Araknis provides a portfolio of devices and features to help you deliver a fast and reliable network that is easy to install and update. Every access point, switch, and router we sell has been put to the test in the Araknis Lab, ensuring strength, quality, and reliability. In addition, every Araknis product is enabled with OvrC, our free cloud management platform, empowering you to monitor and support your networks remotely which aims to reduce truck rolls, protect margins, and increase profitability.

Switches

Support all network needs with a full line of professional-grade switches. The entire Araknis switch family offers full Gigabit throughput, PoE/PoE+, front and rear port options, and cloud management through OvrC to confidently deploy a reliable residential network of any size and complexity.

Managed in the Cloud with OvrC

Wireless site management is simple with OvrC, a cloud management platform that makes it easy to set up, update, and manage all IP-enabled devices on the job, from any location, with no licensing fees. An end-user app allows your clients to reset devices based on macros that you customize.

Access Networks is a trusted provider of enterprise-grade networking solutions and managed services built for the custom integration market. Our offerings span from singular product purchases to full custom configured network solutions tailored specifically to a unique environment. Our mission is to deliver reliable and secure networks that allow the end-user to stay connected in spaces of any size and bandwidth requirement.

Access Networks Products

Our products and solutions include four years of Access Networks support from our team of certified engineers and are only available to Authorized Dealers and are price protected.

Wireless Access Points

- High performing, enterprise-grade hardware
- Suite of Wi-Fi 6 solutions for any size application
- Packed with patented technologies
- Cloud controller (ARCC) compatible

ANX7150 Stackable Switches

- 8 switch options to meet any need
- Class-leading stacking scalability
- Up to 8x10 GbE SFP+ ports for stacking or uplinks
- Multi-gigabit capable for high bandwidth applications

SOPHOS

Sophos Router/Firewall

- Includes features and versatility needed to secure unique environments
- Enterprise-grade protection
- Next-generation protection that exposes hidden risks, blocks unknown threats, and automatically responds to incidents

Network Services

ARCC is Access Networks' cloud-based solution to deploy and manage your clients' wireless systems. ARCC delivers a new level of simplicity during deployment, a higher level of control with more tools to customize each job, and a lower cost of entry for industry-leading capabilities.

Saves Time

ARCC can be configured before installation and will start working as soon as the router, switch and access points are connected and online.

Scalable

ARCC can be applied not only to new Access Networks access point purchases, but to the product you already have on the shelf. It's also available in our Custom Core Systems.

Streamline and Customize

ARCC includes Access Networks' preconfigured templates that can be repeated for consistency or customized to suit your clients' needs.

BASIC CONFIGURATION SERVICES

ANYTHING BUT BASIC

Basic Configuration Services is just that, shipping the network products you love, ready to go, configured to your baseline specification. With Basic Configuration Services you own all the passwords, configurations, and management once the products have been installed and commissioned.

- Ideal for small to medium size networks that are repeatable and less complex than our Core Systems applications
- Receive all devices ready to go out of the box, configured for your project
- We collect the configuration information and validate it for technical accuracy and compliance

The award-winning Custom Core Systems from Access Networks provide an end-to-end solution to confidently deploy a reliable residential network of any size and complexity. Core Wireless option available for a turn-key wireless only system.

Preconfigured

The system is preconfigured with the details provided so when it arrives on site, it's ready for install.

Live Monitoring

1 year of Access Networks Live Monitoring included, a proactive service that makes our team of network engineers your first responder.

Support

4 years of support from Access Networks' certified engineers and 1 year of advanced hardware replacement.

Security

With Core Systems, the Sophos Firewall Router provides net generation enterprise-grade performance and protection.

Power Where You Need It.

WattBox is designed to revolutionize the way you think about power. We deliver every form factor you can imagine, remote management, a robust lineup of IP and traditional power conditioners, surge protection devices, uninterruptible power supplies, and a suite of accessories to help you complete the job.

IP Power

800 Series IP PDU 12 Outlet Rear Rack Mount

- Premium surge protection
- IP remote reboot with auto-ping
- OvrC cloud managed

800 Series Faceplate 8 Controllable Outlets

- Connect up to 3 PDUs
- 1U Rack Mountable
- Integrated Faceplate

800 Series VPS 6, 12, and 18 Outlet Models

- Power Strip and Conditioner
- Self-Healing Auto Reboot
- OvrC Compatible

150 & 300 Series

150 Series 1 Controlled Bank, 2 Outlets

With its affordable price point and truck-roll eliminating power of OvrC, it just makes sense to keep a ready stock of these models on your truck. Whether your job requires Wi-Fi or wired connectivity, the 150 has you covered.

300 Series 3 and 5 Outlet Models

Delivering premium surge protection, self-healing auto reboot, and OvrC compatibility, the 300 series is optimal for tight spaces.

Uninterruptible Power Supplies

Pair an OvrC-enabled Uninterruptible Power Supply (UPS) with a 300- or 800-Series WattBox to receive battery status information and to prioritize mission-critical equipment during a power loss or brownout.

350VA Ultra-Compact

- Standby UPS
- OvrC-Enabled Battery Backup
- Surge Protection

1100VA, 1500VA, and 2000VA Rackmount

- Outlets and Battery Backup
- Single Chassis
- Flexible Option

625VA and 850VA Standby

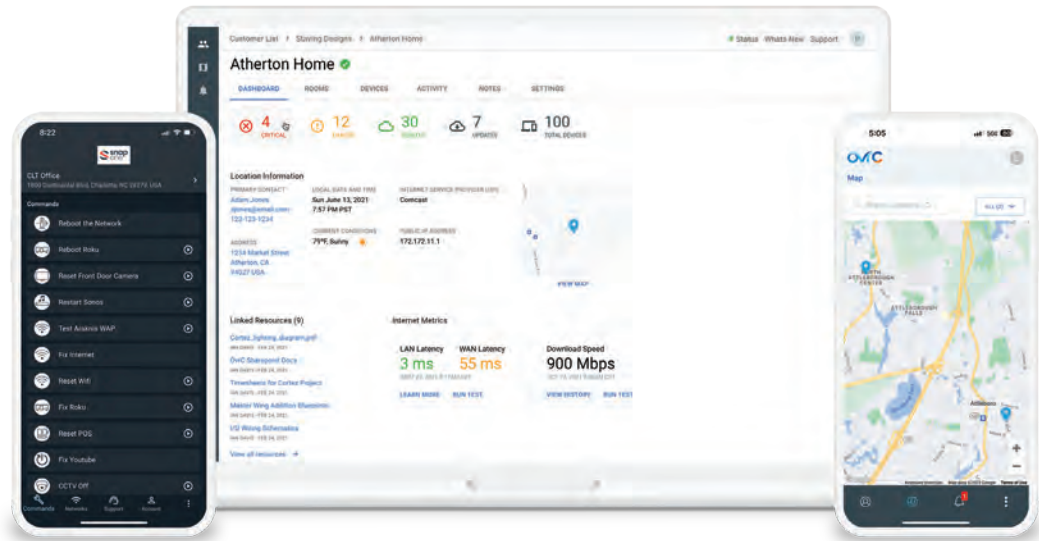

- Standby UPS & OvrC Battery
- Surge Protection
- Remote Management

WattBox with OvrC Cloud Management

Connect an IP WattBox to enable OvrC cloud functionality. Pair the WattBox UPS with the IP power conditioner and experience the power of OvrC. You can monitor the UPS battery's health and set up load shedding of outlets when power is lost.

OvrC[®] Operationally Essential Cloud Management

OvrC is a free, cloud-based ecosystem that provides integrators with robust remote management and monitoring, efficient product configuration and enhanced service operations to increase system up-time, reduce truck rolls and increase end-customer satisfaction. OvrC Connect, the companion end-user app, empowers end-customers to fix problems on their own using customizable rebooting capabilities that are configured by the integrator.

Remote Management

Real-Time Notifications

Receive alerts and troubleshoot common issues before your customer even realizes there's a problem. Plus, batch notifications provide you with a single offline alert based on location.

Remote Reboots

OvrC allows you to remotely reboot Snap One devices or those powered through a WattBox or Araknis PoE switch, instead of rolling a truck.

Modify Configurations

Through an easy-to-use interface, you can modify the most common configuration settings of a device in OvrC – even after your install is complete.

Firmware Updates

If a firmware update is available, you'll instantly be notified. Then you can update the device remotely with a single click.

Remote Access

Get remote, secure access to a device's local UI with just the click of a button, where you can access advanced configuration settings.

Client-Facing Mobile App

Through OvrC Connect, customers can fix common issues and manage certain Wi-Fi settings on their own time.

OvrC is built into more than 500 network-connected products manufactured by Snap One and trusted by thousands of technology professionals like you. These products connect directly to OvrC cloud servers, providing the power of remote management and monitoring for the individual device without any additional hardware or network configuration.

Snap One Brands with OvrC Built-In

OvrC Pro

OvrC Pro extends your visibility and access to the entire network of IP devices, including non-Snap One products. For many third-party brands the platform also provides enhanced troubleshooting capabilities and diagnostic data, making remote support even easier and eliminating unnecessary truck rolls.

OvrC Pro Hub

- Dedicated OvrC Pro device

Araknis Routers

- OvrC Pro built-in

Control4 CORE Controllers

- OvrC Pro built-in

OvrC Works with Your Favorite Brands

Control4 Premium Automation and Elegant Solutions

Control4 is Snap One's flagship control and automation platform and is exclusively available to authorized Partners. Built for the custom integrator and designed for a premium end-user experience, Control4 automates connected devices across whole projects and orchestrates solutions such as lighting, A/V distribution and high-resolution audio streaming, climate control and window shades, as well as security and surveillance in order to create a highly personalized smart living experience.

Controllers

Control4's CORE and CA Series Controllers are the foundation for any Smart Deployment. All device control, personalized automations, high-res audio streaming, remote access and other cloud-services are orchestrated by the Control4 Controller.

CORE Series Controllers

- Multi-core processor for device control and automated experiences
- Ryff: high-resolution audio platform for multi-zone streaming
- OvrC Pro enabled
- HDMI provides 4K OnScreen Menu

CA-10 – For the Largest and Most Demanding Jobs

- Dual, redundant gigabit Ethernet ports, power supplies and cooling fans
- Dual, redundant field-replaceable SSD in mirrored RAID configuration
- OvrC Pro enabled

CA-1 – Getting Started or Expanding Control

- Control for IP, ZigBee & serial devices; option for Z-Wave
- AC or PoE powered
- OvrC Pro enabled

Integrator must be an authorized Control4 dealer to access these products. Visit control4.com/partners to learn more.

Interfaces

Control4 Touchscreens, Halo Remotes, and the Control4 App deliver a powerful and intuitive interface for personalized experiences, device control, media and scene selection. The UI enables customers with single-page controls for multi-zonal audio and MultiDisplay video, and powerful fine-tune controls for parametric EQ, color-capable lighting, and the ability to favorite the rooms, devices, and media customers use most.

T4 Series Touchscreens

- 8" & 10" in-wall or tabletop
- 1920 x 1200 screen resolution
- Dual microphones & larger speakers
- PoE or AC-powered and Wi-Fi

Halo and Halo Touch

- New premium non-touch and touch universal remote controls
- Backlit buttons include dynamic Voice Button for Apple TV and Xfinity
- Extended battery life, better 2.4 and 5GHz Wi-Fi connectivity

SR-260 Remote Control

- Ergonomic, programmable, LED backlit buttons
- Lithium-polymer rechargeable battery with charging station
- Zigbee connected

Smart Lighting

Control4 Smart Lighting replaces "dumb" dimmers and light switches with sleek hard-button interfaces that provide elegant lighting control while responding automatically to desired light levels. Keypads quickly add user controls to any room and can be programmed for media, lighting, or personalized automated experiences.

Lighting Control

- Adaptive Phase, Forward Phase, and 0-10V dimmers
- Switch for motors and non-dimmable loads
- Mechanical switches for 3- and 4-way locations

Keypads

- Keypad, Keypad Dimmer, Fan Speed Controller options with up to 37 possible button configurations
- Programmable RGB LEDs
- Zigbee or RS-485 wired options

Outlets

- Receptacle Switch Outlet, Plug-in Dimmer Outlet, Plug-in Switch Outlet, Outdoor Switch Outlet
- Zigbee controlled and acts as a repeater

Doorbells and Door Stations

Give your customers complete visibility of their property with our video Doorbells and Door Stations. With stunning HD, immediate notifications, and the ability to communicate with visitors, these devices deliver valuable peace of mind.

Chime Video Doorbell

- 5MP HD camera, 180-degree field view, Night mode, IR LEDs
- Programmable motion and zone events
- Wi-Fi and PoE models

Door Station

- Flush-mount & surface-mount
- Keypad module, touch pad module, no module options
- Motion detection, call button press, and keypad entry events

Door Station Mini

- Flush-mount & surface-mount
- Motion detection, call button press, and keypad entry events

Binary media distribution solutions are designed, engineered, and tested in-house to deliver reliable 4K HDR solutions up to uncompressed 18Gbps. Our in-house Test & Validation team pushes every product to its limits, ensuring strength, quality, and reliability.

Switches and Splitters

Matrix Switchers

Multiple Inputs and Outputs

Enables System Switching, Setup, and OvrC Remote Access.

Switchers

Multiple Inputs, One Output

Select from multiple HDMI sources and send to a single display.

B-260 Splitter

One Input, Multiple Outputs

- Independent Downscaling
- Audio Breakout
- Full EDID Control
- Up to 8 outputs

Media Over IP (MoIP)

With MoIP, each source is encoded and visually lossless at the highest quality possible, then decoded and scaled to the desired resolution. And with MoIP Audio, you can distribute 2-channel audio throughout the property in the same network.

Less Than 5 Minute Auto Setup • Virtual IR Routing • RS-232 Over IP • OvrC Enabled

Controller

One Required Per System

- Control System Integration
- IP Controllable

Transmitter

One Required Per Source

- Audio Embed/De-embed
- HDMI Loop Out

Receiver

Conferencing and Control

Snap One and Atлона are committed to the success of today's custom integrator. Within Atлона's premium video distribution technology lies a dedication to delivering the very best, growing your business through cutting edge video distribution your clients will rave about. From switchers to extenders, create a powerful home theater or innovative boardroom with Atлона's extensive lineup—all under one roof.

Atлона Video Distribution

Matrix Switchers & Switches

This robust line of matrix switches and switchers features a variety of dual-mirrored HDMI/HDBaseT outputs, multiple inputs for easy system integration, and can transmit 4K HDR and 4K Ultra HD signals anywhere, fast.

Extenders & AV over IP

With extenders and AV over IP, you get a convenient install that's extremely versatile with PoE, low latency 4K/Ultra HD delivery, and the ability to scale up and plan for future system improvements.

Commercial Products

Atлона's commercial lineup provides integrators with state-of-the-art technology to design engaging business solutions and create innovative communications between any number of displays and sources.

For Conference Rooms

Atлона's conference room products offer everything you need to build a complete video conferencing solution – including USB-C video, PTZ webcams, and Wi-Fi presenting.

High-Performance Custom Speakers

From intimate media rooms to world-class home cinemas, Triad delivers the ultimate acoustic experience. Designed and built in Portland, Oregon, Triad combines technology, automation, and dedicated artistry to drive built-to-order, continuous flow manufacturing along with high-performance sound. Triad also offers custom paint and veneer matching for seamless aesthetics.

Triad Audio Solutions

Home Theater

Triad delivers the dynamic sound of a commercial theater. LCRs provide incredible audio in any room, and freestanding and bookshelf speakers can be built to your exact specs, including matched colors or wood surfaces.

Soundbars

Triad has arguably the most extensive custom soundbar selection on the market, delivering unprecedented sound quality to any size space. And in addition to standard width, custom soundbars up to 82" are available.

Architectural

Triad offers an extensive selection of in-ceiling and in-wall speakers that deliver home theater quality sound throughout the property while blending in discreetly with interior designs.

Integrator must be an authorized Triad dealer to access these products. Visit snapav.com to learn more.

Innovative Sound for All

Episode speakers are engineered for incredible sound that your customers will love with installation features that your techs will appreciate. With a complete lineup of high-value to high-end speakers and amplifiers, Episode has the right pieces for any project and every budget.

Signature by Episode

Signature by Episode speakers deliver immersive audio experiences in any environment, and feature PushLock technology and a broad range of accessories designed to make installation a breeze.

3 Series In-Wall and In-Ceiling Options

Our 3 Series is anything but entry level. A polypropylene woofer and silk dome tweeter deliver all-purpose performance for any room.

5 Series In-Wall and In-Ceiling Options

Kick your audio install up a notch with the 5 Series, crafted with a polypropylene woofer and adjustable, silk dome tweeter – both with vacuum-deposited titanium.

7 Series In-Wall and In-Ceiling Options

For the sophisticated listener, opt for the 7 Series. A honeycomb fiberglass Nomex woofer and pure titanium tweeter for audiophile applications offers the best in distributed audio or home theater sound.

Episode Core Series

The Episode CORE Series delivers stunning sound at a great price without sacrificing performance. With a comprehensive line of in-wall and in-ceiling speakers, including all-weather and dual voice coil/surround hybrid models, you can deliver an immersive audio experience and excellent value.

1 Series In-Wall and In-Ceiling Options

The CORE 1 series features a vacuum-formed polypropylene woofer and mylar dome tweeter for impeccable clarity and powerful, controlled bass.

3 Series In-Wall and In-Ceiling Options

The CORE 3 series features a vacuum-formed polypropylene woofer and fabric dome tweeter for a smooth frequency response and high-performance bass.

5 Series In-Wall and In-Ceiling Options

The CORE 5 series features an injection-molded polypropylene cone and Teteron dome tweeter for an audible difference in sound performance with increased audio dispersion.

Episode Amplifiers

Episode Mini 5.1 AVR Episode Mini AV Receiver

The Episode Mini 5.1 AVR delivers incredible surround sound from a small form factor for rooms that lack space for traditional electronics.

Episode Response DSP Amplifiers (4 Models)

The Episode Response Amplifiers take multiroom audio to the next level, giving pros a matrix switching DSP amp to deliver incredible audio in up to eight rooms - all in one convenient package.

Episode Speakers

Episode Impression Speakers Satellite and Band-Pass Subwoofer

Delight the interior designer as well as the customer with the Episode Impression Series—designed to blend into the environment without sacrificing on audio performance.

Voice Controlled Audio

WAKE Amp™ In-Wall Bluetooth Amplifier

WAKE Amp is a small amplifier that fits into a single gang electrical box, leveraging hard buttons for direct control of music, and pairing to voice assistants using commercial-grade Bluetooth. Bring simplicity to your audio installs and breathe new life into existing audio systems with the WAKE amp.

Episode Subwoofers

Element Series 8", 10", and 12" Options

If your customer wants the most boom for their buck, look no further than the Episode Element Ported, Powered Subwoofer.

Evolution Series 6", 8", 10", and 12" Options

Episode Evolution Series Sealed Subwoofers deliver tight, striking bass. They are the perfect complement to our Episode speakers and soundbars.

Triple Series 8" and 10" Options

Episode Triple Series Passive Radiator Subwoofers combine stunning good looks with three woven fiberglass woofers to deliver one amazing experience.

In-Wall Series Single and Dual Options

Our flagship Episode Passive In-Wall Subwoofer is a culmination of world-class engineering and uncompromising component selection.

MEGA Subwoofer Single and Dual Options

These powerful professional-grade smart subs give you elite bass with smart features like a companion app, audio EQ, and a wireless audio receiver built-in.

Soundbars

Expandable

This 3-channel expandable soundbar provides a premium audio experience while perfectly matching TV width, with left and right channels that expand to better fill the room.

2.1 Active

The new Episode 2.1 Active Soundbar System with 8" Wireless Subwoofer is the easiest and fastest way to upgrade the sound on any TV.

350 Series

Perfect for small to medium-sized spaces, this sleek soundbar uses three independent speakers, left, center, and right channels, to deliver an immersive audio experience.

550 Series

Episode 550 Series Thin Bezel Soundbars offer excellent customizable sound, designed to suit any audio application or customer preference.

70V Speakers and Amps

With a comprehensive line of in-ceiling, on-wall, and pendant speakers, along with cloud-managed amps, Episode has what you need to grow your commercial business. And with features like magnetic grilles, tool-less tap settings, and easy mounting, these solutions couldn't be simpler to install.

Pendant Speakers 4" and 6" Options

Ideal for spaces with tall, open ceilings, Episode Pendant speakers get sound down where you need it.

In-Ceiling 4", 6", and 8" Options

Episode In-Ceiling Speakers deliver a stellar performance for background music and paging applications.

Surface Mount 4", 6", and 8" Options

These durable, all-weather speakers use quality components to deliver great sound no matter the circumstance.

Hybrid Amps 1000 and 2000 Watt Options

- 2 Channel 70V/8-ohm
- IP Controllable
- Cloud Managed

IP-Enabled Amplifier 150, 300, and 500 Watt Options

- OvrC-enabled
- IR, RS-232, IP, URC, and Control4 Drivers
- 2-Channel Amplifier

Mixer-Amplifier 60, 120, and 240 Watt Options

- Front Panel Controls
- 70V, 100V and 4-Ohm Capable

BrightSign® Digital Signage Media Players

BrightSign is the global leader in digital signage media players, with over a million players shipped to date. BrightSign offers PC-class performance and reliability without the hassles and complications of a PC, with the ability to manage content ranging from one-off installs to cloud-based global management.

LS424 Standard I/O Player

- Entry level media player
- Commercial-grade player
- Compact design

HD1024 Expanded I/O Player

- Mainstream performance with standard I/O
- Ideal for mainstream 4K
- Full HD single video decoding

HO523 OPS Player

- HD class performance in OPS compatible module
- Part of the Series 3 product family

XD1034 Expanded I/O Player

- Advanced performance with expanded I/O
- Supports all tech standards of True 4K ecosystem

XT1144 Expanded I/O Player

- Enterprise performance with expanded I/O
- 4K video engine for leading-edge installations

The Sound Choice for Businesses

With extensive experience in high-end musical instruments and delivering broadcast-grade sound worldwide, Yamaha has brought that same engineering prowess and excellence to offer commercial integrators easy-to-install system packages. With a thorough line of DSPs, control systems, amplifiers, speakers, and more, Yamaha Pro delivers the product solutions you need to get the job done right.

Commercial Audio

Mixers and DSPs

Yamaha offers traditional mixing consoles for direct end-user control and DSPs with technology like Dante, YDIF, and ProVisionaire Control.

Power Amplifiers

Yamaha Pro Amps boast Class-AB sound quality, response, and power with class-D efficiency and exclusive Yamaha EEEngine patented technology.

Full Speaker Lineup

With a full line of surface mounts, ceiling mounts, line array, and large format speakers, you'll have the tools needed to tackle more projects.

Control

Complete the install with a range of keypad control systems that are both simple for end-customers to use and even more simple to program.

Network Switches

Yamaha uses its knowledge of both IT and pro audio to provide network switches that have been optimized for Dante networked audio, creating highly reliable networks while minimizing equipment costs.

Speakers, Amplifiers, Control, and Dante

Surface Mount Speakers

- 3.5" – 8"
- Hi and Low Z
- Aesthetic Design

In-Ceiling Speakers

- 2.5" – 8"
- Carry Handle
- Low Profile

Architectural Speakers

- 1.5" Full-Range Driver Unit
- Compact 62mm x 62mm Form
- Paintable Enclosures and Grilles

MTX Fixed DSP

- 8x4 and 8x8
- Dante Capable
- YDIF Audio

Control Panel

- Assignable Buttons
- User Levels
- PoE Powered

- Up to 8 Channels
- Up to 280W
- 70V/8-Ohm

I/O Cards

- Expansion Cards
- Dante and XLR

PA Power Amps

- 2 Channel
- 30W and 120W
- 2 Mic/Line, 2 RCA

Stunning Resolution for Every Install

Dragonfly HD Screens

Dragonfly screens come in three materials for excellent performance in any application, whether there is controlled lighting or a room full of windows. If you're looking for crisp screen performance, Dragonfly's Ultra line and BenQ projectors deliver incredible performance for true 4K UHD and 1080p systems.

Ultra Black ALR
 Recessed • Motorized • Fixed

This smooth screen material absorbs and rejects ambient light, delivering truer color contrast in naturally-lit rooms. Fixed option is also available in thin bezel.

Ultra White
 Recessed • Motorized • Fixed

Provide enhanced resolution with this texture-free material; it's got a gain of 1.3 and is optimized for 4K systems. Fixed option is also available in thin bezel.

Ultra Acoustiweave
 Recessed • Motorized • Fixed

These 4K-optimized, acoustically transparent screens help you hide any set of speakers without damping sound quality. Fixed option is available in thin bezel.

Dragonfly HD

High Contrast
 Fixed Option Only

Creates a rich, enhanced image and better color balance in a variety of 1080p systems.

Matte White
 Fixed Option Only

Reduces light "ripples" and creates impeccable color balance in a variety of 1080p systems.

JVC Projectors

RS4100K

Vibrant Linear Lighting transforms any space by integrating color, temperature, and brightness into personalized automated scenes, for a fully immersive lighting experience. Vibrant Linear Lighting by Control4 is highly adaptable, friendly to most surfaces, and easy to install.

Linear Lighting

This premium lighting solution uses high-end components, including long life, temperature-validated diodes that score 90+ on the color rendering index, plus all accessories needed for a professional installation.

LED Tape

- Fixed Color: 2700, 3000, 4000K
- Warm Dimming and Fully Tunable
- RGBW and RGBTW

Extrusions and Lenses

- In-wall, on-wall, outdoor
- Provides mounting, heat dissipation
- Lenses provide light diffusion

Accessories

- Connector blocks in 2, 3, 4 and 5-wire options, with or without leads
- End Caps for each extrusion type
- Outdoor options with IP67 rating

Power + Control

Complete linear lighting solution, including 24V LED drivers in multiple wattages, and communication modules for DMX, DALI or wireless Zigbee communication.

Power Supplies

- 30, 60, 96, 200, 300W for tape
- 60W 24V for Gateways, splitters
- UBi for DALI lines

DMX/DALI Control

- Gateways: DMX, DALI, mixed
- DMX Splitter
- DMX Decoder

Zigbee Control

- 3- and 5-channel modules for multi-CH or multiple 1-CH LED tape
- Single-channel x4 dimming module
- 3-CH module + 30/72/100W driver

Integrator must be an authorized Control4 dealer to access these products. Visit control4.com/partners to learn more.

We've integrated OvrC into one of the biggest names in lighting, so you're able to leverage exceptional remote management of RA2 Select products. Lutron's RA2 Select line is a robust, professional solution for integrators. It offers personalized, smart lighting control to clients at flexible price points, while ensuring their overall comfort and peace of mind.

RA2 Select

This Snap One exclusive, OvrC-enabled RA2 Select main repeater acts as the brain of the smart lighting system, and enables seamless setup, wireless control, and monitoring of RA2 Select devices from a smartphone or tablet. Native OvrC integration provides unprecedented remote configuration and management of the RA2 Select system through a secure cloud-to-cloud connection.

Mounts

The Razor™ and VersaMount™ lines deliver the industry's lowest profiles, while our Carbon Series offers the strength and price point needed for the everyday install. The Base Series provides a slightly reduced weight rating for slimmer, price-conscious applications.

Razor Series
Fixed • Tilt • Articulating
24-55" Displays

Made for today's ultra-thin TVs, the Razor Series fits snug against the wall and features a kickstand for running wires, an adjustable safety release ring, and more.

Carbon Series
Fixed • Tilt • Articulating
40-80" Displays

Our Carbon Series features 3/4" of post-install adjustment and a durable locking mechanism with strings that can be hidden with magnetic cord covers.

Carbon Series
Ceiling Mounts

Customizable on-ceiling or on-wall mounting with flexible ceiling plates and mounting box storage for horizontal or vertical displays.

VersaMount Series
24"x 92", 40"x 80"

The VersaMount is Strong's best and most versatile mount yet, setting a new standard in low-profile articulation with the ability to position TVs from flush to 16" off the wall and up to 5" of post install height adjustment.

Structured Wiring and Storage Solutions

We're your one-stop shop for structured wiring and bulk wire. We offer keystones, connectors, wall plates, modules, and everything you need for a structured wiring solution. Our bulk wire selection includes twisted pair, speaker, alarm, coax, and more. Plus, our full line of patch cables and comprehensive catalog of accessories ensures you have everything you need to get the job done.

The Power of AI Technology

Get accurate event notifications with the latest AI technology including advanced human, vehicle, and non-motor vehicle detection. Clients can quickly be notified, share, and view key moments on their systems throughout the day.

Human Detection

View foot traffic, delivery people, or anyone else as they enter a Luma camera's view. Through the Luma View app, clients can receive notifications and view events for enhanced peace of mind, even when they're away.

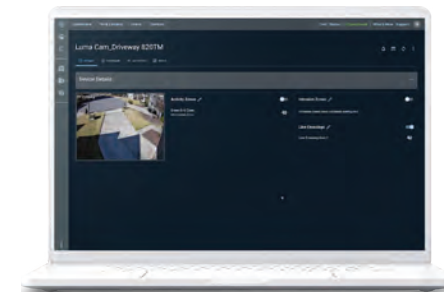

Vehicle Detection

Luma's advanced AI can detect vehicles, which can then send a notification, record a snapshot, create an event-based recording or even trigger a series of events when using a control system (ex. When a car enters the driveway, turn on pathway lighting).

Non-Motor Vehicle Detection

Give your clients more accurate alerts with activity from non-motor vehicles like bikes or scooters.

Complete Configuration in OvrC Saves Time and Money

Say goodbye to the hassle of navigating local UI to configure or change settings. Now you can configure all Luma cameras directly in OvrC. Activate cameras, set up events, configure AI settings, and more—all through one simple-to-use dashboard, which can save hours of technician time on the job.

Viewing Made Easy with Luma View

Luma View gives your clients intuitive access to their surveillance system with push notifications, lightning-fast video viewing, easy access to share and view recordings, 16-channel synchronous playback, activity highlights with AI-filtered events, and more.

ClareVision is a competitively priced, NDAA-compliant surveillance solution built for everyday jobs. Install ClareVision cameras as a standalone system or combine with ClareOne or Control4 for a single platform smart home experience. ClareVision's Edge-based features like built-in analytics and interoperability make it perfect for pros and clients alike.

Digital Watchdog is a leading manufacturer of NDAA/TAA compliant surveillance solutions, offering stunning image quality, advanced hardware capabilities, superior video management, and the lowest total cost of deployment for IP megapixel applications and Video Management Systems (VMS).

Recorders / VMS

Blackjack servers, powered by the SpectrumDW VMS, are robust and user-friendly. They are also highly optimized to provide unlimited scalability, bandwidth savings and simplified system setup and management.

Blackjack AI Servers

- Allows advanced AI capabilities on any connected video stream
- Single device that performs as an NVR and Analytics server

VMAX IP Plus

- Plug and Play IP NVRs, Managed anywhere
- Power up to 16 IP cameras locally from the NVR

Spectrum IPVMS

- Supports hundreds of different devices, scalable from one to thousands
- Intuitive user interface

IP Cameras

MEGApixDW IP cameras remove the complexity of network-powered devices, providing unbeatable crystal-clear megapixel resolution image quality and advanced features.

IP Panoramic (Multi-Sensor)

- Ultra-HD IP panoramic multi-sensor and fisheye cameras
- Get wide views and forensic details

MegaPix LPR

- Capture license plates on moving vehicles at up to 50mph
- Installed heater helps the camera power up in extreme cold

Megapix PTZ

- Pan, tilt, and zoom to monitor large spaces, replacing a multi-camera installation
- Up to 36x optical zoom gives users forensic detail

Conquer Smart Home Security

Traditional security systems are a thing of the past. The ClareOne panel gives you an easy-to-use, 128-zone open platform smart home security system that will help you grow RMR and revolutionize the way you do business.

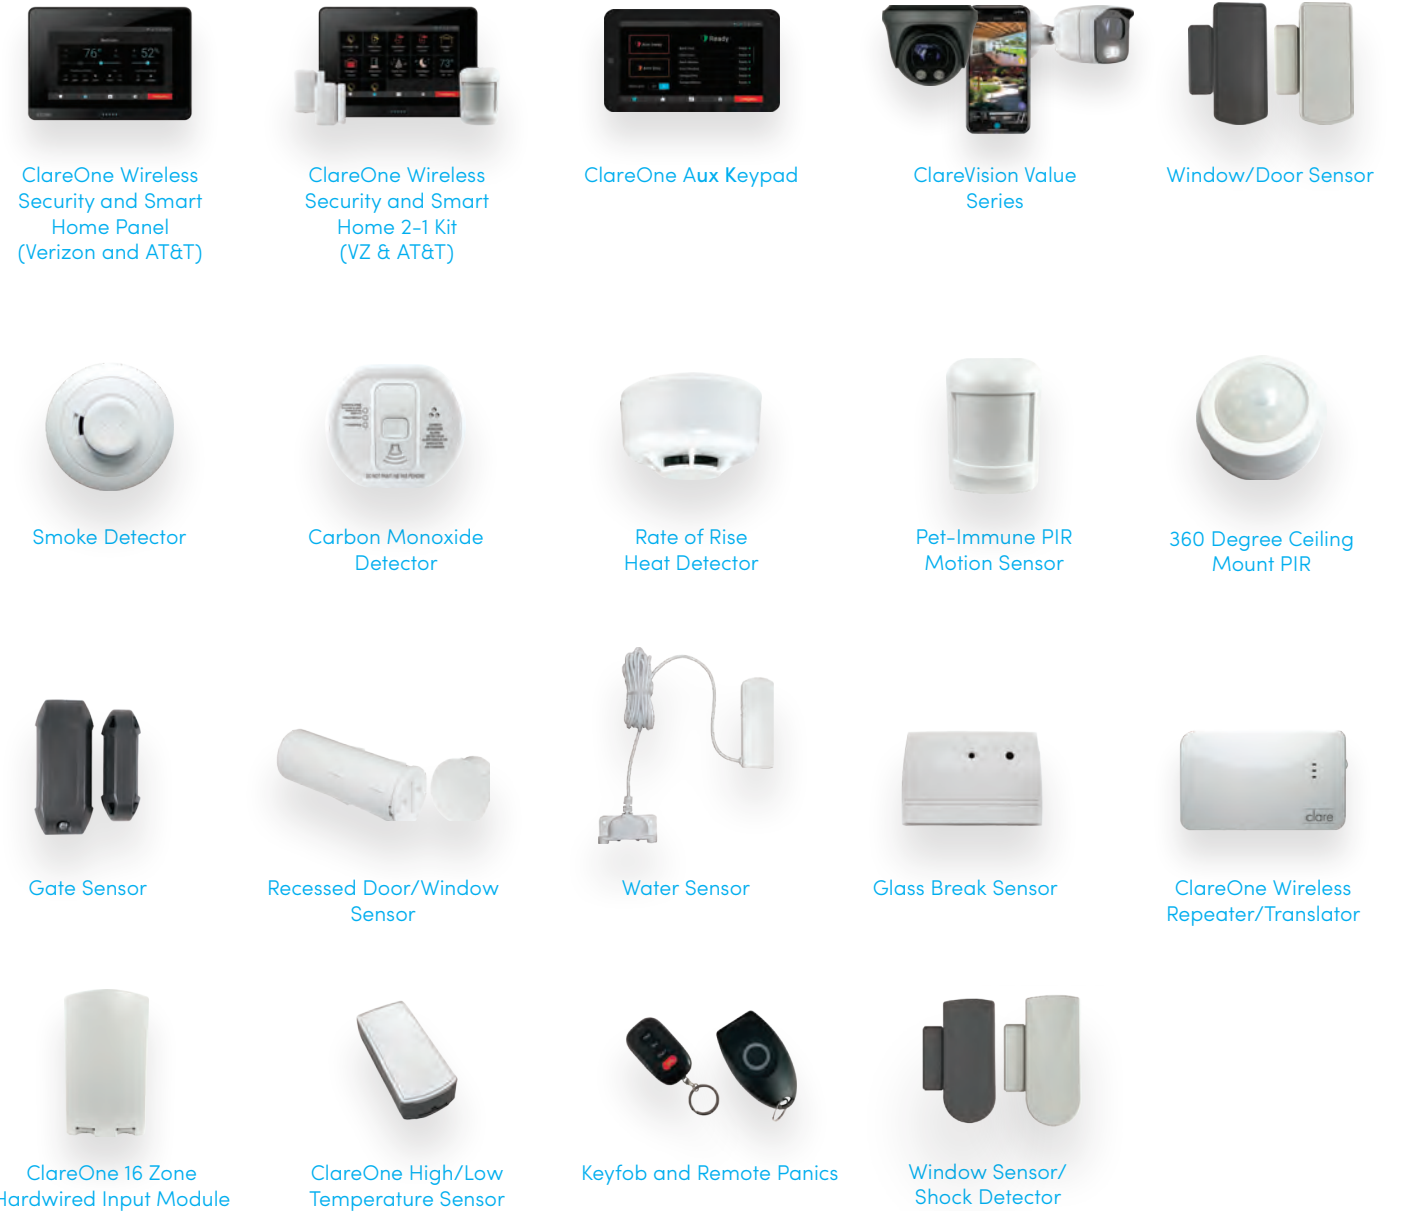

- Amazon Alexa or Google Home Voice compatible
- Supports a complete line of encrypted wireless security sensors
- Integrates with the most popular products for smart home control
- OvrC Enabled + Control4 SDDP

The ClareOne Panel Works with Brands You Know and Trust

ClareOne Security Product Line

The ClareOne Panel and suite of accessories combine professional wireless security with full-featured automation in one easy-to-use platform.

ClareVue Lighting and Additional Smart Home Devices

Pioneering Smarter Security Solutions

Alarm.com offers industry-leading technologies for both home and business and provide advanced protection with products in intrusion detection, video surveillance, access control, video monitoring, and home management.

Security and Safety Devices and Platforms

- A full range of intrusion and Smart home devices
- The Alarm.com platform enables RMR for partners and provides a suite of services for homes, businesses, and the pro

Video Solutions

- Cloud-managed video surveillance combines storage, health monitoring, and intelligent analytics
- NDAA compliant cameras with a variety of feature options

Access Control

- Cloud-based access control combines user management with alarm and video integration
- Lock, unlock, and buzz doors open from anywhere using the mobile app or website

Revolutionizing Pro-Install Security

2GIG products deliver ever-increasing functionality, rock-solid reliability, and frictionless upgradeability that also protects Partner investments. 2GIG offers a variety of products from security panels and intrusion protection to sensors and smart home control.

Edge Panel

- Wide viewing area, high resolution, two speakers and dual microphones for 2-way communication
- Touchless disarm and built-in face recognition

Edge Remote Keypad

- Secondary keypad for 2GIG security systems
- Displays camera feeds and slide show of photos and videos

GC2e Security & Home Control '3-1' Kit

- Enhanced security and a large, easy-to-use touch screen
- Kit includes a GC3 Panel, a PIR motion detector and 3 compact door-window sensors

Encrypted Sensors

- Intrusion and Life Safety Devices
- Built-in safeguards to prevent takeover by competitors

Takeover Kit

- Wireless Conversion Kit for GC2 Panels
- Kit includes Switch Takeover Module, Power Supply Board with backup battery charging circuit, and a Grounded Plug-in Transformer

4G LTE Cell Radio for Alarm.com

- Bring longer-life cellular connectivity and simple installation to 2GIG GC2 systems
- Provide better support for cellular connected smart home devices and remote troubleshooting

Microphones Built for the Custom Installer

Sense is built on the fundamentals we established long ago—a simplified product lineup, robust build quality, and crystal-clear audio quality—all at a price that's significantly less than the big brands, so you have plenty of room to make your margin.

Handheld Transmitter

- Cardioid
- Rechargeable AA
- Up to 500'

Bodypack Transmitter

- Lapel mic included
- Rechargeable AA
- Up to 500'

Outdoor Audio

Great outdoor audio should be heard, not seen, and these aesthetically pleasing speakers and subwoofers blend right into your outdoor space without missing a beat. Whether mounted on the ground, in a tree, under a trellis, or anywhere else, Episode delivers top-notch audio without drawing attention to themselves.

Satellite Speakers

4", 6", and 8" Options

Tested to withstand between -20° and 185°F, these remarkably durable speakers handle the elements and still deliver crisp natural sound. Install in 70V or 8-ohm systems.

Subwoofers

8", 10", and 12" Options

Deliver booming sound in any outdoor area! For built areas, choose the stylish yet discreet hardscape sub. For landscape installs, the burial sub adds bass without disrupting aesthetics.

Rock Speakers

6.5" and 8" Options

Episode Rock speakers are constructed with a Polypropylene cone and dual Titanium tweeters for premium outdoor sound. Available in granite and sandstone finishes.

Terrain Landscape Kit

4 and 8 Speaker Kit Options

Two-way speakers and choice of hardscape or burial sub allow this system to play lower and louder. Plus, the quick-connect system makes for easy install and scalability.

Omni-Directional Speakers

6.5" Option

High quality, affordable, and flexible! These speakers handle temperatures between -20° and 185°F and offer 360° of coverage for top performance without hot spots in 70V or 8-ohm systems.

Surface Mount Speakers

4", 6", and 8" Options

These speakers use a high-temp voice coil and aluminum dome tweeter to deliver stunning high-dispersion sound. And the easy-locking bracket makes mounting a breeze.

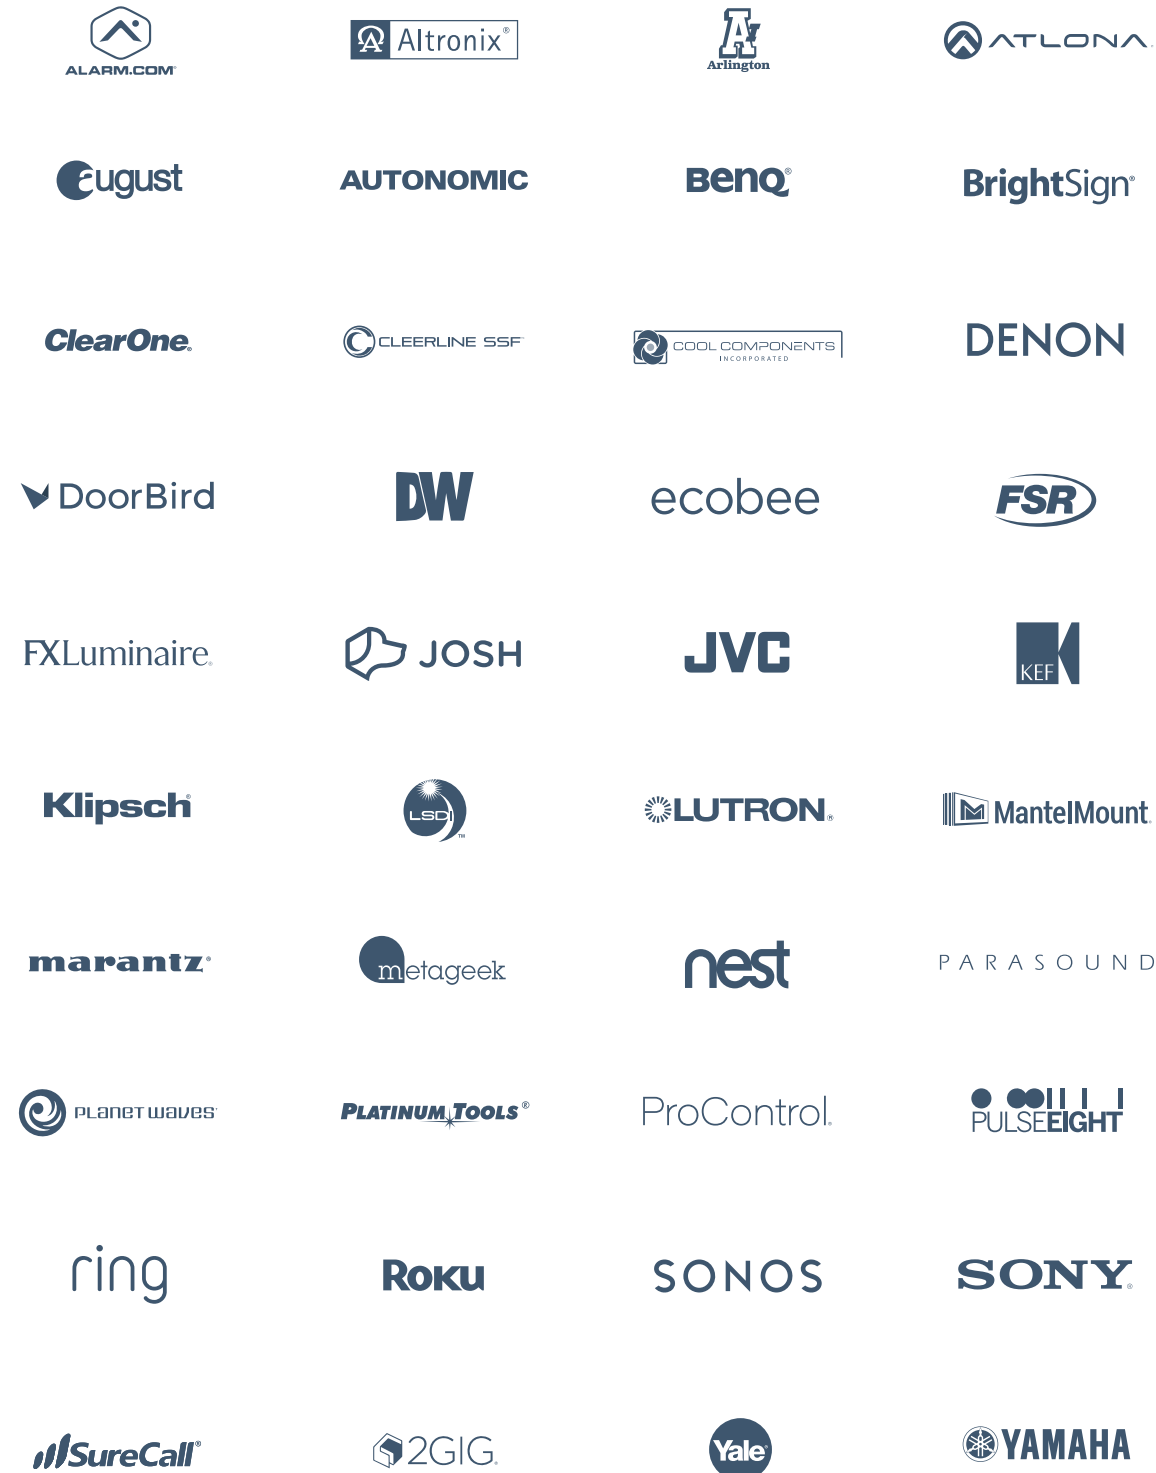

Episode Radiance

Episode Radiance is the ultimate outdoor music and lighting system. This sleek all-in-one modular solution delivers high-performance sound that's easy to install - using just one wire for both audio and lighting! The IP66 certified, UV-protected components can be buried, mounted, or placed anywhere that suits your install. From pathway to poolside, deliver space-filling sound and beautiful lighting with Episode Radiance.
