Whether your conference room is in need of an interactive whiteboard, video conferencing, or both, ViewBoard interactive displays let you securely connect and collaborate like never before.

A premium, state-of-the-art design features a bezel-less PCAP (projected capacitive) touchscreen with incredible 4K Ultra HD resolution. This highly accurate interactive screen provides for an incredibly natural and responsive handwriting experience. Using fingers, styluses, or both, multiple users can simultaneously write or draw on the huge ViewBoard panel. What's more, meetings and presentations start fast thanks to convenient one-wire USB-C connectivity.

myViewBoard™

3 Speakers

ViewSonic myViewBoard is an easy-to-use and incredibly secure collaboration software solution designed specifically for interactive displays and whiteboards.

Loaded with features to enhance the way your team connects and collaborates, there's a myViewBoard software version that can meet any of your needs.

Enterprise-level security

Powered by Amazon Web Services and protected by AES-256 encryption, myViewBoard ensures that everything from corporate secrets to school test scores remain safe and sound from unauthorized access.

Cloud-based portability

Store documents and images directly onto a shared cloud drive such as Google Drive, OneDrive, Dropbox, and Box. Because they're in the cloud, your files are just one touch away and can be accessed, retrieved, and saved wherever you go.

Collaboration tools

An enhanced, full-featured canvas includes a variety of annotation and collaboration tools that all help to boost teamwork and productivity.

USB Type-C SUPPORT

Meetings and presentations start fast with USB Type-C connectivity.

Walk-in and plug-in

Users can simply walk into a room, plug in their device, and immediately begin sharing info on the ViewBoard display.

Single-cable convenience

In addition to fast data, audio,and video transfer, USB Type-C also provides quick 60W charging and touch pass-through over a single cable.

ViewBoard CAST

ViewBoard Cast enables content streaming from mobile devices onto a ViewSonic display over wireless or cable networks.

Wirelessly share content from mobile devices

Multi-screen sharing

Remote touch control

SMART & CONNECTED SPACES

An integrated Smart Building IoT sensor hub connects the ViewBoard display to the Azure Digital Twins cloud platform.

In smart, IoT-connected spaces, the sensor measures room temperature and humidity, ambient light, and human proximity to the screen. This data can then be used to optimize meeting efficiency and energy conservation.

DESIGNED FOR ENTERPRISE

ViewBoard displays are designed to provide the best Microsoft® Office 365 and Team collaboration experience.

Office 365

- Office 365, Windows 10, and Enterprise Mobility + Security
- Delivers a complete, intelligent solution that empowers employee collaboration
