcel is assigned a TRS-Lot relative to the nearest assessed lot. For example, a non-tax lotted parcel situated to the north of tax lot 100 will be denoted as lot “100 Adjacent North”. Parcels that are only a portion of the total tax lot will reference a “por.” or “portion” and number.

Status – The current status of a parcel described as either “in use”, “in reserve”, “excess” or “surplus”.

“In Use” Property – Real property that is actively being used for ODOT operational purposes. Examples include operating highway, weigh stations, rest areas, drainage, storm water management facilities, mitigation property, stockpile sites, maintenance facilities, clear zones, quarries and material source sites, multimodal facilities, park-and-rides and ODOT rail property. This report does not include properties currently in use by ODOT.

“In Reserve” Property – Real property not actively being used for ODOT operational purposes, that has been identified as having a planned or foreseeable future use, such as for a future STIP construction project, ODOT facility, environmental mitigation (e.g., riparian habitat preservation or protection of forested wetlands), stockpile site, or material source site. These properties will be reviewed periodically to determine whether they are still needed or can be added to the excess land inventory. This report does not include properties that have been placed in reserve for a planned future use by ODOT.

Excess Real Property – Real property that is no longer being used to carry out the mission of ODOT. Excess real property includes remnants of real property purchased and located outside of the developed right-of-way limits of a project, uneconomic remainders, depleted material sources or quarries, abandoned stockpile sites, and closed and inactive maintenance stations. At any time, an excess parcel may be requested for surplus authorization, or conversely, it can be placed “in reserve” if a future need is identified. Until an excess property has undergone surplus property review and authorization, it cannot be sold as surplus.

Surplus Real Property – Excess real property that is no longer needed for highway purposes and that has been approved for terminal disposition by sale or by lease. ODOT-owned excess real property cannot be sold until it has been **declared surplus**. Requests to sell ODOT property can originate from individuals, businesses, public agencies or from within ODOT. Before steps can be taken to sell the property, the property must first be declared surplus to the needs of ODOT. Surplus property designations expire three years after their original approval. Subsequent extensions are for three years.

By law, ODOT must give public agencies and non-profit housing authorities the next opportunity, after tribes and other state agencies, to purchase surplus property directly from ODOT. The agency must pay Fair Market Value as set by ODOT through the appraisal and review process.

Surplus Phase – The surplus property disposition process occurs in five phases, which begins when ODOT property management receives expressions of interest to buy or lease excess land, or receives a request from region/district management to put a property into surplus review. The five phases are:

- Phase 1: Initial research and vetting by ODOT property management staff
- Phase 2: Formal surplus property review and approval or denial
- Phase 3: FHWA review (if required) and DAS clearinghouse process
- Phase 4: Appraisal and marketing
- Phase 5: Sale and escrow

Current Land Use – This indicates any current uses by ODOT or third parties. Parcels with third-party users under written agreements with ODOT are denoted by a “lease” or “land use permit”. Additional information pertaining to third-party uses by permit or lease is included in the description.

Planned Future Use – Any planned or foreseeable need for the property is listed here. Properties with “TBD” in their Planned Future Use do not have a known planned future use for the construction or maintenance of the state highway system, and may require additional review by the disciplines noted.

Description – General description of the property including: its size and location; quarry name if it is a former material source site; and additional information relating to current land uses by third parties under an approved permit or lease.

Former material sources (and some associated stockpile sites) will reference an “ASIS#”, which is a reference from ODOT’s Aggregate Source Information System. The type of material (e.g., gravel, basalt, cinder pit) may also be included, but is for reference only. If ODOT’s ownership is only in the form of “mineral rights”, this indicates that ODOT does not own the underlying fee property, but has rights to the materials. Many former material source sites that are now “excess” are within or along river and creek beds, where riparian habitats are now undergoing conservation efforts by the state, and may no longer be viable material sources.

Region – One of five ODOT regions, which ODOT uses to designate responsibilities for construction and project management by geographic location. ODOT region staff participated in the review of the property inventory to confirm current land uses, and identify potential planned future uses.

Maintenance District – The operation and maintenance of the state’s highway system is managed by one of fourteen ODOT districts. ODOT district staff participated in the review of the property inventory to determine current ODOT operational uses, and any planned future use.

Urban Growth Boundary – Urban Growth Boundaries (UGB) are boundaries created to limit urban sprawl, and used by local governments as a guide to zoning and land use decisions. ODOT does not set Urban Growth Boundaries, and this information is subject to change. This data is provided for reference purposes only, and already tracked for the purposes of other reporting under O.R.S. 270.180.

Location – This is a hyperlinked field which when clicked on will open a Google aerial map with a centroid location.

Surplus Authorization and Disposition Process

Excess real property must first be declared surplus to the needs of ODOT before the property can be marketed for sale.

The surplus disposition process involves five phases, which can take up to 12 months or longer. A brief description of the phases is provided below, but full details can be found in the [ODOT Right of Way Manual](#).

- Phase 1: Initial research and vetting by ODOT property management staff
 - During this phase, the real property agent will conduct due diligence on the property to determine its potential value vs. the cost and time involved to put the property up for sale. The property agent packages the research and submits it to Region staff for review. The property is reviewed by all engineering disciplines for a recommendation on whether or not to surplus the property.
 - The timing for this phase is typically *30 to 60 days* depending on agent workloads.
- Phase 2: Formal surplus property review and approval or denial
 - The Region Manager reviews the package and recommendations, and approves or denies the property for surplus disposition.
 - This process can take *up to 30 days*.
 - Once the property is approved for surplus disposition, the authorization is good for three years. If the authorization expires and is not renewed, the property reverts back to being “excess” and returned to the excess land inventory. The only exception would be if the property has a prospective buyer and is currently in negotiations. In those cases, the property agent will continue negotiations and process the surplus authorization renewal.
- Phase 3: FHWA review and DAS clearinghouse process
 - This phase includes contacting the original owner of the land, if possible, for first right of refusal, and contacting the local planning agency for a statement of conformance.
 - FHWA approval is obtained if required, and the surplus property goes through the DAS clearinghouse process, which provides notification to state agencies, other public agencies and Indian tribes that the property is available for sale. The following entities can purchase the property (after other state agencies, and prior to Phase 4), on the condition that they develop the property for affordable housing: Indian tribes, political subdivisions and nonprofit organizations. The property may not be sold to any private person until it has been determined whether acquiring the real property would be advantageous to any of these entities.
 - This process can take between *60 to 90 days*.
- Phase 4: Appraisal and marketing
 - A formal appraisal is ordered to determine the fair market value for the property and the property agent begins marketing the property.
 - This process can take between *90 to 180 days* (sometimes longer) depending on availability of appraisers and the market for buyers.
- Phase 5: Sale and escrow (there is no “Phase 5” specifically mentioned in the R/W Manual)
 - Once a buyer has been found, a purchase contract is executed, and the property is sold.
 - This can take anywhere between *90 to 180 days* depending on the complexity of the sale. On occasion, the sale can be done under a Land Sales Contract where the buyer pays for the land over a fixed period of time.

Assessment of Value

O.R.S. 184.627 requires that ODOT provide an assessment of the value of its excess real property. Due to the high cost of formal appraisals and the time involved, excess properties are not appraised until they are approved for surplus disposition. Such appraisals require recent comparable sales within the same location as the subject property in order to comply with USPAP appraisal guidelines. Given the irregular sizes/shapes of remnant parcels, or their remote locations, it can sometimes be difficult to find comparable sales for ODOT excess land.

County Assessors are required under state law to value property for taxation purposes. State-owned land is generally exempt from assessment, however a query of County Assessor data found that most properties owned by ODOT did carry some form of Assessor real market value. For the purposes of this report, the County Assessor real market values were used as a basis for creating an assessment of value. State property without a tax lot or without assessed values were given assessed values based on the value per acre of adjacent or nearby vacant land.

Care must be taken when using such values for anything other than planning/estimating purposes. Some of the County assessed values may be based on the property's previous size or configuration (prior to the non-remnant portion being used for the highway) and hence overvalue the property.

ODOT excess property values will vary by size, shape, location, access to public roadways and utilities, population density and scarcity of land. While many legal-sized ODOT properties have been appraised at close to the Assessor real market values, some remnant parcels have been appraised as low as 5% of vacant land values in the area, due to their odd sizes/shapes, lack of access, and limited market for such parcels.

Please note: The assessments of value (Estimated Value) contained within this report should not be construed as the value that would be achieved upon the sale of the property, and should only be used for planning purposes.

For many small or non-conforming parcels, the cost to market the property may exceed its market value.

APPENDIX A – Changes Since Last Report

Properties Sold/Transferred from State Inventory

Parcel ID	TRS-Lot	Region	Status	Date Sold	Sales Price	Description
Parcel ID-03896	01N01E09AA-000300 Adjacent East	1	SOLD	9/20/2021	\$6,000	6,093 Sq. Ft.; Surplus triangular parcel, west of I-5, just north of N Schmeer Rd., Portland.
Parcel ID-04946	01N02W07-000400 Adjacent South	1	SOLD	2/11/2022	\$11,000	1.43 Acres; Triangular surplus parcel south of NW Victory Lane, west of the NW Jackson School Rd. Hwy 26 Interchange, Hillsboro.
Parcel ID-03860	01S01W03A-001700 (easement)	1	SOLD	4/13/2022	\$99,000	Quitclaim of access restrictions and slope easement; release of permanent easement. Original fee title was sold in 2018.
Parcel ID-04125	01S02E16AB-005600 Adjacent East	1	SOLD	9/19/2022	\$5,585	2,231 Sq. Ft.; Surplus parcel adjacent east of 9308 SE Pardee Street, Portland.
Parcel ID-05491	01S03E07CD-001202 Adjacent North	1	SOLD	4/7/2023	\$4,700	390 Sq. Ft.; Surplus parcel used as part of Project-related Trade in Portland.
Parcel ID-05033	02S01E35D-005200 Adjacent North	1	SOLD	1/9/2023	\$396,000	33 Acres; Surplus parcel north of I-205, east of S Salamo Rd., West Linn.
Parcel ID-03678	02S01W10AA-000700	1	SOLD	3/17/2023	\$230,000	20,909 Sq. Ft.; Surplus property located on the southeast corner of Hwy 99W and SW McDonald St., Tigard.
Parcel ID-03319	06N10W15BC-003900	2	SOLD	7/1/2022	\$150,000	4,502 Sq. Ft.; Surplus parcel east of Hwy 101, west of Neawanna Creek, Tigard. (3900, 4400, 4613, 4614 sold together)
Parcel ID-03320	06N10W15BC-004400	2	SOLD	7/1/2022	Included with Lot 3900	14,406 Sq. Ft.; Surplus parcel east of Hwy 101 west of Neawanna Creek, Tigard. (3900, 4400, 4613, 4614 sold together)
Parcel ID-03321	06N10W15BC-004613 (por. 1)	2	SOLD	7/1/2022	Included with Lot 3900	2,548 Sq. Ft.; Surplus parcel east of Hwy 101 west of Parcel 4400, Tigard.(3900, 4400, 4613, 4614 sold together)
Parcel ID-03322	06N10W15BC-004614 (por. 1)	2	SOLD	7/1/2022	Included with Lot 3900	748 Sq. Ft.; Surplus parcel east of Hwy 101 west of Parcel 3900, Tigard. (3900, 4400, 4613, 4614 sold together)
Parcel ID-03728	11S03W06CB-000203 Adjacent South	2	SOLD	9/30/2022	\$115,231	24,577 Sq. Ft.; Surplus parcel adjacent south of 350 NW Hickory St., Albany.
Parcel ID-01694	13S03W07-000100	2	SOLD	10/12/2022	\$22,000	2.27 Acres; Surplus parcel north of Boston Mill Rd., just east of Shedd and Hwy 99E.
Parcel ID-01318	17S03W3532-006101	2	SOLD	12/22/2021	\$3,900	1,584 Sq. Ft.; Surplus parcel at NE Corner of S Mill St. and S A St. (Hwy 126 Eastbound), Springfield.
Parcel ID-01337	17S04W2743-000900	2	SOLD	9/24/2021	\$90,000	10,640 Sq. Ft.; Surplus parcel just east of Wallis St. in Eugene.
Parcel ID-01342	17S04W2743-001000	2	SOLD	9/27/2021	Included with Lot 900	3,777 Sq. Ft.; Surplus parcel on NE Corner of Wallis St. and W 3rd Ave. in Eugene.
Parcel ID-04345	17S04W2743-004000	2	SOLD	9/27/2021	Included with Lot 900	34,412 Sq. Ft.; Surplus parcel in Eugene.
Parcel ID-04346	17S04W2744-003000	2	SOLD	9/27/2021	Included with Lot 900	1.35 Acres; Surplus parcel in Eugene.
Parcel ID-01365	17S04W3400-005301	2	SOLD	5/16/2022	\$125,000	6.99 Acres; Surplus parcel in Eugene.

Parcel ID	TRS-Lot	Region	Status	Date Sold	Sales Price	Description
Parcel ID-04994	27S05W19BB-003200 Adjacent North	3	SOLD	10/21/2022	\$5,700	5,017 Sq. Ft.; Surplus parcel west of SE Stephens St. (Hwy 138/99). Just south of Diamond Lake Blvd Intersection with Stephens, Roseburg.
Parcel ID-02168	28S06W26D-001100	3	SOLD	3/14/2022	\$21,900	6.82 Acres; Surplus parcel east of I-5, just north of Round Prairie, 13 miles south of Roseburg.
Parcel ID-03798	28S14W30AD-004500 Adjacent South	3	SOLD	5/18/2022	\$64,500	5,477 Sq. Ft.; Surplus landscaping area between street and building, at 1010 1 st St., Bandon.
Parcel ID-03867	30S05W27DC-000400	3	Transferred	TBD*	\$0	30,928 Sq. Ft.; Surplus parcel north of Hwy 227, just west of Maylea Pl., in east Canyonville. *This property was being being processed for a surplus sale as of the date of the 2021 Excess Land Inventory report, but records show it may have already been jurisdictionally transferred to Douglas County in 1985. A copy of the deed is not on file.
Parcel ID-05094	11S13E11DD-006790 (por. 2)	4	SOLD	5/17/2021	\$7,153.00	225 Sq. Ft.; Surplus parcel between SW 4th St. and SW 5th St. south of SW K St. in Madras. Sold with 11S13E11DD-006800. Reported as surplus in 2021 report. Sold at the end of the 2019-2021 Biennium.
Parcel ID-04667	11S13E11DD-006800	4	SOLD	5/17/2021	Incl. with Lot 6790 (por. 2)	2,636 Sq. Ft.; Surplus parcel between SW 4th St. and SW 5th St., south of SW K St. in Madras. Sold with 11S13E11DD-006790 (por. 2). Reported as surplus in 2021 report. Sold at the end of the 2019-2021 Biennium.
Parcel ID-05153	11S21E36CD-000100 Adjacent South	4	SOLD	5/9/2022	\$1,200	19,516 Sq. Ft.; Surplus parcel NE of Hwy 26, just west of Mitchell.
Parcel ID-05179	18S12E05A0-000200 (easement)	4	SOLD	8/5/2022	\$1,229	1,229 Sq. Ft.; Surplus railroad spur easement in Bend.
Parcel ID-05540	18S12E05A0-000300 (easement)	4	SOLD	8/5/2022	\$2,691	2,691 Sq. Ft.; Surplus railroad spur easement in Bend.
Parcel ID-04674	18S12E17-001600	4	SOLD	4/4/2023	\$45,000	1.66 Acres; Surplus property in Bend.
