# Adjustable Keyboard Trays.

The right adjustable keyboard provides comfort and helps increase productivity

**A** Head, neck and shoulders are positioned forward and upright (not bent or turned).

**C** Hands and wrists are in a straight line with forearms (not bent up or down).

**B** Shoulders and arms are roughly perpendicular to the floor; elbows are close to the sides.

**D** Adjustable keyboard tray allows ample clearance between thighs and keyboard tray.

Reduce repetitive stress, maintain proper posture and ensure comfort

# Selecting the Right Adjustable Keyboard Tray is as Easy as 1-2-3!

**1** Select your preferred arm type based on ease of adjustment.

## BEST – Easy Adjust Arm

Easy to adjust – just tilt platform, adjust and release to lock in place. Tilt is adjusted by dialing tilt knob to desired angle. Includes height and tilt read-outs.

## BETTER – Lever-Adjust Arm

Lever handle ensures positive lock on platform height. Just flip lever to right, adjust height and move lever back to lock in place. Tilt is adjusted with separate pull lever.

## GOOD – Knob-Adjust Arm

Knob adjusts both height and tilt. Just loosen knob, set height and tilt, and re-tighten.

**2** Choose a keyboard platform that's right for you.

## Adjustable Platform KP200LE

Sturdy platform has proprietary lateral adjustments for optimal keyboard adjustment. Articulating mousing platform adjusts in all directions, tilts forward and back, and can be mounted on the left or right side of the keyboard platform.

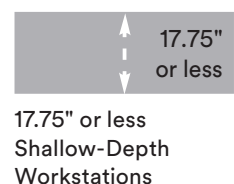

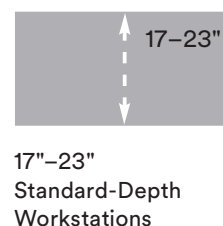

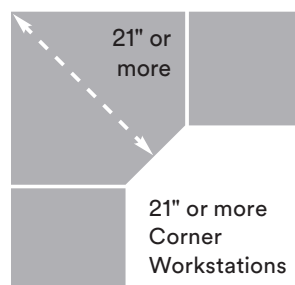

## Standard Platform KP100LE

Standard all-in-one platform with wooden construction minimizes bouncing. Mousing surface can be placed to the right or the left of the keyboard.

**3** Where are you sitting?

## Determine the track length you need for your workstation.

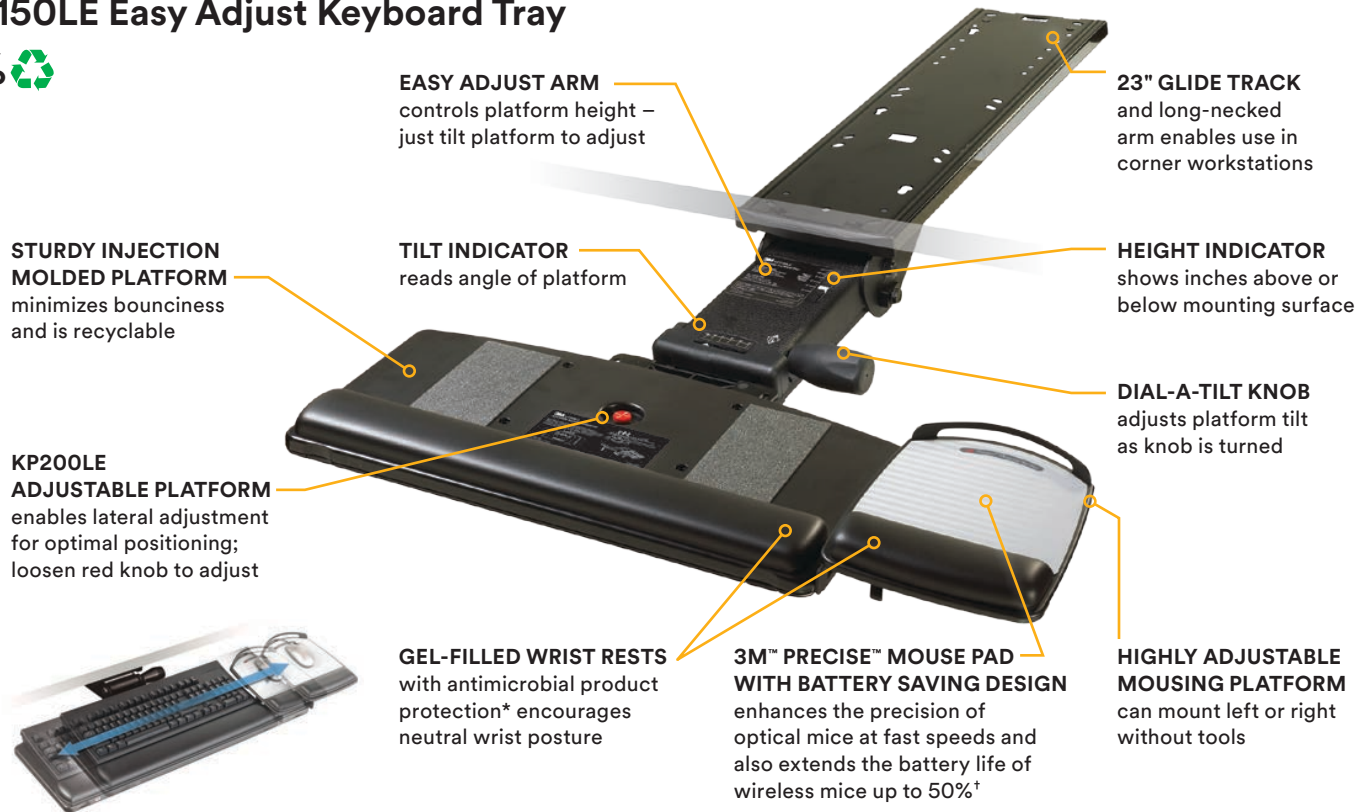

# Adjustable Keyboard Trays

The Keyboard Tray you need. The features you want. 3M™ Adjustable Keyboard Trays offer a broad line of solutions with innovative features and thoughtful design to fit almost any workstation environment.

# Wrist Rest Technology

## Gel-filled comfort

3M's gel technology creates a wrist rest that is firm enough to provide the support you need, but soft enough for optimal comfort. 3M™ Gel-filled wrist rests are guaranteed not to leak and are puncture-resistant under normal use.

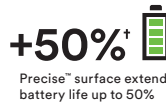

## Antimicrobial protection\*

3M™ Gel Wrist Rests with black leatherette covers feature antimicrobial product protection which inhibits the growth of microorganisms, such as bacteria, on the product surface, that can cause stains, odors and product degradation.

## Recycled content

3M™ Gel Wrist Rests with black leatherette coverings are manufactured using preconsumer recycled material. The  and corresponding number indicates the percentage of recycled content by weight in a given product. All 3M™ Wrist Rests are packaged using recyclable material for less environmental impact.

## 3M™ Precise™ Mouse Pad with Battery Saving Design

Enhance the precision of optical mice at fast speeds and also extend the battery life of wireless mice up to 50%.<sup>†</sup>

# Workstation Guidelines

For Optimal Personal Comfort

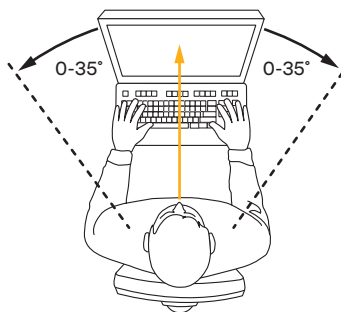

Use these guidelines to set up your workspace to ensure good ergonomic posture and to attain optimal personal comfort.

## Recommended Positioning

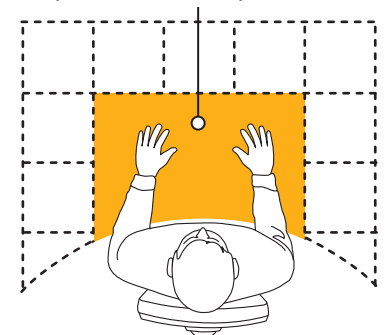

To avoid eyestrain, position your monitor within a comfortable viewing distance, at or below eye level, and within your 60° viewing field.

Position source documents in line with your screen, and no more than 35° to either side, to avoid excessive turning or bending of your neck.

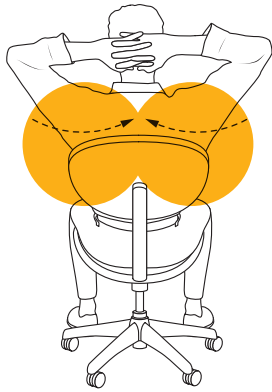

## Optimal area for input devices

Place input devices within the recommended area to avoid strain on your wrists, arms and hands.

# Exercises

To Promote Ergonomic Comfort

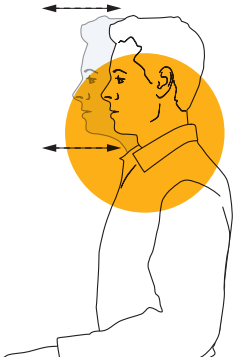

## Executive Stretch – for upper back, chest and shoulders

Sit upright in your chair. Clasp your hands behind your head, keeping your elbows in line with your ears. Press your elbows back as far as possible, squeezing your shoulder blades together. Relax, then repeat 3 times.

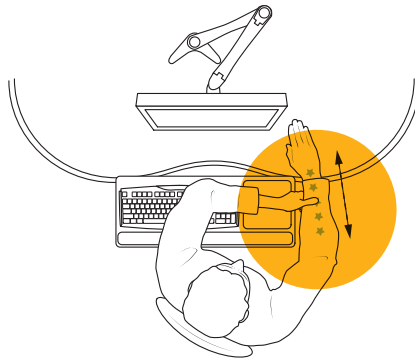

## Focusing Technique – for eye relaxation

Focus on an object at least 20' away or as far from your work area as possible, then move your eyes around and look at other objects. Look back at your computer screen. Repeat throughout the work day.

## Neck Glide – for neck

Sit comfortably upright and look straight ahead. Keeping your head and ears level, glide your head back as far as it will go. Now glide your head forward. Repeat 3 times.

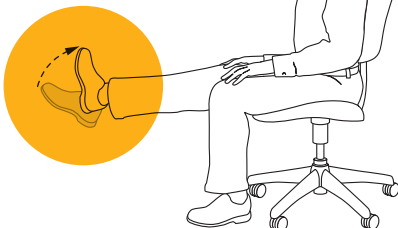

## Arm Massage – for forearms

Sit at a desk or table. Place your arm in front of you with your hand palm-down. Use your thumb to press firmly on your opposite arm, moving it slowly from your wrist to elbow and back down. Repeat 3 times.

## Reverse the Curve – for back and hips

Stand with your feet slightly apart. Place your palms in the curve of your lower back. Keep your chin down and focus on an object in front of you. Bend backward, supporting your lower back with your hands. Don't lock your knees. Hold for 5 to 10 seconds. Repeat 3 to 5 times.

## Leg Extension – for legs and lower back

Sit in a chair and straighten one leg directly in front of you. Flex your foot by pointing your toes toward the ceiling. Flex hard for 5 seconds, then release. Repeat 3 to 5 times. Return foot to floor and switch legs.

There are many possible causes for physical discomfort. If you are experiencing symptoms that persist for more than two weeks or are severe enough to interfere with your job or personal activities, consider seeking medical assistance.
