## WHY D-LINK?

## Why D-Link?

D-Link has been the brand of choice for millions of customers since way back in 1986. Back, in fact, since the Internet was in its infancy. We have grown with it, led the trends and continuously developed leading-edge products that reflect the needs and demands of real people in the real world, whether at work or at home.

With over 30 years in the industry, D-Link has both the resources and expertise needed to pioneer technological trends through ongoing research and development programmes. All this translates into affordable, market-leading products that make your business or personal life easier.

### For Home

There's no avoiding it – we now live in a digital world, a world in which we want all our devices to talk to each other, to seamlessly integrate without the need for human intervention or continual techy tinkering. We want to stream music throughout our homes, ask Siri or Alexa what the weather will be like, visually monitor our babies or pets, download HD movies, share photos, play games and, of course, check our emails and browse the web.

All this needs modern, technologically advanced products that seamlessly integrate into our lives. And D-Link provides it all. Whether you need the latest Wave2 Wireless router, a state-of-the-art network camera, smart plug, Wi-Fi range extender or a 4G dongle, there's a D-Link product to suit.

### For Business

From a business user perspective, D-Link has the scale, the resources, the experience and the expertise that the world's most demanding businesses look for. We make sure we stay really close to our customers' businesses and then, because our R&D resources are geared to fast-track product development, we provide them with early access to the most advanced solutions possible.

D-Link's switching, industrial Ethernet, wireless, security, surveillance and management solutions deliver best-in-class performance. We offer standardised technology with industry-leading functionality integrated into highly flexible, highly reliable and highly secure solutions that are easy to implement, at a price you can afford.

## SWITCHES

# Keep your workflow running smoothly

If a switch fails, your business can experience any number of issues, from loss of connectivity for a group of users, to major disruption and downtime for the entire network. From the core of your network to its edge, D-Link's comprehensive selection of switches includes 10 Gigabit, Gigabit, Fast Ethernet and PoE that range from entry level to fully managed, more sophisticated solutions, including switches designed specifically for Metro Ethernet and datacentre applications.

## Unmanaged Switches

*No-brainer networking*

**Just plug it in, make your connections, and that's it. No configuration necessary.**

- Simple to setup with plug 'n' play
- Optional PoE models

## Smart Managed Switches

*Essential features with affordability*

**D-Link Smart Switches offer a robust set of Layer 2 and Layer 2+ features designed to support the most demanding applications.**

- Extensive range to meet the networking needs of businesses of all sizes
- Optional PoE models that support PoE/PoE+ with high PoE power budgets
- Optional models with 10 Gigabit uplinks and high availability support with physical stacking
- L2/L2+ features help to optimise and improve network efficiency

## Managed Switches

*Seamless connections for demanding uses*

**Designed for network applications requiring the highest availability and reliability.**

- High-performance L3 switches
- 10 Gigabit uplinks and up to 80 Gigabit high-bandwidth stacking
- Optional Enhanced and MPLS images to add advanced VLAN and L3 routing as well as MPLS protocols support
- Comprehensive management and security features

## Independent switch reviews...

Tolly Group has tested several of our smart managed and fully managed switches against well-known competitors, and the results are excellent. To find out more, visit <https://dlink.to/tollyreport>.

## SWITCHES

## Smart Switches

*They're called Smart for a reason*

D-Link Smart Switches offer a robust set of Layer 2 and Layer 2+ features and are designed to support your company's most demanding applications. With port densities ranging from 8 to 52, speeds ranging from Fast Ethernet to 10 Gigabit, models with or without PoE, we have the right Smart Switch solution to keep your business running and your budget intact.

Smart switches are attractively priced, easy to set up and configure, and support an essential suite of L2/L2+ switching features. D-Link offers six families of Smart Switches to meet the networking needs of businesses of all sizes.

## What are the benefits of...

### PoE Support?

Power over Ethernet makes network device installation simpler, safer, and less expensive. Whether you're deploying a network of IP Cameras, Wireless APs, IP phones, or any other PoE device, D-Link PoE switches will provide the flexibility, simplicity, safety and cost savings you need for a successful installation.

### 10 Gigabit Connectivity?

10 Gigabit switches offer a low-cost solution to solve the demands for bandwidth. Not only is the cost of installation low, but the cost of network maintenance and management is minimal, since it can be performed by local network administrators. In addition to the cost-reduction benefit, 10 Gigabit Ethernet allows faster switching since it uses the same Ethernet format as slower switches, thus allowing seamless integration of LAN, MAN, and WAN.

### Layer 2+ Support?

Layer 2+ support helps to reduce the pressure of routers and backbone networks through wired speed inter-VLAN routing, improving the overall network efficiency. Further optimisation of the network can be done through L2/L3/L4 Quality of Service (QoS) and Access Control Lists (ACL) to improve network performance as well as security.

### Stacking?

Essentially, stacking enables multiple switches to be seen as a single switch for setup and admin purposes, but also provides more resiliency than uplinked switches. Centralised traffic-path selection mitigates STP issues between switches, and stacking also provides faster bandwidth between switches along with shared power between switches.

SWITCHES

**10 Gigabit Connectivity**

*Performance and speed*

Business networks of all sizes are faced daily with an increasing amount of data that needs to be processed, stored, backed up and accessible. In many cases, Gigabit Ethernet just can't keep up anymore. With 10 Gigabit Ethernet pricing now more affordable than ever, IT managers are seizing the opportunity to upgrade their networks and keep pace with these growing bandwidth demands. Whether the needs are at the network edge, in the distribution layer, or the core, D-Link has the right solution for your network. From economical Smart Switches to feature-rich fully managed L2/L3 Aggregation Switches, our equipment can relieve your bandwidth bottlenecks and keep data traffic flowing at the fastest possible speeds.

Copper or Fibre, for Uplink or Stacking

10Gbps Ethernet is no longer restricted to fibre optic media only. Recent advancements in chip design have made 10GBASE-T (10Gbps over copper) more economical and easier to deploy than ever before. Direct Attach Copper (DAC) is also a popular choice, especially for shorter distance, latency-sensitive applications.

Media	Type	Distance	Switch Interface	Typical Latency	Typical Application
Copper	DAC (Twinax)	Up to 7m	SFP+	Better	Server/Rack
	CAT-6	~30m	RJ-45	Good	SMB Aggregation Switching
	CAT-6a	Up to 100m			
	CAT-7				
Fibre	MMF	Up to 300m	SFP+	Best	Campus Network
	SMF	10km+			

What's 10 Gigabit Ethernet good for?

**1 Edge Switch**

*Small office network running specialised applications*

**2 Distribution Switch**

*Small/medium office network*

**3 Aggregation Switch**

*Enterprise/campus network*

**4 Core Switch**

*Medium business/small enterprise office network*

**5 Top-of-Rack Switch – small office**

*Small office server closet*

**6 Top-of-Rack Switch**

*Enterprise/campus data center*

<sup>1</sup> When stacking the DGS-3130-30TS/30S/30PS models, the stacking cost is 1 per unit so the maximum units per stack is 9.

When stacking the DGS-3130-54TS/54S/54PS models, the stacking cost is 2 per unit so the maximum units per stack is 6.

<sup>2</sup> When stacking different models in the same stack, switches can be stacked up to a maximum of 12 stacking cost per stack. For example: 2 x DGS-3130-30TS (2 stacking cost) + 2 x DGS-3130-30S (2 stacking cost) + 4 x DGS-3130-54TS (8 stacking cost) consumes a total stacking cost of 12 (2+2+8).

<sup>3</sup> Available in future firmware update

Description	16-Slot Media Converter Chassis with Internal Power Supply	Redundant Power Supply for DMC-1000

## Power over Ethernet (PoE) Adapter / Extender

### DPE-101GI 1-Port Gigabit PoE Injector

- Main Features**
- Use without a PoE switch
  - Supply power to PoE devices
- Physical Features**
- Maximum power input 48 V
  - Gigabit speed
  - Supports 802.3af, up to 15.4 W

### DPE-301GI Gigabit PoE+ Injector

- Main Features**
- Use without a PoE switch
  - Supply power to PoE devices
- Physical Features**
- Maximum power input 55 V
  - Gigabit speed
  - Supports 802.3at/af, up to 30 W

### DPE-301GS Gigabit PoE+ Splitter

- Main Features**
- Add PoE to non-PoE devices
  - Works with PoE switch or injector
- Physical Features**
- 5 V, 9V, or 12 V DC output
  - Gigabit speed
  - Supports 802.3at/af, up to 30 W

### DPE-302GE 2-Port Gigabit PoE Extender

- Main Features**
- Extends PoE connection up to 500 m\*
  - Multiple mounting options
- Physical Features**
- 2 x Gigabit output ports
  - Powered by PoE
  - Up to 60°C operating temperature
  - Supports 802.3at/af, up to 30 W

\* With multiple units

INDUSTRIAL SWITCHES

Designed for a more connected future

**1 Rugged, Hardened Design**

*Design to operate in wide temperature ranges, vibration, shock, allowing the switches to be deployed in enclosures or cabinets in outdoor locations*

**2 High Availability**

*Comprehensive network redundancy features with fast fault recovery, together with advanced security features provides industrial-grade reliability and protection*

**3 Flexible Options**

*Wide selection of port density, media and PoE provides customer with the flexibility to choose the right switch that best fits their requirement*

**Industrial Ethernet Switches**

*Rugged and reliable*

D-Link's Industrial Ethernet Switches are designed specifically to withstand wide temperature range, vibrations and shock. These rugged, yet easy to deploy, switches have superior environmental specification compared to those of commercial network switches. With its hardened design combined with high availability network features, these switches form vital parts of any network infrastructure facilitating the increasing demand for smart cities, city-wide surveillance and wireless connectivity.

Media Converter	DIS-M100G-SW	Industrial 10/100/1000Base-T to SFP Media Converter • IP30-rated housing • -40~70°C operating temperature

People simply want things to work as they should, and network management is no exception. D-Link designed Nuclias to be a networking solution with a simple and user-orientated design, packed with rich features and functionality, designed to address the needs of everyone.

**Simplicity**

Nuclias Cloud allows any organisation with any level of IT resource to quickly and easily set up, configure, monitor, troubleshoot, and manage their network deployment remotely through a web browser, or the dedicated Nuclias tablet app.

### Zero-Touch Deployment

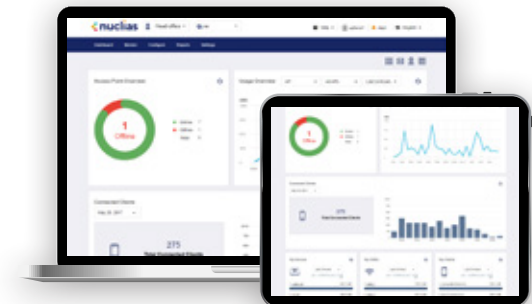

Zero-touch deployment and reduced installation and configuration costs thanks to a centralised, profile-based cloud management system.

### Hassle-Free Management

Nuclias Cloud is a turnkey solution with simple installation and management, designed to work even if the connection to the cloud is interrupted.

### Unlimited Scalability

Suitable for small branch offices to large networks, Nuclias Cloud provides unlimited capacity and uncompromised throughput with its low in-band data management footprint.

# NUCLIAS

Nuclias Connect is the ideal centralised network management solution for SMB and SME networks. Nuclias Connect makes it easier to analyse, automate, configure, optimise, scale, and secure a network – delivering the convenience of an Enterprise-grade management solution, at an SMB price.

## Free Software Download

Free to download software for Windows and Linux providing centralised management for a wide range of D-Link access points.

## Self-Optimising Network

Nuclias Connect automatically adjusts access point transmission power to optimise coverage as well as self-heal in the event of device failure.

## Local Management

Nuclias Connect can be installed on a local as well as privately hosted cloud server, meaning all the data is kept private. Alternatively, Nuclias Connect Hub\* is a dedicated controller preloaded with the Nuclias Connect management software

# Customisable

## Main features

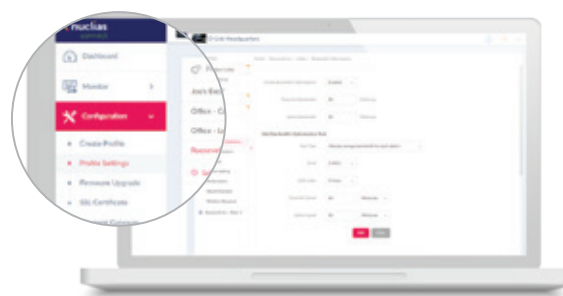

- Free-to-Download Nuclias Connect Management Software
- License-Free Access Points
- Backwards-Compatibility
- Intuitive Interface
- Inexpensive Hardware Controller (Nuclias Connect Hub\*)
- Traffic Reporting & Analytics
- Remote Config & Batch Config
- Multi-Tenant & Role-based Administration
- Searchable & Auditable Event & Change Logs
- 802.1x and RADIUS Server, POP3, LDAP
- Multilingual Support
- Front-Desk Ticket Management
- Authentication and Payment Gateway (Paypal)
- Integration via Customisable Captive Portal

Nuclias Connect Hub\*

## Flexibility to Meet Your Needs

- Free software download or dedicated Nuclias Connect Hub\*
- Monitoring and remote management of wireless APs on your network
- Control & analytics of a broad or fine granularity, presentable in a variety of formats.
- Manage a variety of distributed deployments, including the option to configure settings and admin accounts in a specific manner for each deployment.
- Expand from a small network to a larger one (up to 1,000 APs)

## Insights at a Glance

- Gain an extensive understanding of your network through usage analytics and status reports which can be viewed at a glance.
- Insights derived from traffic data can create business value.
- Traffic can be viewed across the entire network, to the level of a single AP.

\* Available Q2, 2020

NUCLIAS CLOUD

Complete cloud-managed networking solution for small to medium-sized organisations with one or more sites.

Wi-Fi coverage and network capacity are provided by high-performance Access Points and Managed Switches deployed on site, while configuration and ongoing management can be carried out remotely through a web browser or tablet. Zero-touch provisioning and centralised cloud-based control make the network simpler to install and easier to manage.

With Nuclias, network configurations and software updates are pushed to remote devices through the cloud, without the need to have specialised equipment or personnel onsite.

SSL encrypted, out-of-band network monitoring and management ensures secure connectivity whilst minimising bandwidth requirement.

Simpler to install and easier to manage

Zero-touch provisioning

Pay-as-you grow Subscription

Main features

- Zero-touch provisioning
- Role-based administration
- Auditable change logs
- Authentication via customisable captive portal, 802.1x and RADIUS server
- Social login for Wi-Fi access supported
- Advanced traffic report and data analysis
- Intuitive web-based interface with multilingual support
- Automatic monitoring and alerts
- Over-the-web firmware upgrades
- Searchable network-wide event log
- Intuitive VLAN Configuration
- Cloud based RF Optimisation

NUCLIAS CONNECT

# nuclias connect

A free network management software with robust functionality, highly scalable, and end-to-end control.

## WiFi4EU

In order to promote free Wi-Fi connectivity in public spaces, the European Commission's WiFi4EU initiative aims to provide municipalities with funding for Wi-Fi equipment.

€120 million will be allocated to 8,000 municipalities, with each receiving €15,000. This will be done over 5 "calls" between 2018 and 2020.

### WiFi4EU Access Point Criteria

- Supports concurrent dual-band (2.4GHz – 5GHz) use
- Has a support cycle superior to 5 years
- Has a mean time between failure (MTBF) of at least 5 years
- Has a dedicated and centralised single point of management for all APs of each WiFi4EU network
- Supports IEEE 802.1x
- Complies with IEEE 802.11ac Wave 1
- Supports IEEE 802.11r
- Supports IEEE 802.11k
- Supports IEEE 802.11v
- Is able to handle at least 50 concurrent users without performance degradation
- Has at least 2x2 multiple-input-multiple-output (MIMO)
- Complies with Hotspot 2.0 (Passpoint Wi-Fi Alliance certification program).

For more info, visit <https://www.wifi4eu.eu>

BUSINESS WIRELESS

# Managing Wireless Access

D-Link's wireless management option allows you to centrally manage and monitor up to 1,024 wireless access points either within a local network or remotely. Furthermore with our Nuclias Cloud-Managed Networks, you can quickly and easily deploy and monitor unlimited number of access points, through a simple pay as you grow subscription model.

# Security Cameras That Help Businesses

When it comes to end-to-end surveillance solutions, D-Link has you covered. From cameras and switches to wireless access points, network video recorders and software, we have everything you need to customise your business or personal security. And we make it really simple, too. With our exclusive Auto Surveillance VLAN technology, D-Link Smart Switches auto-discover IP cameras, create a virtual LAN and prioritise traffic. Simple.

## D-Link Video Surveillance offers:

- 1 Extensive range of indoor and outdoor cameras
- 2 Flexible connectivity options with Wi-Fi and PoE support
- 3 See the whole picture, in more detail, with cameras supporting up to 5 megapixel resolution and innovative technology such as 180° Wide Eye.
- 4 End-to-end surveillance solutions, include network switches that support surveillance optimised user interface as well as automatic prioritization of surveillance traffic.

## The Complete Video Surveillance Solution

Video Surveillance Cameras

Video Management Software

Video Storage

Network Switches

Network Video Recorders

We have everything you need to customise your business or personal security.

# DNR-2020-04P JustConnect 16-Channel PoE Network Video Recorder

The DNR-2020-04P JustConnect 16-Channel PoE Network Video Recorder is an all-in-one network video recorder (NVR) that can record video from up to 16 network cameras to its dual HDD storage.

without the need to turn on their PC. Featuring Power over Ethernet (PoE), the NVR supplies power to up to four PoE cameras, saving valuable time and electrical installation costs during setup.

Powered by an embedded system, the DNR-2020-04P supports real-time remote monitoring and playback via a web browser using the NVR's web GUI.

Additionally, support for audio in/out, DI/DO triggering, and external USB 3.0 storage for video export and backups fills the needs of small businesses.

The bundled Multi-NVR Viewer is a comprehensive network surveillance software designed for SMB and enterprise users, making the DNR-2020-04P a convenient, versatile, and effective video recorder.

**1 Concurrent Recording and Viewing**

Record and view real-time video streams from up to 16 cameras on a local network or remotely over the Internet.

**2 Easy Setup and Configuration**

Embedded software enables easy setup via a connected monitor and four PoE ports eliminate the need for electrical wiring when adding cameras.

**3 No Computer Needed**

Standalone solution with two integrated hard disc bays, USB mouse/keyboard support and HDMI/VGA monitor support.

FEATURES

Powered by an embedded system, the DNR-2020-04P supports real-time remote monitoring and playback via a web browser using the NVR's web GUI.

# D-ViewCam™

D-Link has its own Video Management Software (VMS), known as D-ViewCam, which is designed to run on industry-standard Windows platforms

## D-ViewCam / DCS-100

Bundled free with D-Link network cameras D-ViewCam enables users to centrally manage multiple cameras for home or businesses.

Supporting up to 64 network cameras and up to 64 users, D-ViewCam is compatible with all current D-Link network cameras and video servers, offers digital monitoring and recording with a wide array of features including simultaneous video recording, playback and live view.

D-ViewCam offers scheduled, motion and manual recording. Recorded files can be searched by video type and selected files can be played, edited and converted into AVI or ASF files. The e-map mode allows users to arrange a map with camera locations and orientation, while additional features such as auto-patrol, rotate, zoom, and focus provide optimal control over video surveillance.

## D-ViewCam Plus / DCS-250

The DCS-250 D-ViewCam Plus is comprehensive network camera surveillance software designed for medium-to-large business as well as enterprise users. It centrally manages up to 64 network cameras and is compatible with current D-Link network cameras, video servers and an extensive range of third-party network cameras. This software offers digital monitoring and recording of video, audio, and events for use in various security applications. Furthermore, this easy-to-use surveillance software provides users with a wide array of features, including multiple-channel playback, high-resolution monitoring and live view.

Powerful optional Intelligent Video Surveillance (IVS) packages are available for D-ViewCam Plus, including Presence/Tripwire and Counting IVS packages. The Presence/Tripwire Package (DCS-250-PRE-001-LIC) allows users to set up to 40 zones or lines which detect when an object is inside or crossing a zone or a line, as well as camera-shake elimination. The Counting Package (DCS-250-COU-001-LIC), allows objects such as people or vehicles to be counted. Both packages provide tamper detection to give users extra peace of mind.

## D-ViewCam Mobile

Keep an eye on your surveillance cameras anytime, anywhere with D-Link's D-ViewCam Mobile app. The D-ViewCam Mobile app makes it easy to check on your home or business no matter where you are, no matter what time of day it is.

### D-ViewCam Plus IVS Presence License

This license enables video analytics functions to detect when an object is inside or is crossing a zone or a line.

**Effective video analytics**  
Low cost and affordable.  
40 detection zones or lines

**Precise detection algorithm**  
Up to 95% accuracy.  
No false alarms from falling leaves, rain, snow or camera noise

**Save recording space**  
Recording function triggers only on event, with high-precision detection algorithm which translates to significant savings in storage space

**Stabiliser**  
In environments where camera stability is an issue, this feature compensates for any movement to provide a clear view

**Tamper Detection**  
Detects any event that significantly changes the field of view of the camera, such as loss of focus if the camera has been covered up.

### D-ViewCam Plus IVS Counting License

This license enables video analytics functions such as people and vehicle counting, camera stability and tamper detection for the D-ViewCam Plus for one camera. The engine can track, classify, and analyse the behaviour of individuals or a group of objects over long distances to greatly improve parameter security and monitoring efficiency.

- Instant alarm notifications
- Intelligent event search with video
- Intuitive 3D grid calibration
- 40 detection zones and tracks up to 100 targets per camera
- Self-learning algorithm automatically adapts to environment changes

### People Counting

- Includes a bi-directional line-crossing filter, suitable for counting people in busy doorways and entrances

### Vehicle Counting

- Captures statistics on vehicle flow
- Provides an estimated speed of the vehicle

### Tamper Detection

Detects any event that significantly changes the field of view of the camera, such as focus loss or camera being covered up.

## VIDEO SURVEILLANCE

# It's time for vigilance

The Vigilance Camera range offers professional, full-featured, high-definition video surveillance that is easy to install and highly affordable. The range consist of cameras designed specifically to meet different surveillance and environmental requirements, from standalone surveillance solutions that allow you to record video without additional software or equipment, to weather-/vandal-proof cameras for harsh environments.

## The Vigilance Camera range from D-Link offers a wide variety of features including:

### Up to 5-Megapixel Resolution

High-definition images allow you to see and capture detailed images that can show revealing characteristics, such as clothing brands or prominent tattoos.

### Long-Range Night Vision

Integrated infrared illuminators allow the camera to see up to 30m, even in complete darkness.

### Wide Dynamic Range

Effective in contrasting light conditions, giving clear footage from shadowed areas as well as brightly lit spaces.

### 3D Noise Reduction

Allows the camera to capture clearer videos with less noise under poor lighting conditions.

Ideal when facial or object identification is required.

### Low-Light Capability

High-sensitivity camera sensor allows the camera to see details in colour, even in very low light conditions.

### Weather-Proof

IP-66 housing designed for use in harsh environments. Specifically built to withstand adverse weather conditions.

### Vandal-Proof

Toughened metal, industry-certified IK-10 housing specifically built to withstand sudden high impact.

### Power over Ethernet

Power and network connectivity through a single network cable simplifies installation as well as deployment cost. More flexibility where the camera can be deployed as it can be positioned in areas where no power outlet is nearby.

### Motion Detection

Able to detect motion, thus triggering recording to on-board or off-board storage space (eg MicroSD card or Network Video Recorder).

## Ideal for protecting:

**Offices & Shops**  
**Public Spaces**  
**Warehouses**  
**Factories**  
**Hospitals**  
**Schools**  
**Health Centres**  
**Shopping Malls**  
**Business Centres**  
**Train Stations**

# Switches for Surveillance

D-Links range of switches specifically designed and engineered for video surveillance offer both PoE and ONVIF support for the ultimate all-in-one solution

## DGS-1100 / 1210 Series

The DGS-1100/1210 Series Gigabit Smart Managed Switches are the world's first PoE switches with ONVIF support specifically designed for Video IP Surveillance applications.

This allows it to recognise ONVIF devices and integrate seamlessly with your surveillance network. With the surveillance-optimised web interface, you can access real-time information on your surveillance network such as surveillance topology and device status, as well as PoE power and network bandwidth utilization. Auto Surveillance VLAN (ASV) function ensures the quality of real-time video for monitoring and control without compromising the transmission of conventional network data.

Auto Surveillance function ensures the quality of real-time video for monitoring and control without compromise

The DGS-1100/1210 Series switches include support for IEEE 802.3af/at and higher power budgets, allowing more PoE devices to be powered by the switch and for devices to be installed in remote locations without immediate access to power outlets. They offer high PoE power budgets – up to 370W – suitable for powering multiple network cameras.

## DSS-100E Series with Long-Range PoE

The DSS-100E Series Fast Ethernet PoE Unmanaged Surveillance Switches are specifically designed for surveillance deployment with high PoE power budgets as well as up to 250 metres long-range PoE support\*. This allows cameras to be deployed at an extended distance without the need for additional equipment, providing additional flexibility and convenience as well as saving cost.

MODEL	DSS-100E-9P	DSS-100E-18P
Number of Fast Ethernet ports	8	16
Number of Gigabit ports	1	1
Number of Combo 1000BASE-T/SFP ports		1
Switching capacity	1.8 Gbps	7.2 Gbps
PoE standards	802.3af, 802.3at	802.3af, 802.3at
PoE power budget	92 W	230 W
PoE capable ports	Ports 1-8, up to 30 W	Ports 1-8, up to 30 W
Extended PoE range	Up to 250 m*	Up to 250 m*
6kV Surge protection	•	•
Desktop	•	•
Rackmountable	•	•
Metal enclosure	•	•
Fanless	•	•
MAC address	2K	4K
802.3az EEE	•	•
Power supply type	External	Internal

\* Compatible with a wide selection of D-Link PoE-enabled cameras. Please check with your local D-Link customer service for more information. Up to 250 metres connectivity may be affected by cabling quality. We recommend customers to test compatibility before actual physical deployment.

## WARRANTY

D-Link is dedicated to setting new standards with our industry-leading business-class networking, wireless, and surveillance products. In fact, we're so confident in the reliability of our products, we offer warranties that truly demonstrate our commitment – giving you full assurance that we stand behind every product, every time.

Your network is the backbone of your business. Keeping it running is essential, even if the unexpected happens. D-Link Assist is a rapid-response technical support service that replaces faulty equipment quickly and efficiently. Maximising your uptime and giving you the confidence that instant support is only a phone call away.

## Limited Lifetime Warranty

The Limited Lifetime Warranty on our business class switching and wireless products reflects our commitment to provide even more quality, performance and value. These include:

- Smart Switches (including integrated fans and power supplies)
- Managed Switches (including integrated fans and power supplies but excluding modules and external power supplies)
- Modular switches (applies to DXS-3400 and DXS-3600 Series, including expansion modules but excluding fans and power supplies)
- Business Wireless Products and Unified Service routers (excluding external power supplies, excludes SoHo Access Points)

Register your eligible D-Link product within 30 days of purchase to qualify for the Limited Lifetime Warranty.

Register at <https://dlink.to/productregister>

## Complimentary Next Business Day Service, as Standard

All D-Link products with 5-year or Limited Lifetime warranty come with complimentary Next Business Day Service. D-Link will send out a replacement product to you on the next business day after acceptance of a product failure. On receipt of the replacement product, you simply arrange the return of the defective product to us. Any products with a 2-year/3-year warranty can also benefit from the Next Business Day advance replacement service when the optional 3-year warranty extension has been purchased.

For more information please refer to [eu.dlink.com/warranty](http://eu.dlink.com/warranty)

# The smart way to protect and control your home

Keep an eye on your home while you're away, save money by controlling your power budget, set your lights to turn on when it gets dark. **Your home, only smarter.**

- 1 Smart scheduling and automation
- 2 Cloud recording allows you to record video clips to off-site cloud storage
- 3 One-tap feature allows you to easily control multiple devices and bundle multiple actions into scenarios
- 4 Works with Amazon Alexa and Google Assistant voice control
- 5 Compatible with IFTTT (If This, Then That)
- 6 Quick and easy setup with integrated Bluetooth

The mydlink Wi-Fi Smart Plug and Power Strip are versatile and easy-to-use devices that allows you to control an electrical appliance from your smartphone or tablet, wherever you are. You can set automatic schedules to turn on or off appliances such as lamps, heaters or hi-fi at specific times and days of the week. They work with mydlink Smart Home devices<sup>1</sup>, Amazon Alexa, the Google Assistant and IFTTT, allowing you to voice-control and set up home automation.

## DCH-S161

The mydlink™ Wi-Fi Water Leak Sensor (DCH-S161) is designed to give you additional peace of mind. Battery-powered means you can install the sensor anywhere to help you detect water leaks before it turns into serious flooding.

If the water sensor is triggered, a 90 dB alarm will sound and an LED will blink to give you audio and visual warnings. Push notifications to your mobile device let you keep tabs on your home on the go.

You can also receive audio alerts from your Google Assistant through the app on your smartphone, smart speakers, or Google Home devices so that you can know about a water leak even if you are too far away to hear the alarm on the water sensor.

**Water Detection Alerts**  
Instant push notification when water is detected

**Battery Powered**  
Lasts up to 1.5 years on 2 AA batteries

**Smart Home Compatible**  
Works with mydlink Smart Home Devices, the Google Assistant and IFTTT

<sup>1</sup> Please visit [www.dlink.com](http://www.dlink.com) for more information on mydlink products that support Smart Home functionality.

### FREE mydlink app with Cloud Recording

The mydlink app takes you to the heart of your smart home, so you can easily control, monitor, and automate every smart home device, wherever you are, whenever you connect to the app.

Control lights around your home without reaching for the switch. Save your home camera recordings straight to the cloud and enjoy your best memories. Turn everything off when you head to bed – mydlink takes the legwork out of your chores so you can spend time doing what you love.

COVR

## Covr your whole home in seamless Wi-Fi

Introducing Covr, the seamless Wi-Fi solution that's the perfect fit for modern living. It blankets every square inch of your home with high-speed AC1200 Dual-Band Wi-Fi so you have a signal everywhere, wherever you are. With Covr, you enjoy Wi-Fi that's stable, consistent, and truly seamless.

### High Performance

With up to 1,200 Mbps combined Wi-Fi speed, MU-MIMO technologies, and 2x3 (Rx) antennae at its core, Covr provides enough speed to support multiple devices undertaking data-intensive tasks simultaneously no matter where they are in the house.

### More Coverage

Covr's three discreet Covr Points cover up to 550 sq m – enough seamless Wi-Fi coverage for a wide variety of housing sizes and configurations. Wi-Fi dead zones are now a thing of the past.

### One Seamless Network

With Covr, there's just one wireless network name (SSID) for your entire home, no matter where you are, so as you move through the house, your device locks on to the strongest signal.

**MU-MIMO Technology**

Like having multiple routers in your home, Multi-User Multi-In-Multi-Out (MU-MIMO) sends data to multiple devices simultaneously to increase speed and efficiency. Your laptop, tablet, media player and game console can all receive data at the same time, with no need to wait in turn. You get more out of your home Wi-Fi network than ever before.

**Wi-Fi that Meets Your Needs**

Whether it's HD video streaming, video chats, or smart home devices, Covr responds to the need for speed in the modern home as consumers perform more data-intensive tasks on their Wi-Fi connected devices.

**Seamless Wi-Fi in Every Corner**

Unlike other whole home Wi-Fi systems that use only two receiving antennas, Covr has three to detect and receive more data from all your devices. You enjoy seamless connectivity no matter where you are in the house.

\* Not available for UK and Ireland

## CONSUMER WIRELESS

## Ditch the wires

The plethora of internet-connected devices around the home is now such that a really strong wireless connection is essential. Widespread coverage, strength of signal and bandwidth are all crucial factors that bring home wireless to the fore when connecting smartphones, tablets, computers, smart TVs, gaming consoles smart speakers and a whole host of home security and other smart devices. The D-Link range of consumer wireless devices offers the very latest in wireless tech, including the new Wave 2 standard for uncongested transmission at blazing fast speeds.

# EXO

## Smart Mesh Wi-Fi Routers

The Smart Mesh Wi-Fi Routers connect you to the future of home Wi-Fi. It's a powerful, intelligent home router featuring McAfee™ protection. This includes McAfee™ Smart Home Platform which provides always-on, up-to-date protection for all the devices connected to the router, as well as powerful parental controls.

What's more, it comes with a 2-year subscription of McAfee™ LiveSafe, providing antivirus, identity and privacy protection for all your PCs, Macs, smartphones and tablets.

Expanding your network cannot be simpler with D-Link Wi-Fi Mesh. Simply add a compatible Wi-Fi mesh extender to create a completely seamless Wi-Fi network.

## USB-C

## One Port, Many Possibilities

D-Link's range of USB-C hubs and adapters allow you to instantly add additional connections to your computers and ultra-portable laptops. Simply connect to an available USB Type-C or Thunderbolt 3 port and enjoy additional ports, wired connectivity and video output in seconds. The compact designs means that you can easily slip into your pocket or laptop bag and take it with you.

Model	DUB-E130	DUB-H410	DUB-M420	DUB-M520	DUB-M530	DUB-M610	DUB-M810	DUB-V310
Number of ports	1	4	4	5	5	6	8	3
USB 3.0		4	2	2	2	2	3	
USB-C with power			1 (up to 60W)	1 (up to 60W)		1 (up to 100W)	1 (up to 100W)	
Gigabit Ethernet	1			1			1	
Display output			HDMI x 1	HDMI x 1	HDMI x 1	HDMI x 1	HDMI x 1	HDMI x 1, DP x 1, VGA x 1
Maximum Resolution			Up to 4K	Up to 4K	Up to 4K	Up to 4K	Up to 4K	Up to 4K <sup>1</sup>
Card reader					SD x 1 microSD x 1	SD x 1 microSD x 1	SD x 1 microSD x 1	
Compatible with	Computer with USB-C or Thunderbolt 3 port(s) running Microsoft Windows, Mac OS or Chrome OS Smartphones with USB-C port running Android OS <sup>2</sup>							

<sup>1</sup> Up to 4K (HDMI/DP), up to 1080p (VGA)

<sup>2</sup> Video output works with smartphones supporting DisplayPort Alternate Mode. Card reader and USB drive access function compatible with smartphones supporting USB On-The-Go (OTG).

PARTNER PROGRAMME

D-Link's success as a provider of network solutions has been built on its relationship and unrivalled commitment to its partners. Our **Value In Partnership+ Programme** not only builds on these relationships but also takes them to the next level by offering networking solutions, training and processes that increase your ability to be profitable with us, grow and diversify your business and provide excellent value to your customers.

Certification and Training

The D-Link Certification Programme is a **free online, on-demand** training programme that provides sales and technical coursework and exams focused on specific technologies: Wireless, Storage, Security, Switching and IP Surveillance. It's an opportunity for individuals in your organisation to become **D-Link Specialists**.

Designed for **sales professionals**, DSS courses focus on D-Link's market strategy, value proposition, product positioning, identifying opportunities and understanding customer needs.

Designed for **pre-sales technical professionals** to ensure that they are knowledgeable about networking concepts and the features, functionality and positioning of D-Link products.

Tools

Available only to our registered partners these system design and product selector tools will help you create and simulate the right network solutions pre-sale.

Product Selector Pro

A straight-forward tool which allows you to select and compare D-Link products, making it easy for our Partners to know which products to use when setting up or upgrading a network or adding functionality.

Wi-Fi Planner Pro

A Useful tool with an intelligent algorithm that provides a visual representation of RF signals for all of D-Link's wireless network products that simulates the Wi-Fi environment prior to actual deployment.

Surveillance Floor Planner Pro

A web-based tool designed to make your surveillance project planning easier, the Surveillance Floor Planner Pro enables you to select cameras and simulate camera placement and coverage based on your customer requirements.

Bandwidth Calculator

Network bandwidth and storage requirements are important when designing a surveillance system. The factors include the number of cameras, the image resolution, the compression type and ratio, frame rates and scene complexity.

GUI Emulator Pro

Allows our partners to easily familiarise with the features and functionality of the selected product – ideal for product training for employees, as well as helping you to answer your customers' support queries quickly and efficiently.
