Position Increments (LPM)

It's Durable - The lack of a flow tube and the durable metal body prevents breakage problems long associated with standard flowmeters.

It's Compact - The compact size allows the unit to fit into tight headwall areas and makes it virtually damage proof when other equipment is installed.

It's Accurate - The patented multi-spring technology insures accuracy at every flow setting without the need for a visible float as in Thorpe tube flowmeters

It's User-Friendly - The knurled flow adjustment knob and the large, easy-to-read numbers make flow adjustment easy.

It's Versatile - The unit is available for headwall outlets as well as for ceiling mount drops. Both air and oxygen models are available.

Plastic Bumper Guards

Sound Deadening Matting

Anthony has developed an exclusive sound deadening system for their multiple cylinder carts, used to distribute cylinders in and around hospitals, rest homes, convalescent homes, etc. or where QUIET is essential.

These sound deadening kits include heavy-duty sound deadening matting and plastic bumper guards. This formula eliminates the rattling & clanging of steel & aluminum cylinders while in transport.

SOUND DEADENING KITS ALSO SOLD SEPARATELY
