MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

The matter of homestead exemptions which were disallowed by the Homestead Exemption Division of the State Tax Commission and returned to the City for disposition came up for discussion and action, such exemptions being those of -

William Baker, Mrs. Lucy W. Bell, Sadie Carlisle, Garland Diamond, Octavia K. Duke, William C. Hawkins, Albert McGlown, Mrs. Ada McLarty, Mrs. Hazel Shelton, Hassell Smith, Mrs. Christine Bickers, Mrs. Mattie Brown, James M. Christman, Howard G. Duvall, William N. Ethridge, Mrs. Maurine M. Frazier, Joe Walton, Miss Maude Heard, Edmund W. Holmes, Lucy R. Pegues, Franklin Pennamon, Lena Peterson (for the year 1948), and Mrs. Daisy Mc. Pegues (for the year 1947).

Finding that the Deputy Clerk had already furnished each of the above with a copy of the disallowance early in November, had given 30 days in which to protest or pay such disallowance, and finding that no objection had been filed, it was ordered that the action of the tax commission be accepted and that the City Clerk be ordered to collect the disallowed tax exemption in cases where it had not been paid after having been notified of the disallowance by the following named persons:

<u>NAME OF APPLICANT</u>	<u>TOTAL ASSESS.</u>	<u>AMOUNT ORIG. ALLOWED</u>	<u>AMOUNT REJECTED</u>	<u>REASON FOR REJECTION</u>
Mrs. Christine Bickers	\$2980.	\$2980.	\$1490.	Apt. rented or available for rent

Lena Peterson	\$ 910.	\$ 910.	\$ 455.	Allowed on more than applicant's elig. portion

Garland Diamond	\$ 720.	\$ 720.	\$ 360.	Allowed on more than applicant's elig. portion

Octavia K. Duke	\$4930.	\$4930.	\$1848.	Allowed on more than applicant's elig. portion

It was found that the following named persons had filed objections (in writing or oral); and that after discussion and investigation, it was ordered that the City Clerk forward the objections to the State Tax Commission for further consideration inasmuch as we believe that the exemption should be allowed:

<u>NAME OF APPLICANT</u>	<u>AMOUNT REJECTED</u>	<u>REASON FOR REJECTION</u>	<u>APPLICANT'S OBJECTION</u>

It is further ordered that as to the list of persons named immediately above, further consideration thereof, be, and is, hereby continued to a future meeting of this board, following the receipt of the final decision of the said tax commission.

It is further ordered, that the clerk of this Board certify a full, true and correct copy of this order to the State Tax Commission, and that T. E. Combs, City Clerk, be, and is, hereby authorized to represent this Board in any hearing before the commission or its duly accredited representative, on any or all matters pertaining to this order.

On motion made, seconded and passed unanimously the above orders were authorized and accepted.

On motion made, seconded and passed unanimously it was ordered that this Board recess until the regular meeting the first Tuesday in February.

RESOLUTION FOR A SPECIAL ADVISORY ELECTION

A RESOLUTION CALLING AND PROVIDING FOR THE HOLDING OF A SPECIAL ADVISORY ELECTION WITH IN THE CITY OF OXFORD, LAFAYETTE COUNTY, MISSISSIPPI, FOR THE PURPOSE OF SUBMITTING TO THE QUALIFIED ELECTORS OF SAID CITY TWO ALTERNATIVE PROPOSITIONS: ONE, FOR THE ISSUANCE OF ELECTRIC PLANT REVENUE BONDS IN THE MAXIMUM AMOUNT OF \$165,000.00 FOR THE PURPOSE OF IMPROVING THE PRESENT ELECTRIC GENERATING SYSTEM OF SAID CITY, OR, SECOND, A PROPOSITION FOR THE ISSUANCE OF ELECTRIC PLANT REVENUE BONDS IN THE MAXIMUM AMOUNT OF \$75,000.00 FOR THE PURPOSE OF CONTRACTING WITH THE TENNESSEE VALLEY AUTHORITY FOR THE PURCHASE FROM THE AUTHORITY OF ELECTRIC POWER AND FOR THE CONSTRUCTION OF A SUBSTATION AND TRANSMISSION LINE AND OTHER NECESSARY IMPROVEMENTS ON THE PRESENT DISTRIBUTION SYSTEM OF SAID CITY.

WHEREAS, the electric power supply of the City of Oxford, Mississippi, is now inadequate, and the electric generating system, exclusively owned by and now serving the said City of Oxford, is in need of improvement by and through the purchase and installation of a Diesel Electric Generating Unit and appurtenances thereto, and by making other necessary repairs and improvements upon the present electric power plant; and

WHEREAS, a maximum amount of \$165,000.00 will be necessary to be borrowed and used by said City for improving and adding to Oxford's present electric generating system; and

WHEREAS, the Tennessee Valley Authority, an agency of the United States Government, has offered to contract with the City of Oxford and to sell to said City electric power if the City will erect a new electric power substation and transmission lines from the Tennessee Valley Authority's substation to a new Oxford substation, and will make necessary extensions and improvements to the present distribution system of the City of Oxford, and for the City to comply with the offer made by the Tennessee Valley Authority will require a bond issue of said City of the maximum amount of \$75,000.00; and

WHEREAS, the Mayor and Board of Aldermen of said City have estimated the cost of such additions and improvements to be made to the City's present power plant to be \$165,000.00, and have estimated the cost of contracting with the Tennessee Valley Authority and erecting a substation and transmission line and other improvements to the present distribution system to be \$75,000.00; and find that the present power plant, without additional improvements, will continue to be inadequate to serve the City, and that the present power plant should be improved, as stated, or a substation and transmission line erected and electric power bought from the Tennessee Valley Authority, and that for either purpose the said City now has no funds available for expenditure; and

WHEREAS, the said Mayor and Board of Aldermen do now further find and determine that it is necessary to provide either for improving the present power plant or buying power from the Tennessee Valley Authority, by and through the issuance of bonds of said City, payable solely from the revenues of the City's generating and distribution system, or from the City's distribution system if power is purchased from the Tennessee Valley Authority and distributed to the City; and

WHEREAS, the City now has a choice between whether it should continue operating its present plant and make the stated additions to it, or whether it should contract with the Tennessee Valley Authority, purchase electric power from it, and discontinue the operation of the City's generating plant; and these choices are alternatives; and

WHEREAS, the Mayor and Board of Aldermen believe that before submitting a specific proposition for a bond issue for a particular purpose, the qualified electors of the City should make a choice between whether they want to keep the present plant and improve it or buy power from the Tennessee Valley Authority instead, and that a special advisory election should be called to submit these alternative propositions to the electorate, the result of which would advise the Mayor and Board of Aldermen of the preference of the people; and thereafter the Mayor and Board could submit at a later election a specific proposition as to a bond issue to accomplish the results approved in this special advisory election; and

WHEREAS, although said Special Advisory Election will be advisory only, and will not itself constitute an authorization to issue bonds for either of said purposes, it will inform the Mayor and Board of the wishes of the electorate on this important issue for the City; and

WHEREAS, the said City of Oxford now has outstanding no indebtedness, the payment of which is chargeable in whole or in part to the revenues of said electric power and distribution system of the City of Oxford, and no pledge of or encumbrances on said revenues has heretofore been made or created which remains unsatisfied at this time, except the following: \$110,000.00 par value, being the outstanding remainder of an issue of \$125,000.00 of Electric Revenue Bonds of said City, dated April 1, 1946, which said outstanding bonds mature in the principal amount of \$10,000.00 on April 1 in each of the years 1950 through 1960, inclusive, with final maturity date for the remaining entire indebtedness being April 1, 1960; and

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

WHEREAS, the Mayor and Board of Aldermen of said City now find and determine that it is for the best interests of said City that a special advisory election be called on the two alternative propositions stated herein, either of which will involve the issuance of additional electric plant revenue bonds of said City, as herein recited;

NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND BOARD OF ALDERMEN OF THE CITY OF OXFORD, LAFAYETTE COUNTY, MISSISSIPPI, AS FOLLOWS:

"EXHIBIT "A"

POWER CONTRACT
between
TENNESSEE VALLEY AUTHORITY
and
CITY OF OXFORD, MISSISSIPPI

This AGREEMENT, made and entered into as of this 30th day of May, 1950, by and between TENNESSEE VALLEY AUTHORITY (hereinafter called "Authority"), a corporation created and existing under and by virtue of the Tennessee Valley Authority Act of 1933 as amended, and CITY OF OXFORD (hereinafter called "Municipality"), a municipal corporation duly created, organized and existing under and by virtue of the laws of the State of Mississippi;

W I T N E S S E T H :

WHEREAS, Authority, by section 10 of the Tennessee Valley Authority Act of 1933 as amended, is authorized to sell the surplus power generated by it and not used in its operations, and is directed to give preference to States, counties, municipalities, and cooperative organizations of citizens or farmers not organized or doing business for profit; and

WHEREAS, by section 11 of said act it is provided that the sale of power by Authority shall be primarily for the benefit of the people of the section as a whole and particularly the domestic and rural consumers to whom the power can economically be made available; and

WHEREAS, Municipality now owns and operates its own generation and distribution system for the purpose of supplying electric energy to consumers inside and outside Municipality's corporate limits; and

WHEREAS: Municipality desires to abandon its generating plant and purchase electric power and energy from Authority for municipal use and resale in the operation of its distribution system; and

WHEREAS, all acts, things and conditions necessary under law and Municipality's charter to make this agreement the valid and binding obligation of the parties hereto have been done, performed, and complied with;

NOW, THEREFORE, for and in consideration of the mutual covenants herein contained and subject to the provisions of the Tennessee Valley Authority Act of 1933 as amended, the parties hereto covenant and agree as follows:

1. Term of Contract. This contract shall become effective as of the date first above mentioned and shall continue in effect for twenty (20) years; provided, however, that sections 4 to 13, inclusive, shall become effective on January 1, 1951, except as otherwise expressly provided therein.

2. Installation of Facilities. Municipality will install at its own expense the facilities necessary to take power from Authority at 13,000 volts at Authority's existing Oxford Substation for use on Municipality's electric system with circuit voltage of 12,500 volts.

3. Interim Emergency Power. Commencing with any day prior to January 1, 1951, on which Municipality is ready to take power at 13 kv at Authority's Oxford Substation, Authority will endeavor to supply, at Municipality's request, such emergency requirements of Municipality, as may be in excess of the capabilities of Municipality's generating facilities. Municipality shall pay for the emergency power and energy delivered to Municipality under this section a demand charge at the rate of 20 cents per week per kw of demand, and an energy charge at the rate of 120% of the out-of-pocket cost to Authority per kwh of the energy supplied, such out-of-pocket cost to include any starting-up and shutting-down expenses at steam plants operated to supply Municipality's requirements. For the purposes of this section 3 demand is defined as the highest average load measured in kilowatts during any 60 consecutive minute period of the calendar week.

4. Interim Power Supply. For the period beginning with January 1, 1951, and extending to March 1, 1952, Authority shall supply at Authority's Oxford Substation at 13,000 volts Municipality's requirements for electric power and energy to the extent that it is physically and economically feasible for Authority to do so and such service will not jeopardize Authority's ability to comply with prior commitments to Authority's other customers. Municipality shall, during said period, operate its generating plant to the extent necessary to supply its requirements for power and energy in excess of the amounts available from Authority under this section. The power and energy made available to Municipality by Authority under this section shall be paid for by Municipality at the rate of 7½ mills per kilowatt-hour.

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

5. Power Supply. Effective as of March 1, 1952, and thereafter for the remaining term of this contract, Authority shall supply for Municipality's use and for resale all of Municipality's power requirements up to the maximum demand specified in section 6 hereof.

Municipality shall in no event obtain, by generation, purchase, or otherwise, power from any source, other than Authority's electric system, without the consent of Authority, unless Authority has refused to supply Municipality such additional quantities of power as may have been applied for as provided herein, and then only to the extent of its requirements in excess of the power available from Authority. Should Municipality, during the period of this contract, desire to increase its purchases of power in excess of the maximum provided for herein, Municipality may apply to Authority for additional quantities of power. Such application shall be in writing and shall be supported by proof of probable need for such additional power. Authority shall, within a reasonable time (which shall be determined in each instance by Authority but which in no case shall exceed twenty-four (24) months) and with due diligence, make arrangements to deliver such additional power, but only to the extent that Authority, in its judgment, has power available after all requirements of Authority, the United States of America, and prior contractual commitments have been met, and subject to acts of God and other contingencies beyond Authority's control. In the event reservation of generating capacity or substantial alteration of existing generating, transmission, or transformation facilities or installation of additional generating, transmission, or transformation facilities is necessary to enable Authority to fulfill Municipality's request for increased quantities of power, Municipality agrees to give Authority such assurances respecting increased use of power as in Authority's judgment may be necessary to justify such reservation, alteration, or installation of facilities.

6. Delivery and Receipt of Power. The power to be supplied hereunder shall be delivered at the delivery point designated below and, under normal operating conditions, shall be within commercial limits of sixty (60) cycles per second and the delivery voltage hereinafter specified. It is understood that Municipality's distribution system is designed for operation at the average distribution system circuit voltage indicated below:

<u>Delivery Point</u>	<u>Normal Wholesale Delivery Voltage</u>	<u>Maximum Demand</u>	<u>Distribution System Circuit Voltage</u>
Low-tension side of Authority's Oxford Substation	13,000	5,000 kva	12,500

Authority shall be obligated to have installed at said delivery point only such protective equipment as in its opinion is necessary for the protection of its facilities supplying energy to such delivery point, but in no case shall Authority be obligated to furnish more than one such installation at such delivery point. Municipality agrees to operate its system and to design and construct future extensions so that it will be feasible to provide its entire power requirements from the point of delivery specified herein or from such additional points of delivery as Authority may deem to be feasible and as the parties may agree to establish from time to time.

7. Schedule of Rates: Attached hereto and hereby made a part hereof is a "Schedule of Rates and Charges" wherein Municipality is referred to as "Distributor." Except as provided in section 4 hereof Municipality shall pay for the power and energy supplied by Authority at the rates fixed in Wholesale Power Rate Schedule A. All payments shall be made to Authority at its principal offices at Wilson Dam, Alabama, or at such other place as Authority may from time to time designate.

The payments to be made hereunder shall be made solely and exclusively from the revenues of Municipality's electric system and shall not be a charge upon Municipality's general funds.

8. Resale Rates. In order to assure a wide and ample distribution of electric energy in the area served by Municipality, Authority and Municipality agree as follows:

(a) Municipality agrees that the power purchased hereunder shall be sold and distributed to the ultimate consumer without discrimination between consumers of the same class, and that no discriminatory rate, rebate, or other special concession will be made or given to any consumer.

(b) For the period specified in section 4 hereof Municipality agrees to charge consumer's Municipality's rates in effect and applicable as of the date of this agreement. Effective as of March 1, 1952, Municipality agrees to charge consumers, including all municipal and governmental customers and departments, the rates set forth for the several classes thereof in Schedule B-1, BG, and B-5.1 of the Schedule of Rates and Charges, and not to depart therefrom except by agreement of the parties. Additional resale schedules for special classes of consumers or special uses of electric energy may be added from time to time by agreement of the parties.

(c) If it should appear that the rates provided for in said resale schedules, including surcharges where applicable, do not produce revenues sufficient to provide for the operation and maintenance of Municipality's electric system on a self-supporting and financially sound basis, including requirements for interest and principal payments on notes, bond, or other evidence of long-term indebtedness issued or assumed by Municipality in the acquisition, extension, or improvement of its electric system (hereinafter called the "System Indebtedness"), Authority and Municipality shall agree upon, and Municipality shall put into effect, such changes in rates as will provide for the increased revenues necessary to place the system upon a self-supporting and financially sound basis.

9. Disposition of Revenues. Municipality agrees to dispose of its gross revenue from electric operations in the following manner:

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

(a) Revenue shall first be used for the payment of all current operating expenses, including salaries, wages, cost of materials and supplies, power at wholesale, and insurance.

(b) From remaining revenues Municipality shall next currently provide for the payment at maturity of interest accrued on all System Indebtedness, and for amortization charges and/or sinking fund payments thereon.

(c) Thereafter, revenues shall be used currently to set up reasonable reserves for replacements, new construction, and contingencies, and to provide a reasonable amount of cash working capital.

(d) From remaining revenues Municipality may thereafter pay into its General Fund a return on its investment, as provided in the Financial and Accounting Policy in the Schedule of Terms and Conditions attached hereto.

(e) From remaining revenues Municipality may thereafter pay into its General Fund a tax equivalent as provided in the Financial and Accounting Policy in the Schedule of Terms and Conditions attached hereto.

(f) All remaining revenues shall be considered surplus revenues and shall serve as a basis for the reduction or elimination of surcharges to consumers, and thereafter for the reduction of rates; provided, however, that Municipality may, subject to the consent of Authority, devote part or all of such surplus revenues to the purchase or retirement of System Indebtedness prior to maturity. Surplus revenues shall be computed as of June 30 of each year.

10. Payment for Municipality's Energy Requirements. Municipality agrees to make payments into its electric funds from appropriate general or special funds for all electric service required by Municipality for street lighting, water pumping, and other operations and uses, at the resale rates prescribed in section 8 hereof.

11. Terms and Conditions. Attached hereto and hereby made a part hereof, is a "Schedule of Terms and Conditions." The provisions of this schedule may from time to time be changed or supplemented by written agreement of Municipality and Authority. It is understood and agreed that the several provisions of this schedule, with such changes as may from time to time be adopted pursuant hereto, as well as the several provisions of this contract and of the Schedule of Rates and Charges, are of the essence of this contract.

Notwithstanding any other provision of this contract, including without limitation the provisions of the Schedule of Terms and Conditions, the amount of Municipality's initial investment in the electric system for purposes of this contract shall be determined by subtracting the bonds and other liabilities assumed by the electric system from the assets transferred to the electric system, all as of January 1, 1951, the assets so transferred and the liabilities so assumed to be determined as hereinafter provided in this paragraph. The assets to be transferred to the electric system, determined as of January 1, 1951, shall consist of the following:

1. The value of Municipality's distribution system as determined by the Authority's inventory and appraisal thereof.
2. Thirty Dollars (\$30) per kilowatt of the installed capacity of the generating plant.
3. All electric system accounts receivable as of January 1, 1951.
4. Organization expense in the amount of Five Thousand Dollars (\$5,000).
5. The actual value of materials and supplies.
6. Trust fund accounts applicable to issued and outstanding bonds assumed by the electric system.
7. The amount of any cash transferred to the electric system as of January 1, 1951.

The liabilities to be assumed by the electric system, determined as of January 1, 1951, shall consist of the following:

1. The issued and outstanding bonds of Municipality of the 5 $\frac{1}{2}$ % issue of July 1930.
2. The issued and outstanding bonds of Municipality of the 2 $\frac{1}{4}$ % and 1% issues of April 1946.
3. Any additional outstanding bonds which were issued, and the proceeds of which were used, exclusively for electric system purposes.
4. All electric system accounts payable and customer deposits as of January 1, 1951.

It is understood and agreed that, if the sum of the above itemized liabilities should exceed the sum of the above itemized assets, the amount of Municipality's initial investment in the electric system shall be zero and the issued and outstanding bonds of Municipality listed above to be

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

assumed by the electric system shall be reduced to the extent necessary to make the total liabilities assumed by the electric system equal to the total assets, and such of the issued and outstanding bonds listed above not assumed by the electric system shall remain the responsibility of Municipality's general funds. It is further understood and agreed that Municipality's investment in its electric system may at any time and from time to time be reduced by payments (other than tax equivalents or returns on investment) from electric system funds to Municipality's general fund, but no such payment shall be made after said investment has been reduced to zero. All debt service requirements relating to the outstanding bonds assumed by the electric system as provided in this paragraph shall be met out of funds of Municipality's electric system.

12. Rules and Regulations. Attached hereto and hereby made a part hereof is a "Schedule of Rules and Regulations." Municipality hereby adopts said Schedule of Rules and Regulations. The provisions of said schedule may be amended, supplemented, or repealed by Municipality at any time upon ten (10) days written notice to Authority setting forth the nature of and reason for the proposed change. No change shall be made in said schedule, however, which is inconsistent with or in violation of any of the other provisions of this contract. In said schedule the term "Distributor" shall be construed to mean Municipality.

13. Purpose of Contract. It is hereby recognized and declared that, pursuant to the obligations imposed by the Tennessee Valley Authority Act of 1933 as amended, Municipality's operation of a municipal electric distribution system and Authority's wholesale service thereto are undertaken primarily for the benefit of ratepayers and that Municipality shall receive from the operation thereof for the benefit of its General Fund, to be used for any permissible municipal purpose, only (a) a return on any investment made from general funds in the electric system, and (b) an amount in lieu of taxes, representing a fair share of the cost of government properly to be borne by such system. In accordance with these principles, which are mutually recognized as of the essence of this agreement, Municipality agrees to operate its electric system and to maintain its financial accounts and affairs in full and strict accordance with the provisions of this Power Contract.

Municipality further agrees from time to time to supply Authority promptly with such information in respect of its electrical property and operations as Authority may reasonably request, including, not later than the first day of September of each year, a complete report, in such form as may be requested, of the transactions of the electric department for the preceding year ending June 30 and of the assets and liabilities of its electric department as of June 30.

14. Use of Lines for Transmission Purposes. Authority is hereby granted the right, privilege and authority to use all electric lines of Municipality, to the extent of their capacity in excess of the requirements of Municipality, for the purpose of transmitting electric energy to other municipalities, public agencies, or cooperatives which may desire to purchase power at wholesale from Authority. Authority shall be obligated to pay Municipality the additional cost, including additional fixed charges and operating and maintenance costs, imposed on Municipality by permitting such use of its facilities by Authority, and to indemnify and save Municipality harmless from any loss, damage, injury, or casualty to persons or property caused by Authority's exercise of such permitted use.

15. Waiver of Defaults. Any waiver at any time by either party hereto of its rights with respect to any default of the other party and/or with respect to any other matter arising in connection with this contract shall not be considered a waiver with respect to any subsequent default or matter.

16. Contract Not Transferable. Neither this contract nor any interest herein shall be transferable or assignable by Municipality without the consent of Authority.

IN WITNESS WHEREOF, the parties hereto have caused this instrument to be executed by their duly authorized officers, as of the day and year first above written.

Charge for energy in excess of 360 times the total demand as hereinafter defined shall be subject to a reduction of 0.5 mill per kilowatt-hour from the otherwise applicable rate.

DETERMINATION OF DEMAND

The demand for any month for which determination is made shall be defined as the highest average load measured in kilowatts during any 60 consecutive minute period of the month, but, at the Authority's option, when the power factor is found to be lower than 85 percent, the demand shall be defined as 85 percent of the highest average kilovolt-amperes measured during any 60 consecutive minute period of the month.

MINIMUM MONTHLY BILL

Ninety cents per kilowatt of demand, but in no case shall the minimum bill be less than the charge for 60 percent of the highest demand occurring during any month within the previous consecutive twelve-month period.

ALLOWANCE FOR SALES TO RESIDENTIAL CUSTOMERS

Authority will adjust bill so that the energy charge shall be 2 mills per kilowatt-hour for at least so much energy as may be sold by Distributor under the residential resale schedule at 4 mills per kilowatt-hour.

SINGLE-POINT DELIVERY

The above rates are based upon the supply of service through a single delivery and metering point, and at a single voltage. Separate supply for the same customer at other points of delivery, or at different voltage, shall be separately metered and billed.

Standard Residential Rate - Schedule B-1

AVAILABILITY

Available for domestic use to all residential customers served from local alternating current distribution systems. Service under the Standard Residential Rate shall apply only to electric service in a single private dwelling and its appurtenances, the major use of which is for lighting and household appliances, for the personal comfort and convenience of those residing therein. Private dwellings in which space is occasionally used for the conduct of business by a person residing therein will be served under the Standard Residential Rate. Where a portion of a dwelling is used regularly for the conduct of business, the electricity consumed in that portion so used will be separately metered and billed under the appropriate Basic Lighting and Power Rate. If separate circuits are not provided by the customer, the entire premises shall be classified as nonresidential and billed accordingly. The Standard Residential Rate shall not apply to service to institutions such as clubs, fraternities, orphanages or homes; recognized rooming or boarding houses; the space in an apartment or other residential building primarily devoted to use as an office or studio for professional or other gainful purposes.

CHARACTER OF SERVICE

SEASONAL SERVICE

Customers who contract for service on a seasonal basis shall pay the above rates plus 10 per cent. For such customers the "Minimum Monthly Bill" provided above shall not apply. Instead, such customers shall pay a minimum monthly bill of \$5.00 so long as service is cut in, provided that such customers shall pay a minimum annual bill of \$6.00 per kw of the maximum demand established and shall pay in addition the actual cost of cut-ins and cut-outs in excess of one of each per year.

DETERMINATION OF DEMAND

The Distributor will measure the demands of all customers having a connected load in excess of 10 kilowatts. Demand measurement shall be made by suitable instruments at the point of delivery. The demand for any month shall be defined as the highest average load measured in kilowatts during any 30 consecutive-minute period of the month, but at Distributor's option, when the power factor is found to be lower than 85 percent, the demand shall be defined as 85 percent of the highest average kilovolt-amperes measured during any 30 consecutive-minute period of the month.

CONTRACT REQUIREMENT

Customers whose demand exceeds 20 kilowatts will be required to execute contracts for a minimum term of one year which may provide for minimum charges in excess of those described herein.

STANDARD STREET LIGHTING RATE - Schedule B-5.1

AVAILABILITY

Available for street-lighting systems, including street lighting, single systems, and roadway and park lighting, for a term of not less than one year.

CHARACTER OF SERVICE

Alternating-current service, either series or multiple system or in combination at option of Distributor.

RATE

The rate for this service consists of two parts, as follows:

I. Investment Charge

The annual investment charge (for the cost of operation, maintenance, taxes, and depreciation, and for return on investment) shall be 12 percent of the investment in the street-lighting system, determined as set forth below. Such charge shall be adjusted under the circumstances set forth below. This charge will be recomputed on July 1 of each year and one-twelfth of the total annual charge so computed will be billed customer monthly.

II. Energy Charge

First.....	250 kwh consumed per month at 3	cents per kwh
Next.....	750 " " " " " 2	" " "
Next	1,000 " " " " " 1	cent " "
Excess over.....	2,000 " " " " " 0.8	" " "

METHOD OF DETERMINING DISTRIBUTOR'S INVESTMENT

The investment in property and equipment used as a basis for the investment charge contained in this schedule shall consist of the cost of such property and equipment, including the full amount shown in the plant account entitled "Street Lighting and Signal Systems". If any part of the street-lighting system has not been built at the expense of Distributor, a deduction shall be made from the annual investment charge in the amount of 6 percent of the investment in such part.

If the cost of any part of the street-lighting system operated by the electricity department of Distributor is carried on the books of other municipalities or agencies or other municipal departments of Distributor, retirements and additions to such property will be made by the electricity department and charged to the department upon the books of which the cost of the property is reflected, or to the other agency owning such property. The investment charge applicable to this portion of the system will be 2 percent per year.

LAMP RENEWALS

Distributor shall keep a record of the number and type of lamp replacements and customer shall be billed monthly for the replacements during the month at actual cost to Distributor, including appropriate overheads.

RELOCATION OF LAMPS

Distributor shall, at the request of customer, relocate or change existing equipment. Customers shall reimburse Distributor for such changes at actual cost, including appropriate overheads.

METERING

All energy consumed under this schedule shall be metered excepting installation where, in the opinion of Distributor, metering would be impracticable.

When the consumption is metered, the meters shall be installed in or connected to the lighting circuit and the billing shall include the energy delivered to and consumed in all circuits and equipment used exclusively for street lighting purposes. If more than one meter is used, the readings shall be consolidated for billing purposes.

When the energy is not metered and also when a meter reading is found to be in error, the consumption for billing purposes shall be computed from the rated capacity of the lamps plus 5 percent for losses, multiplied by the number of hours of use.

PAYMENT

The rates included herein are net, the gross rates being 10 percent higher. In the event the current monthly bill is not paid within 10 days from date of bill, the gross rates shall apply.

Service under this classification is subject to Rules and Regulations of Distributor

SCHEDULE OF TERMS AND CONDITIONS

1. Measurement of Demand, Energy, and Power Factor: Demand and energy measurements shall be made by suitable instruments at the point or points of delivery or, at the option of Authority, at such other point or points as shall be determined by Authority to be convenient. In the event measurements are effected at some location other than at point or points of delivery, suitable correction shall be made by Authority of the amounts determined at such location so that the adjusted amounts will so far as possible reflect the exact quantities delivered at the actual point or points of delivery.

Authority will, at its own expense, install and maintain the necessary metering equipment for measuring the maximum demand and the amount of energy furnished Municipality at each point of delivery. Should such metering equipment fail or be found inaccurate the maximum demand and amount

DEMENT - MERIDIAN

of energy delivered will be estimated by Authority from the best information available. Authority may also, at its option, from time to time measure power factor. Municipality shall permit the use of its housing facilities, ducts, and supports for Authority's metering equipment.

Municipality shall have the right to install, equip, and maintain at its own expense suitable instruments for measuring demand, power factor, and energy adjacent to Authority's measuring devices for purposes of a check on said devices, and Authority agrees that it will so far as practicable provide suitable facilities for the installation of such metering devices.

2. Metering Equipment Tests: Authority will, at its own expense and in the presence of representatives of Municipality, make periodical tests and inspections of its metering equipment in order to maintain a high standard of accuracy. Authority will make additional tests or inspections of its metering equipment at the request of Municipality, and in the presence of representatives of Municipality. If such additional tests show that the meter is accurate within two percent (2%) slow or fast, no adjustment will be made in Municipality's bill and the testing charge will be paid by Municipality. In case the additional tests show the meter to be in excess of two percent (2%), fast or slow, an adjustment shall be made in the Municipality's bill over a period of not over thirty (30) days prior to date of such test, and cost of making tests shall be borne by Authority.

3. Municipality's Lines and Equipment — Ownership: All lines and substations from point or points of delivery (as defined in the contract of which these terms and conditions are a part), and all electrical equipment, except the metering equipment of Authority located on Municipality's side of such point or points of delivery, shall be furnished and maintained by Municipality.

4. Inspections: Authority shall have the right, but shall not be obligated, to inspect any installations before electricity is introduced or at any later time, and reserves the right to reject any wiring or equipment not in accordance with Authority's reasonable standards; but such inspection, or failure to inspect or to reject, shall not render Authority liable or responsible for any loss or damage resulting from defects in the installation of any electrical equipment, or from violation of the contract of which these terms and conditions are a part, or from accidents which may occur upon Municipality's premises.

5. Municipality's Responsibility for Authority's Property: All meters, service connections, and other equipment furnished by Authority shall be and remain the property of Authority. Municipality shall exercise proper care to protect the property of Authority on Municipality's premises and in the event of loss or damage to Authority's property arising from neglect of Municipality to exercise proper care of same the cost of necessary repairs or replacements shall be paid by Municipality.

6. Right of Access: Authority's identified employees shall have access to Municipality's premises at all reasonable times for the purpose of reading meters, and for testing, repairing, renewing, or replacing any or all equipment belonging to Authority.

7. Additional Load: The service connection, transformers, meters and equipment supplied by Authority for delivery of power to Municipality have definite capacity and no addition to Municipality's load in excess of such capacity shall be made except after reasonable notice to Authority. Failure to give such notice of additions to Municipality's load shall render Municipality liable for any injury or damage to persons or property caused thereby.

8. Municipality's Lines and Equipment — Standards: All lines and equipment of Municipality must conform to accepted modern practice, as exemplified by the requirements of the National Electrical Safety Code and the National Electric Code.

9. Accounting and Handling of Funds: Municipality agrees:

(a) To administer its electric system as a separate department, to establish and maintain a separate fund for its revenues from electrical operations, and not to mingle funds or accounts with those of any other of its operations.

(b) To keep the general books of accounts of its electric system according to the system of accounts which has been applied by other municipalities purchasing electrical energy from Authority, and to allow the duly authorized agents of Authority to have free access at all reasonable times to all books and records relating to electric system operations. Authority will render such advisory accounting service in the setting up and administering of such accounts as Authority may deem reasonable.

(c) To furnish promptly to Authority such monthly operating and financial statements relating to electric system operations as may reasonably be requested by Authority. In the event of failure to furnish promptly such operating and financial statements Authority, following written notification to Municipality of intention so to do, may with its own staff perform all work necessary to collect such data as are reasonably desired. Municipality agrees to reimburse Authority its actual expenses incurred including salaries, subsistence, and traveling expenses of personnel so engaged.

10. Financial and Accounting Policy. Municipality agrees to be bound by the following statement of financial and accounting policy:

(a) Municipality's Investment. For purposes hereof, Municipality's initial investment in the electric system shall be determined in accordance with the provisions of section 11 of the contract of which this Schedule of Terms and Conditions is a part. This initial investment shall be increased only as herein specifically provided and by the payment of moneys from the funds of Municipality (other than the electric fund) for the payment of debt incurred by or on account of the electric system or otherwise for the benefit of the electric system.

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

(b) Maximum Return. Adjustments in Municipality's investment in the electric system shall be made as necessary from time to time and in any case at the end of each fiscal year. Municipality shall receive a return on this investment each month not to exceed one-half ($\frac{1}{2}$) of one (1) percent per month, computed on the basis of the investment as of the last day of the month next preceding. In the event revenues of the electric system sufficient for the payment of such return are not available, an amount equal to the portion of the computed return not paid shall be added to Municipality's investment at the end of each fiscal year.

(c) Payments in Lieu of Taxes. Municipality may take from the electric department revenues or funds for the general funds of Municipality an amount in lieu of taxes (representing a fair share of the cost of government properly to be borne by its electric distribution system) to be determined subject to the terms and conditions hereinafter stated.

(1) To the extent surplus revenues are available after the satisfaction of all items set forth in subsections (a) through (d) of section 9 of the Power Contract, Municipality may take from the electric department revenues or funds for the general funds of Municipality an amount calculated by applying the prevailing municipal property tax rate to the value of the property used in electric operations within the municipal limits.

(2) To the extent surplus revenues are available after the satisfaction of all items set forth in subsections (a) through (d) of section 9 of the Power Contract, Municipality may take from the electric department revenues or funds for the general funds of Municipality an amount calculated by applying the prevailing county and state tax rates to the value of the electric system; provided, however, that if Municipality shall, directly or indirectly, and voluntarily or otherwise, make any payment or payments out of electric system revenues or funds to the state and/or any political subdivision thereof other than Municipality in satisfaction of a claim or obligation for taxes or payments in lieu of taxes, or in consideration of or as compensation for franchises or operating rights, then and in such event, and whether or not such payment or payments be measured by taxes or tax values at any time levied or assessed, the county and/or state tax equivalents to which Municipality would otherwise be entitled under this subsection (2) shall be reduced by the amount of such payment or payments; and provided further, that no such payment shall operate to reduce the tax equivalents to which Municipality is entitled under subsection (1) immediately preceding. It is understood and agreed, however, that Municipality shall not, in respect of any year, voluntarily make or agree to make any payment or payments of the kind referred to in this subsection when such payment or payments, either separately or in conjunction with all other similar payments in respect of that year, voluntary or otherwise, would exceed the amount derived by applying the prevailing county and state tax rates to the value of the electric system.

(3) For the purposes of (1) and (2) above the value of the electric system or any part thereof shall be the book cost of the tangible plant attributable to the system or to such part thereof, less the proportion of the depreciation reserve properly allocable thereto as of the date of determination, except that the value of the generating plant and site shall be Seventy-three Thousand Five Hundred Dollars (\$73,500); provided, however, that said value of the generating plant and site shall be reduced at the rate of 5% per year regardless of whether or not said generating plant or any part thereof is removed or disposed of in any way. The said value of the electric system shall be determined as of the beginning of each taxable year.

(d) Payment by Electric Department for Services. The electric department shall pay the salaries and wages of those persons who devote their full time to the operation of the electric system, and an equitable portion of the salaries and wages of those persons devoting part time to the operation of the electric system.

(e) Withdrawals and Reinvestments by Municipality. If at any time Municipality should withdraw from the funds of the electric department of Municipality's general funds amounts in excess of the allowable return on investment and the tax equivalent, Municipality's investment shall be reduced in the amount of such excess withdrawals. Withdrawals of Municipality's investment shall be made only at such times and in such amounts as will not interfere with the efficient operations of the electric system, including requirements for expansion. In no event shall the excess withdrawals by Municipality exceed the amount of Municipality's investment in the electric system. If at any time Municipality should fail to withdraw the full amount due on account of its investment, that part or whole of the return which is not withdrawn shall be added to Municipality's investment to the extent such amount is needed by and used in the operation of the electric system. In the event funds of the electric system sufficient for the payment of said tax equivalents are not available, the portion of the computed amount not paid shall be accrued in a separate non-interest-bearing account and shall be paid to the general funds at such time as the funds of the electric department will permit. In no case shall such accrued tax equivalents be added to Municipality's investment or in any way subjected to the payment of a return or interest.

(f) Publication of Statement of Municipality's Investment. Municipality shall publish at the close of each fiscal year a balance sheet and an income and expense statement covering the operation of its electric system. Copies thereof shall promptly be forwarded to Authority at its office at Wilson Dam, Alabama.

11. Billing: Payment for energy used in any monthly period shall be due fifteen (15) days after Authority's meter reading date or five (5) days after receipt of bill from Authority, whichever is later. Upon failure of Municipality to pay for the energy used in any monthly period within sixty (60) days after due date, Authority shall have the right, upon reasonable notice, to discontinue the supply of energy and refuse to resume delivery so long as any part thereof remains unpaid. Discontinuance of supply under this section will not relieve Municipality of its liability for the agreed minimum monthly payment during the time the supply of energy is so discontinued. To any amount remaining unpaid fifteen (15) days after the due date, there shall be added a penalty of one percent (1%) and an additional one percent (1%) shall be added for each succeeding thirty (30) days period until the amount is paid in full. All payments shall be made to Authority at its

MINUTE BOOK No. 14, CITY OF OXFORD

office at Wilson Dam, Alabama, or at such other place as Authority may from time to time designate.

12. Interruption of Service. Authority will furnish energy as agreed upon continuously so far as reasonable diligence will permit; but Authority, its officers, agents, or employees shall not be liable for damages when for any reason suspensions of or disturbances to the operation of the generation and transmission system serving Municipality or any part thereof interfere with or interrupt the delivery of electric energy to Municipality, not shall such an interruption or interference constitute a breach of this contract on the part of Authority, but Authority shall make appropriate adjustments of the demand and energy charges in the event of an interruption.

13. Lower Rates to Other Municipalities. If at any time during the term of this agreement Authority should enter into an agreement to supply electricity to any municipality, municipal division or department, or cooperative, at a rate schedule lower than applicable to Municipality, and such lower rate schedule shall not be justified in the judgment of Authority by different conditions of service, making the cost to such other municipality, municipal division or department, or cooperative relatively less than to Municipality, such lower rate shall be made available to Municipality so long as such lower rate schedule shall be given to such other municipality, municipal division or department, or cooperative, while this contract is in force.

14. Development Surcharge. In order to maintain Municipality's revenues in the development period, Municipality may impose a temporary surcharge upon those classes of consumers subject to a surcharge under the provisions of the Schedule of Rates. Municipality may initially determine and may from time to time vary such surcharge with the understanding, however, that all surplus revenues (as defined in the contract of which this schedule is a part) shall serve as the basis for the reduction or elimination of such surcharge, and that no surcharge shall be increased unless necessary to place Municipality's electric system on a self-supporting and financially sound basis. The surcharge shall be based on a straight percentage of bills, and shall apply uniformly to all classes as to which surcharges are authorized.

15. Reduction in Rates. Authority agrees to reduce the wholesale rates herein fixed whenever, in the opinion of the Authority, reductions in the cost of generating and transmitting energy make feasible such reductions in rates; the intention of the parties being that Municipality shall participate in the benefits of reductions in the cost of generation and transmission.

16. Adjustment of Wholesale Rate. Notwithstanding any other provision of this contract, Wholesale Power Rate Schedule A which is attached hereto shall be subject to adjustment to reflect substantial changes (excluding effects of abnormal stream flow conditions) from the five-year period ending June 30, 1945, in the level of Authority's operating or other costs, per kilowatt or per kilowatt-hour, for hydro power, for fuel power, or for transmission, or substantial changes in its proportionate use of hydro, steam, and purchased power.

Upon the request of either party at any time and from time to time, Municipality and Authority shall meet and endeavor to agree upon a revision of said Schedule A which will most desirably reflect such changed conditions. In the event Authority and Municipality cannot agree upon such a revision, the energy charge presently set forth in Schedule A shall be changed in the same proportion (or in such lesser proportion as Authority or Municipality may specify in the case of an upward or downward adjustment, respectively) as that by which the average of the Wholesale Price Index for the United States compiled by the Department of Labor for the fiscal year ending June 30 in which the request for a rate adjustment was made hereunder exceeds 125 percent or is less than 75 percent of the average for the five-year period ending June 30, 1945, and the demand charge presently set forth in Schedule A shall be changed in the same proportion (or in such lesser proportion as Authority or Municipality may specify in the case of an upward or downward adjustment, respectively) as that by which the average of the Engineering News-Record Construction Cost Index for the five years ending with said fiscal year exceeds 125 percent or is less than 75 percent of the average for the five-year period ending June 30, 1945, such changes in rates to become effective, unless otherwise agreed, as of the beginning of the fiscal year following that in which the request for a rate adjustment was made; provided, however, that Municipality, recognizing that a rate adjustment clause is included in all power contracts between Authority and the municipalities and cooperatives distributing its power, and that, although such clauses are not identical, it is desirable that insofar as possible the same rate schedule be made applicable throughout the area in which the power produced by the Tennessee Valley Authority is distributed, agrees that if a revised schedule becomes applicable to a majority of the municipal and cooperative distributors of TVA power, and such revised schedule would not result in an increase in the average cost per kilowatt-hour for Municipality greater than could result from rates determined as provided above, the schedule so agreed upon shall be substituted for the otherwise applicable schedule, effective at the time agreed upon with such majority of municipal and cooperative distributors for application to them.

17. Voltage and Load Fluctuations Caused by Municipality. Electric service must not be used in such a manner as to cause unusual fluctuations or disturbances on Authority's system. Authority may require Municipality at its own expense to install suitable apparatus to reasonably limit such fluctuations or disturbances.

18. Balancing of Loads. Municipality shall at all times take and use energy in such manner that the load will be balanced between phases to within nominally ten percent (10%). In the event of unbalanced polyphase loads, Authority reserves the right to require Municipality at its own expense to make the necessary changes to correct this condition or to compute the billing demand on the assumption that the load of each phase is equal to that on the greatest phase.

19. Notice of Trouble. Municipality shall notify Authority immediately should the service be unsatisfactory for any reason or should there be any defects, trouble, or accidents affecting the supply of electricity. Such notices, if oral, should be confirmed in writing.

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

20. Submetering. Municipality shall not sell electricity for submetering or resale.

21. Conflict. In case of conflict between any express contractual provision or any provision of the Schedule of Rates and these terms and conditions, the contract or Rate Schedule shall apply.

SCHEDULE OF RULES AND REGULATIONS

1. Application for Service: Each prospective Customer desiring electric service may be required to sign Distributor's standard form of application for service or contract before service is supplied by the Distributor.

2. Deposit: A deposit or suitable guarantee approximately equal to twice the average monthly bill may be required of any Customer before electric service is supplied. Distributor may at its option return deposit to Customer after one year. Upon termination of service, deposit may be applied by Distributor against unpaid bills of Customer, and if any balance remains after such application is made, said balance shall be refunded to Customer.

3. Point of Delivery: The point of delivery is the point, as designated by Distributor, on Customer's premises where current is to be delivered to building or premises. All wiring and equipment beyond this point of delivery shall be maintained by Customer.

4. Customer's Wiring - Standards: All wiring of Customer must conform to Distributor's requirements and accepted modern standards, as exemplified by the requirements of the National Electrical Safety Code and the National Electric Code.

5. Inspections: Distributor shall have the right, but shall not be obligated, to inspect any installation before electricity is introduced or at any later time, and reserves the right to reject any wiring or appliances not in accordance with Distributor's standards; but such inspection or failure to inspect or reject shall not render Distributor liable or responsible for any loss or damage resulting from defects in the installation, wiring, or appliance, or from violation of Distributor's rules, or from accidents which may occur upon Customer's premises.

6. Underground Service Lines: Customers desiring underground service lines from Distributor's overhead system must bear the excess cost incident thereto. Specifications and terms for such construction will be furnished by Distributor on request.

7. Customer's Responsibility for Distributor's Property: All meters, service connections, and other equipment furnished by Distributor shall be, and remain, the property of Distributor. Customer shall provide a space for, and exercise proper care to protect the property of Distributor on its premises; and in the event of loss or damage to Distributor's property, arising from neglect of Customer to care for same, the cost of the necessary repairs or replacements shall be paid by Customer.

8. Right of Access: Distributor's identified employees shall have access to Customer's premises at all reasonable times for the purpose of reading meters, testing, repairing, removing, or exchanging any or all equipment belonging to Distributor.

9. Billing: Bills will be rendered monthly and shall be paid within ten (10) days from date of bill at the office of Distributor. Failure to receive bill will not release Customer from payment obligation. Should bills not be paid as above, Distributor may at any time thereafter, upon five (5) days' written notice to Customer, discontinue service. Bills paid on or before the final date of payment shall be payable at the net rates, but thereafter the gross rates shall apply, as provided in the Schedule of Rates and Charges. Should the final date for payment of the bill at the net rates fall on a Sunday or holiday, the business day next following the final date will be held as a day of grace for delivery of payment. Net rate remittances received by mail after the time limit for payment of said net rates will be accepted by Distributor if the incoming envelope bears United States Post Office date stamp of the final date for payment of the net amount or any date prior thereto.

10. Discontinuance of Service by Distributor: Distributor may refuse to connect or may discontinue service for the violation of any of its Rules and Regulations, or for violation of any of the provisions of the Schedule of Rates and Charges, or of the application of Customer or contract with Customer. Distributor may discontinue service to Customer for the theft of current or the appearance of current theft devices on the premises of Customer. The discontinuance of service by Distributor for any causes as stated in this rule does not release Customer from his obligation to Distributor for the payment of minimum bills as specified in application of Customer or contract with Customer.

11. Reconnection Charge: Whenever service has been discontinued by Distributor, as provided above, or a trip is made for the purpose of discontinuing service, a charge of not less than One Dollar (\$1.00) may be collected by Distributor before service is restored.

12. Termination of Contract by Customer: Customers who have fulfilled their contract terms and wish to discontinue service must give at least three (3) days' written notice to that effect, unless contract specified otherwise. Notice to discontinue service prior to expiration of contract term will not relieve Customer from any minimum or guaranteed payment under any contract or rate.

13. Service Charges for Temporary Service: Customers requiring electric service on a temporary basis may be required by Distributor to pay all costs for connection and disconnection incidental to the supplying and removing of service. This rule applies to circuses, carnivals, fairs, temporary construction, and the like.

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

14. Interruption of Service: Distributor will use reasonable diligence to provide a regular and uninterrupted supply of current, but in case the supply of current should be interrupted or disturbed for any cause, Distributor shall not be liable for damages resulting therefrom.

15. Voltage Fluctuations Caused by Customer: Electric service must not be used in such a manner as to cause unusual fluctuations or disturbances to Distributor's system. Distributor may require Customer, at his own expense, to install suitable apparatus which will reasonably limit such fluctuations.

16. Additional Load: The service connection, transformers, meters, and equipment supplied by Distributor for each Customer have definite capacity, and no addition to the equipment or load connected thereto will be allowed except by consent of Distributor. Failure to give notice of additions or changes in load, and to obtain Distributor's consent for same, shall render Customer liable for any damage to any of Distributor's lines or equipment caused by the additional or changed installation.

17. Standby and Resale Service: All purchased electric service (other than emergency or standby service) used on the premises of Customer shall be supplied exclusively by Distributor, and Customer shall not, directly or indirectly, sell, sublet, assign, or otherwise dispose of the electric service or any part thereof.

18. Notice of Trouble: Customer shall notify Distributor immediately should the service be unsatisfactory for any reason, or should there be any defects, trouble, or accidents affecting the supply of electricity. Such notices, if verbal, should be confirmed in writing.

19. Non-standard Service: Customer shall pay the cost of any special installation necessary to meet his peculiar requirements for service at other than standard voltages, or for the supply of closer voltage regulation than required by standard practice.

20. Meter Tests: Distributor will, at its own expense, make periodical tests and inspections of its meters in order to maintain a high standard of accuracy. Distributor will make additional tests or inspections of its meters at the request of Customer. If tests made at Customer's request show that the meter is accurate within two percent (2%), slow or fast, no adjustment will be made in Customer's bill, and the testing charge of One Dollar (\$1.00) per meter will be paid by Customer. In case the test shows meter to be in excess of two percent (2%) fast or slow, an adjustment shall be made in Customer's bill over a period of not over thirty (30) days prior to date of such test, and cost of making test shall be borne by Distributor.

21. Extensions and Additions to Street Lighting Systems: Distributor shall, at the request of a customer for street lighting service, provide additions and extensions to the street lighting system, provided that if, in any year ending June 30, Customer requests additions or extensions with a total cost in excess of five percent (5%) of the investment in street lighting property and equipment, Customer may be required to finance such excess cost.

22. Billing Adjusted to Standard Periods: The demand charges and the blocks in the energy charges set forth in the rate schedules are based on billing periods of approximately one month. In the case of the first billing of new accounts (temporary service, cotton gins, and other seasonal customers excepted) and final billings of all accounts (temporary service excepted) where the period covered by the billing involves fractions of a month, the demand charges and the blocks of the energy charge will be adjusted to a basis proportionate with the period of time during which service is extended.

23. Athletic Field Lighting: Athletic field lighting installations not owned or maintained by Distributor may be served on an off-peak basis in accordance with the provisions of the street lighting rate. For athletic field lighting the investment charge provided for in the street lighting rate will be based on the Distributor's investment in furnishing and installing the equipment devoted to supplying the athletic field lighting service. Energy will be billed in accordance with the street lighting schedule and each installation will be considered a separate customer for billing purposes. Customer's bills rendered in accordance with this provision shall be subject to any surcharge and amortization charge applied by Distributor. The off-peak period shall be determined by Distributor, but in no case shall it commence earlier than 7 p.m. Customer may be permitted to use up to ten percent (10%) (not to exceed 10 kilowatts) of the total installed lighting capacity prior to the commencement of the off-peak period, such use to be considered off-peak for billing purposes. In the event customer fails to restrict service in accordance with these requirements, he shall be billed under the appropriate lighting and power rate.

24. Scope: This Schedule of Rules and Regulations is a part of all contracts for receiving electric service from Distributor, and applies to all service received from Distributor, whether the service is based upon contract, agreement, signed application, or otherwise. A copy of this schedule, together with a copy of Distributor's Schedule of Rates and Charges, shall be kept open to inspection at the offices of Distributor.

25. Revisions: These Rules and Regulations may be revised, amended, supplemented, or otherwise changed from time to time, without notice. Such changes, when effective, shall have the same force as the present Rules and Regulations.

26. Conflict: In case of conflict between any provision of any rate schedule and the Schedule of Rules and Regulations, the rate schedule shall apply.

On motion made, seconded and passed, it was ordered that this Board do now adjourn until the first Tuesday in June, 1950 sine die.

The Mayor and Board entered into a discussion of the present need of cash on hand for current expenditures of the City government. It was brought out that certain revenues and taxes would be available within the near future to take care of the City's current expenditures; however, it was decided that the sum of \$25,000.00 would be necessary in order for the City to meet immediately its current obligations and that a loan for such amount should be negotiated. On motion of Ben J. Hilbun, seconded by Alderman T. E. Combs, it was moved that the Mayor be authorized to negotiate a loan in the maximum amount of \$25,000.00 for the City, and that he be authorized further to execute the necessary promissory notes or any other paper to secure the said indebtedness. Motion was carried unanimously.

* * * * *

Aldermen T. E. Combs made a motion that the City issue \$100,000.00 in bonds to pay for the large number of special improvements authorized and being constructed, and that the City Attorney be instructed to prepare the necessary papers and initiate the necessary procedure. On motion made, seconded and passed unanimously, it was ordered that Bill Inmon be employed by the City of Oxford as firemen for night duty. It is further ordered that said fireman be paid \$150.00 per month.

The Mayor and Board of Aldermen,
 City of Oxford,
 Oxford, Mississippi

Gentlemen:

I herewith tender my resignation to you as a member of the Board of Trustees of the Oxford Schools.

Through these past years I have very much enjoyed my work as a member of this Board. The courtesies and considerations that I have received from you as a member of the Board have been most gratifying. I am sure that my successor will find the situation to be the same.

I should like to express my thanks to the other members of the Board, and particularly, Mr. Will Lewis, President, for their faithful performance of their duties in behalf of better schools for Oxford. Mr. R. E. Keye, Superintendent, has been a great help to us all.

Primarily, my reason for the action that I take in this letter is the fact that I no longer have children in attendance in our schools. Try as one might, it is most difficult to maintain the same continuing interest in the schools that a trustee must have when the school is not directly connected with the home.

Further, it appears that our City is about to begin a program of school expansion, and I feel that it would be better for a new Board member, with children in school, to begin with and follow through on this program.

Again, let me express my thanks to you.

With best wishes for better schools for Oxford,
 I am

Sincerely yours,

Howard Hodge

TO THE HONORABLE MAYOR AND BOARD OF ALDERMEN OF THE CITY OF OXFORD, MISSISSIPPI.

Come T. E. Avent, a resident citizen of Oxford, Mississippi and Oxford Homes, Inc., a Mississippi corporation, by their attorney, J. W. Price, and present herewith their petition to amend the map and plat of Avent Acres Subdivision heretofore approved by this honorable body, a copy of which is recorded in Plat Book 1 at Page 10, records in the office of the Chancery Clerk of Lafayette County, Mississippi and for grounds therefor would show as follows:

The courses, distances and locations of lots and streets as designated on the map and plat of Avent Acres Subdivision heretofore offered and filed with the City of Oxford, Mississippi and with the Chancery Clerk of Lafayette County, Mississippi, cannot be properly laid out on the ground because of topography variance before and after grading done in said Subdivision. Therefore, the streets, avenues and other public utilities constructed and installed by the City of Oxford, Mississippi are not in the position, after grading, where they did appear prior thereto. A survey on the ground subsequent to grading shows that said lots, streets and avenues, and the overall boundaries of said subdivision are as shown on the revised map and plat of Avent Acres Subdivision presented herewith, and that parts of the lots on the south side of said subdivision are within a portion of Washington Avenue (unopened), which will remain unopened because the other portion is contained within St. Peter's Cemetery and the negro cemetery.

Your petitioners, together with the City of Oxford as owner of the streets indicated on said original map and Washington Avenue, own all the property described in the revised map and it is to the best interest of all parties to settle the question of property lines and street boundaries before other parties become interested therein.

Petitioners therefore pray that this honorable body, after considering the matter fully according to law, order that said subdivision as set forth in the revised plat and map submitted herewith be laid out in streets, blocks and lots as authorized by law, the said plat and map approved and the land therein included made an addition as a subdivision of said City and that your Mayor be authorized to accept and sign said map and execute such other instruments and acts on behalf of the City of Oxford, as may be necessary to vest title to Avent Street, Williams Avenue, Sisk Avenue, Chandler Avenue, Hilbun Avenue and Combs Street, as said Streets and Avenues are designated on said revised map, in said City of Oxford, Mississippi, and to vest title to Lots 1 to 54, inclusive, as said lots are designated on said revised map in said Oxford Homes, Inc., and to vest title to Lots 55 to 152, inclusive, as said lots are designated on said revised map in the said T. E. Avent.

Respectfully submitted,

/s/ T. E. Avent and Oxford Homes, Inv.

There came on for discussion the matter of the need for the City to issue special improvement bonds to pay for certain special improvements which have been done over the last few months and further for those to be done during the next few months. The City Engineer estimated that it would be necessary to issue such bonds in the minimum amount of \$200,000.00. The City Attorney stated to the Mayor and Board that it would be necessary for there to be an agreement between the Mayor and Board and himself relative to a fee for the handling of said issue. He further stated that the usual and customary fee was in the amount of 1% of the bond issue. After considerable discussion it was agreed by and between the Mayor and Board and the City Attorney that the City Attorney would handle said issue for a fee of One Thousand Dollars (\$1,000), it being understood and agreed that the City would take care of all expenses of the issue, including costs of printing the bonds, court costs, the fee of the State bond attorney, the fee of the usual approving attorneys, Charles & Trauernicht of St. Louis, Mo., and all other usual costs. All members of the Mayor and Board of Aldermen agreed to the foregoing arrangement, as did the City Attorney.

The remainder of the time of the meeting was spent in equalizing the tax roll.

Upon motion made, seconded and passed, it was ordered that this Board do now recess until 7 o'clock P. M. Tuesday, October 10, 1950.

To The County or Municipal
 Tax Collector Addressed:

Dear Sir:

Sometime ago we forwarded to you a notice of a Privilege Tax Assessment against L. M. Berry Company for the privilege of soliciting advertising-commercial as provided for under Section 6, Chapter 137 of the Laws of 1944, known as the Local Privilege Tax Law of 1944. As previously advised, the principal activity of L. M. Berry Company is the solicitation of advertising to be incorporated in the classified section (yellow section) of the telephone directories distributed by the Southern Bell Telephone and Telegraph Company.

We have had numerous replies from the various tax collectors throughout the state to the effect that they have made effort to collect the tax but that they have been unable to do so.

We have been advised by attorneys representing L. M. Berry Company that they refuse to pay the privilege tax. It is, therefore, necessary that suit be filed against L. M. Berry Company in an effort to collect this tax.

Under the terms of House Bill No. 1063, of the Laws of 1950, which is an act to amend Section 202, Chapter 137, Laws of 1944, (Volume 8 Advance Sheet General Acts Regular Legislative Session, 1950, Page 52) the State Tax Collector is given the authority to bring any suits or actions in any court of competent jurisdiction for the purpose of collecting such tax. I have been advised, however, that under the terms of such statute, I should receive a request from you authorizing me to file suit and assist you in collecting such tax. Therefore, I enclose herewith a letter directed to me to be signed by you requesting that I file suit and assist you in collecting this tax, together with the penalties thereon.

Before filing such suit on behalf of your County or Municipality it is urgent that I be advised whether or not the Board of Supervisors (of counties) or Board of Aldermen (of Municipalities) has adopted the Local Privilege Tax Law of 1944, and, if so, I will need two certified copies of the minutes of such board, showing the adoption of such law. Will you please furnish me such certified copies with the letter authorizing suit.

DEMENT - MERIDIAN

I am quite eager to file this suit immediately, therefore, I would appreciate your immediate attention to this matter.

The Mayor and Board after considering the contents of the letter and the remarks of the City Tax Collector endorsed the idea of the City Tax Collector forwarding two certified copies of the City's ordinance adopting the Local Privilege Tax Law of 1944, and writing the State Tax Collector a letter in the following form:

Mrs. Thomas L. Bailey
State Tax Collector
P. O. Box 290
Jackson, Mississippi

Dear Madam:

This is to advise you that I am not actively engaged in a bona fide effort to collect a Privilege Tax Assessment against L. M. Berry Company for the privilege of soliciting advertising-commercial as provided for under Section 6, Chapter 137 of the Laws of 1944, known as the Local Privilege Tax Law of 1944, and that I have not instituted any suit for such purpose.

I do hereby request you to assist me in making the collection of the tax due, together with penalties thereon, and I do hereby request you and authorize you to file suit in any court of competent jurisdiction and to do any and all other things which might be necessary for the purpose of collecting such tax.

I also enclose herewith two certified copies of the minutes of this taxing agency showing the adoption of the Local Privilege Tax Law of 1944.

Yours very truly,

City Clerk and Tax Collector

Mr. Harrison presented a bill from The Southern Line Construction Company for work done on The Transmission Line in the amount of \$1,500.00. Motion was made, seconded and passed unanimously and it was ordered that a warrant be issued for the above amount for payment of said bill.

There came on for discussion the fact that greatly increased costs had taken place in the operation of the City's combined waterworks and sewerage system and further that the charge for water and sewerage services furnished the consumer by the City were not adequate for the waterworks and sewerage system to be a self supporting operation of the City. It was pointed out by Aldermen Hilbun, Chandler and Combs that the minimum water rate for the first 3,000 gallons of water for each needed service unit was in the amount of \$1.50 and that the City made no charge whatsoever to the consumer for a sewer service charge. The Discussion indicated a consensus that the minimum water rate for the first 3,000 gallons of water should be fixed at \$2.00 for each family unit and/or each place of business, and that a \$1.00 sewer service charge should be placed on each family unit and/or each place of business which occupied property connected to the City Sewer system, both of the above charges to be on monthly basis and to begin on January 1, 1951. Thereupon, the following motion was made by Alderman Hilbun and seconded by Alderman Chandler: That there be a charge in the minimum rate for the first 3,000 gallons of water from \$1.50 for each metered consumer to a \$2.00 minimum for each family unit, and/or each place of business and further that a \$1.00 sewer service charge be placed on each family unit and/or each place of business utilizing the services of the Municipal Sewer System, and further that this new and additional charge on water and new charge on sewer service take effect as of January 1, 1951. After a discussion of the motion, the Mayor put same to a vote and all Aldermen present voted in favor of the motion, and the Mayor declared the motion declared and adopted.

A petition for certain special improvements on Price Street from its intersection with Sivley Street and thence in a Westerly direction a distance of 594 feet to the end of Price Street, the original of which is on file in the office of the City Clerk, was presented by Messrs. B. O. Elliott and A. B. Cullen. After due consideration on motion of Alderman Chandler, seconded by Alderman Avent, the petition was unanimously approved and the City Attorney instructed to prepare the necessary resolutions to carry out the requests of the petitioners.

Alderman Chandler made a motion that an additional street light be placed in Pat Haley Hollow. Alderman Hilbun seconded the motion and it passed unanimously.

The following petition was presented by Mr. and Mrs. E. L. Hooker at a previous meeting of the Mayor and Board of Aldermen:

STATE OF MISSISSIPPI
COUNTY OF LAFAYETTE

April 10, 1951

P E T I T I O N

TO THE HONORABLE MAYOR AND THE BOARD OF ALDERMEN OF THE
CITY OF OXFORD, LAFAYETTE COUNTY, MISSISSIPPI:

Comes now your petitioner, E. L. Hooker, who would show unto the Board of Aldermen and the Mayor the following facts, to Wit:

1. That your petitioner is the owner of a lot of ground in the City of Oxford, which is Lot Number 64 of the Amadelle sub-division as that section of the city is shown on the city map on file the office of the Chancery Clerk of Lafayette County, Mississippi.

2. That your petitioner's ownership of the said lot is recorded in Deed Book No. 119 at page 311 in the office of the Chancery Clerk of Lafayette County Mississippi.

3. That, at some time during or prior to the summer months of 1950, the city of Oxford began construction of a street called PRICE street which street your petitioner understood and believed to be the northermost boundary line of the aforesaid lot no. 64 of the Amadelle subdivision.

4. That in the process of street construction, the city of Oxford did cause certain trees to be cut from land which your petitioner understood and believed to belong to him; and that in due course a complaint was made to the Mayor and the City Engineer.

5. That the Mayor and City Engineer did, at that time, show your petitioner the aforesaid map and did state that the trees which had been cut did not belong to your petitioner, but were rather the property of the city by virtue of the right-of-way rights provided in the deed granting PRICE street to the City.

6. That the City of Oxford continued to do construction work on PRICE street to the point of certain grading operations which resulted in clear indications that if allowed to continue to completion would effectively destroy any possible lot 64 frontage on N. Lamar street. That this loss of frontage on N. Lamar street would cause complete and irreparable damage to the said lot and would result in considerable financial damage to your petitioner or cause the lot to be much less desirable as a site where the home of your petitioner might be constructed.

7. That, as soon as this situation became apparent, on or about Aug. 25, 1950, your petitioner again complained to the Mayor and the City Engineer with reference to the curve of PRICE street where the said PRICE STREET intersects N. Lamar street. That this complaint resulted in a conference between the wife of your petitioner, the Mayor, the City Engineer, and a brother in-law of your petitioner at the actual site of complaint.

MINUTE BOOK No. 14, CITY OF OXFORD

DEMENT - MERIDIAN

8. That as a result of that conference, the wife and the brother-in-law of your petitioner were assured that the plans of construction of the street would be changed to alleviate the matter by bringing PRICE street into N. Lamar street at more or less a right angle which would leave lot No. 64 with some frontage on N. Lamar street. This assurance and promise was given to the agents of your petitioner by the City Engineer in the presence of the Mayor and that your petitioner, relying on such assurance and promise, said nor did nothing more about the matter.

9. That at some time during the month of March, 1951, without notice of any kind to your petitioner, construction on PRICE street was carried on in the manner which caused the original complaint of your petitioner; and that such construction was carried on in DIRECT CONTRADICTION of the promise and assurance given by the City Engineer to the agents of your petitioner as set out in the preceding paragraph.

10. That as a result of this construction a curb and gutter was laid by the city of Oxford around the entire northern and eastern lines of the said lot no. 64, thereby completely destroying any frontage of lot no. 64 on N. Lamar street. And that not less than eighteen feet of previously laid curb and gutter on N. Lamar street was removed and destroyed as a part of this same construction.

11. That as a result of the act of the city and in violation of a promise previously made to your petitioner, your petitioner has been wrongfully damaged by the city without notice and that whether or not your petitioner has or had legal grounds sufficient to support a legal claim on the city, the city was morally obligated to support the promise and assurance of one of its responsible officers and agents or, if not that, was morally obligated to serve your petitioner with sufficient notice of its intention to violate its promise that your petitioner would have been able to take appropriate action prior to the completion of the act complained of herein.

12. WHEREFORE, PREMISES CONSIDERED, it is the prayer of your petitioner that this Board direct the removal of so much of that curb and gutter now laid around the northern and eastern lines of lot no. 64 as is here complained of and that this Board will cause new curb and gutter to be laid along PRICE street to N. Lamar street in accord with the promises and assurances given to your petitioner by the City Engineer. And, moreover, your petitioner prays that this honorable board grant such other additional relief as this board may direct.

Respectfully submitted,

/s/ E. L. Hooker

E. L. Hooker, petitioner

Elliott moved that Price Street be straightened according to Mr. Hooker's request provided Mr. Hooker pay one-half of original construction of curb and gutter around lot No. 64 and the entire cost of the new construction. The Mayor and Board Entered into a discussion of the present need of cash on hand for current expenditures of the City government. It was brought out that certain revenues and taxes would be available within the near future to take care of the City's current expenditures; however, it was decided that the sum of \$8,000.00 would be necessary in order for the City to meet immediately its current obligations and that a loan for such amount should be negotiated. On motion of Alderman Hickey, seconded by Alderman Sisk, it was moved that the Mayor be authorized to negotiate a loan in the maximum amount of \$8,000.00 for the City and that he be authorized further to execute the necessary promissory notes or any other paper to secure the said indebtedness. Motion was carried unanimously.

Came on for consideration the matter of a request from the Northcentral Mississippi Electric Power Association of Senatobia Mississippi that the City of Oxford furnish the current needed for the City of Senatobia and after a careful consideration of the matter, the following agreement was entered into by the City of Oxford and the Northcentral Mississippi Electric Power Association of Senatobia, Mississippi:

The Northcentral Mississippi Electric Power Association
Senatobia, Mississippi

Gentlemen:

In line with our previous conversation with your representatives The City of Oxford, Mississippi is of the opinion that they will be able to furnish your electricity at the rate of two cents per KWH to be metered at your station at Miller, which metering is to be done by T. V. A. They will read the meters and furnish Oxford with sufficient information for billing. T. V. A. will also furnish a meter located in Oxford and have agreed to absorb the electricity not used by your Association and will work out a plan with the City of Oxford as to payment for use of same.

The City of Oxford is of the opinion that they will be able to furnish you 300 Kilowatts and will make every effort to do so, however, should they find that they can not furnish that amount or should have a break-down whereby they could not furnish any current they would not be liable for any shortages or damages due to same.

This contract or agreement is to extend from the time in which the necessary meters can be installed and until April 1, 1952 or such time as may be requested by either party.

The position of the City of Oxford is that they are helping your Association due to your shortage of power and will assist in every way possible however, should something happen beyond the control of Oxford they will not be held liable in any way.

If this agreement is acceptable, have the proper party for your Association sign one copy of same and return to Oxford.

Respectfully submitted,

/s/ R. K. Williams
City of Oxford, Mississippi
By R. K. Williams, Mayor

(S E A L)
