## Footnotes

- <sup>1</sup> "Smart Home Printer" defined using the following criteria: 1) Designed exclusively for mobile devices, and driven by an OEM printer app, like other IoT devices. This HP Tango device is designed exclusively for mobile devices, it requires a mobile device for install. 2) Uses both local Wi-Fi and cloud cell phone data connectivity for two-way connection with OEM app to control printer and get status. 3) Offers voice printing support for Amazon Alexa, the Google Assistant, and Microsoft Cortana. (See: [keypointintelligence.com/HPVoicePrint](http://keypointintelligence.com/HPVoicePrint)). 4) Unique in-class in that it lacks screen/display/buttons/LEDs/USB port other than the power button. Smart home devices often lack screen/display/buttons/LEDs/USB port, since they are designed for wireless and control by OEM provided app on smart device like phone or tablet. Compared to the majority of in-class A4-size colour desktop inkjet printers and all-in-ones <€150. Claim based on HP internal research of printer manufacturers' published specifications and Keypoint Intelligence Buyers Lab 3/29/2018 study commissioned by HP. See: [keypointintelligence.com/HP Tango](http://keypointintelligence.com/HP Tango). Market share as reported by IDC CYQ4 2017 Hardcopy Peripherals Tracker.
