The value of the goods must be due justified via commercial invoice or (B2C transactions) proof of payment. Proforma invoice can be only accepted in case of no charge transactions (samples, gift, internal transfers etc.). The value at customs (base for duty/TAX calculation) = value of the goods + transport charges (so called CIF price). - Shipments handled through formal clearance procedure are subjected to clearance charges, both fiscal (duty, VAT and other tributary charges where determined by TARIC code) and DHL clearance service charges. In certain situations, advanced payment for clearance charges may be required from the importer (high value shipments, importer on stop credit etc.), in such cases the release of the goods may be delayed up to 3 days. For local variations refer to the value notes for XVQ
