## Instruments

### Plastic Composite Filling Instrument Set (Premier)

**Contains:** Five Instruments, one each of 425/1, 425/2, 425/3, 425/4, 425/5 40-90988

### Slix Composite Manipulation Instruments (Premier)

- Revolutionary protective coating provides ultra lubricity and a lustrous surface for a long-lasting esthetic appearance
- Highly resistant to composite sticking—makes cleanup quick and easy
- The coating is autoclave-safe, will not chip, flake or peel, and gives the tips the appearance of highly polished stainless steel
- The ergonomic handles are manufactured from an advance technology polymer (yellow) with medical-grade silicone grips and offer exceptional lightness, comfort, and durability
- Handle diameter is 1/2" (1.27cm.) to reduce hand fatigue

<b>Woodson 2, each</b>	40-91000
<b>W3, each</b>	40-91001

### Titan Composite Instruments (DA)

Titan Composite Instruments feature a special coating that eliminates the problems of composite discoloration inherent in the use of steel instruments. Titan Composite Instruments are specially designed for use with composite and glass ionomer restorative materials, although their use with amalgam is also recommended. The instruments have been proven in long-term trials, in general practice, and in hospital use.

## O'Hehir New Millenium Curettes (PDT)

- These unique curettes have small scoop blades with 310° radius cutting edges
- It's like having the toe of a curette without the interference of the remaining unused portion of a traditional blade
- This radical departure from traditional curette design allows the clinician to reach areas missed by traditional curette blades
- Designed for access and effectiveness
- Can be used with either a push or pull motion, in vertical, horizontal or diagonal directions
- Perfect for flutings, fractions and line angles

<b>PDT O'Hehir Millenium Curettes 1-2</b>	40-13111

## Piezo Ultrasonic Gracey Mini Curette Tips (Vista)

The long shank and slender design allow these tips to be used in places that are out of reach with regular sized tips. For instance, when furcations are present or when teeth overlap (crowding) because the bite was never corrected with braces.

- Longer shank than regular curettes for better access into deeper pockets
- Shorter blades (on average 1.2 mm) permit better scaling in NARROW pockets, reduce tissue damage and offer great adaptation to the root surface
- Slender blades aid in tactile sensitivity and enhance deep pocket access and adaptation to the root surfaces

- Tips will fit: EMS\* STYLE: Mini Piezon\*, Scalex 880\*, Bonart\*, SuperSon EIE\*, Master 400\*, Parkel (Piezo)\*, Dent America\* - Acteon\* STYLE: Vista P5\*, NSK\*, ENAC\*, Sybron Endo\*, Obtura Spartan\*, ADEC\*, J.Morita\*, Dentsply/Tulsa\*, Amdent\*

PDT Rules Curette D/E #3-4 Each 40-13609

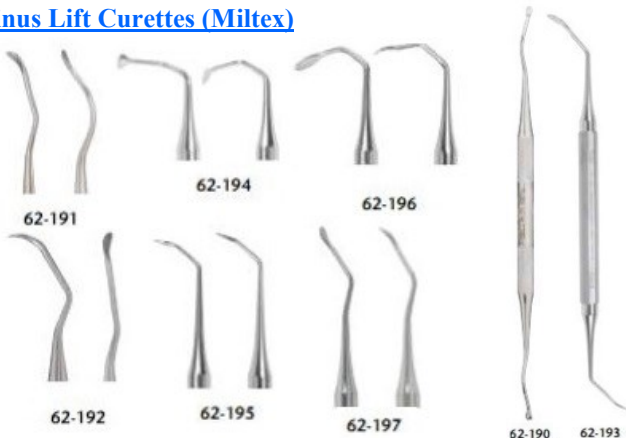

### Sinus Lift Curette (Nordent)

Nordent Sinus Lift instruments are designed to give practitioners improved access to the internal aspects of the sinus. Sinus Lift Curettes have spoons with smooth non-cutting edges and are available in various shank configurations and spoon widths to detach the delicate sinus membrane from lateral walls. Bone Condensers have fine serrations and diameters to compact bone graft material.

## Elevators & Root Picks

### Beck Root Elevators (Miltex)

- Made from the highest quality German stainless steel
- Permanent weld in handle preserves instrument integrity and longevity
- Finger platform on the handle provides a better grip
- Sharp, thin rounded tip with luxating step for easy penetration in the interdental space as well as 180° access to luxate in four directions, two mesial and two distal

<b>2.8mm, Straight Tip each</b>	40-91503
<b>3.5mm, Straight Tip each</b>	40-91504
<b>4mm, Straight Tip each</b>	40-91505
<b>35mm, Curved Right Tip each</b>	40-91506
<b>3.5mm, Curved Left Tip each</b>	40-91507

## Explorers (J & J Instrument)

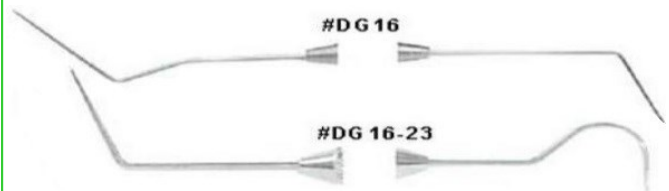

Several components are necessary to provide a fine and functional dental explorer. First, the tips must be sharp so that dental caries and calculus can be precisely located. Next, the tips must be both malleable and durable. The correct steel hard-end to consistent and exacting standards will ensure the tactile sensitivity that the

practitioner demands. Finally, these tips must be joined to a handle that is lightweight and comfortable, yet sturdy. The meticulous marriage of these elements makes the J&J Explorer a most effective diagnostic tool.

## Miltex Grip Deep Extracting Forceps (Integra Miltex)

Grip deep extracting forceps have been designed to allow subgingival access to the root while removing the tooth. The beaks are tapered, which allows them to penetrate deeper into the tooth socket and maximize the tooth-to-forceps contact.

<b>1STD</b>	40-20013

<b>845</b>	40-20022

## Miltex Xcision Extracting Forceps (Integra Miltex)

- Tapered, anatomically shaped, and serrated beaks are designed to perfectly match teeth and allow for subgingival access to the tooth
- Manufactured of high quality German stainless steel
- Smooth handle with circular openings reduces instrument weight and aids in cleaning

## Forceps

### Easy X-Trac System (A. Titan)

- Intended for immediate implant placement
- No pressure, pulling or rotary movements
- No post traumatic swelling
- No bone restoration

**Easy Kit Contains:** the 63, 60R, 60L, and 60U. All elevators have a sharp spade tip to create space between bone and root and are great for removal of root tips and fragments

# Instruments

## Instrument Cleaners/Lubricant

### Barrier Milk (L & R)

- Helps prevent corrosion of instruments when used prior to sterilization
- Protects and extends the life of instruments during autoclaving
- Lubricates and maintains smooth working of hinged instruments
- Nitrate-free, chromate-free, phenolic-free
- Non-irritating
- Neutral pH
- Mild, pleasant odor

**8oz Ready-to-Use Spray** 40-90750

**Gal** 40-90751

### Instrument Lubricant Spray (Hu-Friedy)

- Prevents instrument discoloration and buildup of mineral deposits, and keeps hinged instruments moving freely
- Should be applied to instruments after cleaning and prior to sterilization
- Does not contain silicone
- Packaged in a convenient non-aerosol pump bottle

**8oz** 40-90752

### Lorvic Surgical Milk (Young Dental)

A concentrated pre-autoclave dip. Inhibits rust and lubricates all hinged instruments.

**Qt.** 40-90754

**Gal.** 40-90755

## Instrument Miscellaneous

### Tooth Slooth Fracture Detector (Professional Results Inc.)

This simple but effective diagnostic device is used for detection of cracked teeth. It specifically pinpoints suspected cusps that cause pain during chewing, or teeth that are sensitive to hot or cold due to cracks. Replaces the use of cotton rolls, bite sticks, Q-tips and other devices. Autoclavable. Color: White

**4/Pkg** 40-90745

# Order Online!

## Tooth Slooth II Crown Seater (Professional Results Inc.)

This two-ended instrument is beneficial for cementation purposes or for diagnosing fractures of difficult-to-reach molars or for use in small mouths.

Features include:

- Smaller Tooth Slooth head for fracture detection
- Slot for holding anterior crowns in place during the cementation process
- Pointed end for testing for sensitivity in the fossa area or for cementation purposes
- Knurled, slip-resistant surface
- Autoclavable
- Color: **BLUE**

**4/Pkg** 40-90746

## Luxating Elevators (Hu-Friedy)

Luxating elevators feature thin, sharp blades that are used to cut periodontal ligaments. The elevator tips are permanently fixed to a satin finished, stainless steel handle for increased comfort and control. Luxating elevators reduce pressure on adjacent teeth, as they are used in a rocking motion for cutting as opposed to a standard elevator that lifts and pries.

<b>2mm Straight, each</b>	40-91678
<b>3mm Straight, each</b>	40-91679

## Periotomes

### Periotomes (A. Titan)

<b>Fixed Tip Kit Contains:</b> 100% stainless steel. 3 exclusive instruments w/fixed blades for all areas of the mouth, 3 different blade shapes are slightly rounded and paper thin to slide easily below the gumline	40-91717
<b>Fixed Wide Tip, Universal</b>	40-91718
<b>Fixed Angled Tip for Posterior</b>	40-91719
<b>Interchangeable Kit Contains:</b> #P0 Handle, #P1 Tip, P2 Tip, #P3 Tip	40-91720
<b>Fixed Wide Tip, Universal</b>	40-91718

<b>Fixed Angled Tip for Posterior</b>	40-91719
<b>Interchangeable Kit Contains:</b> #P0 Handle, #P1 Tip, P2 Tip, #P3 Tip	40-91720
<b>P0 Interchangeable Handle</b>	40-91721
<b>P1 Interchangeable Blade</b>	40-91722
<b>P2 Narrow Blade</b>	40-91723
<b>P3 Angled Blade</b>	40-91724

### Periotomes (ASA Italy)

<b>Fig.1 Leonardo - Straight</b>	40-13244
<b>Fig.2 Leonardo - Straight</b>	40-13243
<b>Fig.3 Leonardo - Curved</b>	40-13245

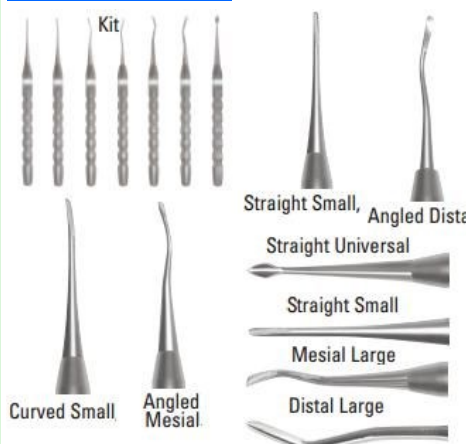

### Periotomes (Hu-Friedy)

These instruments provide a unique way to aid in tooth extraction. Unlike forceps, which tear the ligaments by stretching them laterally, the periotome cuts the ligaments, preventing damage to the alveolar bone. This is a great instrument for any dentist doing implant cases because it leaves behind more natural bone structure than an extraction done with forceps.

<b>PT 1,</b> D/E Angled blades for posterior use	40-91715
<b>PT 2,</b> D/E Straight blades for anterior use	40-91716

### X-Otome (A. Titan)

The X-Otome is a hybrid, i.e., a cross between the periotome and a root elevator. Severing the PDL and creating space along the mesio distal plane is executed with precision and accuracy due to the thin, honed ends.

 (3-6-9-12mm), #6 Satin Steel Handle 40-90236

### Microlux Transilluminator (AdDent)

Provides a focused beam of cool white light for use in clinical diagnosis of caries, calculus, and crown fractures. The light is powered by a high-intensity, light-emitting diode (LED) and transmitted through a focused glass fiber optic element. By using the technique of fiber optic transillumination, the scope of oral diagnosis can be greatly improved without the introduction of additional X-rays. It also functions as an auxiliary light source which aids in general operative procedures, preventive dentistry, and patient education.

**Warranty: 1 year, excluding batteries.**

**Kit Contains:** 1 LED Transilluminator, 40-90237  
 1 Glass Light Guide, 3 Batteries, 1 Pocket Clip

### Novatech Color-Coded Probes (Hu-Friedy)

Unique right-angle design allows for superior adaptability in areas of limited access.

### Probes (J & J Instruments)

It is essential that the tips on a periodontal probe be polished to a smooth and fine finish. This is to assure ease and comfort in subgingival access. These tips must have clear, precise, and consistent markings to provide an accurate diagnosis. Once these

## Probes-Single End (Nordent)

Probes are used to measure periodontal pocket depth in millimeter increments. All Nordent Probe tips are made from spring tempered stainless steel and machine ground to exacting tolerances. The millimeter measurements are precisely cut into the Probe tips. Color coding is applied to Probes under extreme temperatures so that the

color penetrates the surface of the tip. Probe tips undergo additional tight tolerance grinding to achieve the desired readability for each marking. All tips are then hand formed into their final shape by expert craftsmen.

**University of Minnesota**

**Columbia**

<b>University of Minnesota, each</b>	40-90772
<b>Columbia, each</b>	40-90773

**Comfortview Lip & Cheek Retractor (Premier)**

Innovatively designed lip and cheek retractor that provides even retraction of the lips and cheeks for buccal and gingival access at the same time. Hands-free, 2-in-1 anatomic design with cushioned lip supports/ensures wearing comfort during longer procedures and facilitates placement of the saliva ejector. Allows for visual and instrument access in diagnostic, therapeutic and preventive dental applications such as photography, prophylaxis, tooth preparation, bleaching, occlusal analysis plus other dental procedures. Autoclavable at 273°F/134°C.

**Implacare II Intro Kit Includes:** 1 40-90602  
Implacare II handle, 1 Columbia 4r/4L pair, 1 204S pair, 1 H5/H7 pair, 1 Barnhart 5/6 pair, 1 Langer 1/2 pair

**Implant Maintenance Starter Kit** 40-90603  
**Includes:** Colorvue Handle, 3 Colorvue tips, 1 Implacare II Handle, 5 Implacare II tip pairs

### ImplaKlean Implant Deplaquer –Scaler Set (Pac-Dent)

Designed to fulfill the requirements of dental implant maintenance, Implaklean scalers are made of high performance autoclavable carbon reinforced resin. The unique rigidity allows conventional re sharpening and because of the unique resin material will not scratch abutments surfaces. The handles are ergonomically designed with a pair of color-coded silicone grips for comfort and easy identification. Each set includes three scalers; optional sharpening stone is specifically chosen for optimal re sharpening results.

Available in 3 types for different implant deplaquing/cleaning purposes: 4R/4L is the universal tip for use on all implant surfaces; H6/H7 is a sickle scaler for the removal of supra-gingival calculus; 204S is a sickle scaler for the removal of posterior supra-gingival calculus.

- Unique resin material does not scratch implant surfaces
- Resharpenable w/ conventional methods
- Comfortable color-coded silicone grips
- 3 types to satisfy different scaling needs
- Optional sharpening stone for optimal resharpening results

**Intro pack (1 of each)** 40-25571

**3 X 4R/4L** 40-25572

**3 X H6/H7** 40-25573

**3 X 204S** 40-25574

**Intro pack (1 of each) with sharpening stone** 40-25575

**1 X Sharpening stone** 40-25576

### Implant Scalers (Premier)

Thin, flexible and easily sharpened. Unique high density graphite, autoclavable.

**Facial 2/Pkg** 40-90604

**Universal 2/Pkg** 40-90605

**Universal 5/Pkg** 40-90606

## Scalers Double End (Miltex)

Revolutionary Tactile Tone Handle offers two unique features:  
 Color and Feel the permanently color-coded grips allow for immediate recognition between procedures and tray setups the soft yet firm grip provides a more stable and comfortable feel and reduces hand fatigue and problems associated with Carpal Tunnel Syndrome (CTS) and arthritis.

Pocket scalers and mini pocket scalers have a slender and longer terminal shank to provide access into deeper pockets. MPS has the same slender tip design as PS, but with half the blade length. InSite PS & MPS have a depth gauge at 5mm. through 10mm., offering an excellent visual guide. Big Easy UltraLite Pocket scalers and mini pocket scalers do not feature the depth gauge found in InSite scalers

## Scalette Anterior Double End (Nordent)

Combines the design characteristics of a scaler and a curette into one easier-to-use instrument. Using a Scalette® will save time during the procedure, space on the tray, and will reduce instrument replacement costs. ANTERIOR combines a sickle scaler and anterior universal (sharp on both sides of the blade) curette.

**Each** 40-90743

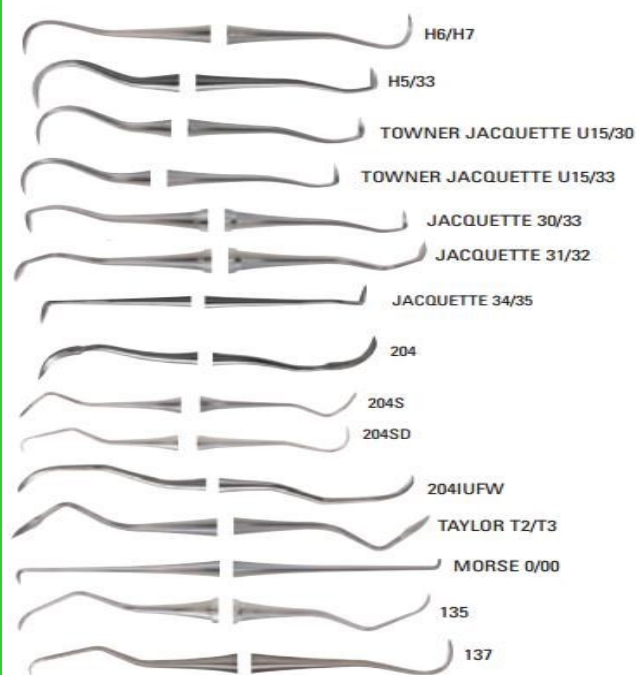

## Scalette Posterior Double End (Nordent)

POSTERIOR combines the pointed tip of a scaler and the narrow profile of a very fine universal curette. The terminal shank is 11mm. long and the blades are set over the centerline of the instrument to enable easier access into hard-to-reach posterior areas.

**Each** 40-90744

#### ImplaKlean Implant Deplaquer – Scaler Set (Pac-Dent)

Designed to fulfill the requirements of dental implant maintenance, ImplaKlean scalers are made of high performance autoclavable carbon reinforced resin. The unique rigidity allows conventional re sharpening and because of the unique resin material will not scratch abutments surfaces. The handles are ergonomically designed with a pair of color-coded silicone grips for comfort and easy identification. Each set includes three scalers; optional sharpening stone is specifically chosen for optimal re sharpening results.

Available in 3 types for different implant deplaquing/cleaning purposes: 4R/4L is the universal tip for use on all implant surfaces; H6/H7 is a sickle scaler for the removal of supra-gingival calculus; 204S is a sickle scaler for the removal of posterior supra-gingival calculus.

- Unique resin material does not scratch implant surfaces
- Resharpenable w/ conventional methods
- Comfortable color-coded silicone grips
- 3 types to satisfy different scaling needs
- Optional sharpening stone for optimal resharpening results

### Mirro-Vac Saliva Ejector Mirror (IndiGreen)

Reduce number of hands needed, instruments used and procedure time! Our Mirro-Vac Saliva Ejector Mirror combines evacuator and mirror functions into one efficient instrument. Ideal for sealants, air abrasion, bonding and other dry field procedures. Upper suction inlet relieves tissue grab and ensures anti-fog acrylic mirror stays clear—even under direct exhalation. Size 4 lens with 35° inclination delivers standard mouth mirror feel and function without compromise.

- Easy-lift film protects mirror surface until use
  - Soft blue color eases patient anxiety
  - Round, knurled handle improves grip.
- Fully disposable, one-piece construction eliminates need for sterilization. 6" long

50/Pkg 50-87861

### Piezo Ultrasonic Gracey Mini Curette Tips (Vista)

The long shank and slender design allow these tips to be used in places that are out of reach with regular sized tips. For instance, when furcations are present or when teeth overlap (crowding) because the bite was never corrected with braces.

- Longer shank than regular curettes for better access into deeper pockets
- Shorter blades (on average 1.2 mm) permit better scaling in NARROW pockets, reduce tissue damage and offer great adaptation to the root surface
- Slender blades aid in tactile sensitivity and enhance deep pocket access and adaptation to the root surfaces

• Tips will fit: EMS\* STYLE: Mini Piezon\*, Scalex 880\*, Bonart\*, SuperSon EIE\*, Master 400\*, Parkel (Piezo)\*, Dent America\*  
 - Acteon\* STYLE: Vista P5\*, NSK\*, ENAC\*, Sybron Endo\*, Obtura Spartan\*, ADEC\*, J.Morita\*, Dentsply/Tulsa\*, Amdent\*

## Luxating Elevators (Hu-Friedy)

Luxating elevators feature thin, sharp blades that are used to cut periodontal ligaments. The elevator tips are permanently fixed to a satin finished, stainless steel handle for increased comfort and control. Luxating elevators reduce pressure on adjacent teeth, as they are used in a rocking motion for cutting as opposed to a standard elevator that lifts and pries.

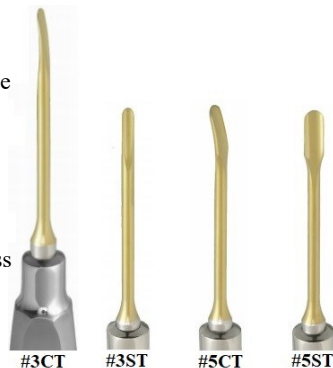

<b>2mm</b> Straight, each	40-91678

### Miltex Xcision Forceps (Integra Miltex)

The Miltex Xcision brand of forceps are the original forceps featuring a unique, light weight, ergonomic handle. They feature a smooth handle with circular openings. This helps reduce hand and wrist fatigue and makes the instrument easier to clean. The Xcision forceps have a resistant Teflon disc which helps reduce wear in the joint of the instruments. They also feature a slim, compact design for easy access to molars.

The Miltex Xcision Extracting Forceps have been designed to allow subgingival access to the root while removing the tooth. The beaks are anatomically shaped and tapered, which allows them to penetrate deeper into the tooth socket and maximize the tooth-to-forceps contact. Serrated breaks allow for better gripping of the

### Diamond Coated Furcation Files (Nordent)

Mirror image tips for facial and lingual adaptation.

The blade has a round shape and is 1.0mm in diameter.

The blades are set at opposing angles and have a round shape that is 1.0mm in diameter set on a 14mm terminal shank.

Excellent for mesial and distal adaptation.

## Instruments

### Ultrasonic Piezo Tips (Vista)

#### **SU1 Light to Medium - Heavy Cases of Supra-Gingival Calculus**

Utilizing the side radius of the initial 2-3mm of the top of the tip in a sweeping motion on the tooth enamel provides a smooth scaled surface with minimal need for secondary hand instrumentation.

#### **SU2 Scaling of High Density Supra-Gingival Calculus Deposits**

Utilizing the flat edge of the top of the tip and the side of the tip perpendicular to the tooth surface, use an up-and-down motion on the tooth surface to shear off calculus.

#### **SU3 Removal of Stains (Tobacco, Coffee & Other Similar Stains)**

Utilizing both the round edge of the top of the tip and the side of the tip on the tooth surface, use an up and down motion on the tooth surface to shear off stains.

#### **SU4 General Scaling of Sensitive Areas**

Less abrasive than the SU1 - SU3 tips, this tip is ideal for use in the periodontal pockets and with other sensitive locations.

#### **SU5 Designed for Easy Interproximal Scaling**

The thin design of the SU5 tip allows for entry into most interproximal spaces.

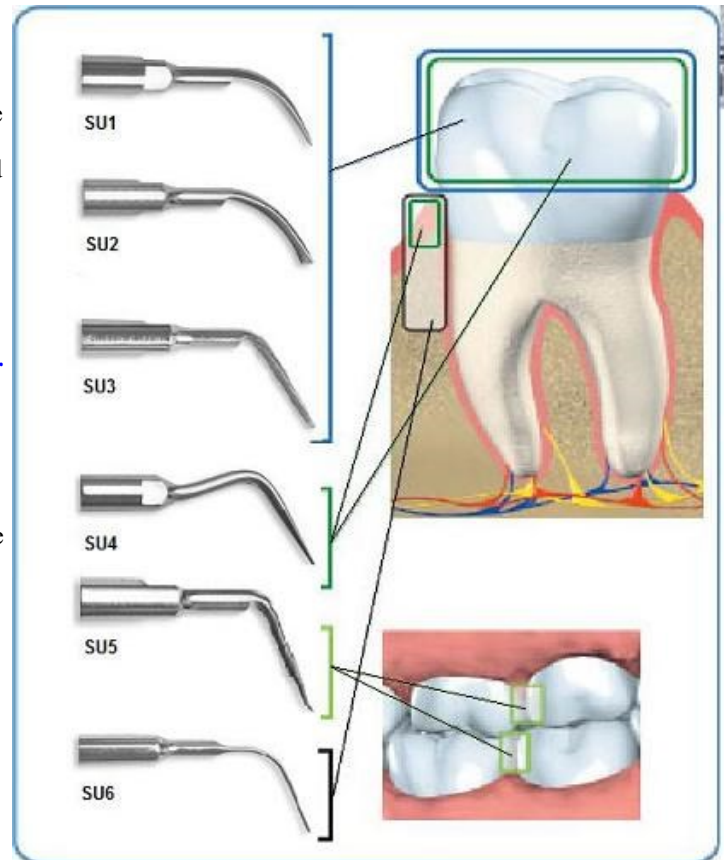

#### **SU6 Designed for Subgingival Scaling**

Long and thin design allows for a less evasive entry into subgingival pockets resulting in minimal patient sensitivity and reduced bleeding.

### Signature Series Instrument Cassettes (Hu-Friedy)

Hu-Friedy now offers IMS Signature Series Thin Orthodontic Cassettes. The Thin Ortho Cassettes are 40-50% thinner than our existing cassettes allowing for more cassettes to fit into processing equipment (you can now fit 8 thin ortho cassettes in the same amount of space as 5 standard cassettes).

These cassette features a brand new design of an ultra low profile silicone rail that gently holds pliers in place during processing; therefore, reducing the chance for instrument damage and allowing for easy accessibility.

<b>Large, Thin, fits up to 7 pliers</b> Standard configuration has rails for 4 hand instruments Available in blue rail color. Each	40-89191
<b>Small, Thin, fits up to 4 pliers</b> Standard configuration has rails for 3 hand instruments Available in blue rail color. Each	40-89192

## Sharpening System

### Sharpening Systems (PDT)

No need for oil or water  
 Guaranteed not to pit or groove!

<b>PingRing Sharp Tester</b>	40-13781
------------------------------	----------

**Diamond Head Ceramic Stone** (Maintain Edge) 40-13782

**Transformation Sharpening Stone** (Reshape Blade) 40-13780

**PDT/Gleason Guide** \*Patent No. 6,852,014 40-13779

### InstRenew Sharpening Assistant (Nordent)

InstRenew Sharpening Assistant comes complete with everything you'll need to begin sharpening with professional results.

#### **Includes:**

- Diamond Coated Sharpening Cone (installed)
- Wrench with Diamond Smoother
- Plastic Test Stick
- 110vUS - Prong Power Cord
- InstRenew Training DVD

**Sharpening Assistant InstRenew 2v3** 40-12615

**Sharpening Cone InstRenew (FINE)** 40-12606

**Wrench InstRenew** 40-12607

**Kit InstRenew 2 Updated Tip Clamp and Cones** 40-12608

**Cone Dressing (1 oz. Bottle)** 40-12609

**(4" x 1/2") Test Stick Plastic Non-Autoclavable** 40-12610

**Updated tip clamp for SSM2V3** 40-12611

**110 Volt Power Adapter InstRenew Standard US** 40-12612

**240V Transformer for Australia/New Zealand** 40-12613

**220V European type Power Adapter InstRenew2** 40-12614

**220V UK type Power Adapter InstRenew2** 40-12605

### Neivert Whittler Instrument Sharpener (Temrex)

Sharpens any metal tool or instrument to razor edge in seconds. It can be used on knives, scissors, curettes, scalers, spoon excavators, and chisels. Sharpener is made of tungsten carbide. Autoclavable.

### Sidekick (Hu-Friedy)

Designed to perform routine maintenance sharpening of scalers and currettes, this sharpener is the only power device with instrument guide channels and vertical backstops to help control blade angulations.

These template-like features allow virtually effortless positioning of your scalers/currettes and provide consistent sharpening results. Correct routine sharpening will help extend the life of your instruments. The Sidekick is small, compact, cordless, can be placed anywhere and requires minimal counter space—perfect for anywhere in the dental office.

Hu-Friedy, at its sole option, will repair or replace for a period of one year following the date of purchase, Sidekick Sharpener that fails as a result of a defect in materials or workmanship. Purchaser must return the defective Sidekick Sharpener (postage prepaid) and must have previously provided Hu-Friedy with the Sidekick warranty registration card.

**Kit Contains:** Sidekick unit, user manual and CD-ROM, ceramic sharpening stone, plastic test stick, magnifying lens and 2 AA batteries

**Replacement Stone for Sidekick** 40-90811
