

MRO CAPABILITY LIST

MRO Capability covered by
The SA Group & Partners

The Scandinavian Avionics Group HQ

MRO Capability covered by

The SA Group & Partners

Scandinavian Avionics has an extensive in-house capability and supports both FAA and EASA (Dual release) Part 145. Furthermore, SA has a substantial capability by means of a number of selected and trusted partnerships which fulfils SA's requirements for quality, customer service and turnaround time.

The SA MRO capability mainly covers avionics and instrument components.

The MRO capability listing generally specify the equipment by OEM (Original Equipment Manufacturer) Part Numbers. However, be aware that i.e. Airframe manufacturers may use their own PN's instead of the original equipment manufacturers part, type or model number. For this reason our capability listing may include all your equipment despite the numbers does not correlate directly and we please ask for your support by referring to the OEM part numbers when investigating our capability. Alternatively of course, please feel free to contact us for assistance and/or clarification.

In addition to the capability listed here, SA provides a wide range of services

- Design and certification of A/C modifications (EASA Part-21)
- Engineering, analyses and drawings (CAD based)
- Aircraft system troubleshooting and repair
- System integration and installation
- Technical and operational training
- Supply of new and used equipment
- Supply of rental and exchange equipment
- Supply of test and workshop equipment
- Field service team support on a worldwide basis

The listing is constantly revised and you can always find updated versions on our website.
