TOOLING FOR SWISS-TYPE CNC MACHINES

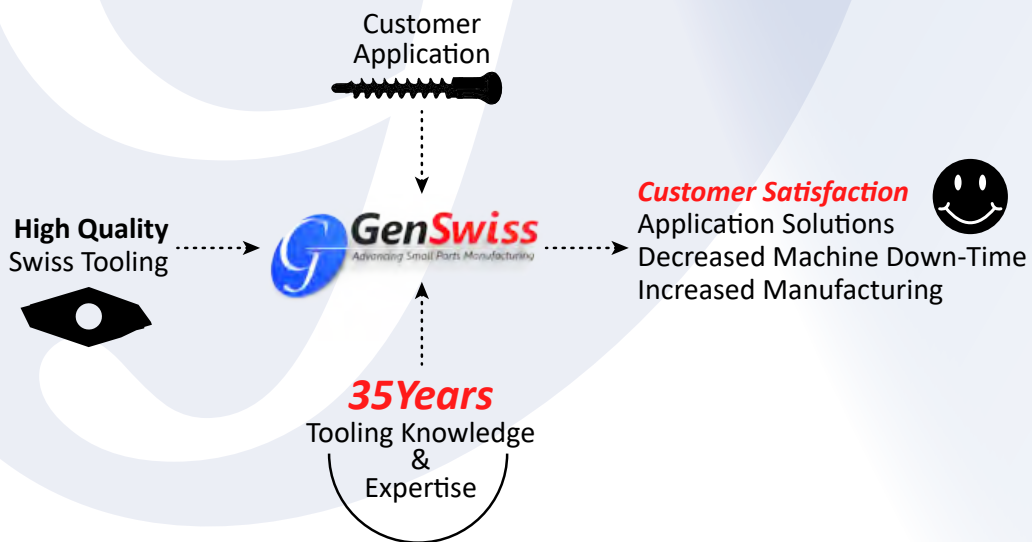

www.genswiss.com

Westfield, MA, USA

Genevieve Swiss Industries, Inc. brings to market unique high precision tools and accessories, advancing small parts manufacturing and enhancing Swiss-type machine processes. Our high quality product line of cutting tools, machine tool holders, and live spindles are imported from three of Switzerland's primarily world-class manufacturers: PCM Willen SA, UTILIS AG, and Louis Belet SA.

With more than 35-years of experience in the industry, GenSwiss aims to improve distribution efficiencies and increase manufacturing productivity. We strive to deliver products which meet or exceeds customer expectations, providing a reliable service with application solutions for YOUR critical small parts manufacturing.

Precision Tools

- **High quality for extended tool life**
- **Quick setup times**
- **Low TIR's and tight tolerances**
- **Thousands of tools available**
- **Custom tooling available**

Customer Service & Sales Team

- **Our skilled staff is dedicated to providing you with the tooling and assistance you require**
- **The GenSwiss team visits our distributor network to support our partners and learn how we can better provide or improve the GenSwiss experience**
- **Instant access to our vendors' inventory allows our team to provide immediate lead times and pricing**

Tooling Application Assistance

- **35 years of industry experience**
- **Knowledge of the benefits and disadvantages for all available tooling systems**
- **GenSwiss will find the right combination of tools for your application to optimize the best tool life with cost savings**

Live Tooling Repairs & Restoration

- **Live swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **Free evaluation**
- **Save money by shipping to GenSwiss instead of overseas**

ROTARY BROACHING GUIDE

Rotary Broaching is a fast and easy method of producing polygonal drive features in turned parts. Genevieve Swiss offers Premium Rotary Broaching products from PCM, the European industry leader in rotary broaching tools.

A Guide To Internal Rotary Broaching

During the rotary broach operation, the broach tool approaches the work piece at a small angle. The tool spins synchronously with the part, creating a wobble effect that causes the leading cutting edge to rotate in and out of the cut like a cam. This method shapes internal and external polygonal profiles at a single-point. Compared to punch forming, which shapes the entire profile at once, rotary broaching requires 80% less force, offers increased tool life, and lowers machine maintenance cost over time.

The advantages offered by rotary broaching result from proper preparation prior to the broaching operation. The most important part of this preparation includes drilling a hole which allows for broached material to accumulate, preventing damage to the broach tool and machine. Continue with the guide below for some important tips on rotary broaching.

Preparing To Broach A Hole

First, prepare the hole with a 60° - 90° chamfer slightly bigger than the largest dimension of the broach tool. A chamfer provides a guide for the broach tool.

GenSwiss Spot Drills
Pgs. [44-45](#)

Drilling The Hole

For internal broaching, the diameter of the hole should be 1 percent larger than the diameter across the flats of the broach's hex shape and drilled as deep as possible. A depth of 1.3 to 1.5 times the depth of the broached profile is recommended. Drilling to this depth is vital, leaving room for material accumulation during the broaching process. If material accumulates during the drilling process, re-drill the hole with a smaller drill.

If A Drill Radius Is Not Allowed

Many medical and aerospace applications do not allow for a drill radius along the broached walls of the part. When exact concentricity is required, chamfer, drill, and then pre-bore the hole. Using a micro bore allows for extra control and accuracy. The use of a drill might lead to inaccuracies due to deflection and other conditions.

NOTE: Broaching into a tight hole will not allow air or coolant to escape, resulting in a build up of pressure. This can cause the part or tool to push back, damaging the tool or machine. Use a GenSwiss broach that has a pressure relief vent.

Broaching The Hole

Rotary broach holders hold the broach tool at a 1° angle relative to the centerline of the work piece, allowing for high speed applications from 1,500 rpm up to 3,000 rpm. As the broach holder rotates, the broach tool is thrust into the pre-drilled hole.

The cutting edges of the broach can dig into the part face as the tool comes into contact with the rotating material. At higher speeds, this dig mark is more pronounced and tool life suffers. For best results, start the broach operation at a slow rotation, and then increase the speed when it is in full contact. Reversing the spindle rotation halfway into the part can reduce spiraling.

The feed rate mainly depends on the material characteristics. In mild steel, 0.0012 to 0.0024 inches per revolution is recommended. If the machine thrust force is sufficient, the feed can be doubled as machinability increases. In most cases the maximum feed rate should not exceed 0.03 times the profile diameter. A slower feed rate will produce an improved finish with finer lines along the sidewalls of the broached hole. By increasing the feed rate, the cutting cycle will be faster, but the broaching lines will be more pronounced, leaving a coarse finish.

Give GenSwiss A Call For More Information On Rotary Broaching

2150 Series Rotary Broach Holder

This rotary broach holder is ideal for micro broaching applications and is for use on the smallest of CNC Swiss machines or older cam-style screw machines. Recommended for broaching profiles smaller than 2mm in diameter.

Eccentric Spindle Design:

This unit is designed off-center. An X-axis offset must be programmed to align the center of the broach with the center of the work piece. This special design enables broaching under 2 mm.

- Max thrust force: 112lbs
- Uses 5mm shank Broaches
- For micro broaching .078" (2mm) & under

**SMALLEST ROTARY BROACH HOLDER

2100 Series Rotary Broach Holder

Swiss-type broach holder designed for easy setup and centering of the tool to the work piece on CNC Swiss machines and gang lathes. Eliminates the need to indicate the holder to center when used with qualified OAL 8mm shank broach tools. Recommended profile size range for this holder is .050" to .375"

- Max thrust force: 900lbs
- Uses 8mm shank broaches
- Recommended profile size .050" to 0.375"

Item No.	Description	D	L
3010-000100	RBH-2100-158	.625in	1.5in

The Original

Swiss-Type Rotary Broach Holder

- Max thrust force: 2250lbs
- Uses 8x28mm broaches
- Recommended profile size .050" to .375"

2160 Series Rotary Broach Holder

The ORIGINAL & best choice for Swiss machines and precision lathes. The 2160 series Swiss-type rotary broach holder is the premier choice for performing broaching applications in your Swiss-type CNC machine or gang-style lathe. Eliminates the need to indicate for center location. Recommended profile size range for this holder is .050" to .375"

Key Features

- No center indicating required
- Ideal for medical & aerospace fastener applications
- Low profile; fits machines with minimal interference
- Shank length is customizable, No need for bushings
- short head length is ideal for sub-spindle applications
- Longer OAL broach tools can be used by adjusting X-axis

6180 / 6181 Series Holder

Adjustable Broaching holder designed for CNC Lathes & Turning centers. Can be adapted with a special die to produce external broach forms such as splines.

- Max thrust force: 2700lbs
- Uses 8mm shank broaches

Hex cap screws enable easier locking of adjustment settings

Four wuadrant micro adjustability enables easiest center locating for better broach results

6190 / 6191 Series Holder

Adjustable broaching holder designed for the largest of turning centers and CNC lathes. This broaching holder features a robust bearing configuration to withstand the high forces required to attain some of the largest of broach profiles.

- Max thrust force: 9000lbs
- Uses 12mm shank broaches

SIGNATURE SERIES ROTARY BROACH TOOLS

GenSwiss' premium rotary broach tools deliver consistent high-performance cutting for industries requiring the highest degree of standards. Each tool is precision ground to ultra-high standards and features geometries designed specifically for the material type in which each broach will be used. These tools are engineered and manufactured to be utilized in the aerospace industry, medical industry, or any industry requiring the highest standards for inspection.

- Available sizes: 1.5mm-5mm & 1/16in-3/8in

GenCut[®] Spot Drills

Highly repeatable, carbide ground inserts make old fashioned center drills obsolete for performing spotting operations. Precision ground carbide inserts repeat within +/- .0004", thus eliminating the need to adjust the axial location of the tool, unlike conventional spot tooling held by collets. The system also simplifies tool changing in that it only requires a torx wrench for insert removal. This eliminates the need for collet wrenches, reducing the chance of accidental tool breakage or personal injury.

Versatile tools that can:

Geometry Styles

Positive Fluted

Negative Spade

Insert Sizes:

Available Web Thickness
.005" / .015" / .036"

Available Drill Point Angles
60°, 82°, 90°, 120° & 140°

60° insert

All 60° inserts feature a radial relief grind for spotting of small holes starting with an ID of .010". Note: 60° inserts do not conform to the standard insert max Ø and are intended for micro spotting only.

Reduces the Need for Collet Wrenches During Routine Tool Changes

Example Ordering Nomenclature: SDI-2060-PRF-TiN Spot Drill Insert, #2 Size, 60 Degree Point Angle, Positive Geometry, Right Hand, (Fine).005" Web Thickness, TiN coated

**True
 Orbital/
 Float**

- Simplifies Small Hole Reaming
- Prevents Breakage of Expensive Micro Reamers
- Fits Into the Smallest Swiss Machines
- Compensates for Hole Misalignment

Designed with "True Orbital Float" capability, the micro reamer holder aligns the reamer perfectly to the drilled hole enabling better size control, reduces "bell-mouthing", and increases tool life.

ADVANCED PRECISION MICRO TOOL HOLDERS

TIR <.0002in

Perfect Concentricity For Micro Drills

Look to **GenSwiss Micro Drill Holders** for a new standard in holding micro drills in CNC Swiss Machines and Precision Lathes.

Take the **NEXT STEP** in precision micro drilling performance to meet today's ever changing demands for high performance, tight tolerance, micro parts production.

Advanced Precision Collet Sleeves

Item No.	Description	Collet	D1	L1	Nut & Wrench Included

Nut

Item No.	Description
1017-000100	CN-CHK

Wrench

Item No.	Description
1035-000114	CW-CHK 14mm

****Note: (1) Clamping Nut and Wrench Required****

MICRO DRILLS

GenSwiss Micro Drills are a cost effective solution for hard to find small diameter solid carbide micro drills & micro spotting tools. Swiss-style precision ensures maximum reliability, accuracy and finish results. When consistency of hole tolerance control is paramount, look to GenSwiss micro drills.

Sizes From .1mm (.004in) Up To 3mm (.1181in)

Precision Ground & Finished

Makes Use Of Readily Available ER Collets

Micro Drill Series Descriptions

Series	Material	Depth	Flute Ø	Flute Length	Drill Point	Helix	# of Flutes	Tolerance	Coolant-Thru
3610	HSS	2-3 x Ø	0.20-3.0mm	0.6-5.3mm	120°	35°	2	h6	No
3620	HSS	5 x Ø	0.10-3.0mm	0.7-18.0mm	120°	24°	2	h6	No

3650	Solid Carbide	5-7 x Ø	0.10-1.99mm	0.5-12.0mm	140°	35°	2	h6	No
3660	Solid Carbide	6-7 x Ø	0.50-3.0mm	3.5-21.0mm	140°	30°	2	h4	No
3670	Solid Carbide	12 x Ø	0.50-2.0mm	6.0-24.0mm	140°	30°	2	h5	No
3690	Solid Carbide	15 x Ø	2.05-3.0mm	34-50mm	140°	30°	2	h5	Yes
3700	Solid Carbide	10 x Ø	0.20-3.0mm	2.0-30.0mm	120°	None	Half Round	h5	No
3710	Solid Carbide	4-6 x Ø	0.50-1.5mm	3.0-5.0mm	140°	30°	3	h5	No
3720	Solid Carbide	4-6 x Ø	0.50-3.0mm	6.0-16.0mm	140°	30°	3	h5	No

See the following pages for part numbers and sizes

Ti-Loc Tool Holder

- Enables micro tools to clear the guide bushing
- Maintains exceptional TIR at extended length
- Solves deflection and chatter issues
- Available in ER8, ER11, ER16, ER20, & ER25 sizes

See Page **104**

Micro End Mills

Micro Drills

Key Cutters

Gear Hobs

Custom Tool Engineering

Saw Blades

Genevieve Swiss is committed to bringing the industry's finest cutting tools to the North American metalworking market. Louis Belet of Switzerland is a leading manufacturer of super precision micro tooling, drills and end mills as well as a large variety of specialty cutters. With over 6500 standard tool offerings as well as advanced production capability, Louis Belet has the precision micro tooling you need to achieve optimal production efficiency.

Tooling Optimized for Medical Technology Applications:
Cutting tools for titanium and medical stainless that have been tested and optimized through research and assistance from Louis Belet's customers.

337 Series: Center Drills

GEOMETRY:

Flutes: 2
Helix: 24°
Drill Point: 60°,90°,120°

TOLERANCE:

D1 Under 1mm: +/- .01mm
D1 Over 1mm: +/- .02mm
D Shank: h5

OPTIONAL COATINGS:

TRIO: Steel & Stainless
SOLO: Brass & Bronze
RICO: Titanium & Aluminum

Through rigorous testing, feedback from customers as well as years of advancement in grinding and geometry development, Louis Belet has introduced the EXPERT series of application specific drills and cutting tools. The INOX370 Series has been developed for advanced tool life, cutting reliability and chip control in stainless steels.

Comparative Trial Test:

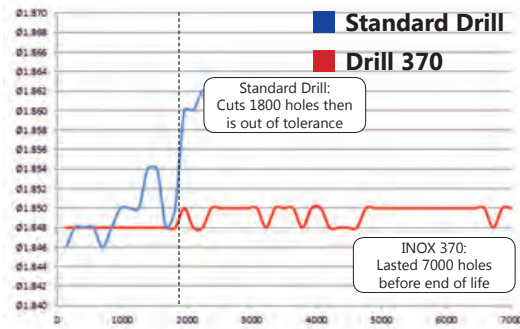

- Test: INOX370 vs Conventional Twist Drill
- Diameter: 1.85mm x 12mm Flute Length
- Material: 316L Stainless
- Hole: 8mm deep thru-hole

End of Life Criteria:

- Tool breakage
- Conical holes
- Excessive burrs
- Deviation of hole location
- Diameter tolerance +/- .01mm

Cutting Parameters:

Vc = 30m / min or 98.4 SFM
 f = .04mm per rev or .0015" IPR
 RPM = 5164
 Peck Cycle = .37mm

Test Results

INOX 370 Drill

- Cut 7000 Holes
- Fragmented Chips
- Cleaner, Tight Tolerance Holes

Standard Drill

- Cut 1800 Holes
- Long Stringy Chips
- Poor finish, burrs

PROPRIETARY COATING OPTIMIZED for STAINLESS

"Not Your Father's Carbide Drills"

342 Series: Precision Micro Drills - 2 Flute

GEOMETRY:

Flutes: 2
Helix: 34°
Drill Point: 118°

TOLERANCE:

D1: -0.02mm / -0.004mm
OAL: -0.02mm / -0.00mm
D Shank: h5

OPTIONAL COATINGS:

TRIO: Steel & Stainless
SOLO: Brass & Bronze
RICO: Titanium & Aluminum

342 Series: Precision Micro Drills - 2 Flute (continued)

GEOMETRY:

Flutes: 2
Helix: 34°
Drill Point: 118°

TOLERANCE:

D1: -0.02mm / -0.004mm
OAL: -0.02mm / -0.00mm
D Shank: h5

OPTIONAL COATINGS:

TRIO: Steel & Stainless
SOLO: Brass & Bronze
RICO: Titanium & Aluminum

343-8 Series: Precision Micro Drills - 2 Flute

GEOMETRY:

Flutes: 2
Helix: 34°
Drill Point: 118°

TOLERANCE:

D1: -0.002mm / -0.004mm
OAL: -0.02mm / -0.00mm
D Shank: h5

OPTIONAL COATINGS:

TRIO: Steel & Stainless
SOLO: Brass & Bronze
RICO: Titanium & Aluminum

353 Series: Triple Fluted Precision Micro Drill

GEOMETRY:

Flutes: 3
Helix: 34°
Drill Point: 140°

TOLERANCE:

D1: -0.02mm / -0.004mm
OAL: -0.02mm / -0.00mm
D Shank: h5

OPTIONAL COATINGS:

TRIO: Steel & Stainless
SOLO: Brass & Bronze
RICO: Titanium & Aluminum

353-2 - Extra Length

353-2 Series - Extra Length

The GenBore[®]-mini

The GenBore-mini is an excellent solution for when you need to incorporate additional small ID tools into your setup. Low profile and interference-free in most Swiss machines, the GenBore-mini is ideal for small ID spotting, drilling, and boring.

- Effective solution for increasing ID tools capacity
- Interference-free design for smaller machines
- Accurately locates small shank ID tooling
- Custom options available - call for details

SIGNATURE SERIES COLLET SLEEVES

ER Style Collets are the tool holding system of choice for use in CNC machine applications. Swiss Precision collet sleeves provide rigid & accurate holding of ID tooling. These collet sleeves feature ground shanks and tapers. Mini nuts are used to reduce interference and to make setup and tool changing easier than collet sleeves with hexagonal clamping nuts.

Our Single Ended Swiss Precision Sleeves Feature:

- Locking flats to prevent damage to sleeve shank & provides orientation for tools
- Machined from medium carbon alloy steel
- Precision ground & through hardened for accuracy & precision
- Internal stop screw prevents tool pushback

QUICK CHANGE TOOL HOLDING SOLUTIONS

These collet sleeves are cost effective solutions to tool holding and are available in a variety of both Inch and Metric sized shank diameters. Also featuring a solid shank for rigidity and a side coolant port for connection to a high-pressure coolant delivery system. Every unit has a notched collet taper for easy tool orientation when combined with Quick-Change boring bar adapters.

QUICK CHANGE COLLET ADAPTERS

Quick Change collet adapters make it easier to control quality in your shop. These adapters make it simple to have preset tooling available, eliminating the need to touch off the tool after a routine change. This also enables less experienced machine operators to be more productive.

- Simplifies setup
- Decreases downtime

QUICK CHANGE BORING ADAPTERS

Quick Change Boring adaptors make it fast and simple to locate center position for boring bars when combined with notched ER holders. A simple locating pin rests within the notched holder ensuring accurate centering. These solid bushings utilize the ER collet system to securely hold a boring bar in a rigid fashion. Axial length can be easily set using any form of presetting device.

- Easily locates boring bar axial & radial position

EZR Swiss Clamp System

Upgrade your current tool holders with "EzR Swiss-Clamp" ER Collet clamping nuts from GenSwiss.

- Eliminates wrench slippage
- Prevents accidental tool breakage
- Prevents injury to machine operator
- Eliminates the loss of clamping nuts

Wrench Adapter

Clamping Nut

Extended Wrench Adapter

The EzR wrench adapter engages and locks to the EzR clamping nut using a specialized cam system.

Specialized cam system delivers positive torque to the nut while eliminating slipping of the wrench.

EzR extended wrench adapter clears sharp tooling, keeping your hands safe from injury while enabling accurate tightening of ER Tooling.

EzR Swiss clamp nuts can be tightened using standard box wrenches or 3/8" drive ratcheting socket wrenches when combined with the positive locking EzR extended wrench adapters or EzR wrench adapters.

NEVER drop an ER clamping nut
in your machine sump again!

EzR Swiss Clamp Nuts

Replaces standard Mini-Nuts.

Tapping Collets

PCM floating tapping collets are an economical solution to replace expensive tapping sleeves and eliminate tapping error. Ideal for use on machines that do not have a rigid tapping function.

The ET1 floating tap collets can also be used with rigid tapping function to compensate for pitch error due to the torsional stress that can occur on small taps eliminating the difference between the tap and the CNC.

multidec®-Cut 3000 Series

Swiss Made UTILIS World Class tools deliver proven production performance and extended tool life. All 3000 series inserts feature a wide variety of chip breaker geometries and will fit the same holder, reducing tooling costs. The unique insert holding design absorbs machining forces providing one of the most rigid Swiss-turning systems available to the industry today.

- For all turning application processes
- Repeatable within .0004"
- All insert styles fit the same holder
- Holder design absorbs cutting forces
- Ideal for tough applications

Insert Geometry & Chip Breakers

Type-GS Chip Breaker - Cut-Off Inserts

The CUT3000 type-GS chip breaker is an evolution of Swiss-type cut off tooling. By using a new carbide forming technology, these inserts require less grinding to be produced while offering a decrease in overall cost of use. 'Type GS EN' grade offers supreme performance in carbon steels while the Type GS FN grade offers excellent performance in Stainless and Titanium applications.

Type-SPT Chip Breaker - Cut-Off Inserts

The multidec® CUT3002 cut off inserts with type-SPT chip breaker feature a positive rake intended for use in soft and stringy materials. The SPT chip breaker comes in three different angles described by the product number suffix below.

SPT: 20° rake - Plastics Such As Delrin
SPT06: 6° rake - Good For Stainless
SPT12: 12° rake - Aluminum

Type-SC Chip Breaker - Cut-Off Inserts

Cut-off inserts armed with the type-SC chip breaker are ideal for hard materials. This chip breaker is quite universal, used in roughing, finishing, and micro finishing.

Type-SP Chip Breaker - Front & Back Turning Inserts

Front and back turning inserts with the type-SP chip breaker are ideal for finishing and micro finishing on materials such as aluminum, breaking up chips and preventing stringy chips from forming.

Type-CP Chip Breaker - Front & Back Turning, Grooving Inserts

When creating deep features during front turning, back turning, or grooving, the type-CP chip breaker is vital for chip removal. The sharp articulated geometry will peel chips away and keep features clear of material during finishing and micro finishing operations.

3002 Cut-Off

Cut: Standard

Chip Breaker: None

Repeatability <20µm

4005-000111
Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104
Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately.

Features (5) connection ports for simple connection to your oil delivery system: (4) Side ports and (1) one end port making connection possible on most machine tool positions.

multidec® CUT 3000 Offset Shank & Insert Holders

Shifted holders enable the cutting of short parts by enabling the cutting edge to move closer to the guide bushing thus reducing the chance for deflection.

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. **multidec® 1600, 3000, ISO VC, & ISO VP** series inserts are currently available.

See Pg. 237 For Full Details

3000 Series Insert Shown

multidec® CUT 1600 Series

UTILIS
Tooling for High Technology

UTILIS multidec® 1600 Series Swiss Tools are designed for micro turning and grooving operations in Swiss-type CNC machines. Perfectly designed for the smallest of Swiss machines the 1600 series excels at work under .125" in diameter. Tough UHM30 grade carbide combined with a variety of coatings enhances tool life in tough materials typically machined in Swiss-type applications.

- Highly repeatable cutting edge
- .05mm to 2.75mm (.0019" - .1082") insert widths
- Micro grooving, front turning, back turning, micr threading, & cut off operations

Insert Geometry & Chip Breakers

Type-SPT Chip Breaker - Cut-Off Inserts

The multidec® CUT3002 cut off inserts with type-SPT chip breaker feature a positive rake intended for use in soft and stringy materials. The SPT chip breaker comes in three different angles described by the product number suffix below.

SPT: 20° rake - Plastics like Nylon
SPT06: 6° rake - Good for Stainless
SPT12: 12° rake - Aluminum

Type-SC Chip Breaker - Cut-Off Inserts

Cut-off inserts armed with the type-SC chip breaker are ideal for hard materials. This chip breaker is quite universal, used in roughing, finishing, and micro finishing.

Type-SP Chip Breaker - Front & Back Turning Inserts

Front and back turning inserts with the type-SP chip breaker are ideal for finishing and micro finishing on materials such as aluminum, breaking up chips and preventing tight rolls from forming.

Type-CP Chip Breaker - Front & Back Turning, Grooving Inserts

When creating deep features during front turning, back turning, or grooving, the type-CP chip breaker is vital for chip removal. The sharp articulated geometry will peel chips away and keep features clear of material during finishing and micro finishing operations.

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL Shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders
Sold Separately.

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions

4005-000111

Connects to side ports on ALL Shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks.

4005-000104

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders
Sold Separately.

Superb Chip Control On Stringy Materials

1600 Y-Axis Holder

Type: Standard

Coolant-Thru: Side & Rear Coolant Ports

Repeatability <10µm

**Fits Position (d) On Tool Holders
Sold Separately.**

To avoid problems, two Y-Axis holders must not be mounted directly next to each other.

Mount a standard tool holder between the Y-Axis holders.

To prevent collisions, move back the holder in accordance with the overhanging length before changing the tool position.

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. **multidec® 1600, 3000, ISO VC, & ISO VP** series inserts are currently available.

See Pg. 237

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately.

4005-000111

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders
Sold Separately.

ISO Holder SDNC
Type: 62.5°
Coolant-Thru: None

Repeatability <20µm

DNGU carbide inserts are ideal for applications where chip control becomes an issue. The high positive geometry insert with negative tool holder creates an ideal situation for rolling chips in a controlled manner.

- Features 4 cutting edges per insert
- Ideal for stainless steels and materials that produce stringy chips
- Sharp tool nose radius intended to benefit Swiss-style applications

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

[4005-000111](#)

Connects to side ports on ALL Shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks.

[4005-000104](#)

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
**Fits Position (d) On Tool Holders
 Sold Separately.**

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

- 4005-000111**
 Connects to side ports on ALL Shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks
- 4005-000104**
 Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately.

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

[4005-000111](#)

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

[4005-000104](#)

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSP to 1/4 JIC Flare Fitting
**Fits Position (d) On Tool Holders
Sold Separately.**

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. **multidec® 1600, 3000, ISO VC, & ISO VP** series inserts are currently available.

See Pg. 237

UTILIS multidec® swiss type tools TOP Series

- Wiper geometry enables faster feeds while maintaining good surface finish
- Holders especially designed for front turning and back turning in Swiss-type machines
- Versatile cutting geometry and chip breaker enables turning in three directions
- Decreases cycle time by enabling up to 2X feed rate while maintaining surface quality

multidec® TOP series inserts feature a trailing wiper geometry which produces a stronger cutting edge. This allows for faster feeds while simultaneously increasing surface finish by burnishing the high-points of the turn pattern.

The multidec® TOP series line features a sharp tool nose radius of 0mm .08mm and .15mm with chip control geometry and is ideal for precision small parts turning in tough materials.

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

[4005-000111](#)

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

[4005-000104](#)

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders
Sold Separately.

Features (5) connection ports for simple connection to your oil delivery system: (4) Side ports and (1) one end port making connection possible on most machine tool positions.

[4005-000111](#)

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

[4005-000104](#)

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders
Sold Separately.

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders
Sold Separately.

Usage notes:

To avoid problems, two Y-AXIS holders must not be mounted directly next to each other.

Mount a standard tool holder between the Y-AXIS holders.

To prevent collisions, move back the holder in accordance with the overhanging length before changing the tool position.

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. **multidec® 1600, 3000, ISO VC, & ISO VP** series inserts are currently available.

multidec® LUBE Clamping Wedges

Introducing a revolutionary new method of delivering high pressure coolant directly to your cutting tools. Our NEW multidec® LUBE Integrated Coolant Wedge Clamps from UTILIS are specifically engineered to work with standard square shank stick tooling thereby effectively making your entire tooling inventory "coolant-thru" capable. Convert your whole gang plate or just one tool station, the choice is yours.

Coolant Spray Patterns

- Works with any high-quality square shank tooling
- NEVER waste time bending and aiming coolant lines again!
- Eliminates stringy chips from collecting on your cutting tools
- Replace your standard tool clamping wedge, plumb in to your oil delivery system and hit cycle start!

Coolant Manifolds & Accessories

Citizen - Coolant-Thru Clamps

BACKTOOLS **UTILIS**[®]

multidec[®] BACKTOOL holders enable turning operations to be performed from an ID tool position and are ideal for performing turning operations on the sub-spindle of your machine. Each holder is center height adjustable and is modular to allow usage of a variety of 35, 55 & 80 degree ISO turning inserts; as well as multidec[®] TOP inserts & ALL multidec[®] CUT inserts.

- Center height adjustable to ensure precision setup
- Modular system uses multidec[®] ISO, TOP & CUT series inserts
- Perform turning operations on the subspindle
- Rigid design ensures good finish results as well as extended tool life

Available Backtooling for Turn-Mill Machines & Machine-Based Tool Systems...

- Interchangeable inserts
- Equipped with internal cooling

High Performance Thread Whirling

Thread whirling is a fast & accurate method of producing long threaded parts on a Swiss-type machine. By employing more cutting teeth, the GenSwiss/UTILIS whirling system greatly enhances productivity by allowing increased speeds and feeds while maintaining rigid finish qualities required by the medical implant industry.

- **Whirling Rings**
- **Whirling Inserts**
- **Whirling Attachments**
- Available In Live Tooling

TYPE-A xModular-System

- Whirling ring reduces setup time
- $\pm 0.005\text{mm}$ guaranteed concentricity
- Interchangeable 2-part system

TYPE-B Mono-System

- Compact single component System
- $\pm 0.005\text{mm}$ guaranteed concentricity

TYPE-C QuickChange-System

- Similar to type-A, but ring is rotated to insert or remove
- $\pm 0.005\text{mm}$ guaranteed concentricity

High Pressure Coolant required for adequate chip evacuation in 12 insert configuration

**For Whirling Attachments
See Live Tooling Pg. 296 - 297**

Optional Whirling Rings with advanced or recessed center position are available. Visit genswiss.com or call us for details

Double edge indexable inserts provide excellent tool life

Inserts repeat within .0004"

Custom precision thread forms can be generated in a single pass from barstock diameter

Available in several pocket configurations up to 12 inserts

Increased surface finish and improved thread quality can be achieved by minimizing cut interruption and vibration

Dummy inserts protect the unused insert slots, keeping them particle free and maintaining accuracy when occupied by a threading insert

Whirling Inserts
Pg. 271 - 273

4,6, and 8mm
Insert Widths

**Keep Your Whirling
Ring On-center**

COMPACT STRADDLE KNURL HOLDERS

for small parts

- Create perfect knurls
- Eliminates workpiece deflection
- Low interference

Specifically designed for Swiss-type machines; our low profile straddle knurl holders keep interference to a minimum within the tooling envelope of most machines while ensuring adjacent tool positions are available to maximize tooling capacity.

Item No.	Description	Shank	L	R	Wheel Dimensions
2040-000107	KHS-2BPR-375.1	.375in	2.7in	.0-.394in	5/16in x 1/8in x 5/32in

AXIAL FEED KNURL HOLDERS

- Ideal for long knurled parts
- Produce straight or diamond patterns
- Adjustable for a range of part diameters

Compact design makes it ideal for use on screw machines and CNC lathes when axial feed knurling from the turret. Parts are self supported and they can extend through the shank for long jobs. We recommend using CONVEX Knurl Dies with this style Knurl Holder. Can also be adapted for burnishing and internal knurling

Item No.	Description	Knurl Series	Knurl Range	A	B	C	D	E

BUMP-STYLE KNURL HOLDERS

Conventional "bump" knurling is a cost effective way to produce knurled features on the outer diameter of parts.

- Carbide axles
- Ground shanks
- Left handed available
- Cost effective

Item No.	Description	Knurl Series	A	B	C	D	E
2025-000100	KHB-1BPR-312	BP	.312	.500	4.0	.312	.050

DOUBLE-DIE BUMP-STYLE KNURL HOLDERS

Cost effective solution for producing diamond pattern knurls on Swiss-type machines.

- Carbide axles
- Ground shanks
- Axial feed capability
- Cost effective

Compact Double-Die Bump-Style Knurl Holders

KNURLING WHEELS

Genevieve Swiss offers a full line of precision knurling tools for Swiss-type applications. Optional wheel geometries are available to suit your specific needs. More options are available in addition to what is listed below. Call for details or to discuss applications.

Standard Knurl Dies For Bump Knurling

Knurl Series	Wheel Dimensions	Straight Tooth	30° Right Hand	30° Left Hand	30° Male	30° Female	Available Pitch Teeth Per Inch (TPI)
	OD x ID x Width						
BP	5/16 x 1/8 x 5/32	KDS-BPS0-	KDR-BPR0-	KDL-BPL0-	KDD-BPM0-	KDD-BPF0-	20, 25, 30, 35, 40, 50, 60, 70, 80, 90, 100
EP	1/2 x 3/16 x 3/16	KDS-EPS0-	KDR-EPR0-	KDL-EPL0-	KDD-EPM0-	KDD-EPF0-	16, 20, 25, 30, 32, 35, 40, 50, 80

KP	3/4 x 3/8 x 1/4	KDS-KPS0-	KDR-KPR0-	KDL-KPL0-	KDD-KPM0-	KDD-KPF0-	8, 10, 12, 14, 16, 20, 21, 25, 30, 33, 35, 40, 50, 60, 70, 80, 100

All Wheels Also Available in DIAMETRAL PITCH Configurations: 64DP, 96DP, 128DP, 160DP

- Precision lapped tooth forms provide superior knurled surfaces
- HSS vacuum hardened to approximately 63 Rockwell C
- Sides and Bore are Finish Ground to Maintain Close Tolerances
- Available Coated on Request

CONVEX Series Knurl Dies For Axial Feeding - Inch

Knurl Series	Wheel Dimensions	Straight Tooth	30° Right Hand	30° Left Hand	Available Pitch Teeth Per Inch (TPI)
	OD x ID x Width				
EPV	1/2 x 3/16 x 3/16	KDS-EPSV-	KDR-EPRV-	KDL-EPLV-	16, 20, 25, 30, 32, 35, 40, 50, 80

KNV	3/4 x 1/4 x 1/4	KDS-KNSV-	KDR-KNRV-	KDL-KNLV-	16, 20, 25, 30, 32, 35, 40, 50, 80
KPV	3/4 x 3/8 x 1/4	KDS-KPSV-	KDR-KPRV-	KDL-KPLV-	8, 10, 12, 14, 16, 20, 21, 25, 30, 32, 33, 35, 40, 50, 60, 80

All Wheels Also Available in DIAMETRAL PITCH Configurations: 64DP, 96DP, 128DP, 160DP

CONVEX Series Knurl Dies For Axial Feeding - Metric

Knurl Series	Wheel Dimensions	Straight Tooth	30° Right Hand	30° Left Hand	45° Right Hand	45° Left Hand	Available Pitch Metric (mm)
	OD x ID x Width						
MRV	20 x 6 x 6mm	KDS-MRSV-	KDR-MRRV-	KDL-MRLV-	KDR-MRCV-	KDL-MRDV	0.4, 0.5, 0.6, 0.7, 0.8, 1.0, 1.2, 1.5, 1.6, 2.0

Other Coatings Are Available

- Hi-Cobalt HSS treated with ferritic nitrocarburizing is standard on all CONVEX Knurls.
- Full-form convex relief spreads out forces providing smoother finish
- The ULTIMATE knurling die for Swiss-type straddle knurling

Ti-Loc[®] Saw Arbors

Taper-integrated small tooling provides unparalleled ease of use for advanced productivity!

A BETTER Solution for Slitting Saw Holding.

NEW SIZES Available!

TIR Held to .0002" or Better
 Repeatable Positioning of Saw Edge
 Ground ER Taper and Saw Journal
 Integrated ER Taper For Maximum Rigidity

ER11 Saw Arbors

Signature Series Saw Arbors

Ultra Precision Combination Saw Arbors - 5015 Series

GenSwiss ultra precision combination arbors are made from pre hardened material and exemplify what it means to be called "Swiss Precision". The addition of the combined mill or center drill provides additional tool capacity and setup flexibility. TIR measured at less than .0002". Made in the USA.

Flange Mount Metric Saw Arbors - 5020

These metric flanged saw arbors provide maximum saw balance and stability with the flange mount design. The unique design applies pressure to the outward edge of the flange ensuring the greatest gripping power at the outer most edge to prevent slipping. Uses countersunk screw and flange washer to apply holding force. Measured TIR is less than .0004".

Precision Saw Arbors - 5025 Series

Our most popular style of slitting saw arbor is now available in guaranteed TIR grades of SAS (under .0005" TIR) and SAP (under .0001" TIR). Our SAS arbors are adequate for many applications and are an extremely cost effective method of clamping and holding a carbide slitting saw in your Swiss lathe tool setup. When ULTRA Precision is required, the SAP grade is suggested as they are held to stringent quality standards required by discerning Swiss-type machinists. Made in the USA.

Custom Slitting Saw Arbors

GenSwiss has the capability to assist with the engineering and manufacture of special gang slotting arbors that also feature the option of holding an end mill, spot drill or other small round shank rotary tool.

Some features we can provide:

- Spacers for gang slotting with multiple blades.
- Custom hub widths (L1 dim.) for oversize blade thicknesses.
- Optional shank sizes for special applications.

SOLID CARBIDE SAW BLADES

Genevieve Swiss Industries carries a full line of solid carbide slitting saws directly imported from Switzerland. Available from stock in either fine and extra-fine tooth configurations with tooth counts ranging from 40-120 teeth per saw.

Our Solid Carbide Saws Feature:

- Precision ground accuracy
- Superior surface finish
- High tooth count for cutting hard metals
- Hollow ground side clearance
- Full radius, V-cutter, & staggered versions available
- Designed and manufactured to the highest quality & standards

QUICK CHANGE TOOLING SYSTEM

Insert Modules For KM Quick Change Holders

- Compatible with multidec® CUT 3000 & 1600 & ISO/TOP inserts
- Coolant-thru capable

Decreased Setup Times
Increased Tool Capacity

Willemin Macodel & Bumotec

HSK Tool Holders

- Compatible with multidec® CUT 3000 & 1600, ISO/TOP inserts & micro bore tools
- Monoblock tools with interchangeable inserts
- Coolant-thru capable
- Insert positioned on center line

multidec[®] **ESCOMATIC**

The multidec[®] ESCOMATIC line of tool holders enables the use of multidec[®] 1600 & TOP/ISO series inserts with ESCOMATIC machines. These quick-change holders reduce tool changes to a few minutes. The indexable cutting inserts have two cutting edges, extending tool life.

SWISS SILVER

Signature Series Cutting Oil

Swiss Silver is formulated from a highly refined mineral base oil that is as crystal clear as pure water. Low viscosity makes it perfect for Swiss-type machines and small parts manufacturing as it provides superior penetration on micro parts and better flow to the cutting tool.

- NO STAINING RESINS - Your machine stays cleaner
- HIGH FLASH POINT - Reduces possibility of machine fires
- LOW MIST - Good for high pressure delivery
- LOW VISCOSITY - Reduces air entrapment
- INCREASED VISIBILITY - Easier to see into the machine

Formulated For CNC Swiss-Type Machines

TYPE A - Most Metals TYPE B - Ferrous & Tough Alloys

Swiss Silver Premium - Most Metals

Our standard premium HIGH PERFORMANCE product, ideal for all Swiss-type machines or small parts turning centers. Provides extended tool life in ferrous and non-ferrous applications. Minimal air entrainment reduces misting under medium pressure coolant delivery.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000100	LCO-SS00-A00-MGS
A (Most Metals)	5 Gallon	2505-000107	LCO-SS00-A00-M-5G
B (Ferrous & Tough Alloys)	55 Gallon	2505-000101	LCO-SS00-B00-MGS
B (Ferrous & Tough Alloys)	5 Gallon	2505-000118	LCO-SS00-B00-M-5G

Swiss Silver AB - Aluminum & Brass

Specifically formulated for enhanced surface finish results in aluminum, brass & copper applications. Prevents tarnishing of yellow metals. Features low air entrainment for low mist under medium pressure coolant delivery.

Type	Size	Item No.	Description
Standard	55 Gallon	2505-000102	LCO-SSAB-000-MGS
Standard	5 Gallon	2505-000113	LCO-SSAB-000-M-5G
High Pressure	55 Gallon	2505-000111	LCO-SSHP-AB0-MGS
High Pressure	5 Gallon	2505-000119	LCO-SSHP-AB0-M-5G

Swiss Silver HM - Hard Metals

A special formulation of Swiss Silver designed to enhance the machining of "hard metals" such as high nickel materials, inconel, hastelloy, and other tough-to-machine exotic alloys. Includes the tool life enhancing additives and low misting agents offered in other Swiss Silver variants.

Type	Size	Item No.	Description
B (Ferrous & Tough Alloys)	55 Gallon	2505-000103	LCO-SSHM-B00-MGS
B (Ferrous & Tough Alloys)	5 Gallon	2505-000120	LCO-SSHM-B00-M-5G

Swiss Silver HP - High Pressure Delivery Formula

An enhanced formula of the standard premium cutting oil product that greatly reduces the mist and air entrainment under high pressure pump coolant delivery applications found in many Swiss-type machining operations.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000104	LCO-SSHP-A00-MGS
A (Most Metals)	5 Gallon	2505-000108	LCO-SSHP-A00-M-5G

Swiss Silver PL - Platinum

Provides low viscosity and better heat dispersion for precision micro machining and deep hole drilling. Available in both TYPE A & Type B Grades. Excels on stainless steel, tough alloys, titanium, brass, and aluminum.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000124	LCO-SPLA-A00-MGS
A (Most Metals)	5 Gallon	2505-000125	LCO-SPLA-A00-M-5G

B (Ferrous & Tough Alloys)	5 Gallon	2505-000127	LCO-SPLB-B00-M-5G

Swiss Silver VX - Vegetable Based Formula

A High Performance vegetable based cutting oil product that provides pure lubricity and unparalleled surface finish on ferrous and non-ferrous parts. Biodegradable and environmentally acceptable for fulfilling 'green' manufacturing objectives.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000106	LCO-SSVX-101A-VGS
A (Most Metals)	5 Gallon	2505-000114	LCO-SSVX-101A-VGS-5G
B (Ferrous & Tough Alloys)	55 Gallon	2505-000110	LCO-SSVX-101B-VGS
B (Ferrous & Tough Alloys)	5 Gallon	2505-000123	LCO-SSVX-101B-VGS-5G

Swiss GD - Gold

Low foaming oil with maximum visibility, Swiss Gold is ideal for high pressure systems, providing a mix of low viscosity and a high flash point. Excels on stainless steel, tough alloys, titanium, brass, and aluminum. Long term use provides high performance on all metals.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000129	LCO-SSGA-A00-MGS

Special formulations are also available for custom applications.
 Low or no chlorine formulas available on request.
 Way Lube also available.

PERFECT ZERO

Visual Alignment System

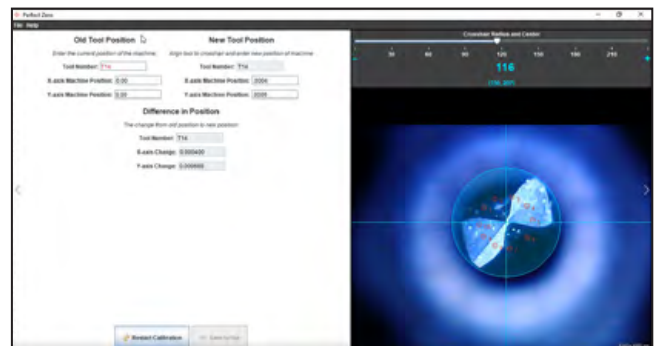

- Center ID tools as small as .002in
- Center OD tools including threading tools, turning tools, & Y-axis tools
- Saves you money by extending the life of your perfectly aligned micro tools
- Works on any machine
- Sub-spindle camera also for use on mills, lathes, & vertical mills

The Perfect Zero visual alignment system is a complete turn-key solution for any machine, perfectly and rapidly centering your tools. With perfectly centered micro tooling, Perfect Zero will pay for itself in both time savings and added service life for your tooling. The included laptop computer, pre-installed Perfect Zero software, and cameras will center your tools on both the guide bushing and sub spindle side of any machine. Center micro drills as small as .02in as well as OD tools, including threading tools, turning tools, and Y-Axis tools. The non-contact optics of the sub spindle and guide bushing cameras eliminate alignment errors with no measuring gauges needed.

Perfect Zero aligning a micro tool on a Citizen Swiss-style machine

Screen-shot of Perfect Zero Software crosshairs on ID tool

Guide bushing camera, aligning ID tool

Camera in sub spindle

Perfect Zero Kit Includes:

Contents	Description
Cameras	(1) 12.7mm Guide Bushing Camera, (1) 12.7mm Sub Spindle Camera.
Visual Targets	(5) Targets with 0.25, 0.375, 0.5, 0.625, & 0.75in OD (All targets have 0.02in ID) Used for finding the center of your tool.
Laptop & Software	The Perfect Zero Software comes pre installed on each included laptop.
Service Cart	A wheeled cart useful for transporting Perfect Zero between multiple machines.
Carry Case	Durable carry case, ideal for storing all Perfect Zero components and taking on-the-go.

Parts Cleaning System

- Easy to install - connects to shop air in minutes
- Keeps the air and floor clean of oil residue
- Captures EXPENSIVE cutting fluids for reuse
- The perfect accessory for Swiss machine shops
- Wash stations are available for washing & drying parts

Optional Casters For Ease Of Transport

- MiJet unit

MAGNETIC FINISHING

No Feature Is Too Small

- Edge rounding of .002-.003in
- Removes micro burrs
- Improves surface finishes

Contact Us For A FREE Applications Trial

Magnetic Finishers remove micro burrs and improve surface finishes on non ferrous materials and some stainless steels. Small steel pins with diameters ranging from .007in -.050in are spun at a high-speed by a magnetic wheel. The size of the pins enable them to travel through fragile parts to remove microscopic burrs that would normally be removed by hand. The non-aggressive burnishing action enables desirable edge rounding of .002-.003" without part damage to threads, knurls, or other fine edge surfaces.

Complete Sets - Includes Stainless Finishing Media & Supplies

Item No.	Description	Bowl Size	Includes:
1505-000133	FR-CMF-400-S	4in	Includes Base, Turbo Finishing Pins, Burnishing Solution, & Magnetic Separator - 115V or 230V
1505-000134	FR-CMF-610-S	6in	Includes Base, Turbo Finishing Pins, Burnishing Solution, & Magnetic Separator - 120V or 230V
1505-000130	FR-CMF-900-S	9in	Includes Base, Turbo Finishing Pins, Burnishing Solution, & Magnetic Separator - 120V or 230V
1505-000129	FR-CMF-1200-S	12in	Includes base, Turbo Finishing Pins, Burnishing Solution, & Magnetic Separator - 230V ONLY & requires plug wiring by qualified electrician.

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **Free evaluation and inspection**
- **Repaired by factory trained professionals**

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **Free evaluation and inspection**
- **Repaired by factory trained professionals**

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **Free evaluation and inspection**
- **Repaired by factory trained professionals**

Call Us At: 1-413-562-4800

TORNOS DECO 13

Swiss Made by

Rigid steel housings absorb cutting forces and are resistant to thermal instability, providing better finish results

Multi-bearing layout is designed for mill cutting as well as simple drilling

High-Precision bearings ensure free spinning rotation & long service life

All PCM spindles utilize REGO-FIX ER-collet nuts for tool-holding

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **Free evaluation and inspection**
- **Repaired by factory trained professionals**

Call Us At: 1-413-562-4800

Terms & Conditions of Sale

Prices	All prices are in U.S. dollars. Prices are valid for 30 days after quotation, then subject to change. Sales & Use Tax due is the consumer responsibility and payable as State regulations require.
Credit	Credit approval may take several weeks after returning the completed Credit Application and signed Terms & Conditions Agreement. Changes to Genevieve Swiss Industries, Inc. ("GSI") standard Terms and Conditions made by the applicant are grounds for credit denial. GSI reserves the right to change or deny credit at any time based upon late payment or changes to your DNB rating.
Orders	Upon receipt of your purchase order, GSI will provide a sales order confirmation. The customer accepts responsibility to notify GSI of any error or changes that are required.
Cancellation	Order cancellation must be provided to GSI in writing. Cancelled orders are subject to a minimum \$25.00 process fee and a production upcharge depending upon product completion.
Delivery	Product availability is subject to prior order regardless of stock condition at the time of quotation. GSI policy is to partial ship the order if any item is out of stock unless otherwise instructed. The customer is responsible for all shipping charges. The customer accepts responsibility to notify GSI in writing of orders that must ship complete.
Quantity	For special orders, the customer agrees to a delivered quantity +/-10% at the per piece cost.
Blanket Order	At the end of the agreed term, the customer agrees to accept the open balance of the blanket order. Any deviation to this agreement must be in writing by GSI. If GSI agrees to a contract adjustment and where quantity discounts were applied, a change in quantity will affect the price per piece of the complete order. The customer accepts a back charge on any previously shipped quantity.
Payment	Invoices are payable within GSI established terms. Interest will be charge on overdue accounts at 1.5% per month, 18% per annum. Returned checks will incur a \$50 charge. Credit Card payments are due when the item ships. Credit card payments made after 30 days of invoice or later are subject to a 2.75% fee or 1.5% per month at the option of GSI.
Shipping	All freight and packing cost will be paid by the customer and shown separately on the invoice. Shipments will be insured at sale value and included in the shipping cost. A maximum 20% packing fee may be added at the discretion of GSI. Shipments are FOB Westfield Massachusetts.
Warranty	Products are covered by the original manufacturer warranty where applicable. Live Tool Holders are guaranteed by the manufacturer for a period of 12 months or 2000 hours whichever comes first to be free of material defect or poor workmanship. A copy of the manufacturer's full guaranty is available upon request. GSI warrants that its products are free of material defect or poor workmanship ("Defect") for a period of 12 months from delivery. In the event GSI receives written notice of an alleged defect within the warranty period, GSI has a reasonable opportunity to inspect the relevant product and GSI determines that there is a Defect, GSI will repair or replace the product at GSI's option. EXCEPT FOR THE WARRANTY SET FORTH IN THIS SECTION, GSI MAKES NO OTHER WARRANTIES, WHETHER BY STATUTE OR EXPRESS OR IMPLIED, INCLUDING ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR THAT THE DESIGN OF THE FINISHED PRODUCT WILL MEET CUSTOMER REQUIREMENTS. ALL OTHER WARRANTIES AS TO THE QUALITY, CONDITION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY EXPRESSLY DISCLAIMED. THE REMEDIES SET FORTH IN THIS SECTION SHALL CONSTITUTE YOUR SOLE AND EXCLUSIVE REMEDIES, AND GSI'S SOLE AND EXCLUSIVE LIABILITY, IN CONNECTION WITH ANY WARRANTY CLAIM ARISING HEREUNDER.
Limitation of Liability	EXCEPT FOR ACTS OF GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, TO THE MAXIMUM EXTENT PERMITTED BY LAW, NEITHER GSI, NOR ITS RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, AND AGENTS SHALL BE LIABLE TO CUSTOMER FOR ANY INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, RELIANCE OR PUNITIVE DAMAGES OR LOST PROFITS OR OPPORTUNITIES, IRRESPECTIVE OF ANY NOTICE OR ACT CONSTITUTING NOTICE OF THE POSSIBILITY OF ANY SUCH CLAIM. THE AGGREGATE CUMULATIVE LIABILITY THAT GSI SHALL HAVE FOR ANY AND ALL CLAIMS ARISING IN CONNECTION WITH THIS PURCHASE, WHETHER BASED ON CONTRACT, TORT, STRICT OR PRODUCTS LIABILITY, WARRANTY, INFRINGEMENT OR OTHERWISE, SHALL NOT EXCEED ALL PAYMENTS MADE BY CUSTOMER AND RECEIVED BY GSI UNDER CUSTOMER'S ORDER.
Returns	We will replace or accept for return items that are not what was ordered or are found to be defective. Claims must be submitted within 30 days and will not be accepted without an approved GSI Return Authorization Form. Items must be returned in new condition and properly packaged. Returned items that are damaged, used or are missing parts may be refused for return or subject to repair charges and restocking fee. Items returned without cause will incur a \$25.00 process fee and or up to 20% restocking charge. No credit will be issued for items returned after 90 days. Special orders cannot be returned. Any credit due will be issued as a merchandise credit and applied towards future purchases.
Collection	In the event of non-payment within the terms, the customer will be responsible for all costs of collection including, but not limited to, attorneys' fees incurred by GSI in connection with any delinquent account.
Disputes	This Agreement and dispute arising from or related to this Agreement, the sale of goods or any other transactions between the parties shall be governed exclusively by Massachusetts law. Any court action by either party shall be brought exclusively in the appropriate state or federal court in Hampden County, Massachusetts. The customer hereby agrees to submit to the jurisdiction of such court.

I understand the terms and conditions set forth by Genevieve Swiss Industries, Inc. and agree to the conditions in whole as they are stated above in exchange for the goods and service rendered from Genevieve Swiss Industries, Inc. No amendment or modification of these terms and conditions is effective unless agreed to in writing by an officer of Genevieve Swiss Industries, Inc.
