# Flexibility from 10GbE and 1GbE port

# QSW-308 series features

## QSW-308S

Use 10G-SFP-T copper transceiver module for link up copper cable

- 3 x 10GbE SFP+ port
- 8 x 1GbE RJ45 port

## QSW-308-1C

Use 10G-SFP-T copper transceiver module for link up copper cable

- 3 x SFP+ 10GbE port  
(built-in 1 x 10GbE NBASE-T Combo port)  
Support: 10Gbps/5Gbps/2.5Gbps/1Gbps/100Mbps
- 8 x 1GbE RJ45 port

# Multi-Giga port

Automatically adapts to the required speed and supports 5 networking speeds.

Supports Multi-Gigabit NBASE-T by QSW-308-1C combo port

# Thin and light design

90 degree

Adjustable angle power cable design

Sleek design for desktop placement

# Fanless design

# Upgrade with existing cable wiring

Supports Multi-Gigabit NBASE-T by QSW-308-1C combo port, existing RJ45 cables can be used for faster speeds!

# A complete backup solution

Data backup is the most effective way against ransomware

# QNAP Hybrid Backup Sync

The image displays the QNAP Hybrid Backup Sync web interface. On the left, a sidebar contains navigation options: Overview, Backup & Restore, Sync, All Jobs, Services, and Storage Space. The main area is divided into 'Job Status' and 'Storage Spaces'. The 'Job Status' section shows a summary of job counts: Success (15), Running (0), Stopped (4), Error (2), Warning (0), and Not start yet (1). Below this is an 'Alarm Log' section with a clipboard icon and the text 'There are no job log.' A large blue circular icon with a clock and arrows is positioned over the job status area.

Three numbered steps are overlaid on the interface:

- 1 Backup**: Represented by a green arrow pointing down to a server rack icon.
- 2 Restore**: Represented by a green circular arrow around a server rack icon.
- 3 Sync**: Represented by a purple circular arrow around a cloud icon.

Below the interface, a yellow callout box contains the text: **Intuitive operation design Improve backup management efficiency**

The bottom right shows a 'Jobs' overview page with a table of tasks:

Type	Job Name	Source / Destination	Schedule	Status	Action
Backup	Backup 14	Source: 10.8.16.54 - Public/NTV Destination: 10.8.16.48 - Public/MSL_Test/Backup 14.qiff	Do not repeat	Completed 2019/01/17 10:16	▶ □ □ □ □
