Technical and Sales Training

TARANTIN INDUSTRIES provides technical and sales training at each of our locations on a monthly basis. The schedules are listed on the web site at www.tarantin.com, and registration is available on-line. This training is free of charge and conducted by qualified instructors, culminating with certificates of completion.

OUR TRAINING SESSIONS are conducted as hands-on courses. Our highly skilled technical training staff provides a full range of instruction from regulator and line sizing to heater installation, troubleshooting and repair, to very technical aspects of pump, vaporizer and LPG plant installations. We also offer training on sales, codes, emergency response, rules and regulations.

OUR ON-THE-ROAD SALESPeOPLE are factory trained on the products we sell. All members of the inside and outside sales team have been CETP trained in several modules. As a distributor we believe it is our responsibility to offer training on the products/items we sell to ensure trouble-free installation and reduce costs.

RegO First Stage Regulators

First Stage Regulators, High Pressure Domestic

Provides accurate first stage regulation in two-stage bulk tank systems. Reduces tank pressure to an intermediate pressure of 5 to 10 PSIG. Also used to supply high pressure burners for applications like industrial furnaces or boilers. Domestic LP-gas installations, also incorporated in multiple cylinder installations.

LV3403TR

LV4403TR

PART NUMBER	INLET CONNECTION	OUTLET CONNECTION	ORIFICE SIZE	FACTORY DELIVERED PRESSURE	INTEGRAL ADJUSTMENT RANGE	RELIEF VALVE INCLUDED	VAPOR CAPACITY BTU/HR. PROPANE

* Maximum flow based on inlet pressure 20 PSIG higher than the regulator setting and delivery pressure 20% lower than the setting.

** Vent at 9 o'clock.

RegO Low Pressure Second Stage Regulators

Second Stage Regulators Low Pressure, Domestic

Reduces first stage pressure of 5 to 20 PSIG down to burner pressure, normally 11" WC. Ideal for medium commercial installations, multiple cylinder installations and normal domestic loads.

Backmount Design

Mounts directly to house line piping. Eliminates need for union joints and elbows and mounting brackets. Quick and easy to install.

RegO Low Pressure Second Stage Tobacco Barn Regulator

Especially developed for drying barns in the tobacco industry. The LV5503G4 regulator will supply a steady and constant flow of fuel to as many as 12 to 20 burners throughout the barn.

LV5503G4

PART NUMBER	INLET CONNECTION	OUTLET CONNECTION	ORIFICE SIZE	FACTORY DELIVERED PRESSURE	ADJUSTMENT RANGE	VENT POSITION	VAPOR CAPACITY BTU/HR. PROPANE
LV5503G4	1/2" F.NPT	3/4" F.NPT	1/4"	15" WC at 15 PSI Inlet	8"-18" WC	Over Inlet	1,750,000

*Maximum flow is based on 15 PSIG inlet and 13" WC delivery pressure.

REGULATORS

RegO Compact Twin Stage Regulators

Compact Twin Stage Regulators

This compact two-stage regulator is designed to reduce container pressure down to 11" WC delivery pressure. It is ideal for "on-site" cylinder applications, such as homes, mobile homes and average domestic service including small ASME and 100 to 420 pound DOT cylinders.

7525B4	Integral	1/4" Inverted Flare	1/2" F.NPT	11" WC	9"-13" WC	Over Outlet	450,000	2503-22

* Set at 100 PSIG inlet pressure.

** Maximum flow based on 25 PSIG inlet pressure and 9" WC delivery pressure.

Application:

These combination automatic changeover, two stage regulators are especially suitable for homes, mobile homes, cottages, construction and other portable two cylinder installations. Empty containers may be replaced without interrupting customer's gas service.

Features:

- Automatic changeover switches from "service" to "reserve" cylinder automatically without interrupting service.
- The Second Stage Incorporates wide bonnet drip lip vent to guard against freeze-up when properly installed.
- With 15 PSIG inlet pressure, the second stage regulator is designed to not pass more than 2 PSIG with the seat disc removed.
- Allows "reserve" cylinder to supplement the flow of gas from the "service" cylinder during extreme load or severe cold conditions.
- Incorporates molded diaphragm in second stage regulators.
- Integral indicator gauge.
- Change over knob and indicator are integral to the first stage.
- Select brown finish on first stage.

REGULATORS

RegO Single Stage Compact Regulators

Designed for smaller outdoor grills and fish cookers.

Intended for use on small portable appliances that use 100,000 BTUs/hr. or less.

May not be used on fixed pipe systems per NFPA 58, 1995 edition.

PART NUMBER	CONNECTIONS		ORIFICE SIZE	FACTORY DELIVERY PRESSURE	ADJUSTMENT RANGE	BONNET VENT POSITION	VAPOR CAPACITY BTU/HR. PROPANE

Fairview Twin Stage Regulator

299-GR9959

The model GR-9950 and GR-9959 regulators combine both a high pressure first stage and a low pressure second stage regulator into a single unit. Ideally designed for RV applications, these regulators ensure a smooth and continuous flow of gas to all appliances.

SPECIFICATIONS:

- Zinc Die Cast
- Molded Rubber Diaphragms
- UL Listed
- 2nd Stage Relief Mechanism Per U.L. 144
- Adjusting Screw and Dust Cap Design

PART NUMBER	DESCRIPTION
290-GR9950	Vent Over Outlet
299-GR9959	9 o'clock Vent

Fairview Automatic Changeover Regulators

Low Pressure Two-Stage Automatic Changeover

Automatically redirects LP gas vapor flow from an empty designated service cylinder to a reserve cylinder without interruption of service. It features a green indicator dome which changes to red when the service cylinder needs to be refilled.

SPECIFICATIONS:

- Zinc Die Cast
- Molded Rubber Diaphragms
- UL Listed
- 2nd Stage Relief Mechanism Per U.L. 144
- Powder Coated

High Pressure Industrial/Commercial Pounds-to-Pounds Regulators

Designed to reduce propane gas container pressure down to between 3 and 100 PSIG. Ideal for liquid or vapor service, they can be used in a variety of applications, including salamander heaters, weed burning torches, fish cookers, tar pot heaters and other industrial type services.

FEATURES:

- Provides high capacity performance at a reasonable price
- Suitable for both liquid and vapor service.
- Compact design provides easy installation
- Consistent delivery pressure, especially in cold weather, helps assure maximum performance from the second stage regulator

PART NUMBER	ADJUSTMENT METHOD	INLET & OUTLET	RECOMMENDED DELIVERY PRESSURE RANGE (PSIG)	CAPACITY*	CAPACITY**
597FA	Tee Handle	1/4" NPT	1-15	10	1,750,000
597FB	Tee Handle	1/4" NPT	10-30	20	3,000,000

597FD	Tee Handle	1/4" NPT	40-100	40	4,500,000

* Set pressure established at 100 PSIG inlet and flow of 250,000 BTU/hr.

** Capacity determined at actual delivery pressure 20% less than set pressure with inlet pressure 20 PSIG higher than the set pressure.

597F

High Pressure Industrial / Commercial Regulators - LP Gas

Designed to reduce container pressure to between 3 and 125 PSIG. Precision-built with a multi-million BTU capacity. Ideal as a first stage regulator in large, multiple container operations. Also ideal for crop dryers, asphalt plants and "tar wagons." Large nozzle and straight through flow provides capacity and resistance to freezing up. Suitable for both liquid and vapor service. Can be readily fitted with a pressure gauge or 3139 series relief in 1/4" F.NPT port.

PART NUMBER	ADJUST METHOD	INLET & OUTLET CONN.	RECOMMENDED DELIVERY PRESSURE RANGE	WIDTH	HEIGHT (MAX.)	CAPACITY DETERMINED AT SET PRESSURE OF PSIG	CAPACITY*
1584VN	Tee Handle	1/2" F.NPT	3-30 PSIG	2 15/16"	4 7/8"	20	7,000,000

1584VH	Tee Handle	1/2" F.NPT	45-125 PSIG	2 15/16"	4 7/8"	60	8,000,000
1586VN	Tee Handle	3/4" F.NPT	3-30 PSIG	3.5"	7"	20	11,000,000
1586VL	Tee Handle	3/4" F.NPT	25-50 PSIG	3.5"	7"	30	12,000,000
1586VH	Tee Handle	3/4" F.NPT	45-125 PSIG	3.5"	7"	60	14,000,000
1588VN	Tee Handle	1" F.NPT	3-30 PSIG	3.5"	7"	20	11,000,000
1588VL	Tee Handle	1" F.NPT	25-50 PSIG	3.5"	7"	30	12,000,000
1588VH	Tee Handle	1" F.NPT	45-125 PSIG	3.5"	7"	60	14,000,000

Care must be taken to prevent re-liquefaction of propane at normal temperatures by heat tracing or other effective means. Use of a relief valve downstream of these regulators is recommended in accordance with NFPA 58.

* Capacities determined at actual delivery pressure 20% less than set pressure with inlet pressure 20 PSIG higher than set pressure.

1584VN

High Pressure/High Temperature Industrial/Commercial Pounds-to-Pounds Regulators

Application:

Reduce LP-gas container pressures to between 3 and 50 PSIG. Ideal for crop drying, heat treating, asphalt batch mixing, and other large industrial and commercial load application utilizing high temperature LP gas or high temperature atmosphere under conditions up to 300°F. Also ideal as a first stage regulator in large multiple operations.

FEATURES:

- Diaphragm and seat materials are suitable for up to 300°F.
- High capacity and resistance to freeze ups.
- Suitable for both liquid and vapor service.
- zCan be fitted with a high pressure gauge in 1/4" F.NPT port. Recommended that these gauges use silver braze rather than soft solder construction.

PART NO.	SERVICE	ADJUSTMENT METHOD	INLET & OUTLET CONNECTIONS	RECOMMENDED DELIVERY PRESSURE RANGE (PSIG)	CAPACITY DETERMINED AT SET PRESSURE OF PSIG*	CAPACITY BTU/HR PROPANE**
X1584VL	LP-Gas	Tee Handle	1/2" F.NPT	25-50	30	7,500,000
X1586VL	LP-Gas	Tee Handle	3/4" F.NPT	25-50	30	12,000,000

* Set pressure is established with 100 PSIG inlet pressure and a flow of 500,000 BUT/hr propane.

** Capacities determined at actual delivery pressure 20% less than set pressure with inlet pressure 20# PSIG higher than set pressure.

NOTE: Care must be taken to prevent re-liquidation of propane at normal temperatures by heat tracing or other effective means. Use of a relief valve upstream or downstream of these regulators is recommended in accordance with NFPA 58.

Vapor Relief Valves for Pounds-to-Pounds Regulators

Application

Designed for use as a relief valve on first stage regulators that comply with the NFPA58 2.5.7.5 exception: "first stage regulators with a rated capacity of more than 500,000 BTU/hr. shall be permitted to have a separate relief valve."

FEATURES:

- Pop-action design keeps product loss to a minimum.
- Suitable for use downstream of 1580 series regulators on vapor systems to comply with NFPA 58.
- Install with either the regulator pressure gauge port or on a fitting downstream from the regulator outlet.
- Constructed of non-corrosive brass.

Belgas Low Pressure Second Stage Regulators

B34 SERIES

Intermediate Commercial

B34: A versatile, large diaphragm-controlled regulator designed for commercial and industrial loads. It maintains accurate regulation on applications where frequent sudden load changes can occur.

B34SR SERIES

B38: Designed for use on large commercial and industrial loads. Large orifices are available (up to 1 3/8") for high capacity/low inlet pressure applications. An added feature is its massive relief capacity.

B38 SERIES

PART NO.	INLET	OUT	ORIFICE	ADJ RANGE	OUTLET PRESSURE SETTING	INTERNAL RELIEF VALVE	BTU/HR CAPACITY

Maxitrol Regulators

Maxitrol 325 Series Regulators

Use on residential, commercial, and industrial applications. Features a high leverage valve linkage assembly to deliver positive dead-end lock-up. Capable of precise regulating control from full flow down to pilot flow.

B Models:

Imblue Technology™ increases corrosion resistance and provides extra protection against the elements for regulators used in outdoor applications.

ALL MAXITROL REGULATORS COME WITH THE VENT LIMITER INSTALLED. ALSO AVAILABLE WITHOUT.

Tee Blocks

Use with suitable pigtails to connect multiple cylinders together. Ideal for loads that require more than one cylinder to be in service at a time. Provides a three-way tee function when not equipped with an internal disc check.

PART NUMBER	PART NUMBER	CHECK	INLET	OUTLET
1350E	MSCP-1701B	No	FPOL	MPOL 7/8" Hexnut

1493	Installed directly on vent piping 3/8-1/2"
1493D	1/4" M.NPT Tailpiece

Brackets

RegO brackets are especially designed for use in installing RegO regulators in applications requiring the use of a bracket.

PART NUMBER	MATERIAL	FOR USE WITH REGULATOR MODEL
2302-31	Cadmium Plated Steel	LV3403 & LV404B34 Series
2503-22	Cadmium Plated Steel	LV404, 2503, & LV4403 Series
2503-19	Aluminum	LV404, 2503, & LV4403 Series

PART NUMBER	APPLICATION
240-GR900	Z-Mounting Bracket Pre-drilled to attach to regulators horizontally or vertically. Allows the regulator to be mounted from the front to any surface

REGULATORS

Selecting a RegO® Regulator

In order to properly size the RegO® Regulator, find the total load of the installation. The total load is calculated by adding up the input ratings (BTU or CFH) of all appliances in the installation. Input ratings may be obtained from the nameplates on the appliances or from the manufacturers' literature.

Determine the type of regulation needed referring to the chart below.

TYPE OF SYSTEM	MAXIMUM LOAD	SUGGESTED REGULATOR
First Stage in a Two Stage System	1,500,000	LV3403TR
	2,500,000	LV4403SR Series LV4403TR Series
Second Stage in a Two Stage System	450,000	LV3403B Series
	935,000	LV4403B Series
	1,600,000	LV5503B4/B6
	2,300,000	LV5503B8
Second Stage in a 2 PSIG System	1,000,000	LV4403Y4/Y46R
	2,200,000	LV5503Y6/Y8
Integral Twin Stage	450,000	LV404B34/39 Series
	525,000	LV404B4/B9 Series
	800,000	LV404Y9
Automatic Changeover	200,000	7525B34 Series
	450,000	7525B4 Series

* See RegO L500 Catalog for inlet and delivery specifications.

Now determine which regulator in the Series would be most suitable. Turn to the individual product pages and refer to the Performance Curves. Check the performance of the regulator with your actual load conditions at the minimum LP-Gas inlet pressure for the regulator. Use the pressure corresponding to your lowest winter temperatures shown in the chart below or refer to the delivery pressure of your first stage regulator.

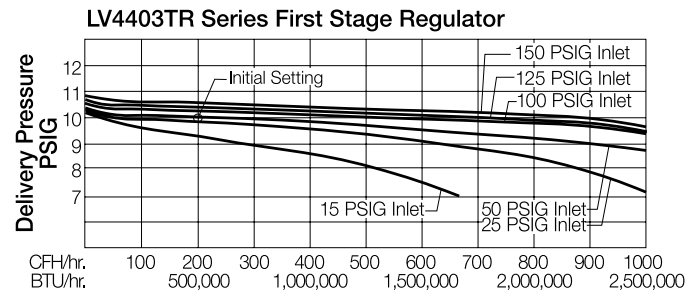

TEMPERATURE		APPROX. PRESSURE (PSIG)		TEMPERATURE		APPROX. PRESSURE (PSIG)	
°F	°C	PROPANE	BUTANE	°F	°C	PROPANE	BUTANE
-40	-40	3.6	-	40	4	72	3.0
-30	-34	8	-	50	10	86	6.9
-20	-29	13.5	-	60	16	102	12
-10	-23	23.3	-	70	21	127	17
0	-18	28	-	80	27	140	23
10	-12	37	-	90	32	165	29
20	-7	47	-	100	38	196	36
30	-1	58	-	110	43	220	45

Example for a First Stage Regulator

1. Assume a load of 500,000 BTU's per hour.
2. Assume a minimum delivery pressure of 9.5 PSIG.
3. Assume a minimum tank pressure of 15 PSIG.

4. For these conditions, refer to chart for the LV4403TR Series, First Stage Regulator, shown below.
5. Find the line on the chart corresponding to the lowest anticipated winter tank pressure (note that each performance line corresponds to and is marked with a different inlet pressure in PSIG).
6. Draw a vertical line upward from the point of assumed load (500,000 BTU's per hour) to intersect with the line corresponding to the lowest tank pressure.
7. Read horizontally from the intersection of these lines to the delivery pressure at the left side of the chart. In this example the delivery pressure will be 9.7 PSIG. Since the delivery pressure will be 9.7 PSIG at the maximum load conditions and lowest anticipated tank pressure, the regulator will be sized properly for the demand.

Example for a Second Stage Regulator

1. Assume load of 250,000 BTU's per hour.
2. Assume a minimum delivery pressure of 10" w.c.
3. Assume a minimum inlet pressure of 10 PSIG.
4. For these conditions, refer to chart for the LV4403B Series, Second Stage Regulator, shown below.
5. Find the line on the chart corresponding to the anticipated inlet pressure.
6. Draw a vertical line upward from the point of assumed load (250,000 BTU's per hour) to intersect with the line corresponding to the lowest inlet pressure.
7. Read horizontally from the intersection of these lines to the delivery pressure at the left side of the chart. In this example the delivery pressure will read 10.6" w.c. Since the delivery pressure will be 10.6" w.c. at the maximum load condition and lowest anticipated inlet pressure, the regulator is sized properly for the demand.

RegO Service Valves for ASME and DOT Containers or Piping Systems

Designed especially for vapor or liquid withdrawal service on ASME and DOT containers or in fuel line applications.

9101R1

* Heavy-duty models

** Based on 3/8" O.D. pigtail, 20" long or less, connected to valve outlet. For greater lengths, the pigtail must have a larger O.D.

*** Same as (**). In addition, 1/4" O.D. pigtails or POL connections for 1/4" O.D. should not be used with this valve.

**** Based on 3/8" O.D. pigtail; 20" long or less, connected to valve outlet. Also based on 1/4" pipe size dip tube, 42" long or less, attached to special inlet connection. For longer pigtail lengths, the diameter of the pigtail must be increased.

NOTE: These valves incorporate an excess flow valve.

RegO Service Valves for DOT Forklift Containers

Designed specifically for vapor or liquid withdrawal service on DOT forklift containers. Valves with 1.5 GPM closing flow are for use in small and medium size lift truck applications, while those with 2.6 GPM closing flow are for large lift trucks and gantry crane type vehicles.

9107-31	Replacement Handwheel

RegO ASME Multivalve for Vapor Withdrawal

These multivalves provide vapor withdrawal and filling of ASME containers. A separate pressure relief valve is required in addition to this valve. The MultiBonnet is standard on this valve.

PART NUMBER	CONTAINER CONNECTION	SERVICE CONNECTION	FILLING CONNECTION	VAPOR EQUALIZING CONNECTION		LIQUID LEVEL VENT VALVE STYLE	FIXED DIP TUBE* LENGTH
				CONNECTION SIZE	UL LISTED CLOSING FLOW		
8593AL16.0	1 1/2" M. NGT	F. POL (CGA 510)	1 3/4" M. ACME	1 1/4" M. ACME	4200 CFH at PSIG	Knurled	16"

*Dip tube not installed, may be cut by customer to desired length.

Since these multivalves have no integral pressure relief valves, they can be used on any ASME container with an independent relief device sufficient for that tank's capacity.

This style has a 1/8" F.NPT pressure test port. With the service valve closed the pressure test port will be isolated from the container. This will allow a high pressure leak test be conducted without disconnecting the pigtail from the service valve.

It is especially suited for vapor withdrawal of ASME containers where compact groupings of components are necessary. Separate filler valves and pressure relief valves are required.

Anhydrous Ammonia Parts available upon request

"A" prefix – Products with this prefix are suitable for LP-gas or NH₃ service (i.e., contain no brass parts).

- (a) Per NFPA Pamphlet #58, Appendix D. Area shown is for UL or ASME flow rating —whichever is larger.
- (b) Cap supplied with chain.
- (c) Outlet 31/2-8N (F) thread, will accept 3" M. NPT pipe thread.
- (d) Weep hole deflector is Part No. A3134-11B.

RegO Low Emissions Underground Multivalve

These Multivalves are designed for use in single opening ASME containers equipped with a 2 1/2" M. NPT riser.

Features

- Combines low emission double back check filler valve, vapor equalizing valve, pressure relief valve, service valve, fixed liquid level gauge, "junior" sized float gauge flange opening and a plugged pressure gauge opening.
- Double back check filler valve is low emission, 2.13cc at disconnection no reduction in fill rates.
- Service valve features a Multibonnet® stem assembly that allows for repair without evacuating gas from the container.
- Designed for installation of a 1/8" F.NPT pressure gauge or pressure gauge connection like the Presto-Tap®.

Materials

- Body Forged Brass
- Hand-wheel Aluminum
- Valve Stems Brass
- O-rings Resilient Rubber
- Seat Disc (shutoff) Nylon
- Seat Disc (other) Resilient Rubber
- Relief Spring Stainless Steel

* Dip tube not installed, may be cut by customer to desired length.

VALVES

Relief Valves

RegO Fully Internal Pressure Relief Valve for DOT Forklift Cylinder

8545AKT

Designed for use as a primary relief valve on forklift cylinders, the 8545AK reduces the possibility of improper functioning of the relief mechanism due to foreign material build up.

PART NUMBER	CONTAINER TYPE	START TO DISCHARGE SETTING (PSIG)	CONTAINER CONNECTION	FLOW CAPACITY SCFM/AIR** (ECII® RATED AT 480 PSIG)
8545AK	DOT	375	3/4" M.NPT	400*

* Classified by U.L. in accordance with Compressed Gas Association Pamphlet S-1.1 Pressure Device Standards for Cylinders. Meets requirements for use on DOT containers with 262 pounds or less weight of water or 109 pounds or less of LP-Gas.

** Flow rates are shown for bare relief valves. Adapters and pipeways will reduce flow as discussed in forewording information.

Relief Valve Cap - Part Number: 3135-54

The RegO Multiport makes changing storage tank relief valves a snap. No need to empty the tank!

Weather Caps

Provides protection of vertical relief valve riser pipes against rain and foreign material.

PART NUMBER	PIPE SIZE
P770-1-1/8	3/4"
P770-2-3/8	2"
P770-3-1/2	3"
P770-4-1/2	4"

Relief Valve Bonnets

Inexpensive, expendable relief valve cover. Fits most popular sizes. Meets NFPA requirements. Self venting and weather resistant.

Universal Relief Valve Cover

PART NUMBER	SIZE
85	1/2" - 3/4"
85A	3/4" - 1 1/4"

RegO Multiport Pressure Relief Valve Manifold Assemblies for Large Storage Containers

Designed especially for use as a primary relief device on large stationary pressurized storage containers with flanged openings. Incorporates an additional relief valve, not included in the flow rating, allowing for servicing or replacement of any one of the relief valves without evacuating the container. The handwheel on the manifold selectively closes off the entrance port to the relief valve being removed while the remaining relief valves provide protection for the container and its contents. All manifold flow ratings are based on flow through the relief valves after one has been removed for service or replacement.

The stainless steel ball valves below are rugged and very affordable. Call for pricing!

Apollo Carbon Steel Double Union End Ball Valves

Apollo valves feature heavy duty quarter turn lever with steel barrel stock design and reinforced TFE seats and seals for ease of installation and maintenance. UL listed for LP gas.

600 PSI WOG, 250 PSI LP gas

RegO Needle Valves

These valves are high quality, "true" throttling valves. Unlike most so-called needle valves, both the body seat and stem are tapered to provide fine, precise control over a wide range of adjustment without stem galling.

A8017DLP	1 1/4"	3/4"	49 GPM

* Built-in back pressure check valve eliminates need for hydrostatic relief valve in downstream piping segment.

This valve has been updated to meet the changes in UL125 for anhydrous ammonia and LP gas.

It incorporates a soft seat back check in place of the excess flow valve.

Filling and Equalizing

RegO Flange Seal Liquid Transfer Angle Valves for Bulk Storage Containers

7550P

7550PX

These valves are designed especially for liquid transfer of LP gas from consumer bulk storage containers when used with a Chek-Lok or equipped with an integral excess flow valve. May also be used for vapor LP gas service.

PART NUMBER	CONNECTION		INTEGRAL EXCESS FLOW	FLOW AT 1 PSIG (CV) PRESSURE DROP* (GPM/PROPANE)	EXCESS FLOW APPROXIMATE CLOSING FLOW (GPM/PROPANE)**
	INLET (M. NPT)	OUTLET (F. NPT)

7591U	1 1/4" M. NPT	1 5/8" UNF	1 3/4"	1 11/16"	1 5/16"	35

* Based on horizontal installation of excess flow valve. Flows are slightly more when valves are installed with outlet up, and slightly less when installed with outlet down.

- Note: Multiply flow rate by .94 to determine liquid butane flow.
- Replacement Nylon Washer 8594-1A
- Replacement O-ring for 7590U-10 7590U-6
- Replacement Cap and Gasket 7590U-5A

Union Style Adapters for 7590U and 7591U

The 7590U-10 adapter must be used to connect to the 7590U and 7591U Chek-Lok. This insures a proper connection to open the check mechanism. A built in nylon gasket provides a gas tight seal.

RegO Chek-Lok Liquid Evacuation Adapter for 7590U and 7591U Valves

Designed specifically for use with RegO 7590U and 7591U Chek-Lok Excess Flow Valves. Adapter's operating handle opens and closes equalizing stem in the Chek-Lok valve. Eliminates gas flow through Chek-Lok valve when installing or removing adapter. Use of RegO adapter ensures proper connections and opening of the check mechanism.

7554LV	3/4"	Yes	11.5

* To obtain approximate flow at other than 1 PSIG pressure drop, multiply flow in table by square root of pressure drop. Example: 7554LV @ 9 PSIG = 11.5 x √9 = 34.5 GPM/propane.

RegO Quick-acting Hose End Valves for Bobtail Delivery Trucks and Dispensing Stations

Designed especially for safe operator handling of LP gas in bobtail delivery truck, dispensing systems and anhydrous ammonia nurse tank service. These valves provide instant, full-on flow.

A7707L

PART NUMBER	INLET & OUTLET BODY DESIGN	CONN. (F. NPT)	LOCKING HANDLE	FLOW AT 1 PSIG (CV) PRESSURE DROP* (GPM/PROPANE)	COMPACT		EXTENDED
					BRASS	STEEL	STEEL
A7707L	Globe	1"	Yes	18.0	3175A	A3175A	A7575L4
A7708L	Angle	1"	Yes	22.0			

* To obtain approximate flow at other than 1 PSIG pressure drop, multiply flow in table by square root of pressure drop. Example: A7708L @ 9 PSIG = 22.0 x √9 = 66.0 GPM/propane. For NH3 flow, multiply propane flow by .90.

** Areas under EPA low emission guidelines and bobtails or dispensing stations filling motor fuel are required to use minimum loss valve such as the RegO A7797. See NFPA 58 for additional information.

RegO Hose End Valve Adapters

These adapters are designed with minimal flow restriction and recommended for use on the outlet of the LP gas delivery truck filler hose. Both incorporate a swivel female ACME connector.

VALVES

Excess Flow Valves

RegO Excess Flow Valves for Liquid or Vapor Service Line

For top installation, any position, in liquid or vapor service lines. Intended for long lines or branch piping where tank mounted excess flow valves won't do..

* Based on horizontal installation of excess flow valve. Flows are slightly more when valves are installed with outlet up; slightly less when installed with outlet down.

RegO Excess Flow Valves for Vapor or Liquid for Half and Full Couplings

Designed especially for filling, withdrawing or vapor equalizing in half and full coupling installations. Ideal for container service where welded-in dip pipes are not provided. For vapor use, mount in the bottom opening with a threaded dip pipe. For liquid use, mount in the top opening with a threaded dip pipe.

RegO Double Check Filler Valves for ASME Tanks Low Emissions

Designed to provide fast filling of large motor fuel and ASME domestic tanks the 6579 series incorporates a swing-away lower check which greatly reduces pressure drop across the valve. This lower pressure drop promotes faster filling rates and greater efficiency resulting in more profitable operations.

RegO Flomatic Internal Valves for Bobtail Delivery Trucks, Transports and Large Stationary Tanks

Designed primarily for LP gas and anhydrous ammonia liquid withdrawal on MC331 bobtail delivery trucks, transports and large stationary storage tanks with flanged connections. The valve is fully automatic, opening and closing as the pump is turned on or off. Unloading is quicker and turnaround faster to provide more profitable operation. The fully internal design reduces possibility of spillage that may result from a collision.

Supplied with A7853A 3-way valve, A7884-201 filter, studs, nuts and gaskets.

This valve controls the sensing line to the Flomatic. Valve is held open by a cable with a fusible link and return spring. If fusible link melts, valve closes and causes Flomatic to lose its prime and valve closes.

Disposable filter removes contaminants as small as 20 microns from liquid in the sensing line preventing valve malfunction. Filter should be replaced at least once a year and immediately after every tank hydrostat.

A7884-201

RegO Emergency Shutoff Valves for Bulk Plants

Especially designed for installation in liquid or vapor transfer lines at LP-gas bulk plants to provide for quick shut off of liquid or vapor flow in the event of an accidental pull-away or hose rupture.

7781AFPN-1	Cylinder assembly kit. Convert 7781AF ESVs to pneumatic shutdown.
6016-60D	Cylinder assembly kit. Converts 6016 ESVs to pneumatic shutdown.
6016-60C	Pneumatic remote for 6016. Open/close actuator.
7605PN-50	Pneumatic remote shutdown system kit, complete with 100' of tubing, fittings, 1 charging valve assembly and 1 remote shutdown valve assembly.
7605APN-8A	Extra shutdown valve assembly.
7605AP-16	1/4" tubing tee, w/nuts.
7605AP-15	1/8" NPT x 1/4" tubing, straight connector.

ESV Remote Cable Controls

PART NUMBER	DESCRIPTION
7609-50	Transfer hose cable release kit. Attaches to ESV and hose for automatic closing as hose stretches.

Fisher ESVs for Railroad Cars

Series N562 Snappy Joe ESVs are designed expressly for attachment to the shutoff valves on railroad tank cars. Usually three N562s will be used, two on the liquid lines and one on the vapor line. NFPA 58 regulations call for ESV protection on both sides of the transfer hose or piping. Hardened stainless steel F.NPT threads. Uses customer supplied Sch 80 nipple.

RegO Pneumatic Remote Control Kit

Control kit with components for connecting and charging the pneumatic controls from a source of compressed gas (air or nitrogen) to a RegO liquid or vapor ESV. Includes charging valves with low pressure indicator, operating valves, 100 feet of 1/4" plastic tubing and tube fittings.

PART NUMBER	DESCRIPTION
6016PN-50	Cylinder assembly kit for ESV pneumatic shutdown

Remote Components

PART NO.	DESCRIPTION
7605AP-10	Emergency Valve
7605AP-12	Charging Valve
7605AP-13	Tee
7605AP-14	Hex Nipple
7605AP-15	Tubing Connector
7605AP-16	Tubing Tee
7605A-17	Union (Plastic Tube)
7519-64	Indicator
7605AP-19	Bushing 1/8" x 1/4"

PART NO.	DESCRIPTION
7605AP-81	Bracket for emergency valve
7605AP-82	Bracket for charge valve
2303-3	Screw
7605A-BT	Black tubing 1/4" x 100'
7605PN-30	Instruction Sheet
7605APN-8A	Extra shutdown valve assembly
7605AP-16	1/4" tubing tee with nuts
7605AP-15	1/8" NPT x 1/4" tubing. Straight connector

RegO Pull-away Valves for Transfer Operations

Designed especially to provide pull-way protection for LP-gas and anhydrous ammonia transfer operations including transport and delivery truck loading and unloading, engine fuel container filling and miscellaneous cylinder filling operations.

PART NUMBER	INLET/OUTLET CONNECTIONS (F. NPT)	DISCONNECT FORCE (APROX-LBS)	RECONNECT FORCE (APPROX-LBS)	MOUNTING CONNECTION

A2141A10	1 1/4"	160	25	Lanyard
A2141A16	2"	300	50	Lanyard

RegO Bleeder Valves

Especially designed to bleed off liquid or vapor pressures trapped in transfer lines. When installed in the downstream boss of RegO globe and angle valves used at the end of a liquid transfer hose, the bleeder valve allows for the controlled venting of the product and indicates to the operator that the valves are closed and he can disconnect the coupling. They may also be used as a fixed liquid level gauge where the dip tube is part of the container.

PART NUMBER	SERVICE	CONNECTION	ACTUATION	ACCESSORIES WARNING PLATE KIT
3165C	LP Gas Only	1/4" M.NPT	Knurled	2550-40P

3165C with 2550-40P

TSS3169

RegO Fixed Liquid Level Gauges

Especially designed to provide a visible warning when containers are filled to the maximum permitted filling level. At the start of the filling operation, with the vent stem opened, the valve discharges vapor. When the maximum permitted filling level is reached, the valve discharges liquid. These valves are normally furnished with a 12", 3/16" O.D. dip tube and incorporate a No. 54 drill size orifice. An optional instruction plate with "Stop Filling When Liquid Appears" may be ordered for use with these valves.

PART NUMBER	SERVICE	CONNECTION	ACTUATION	DIP TUBE LENGTH	ACCESSORIES WARNING PLATE KIT
3165CF05.6	LP Gas Only	1/4" M.NPT	Knurled	5.6"	2550-40P

3165CF12.0

RegO Hydraulic Automatic Cylinder Filling System

Designed to provide accurate, economical filling of LP-Gas DOT and fork lift cylinders by weight. Filling stops automatically as the total weight of the cylinders reaches the amount pre-set on the scale. One individual can efficiently handle up to four cylinder filling operations simultaneously, to maximize profits, increase efficiency and allow servicing of more customers.

KEY NO.	DESCRIPTION	SIZE	PART NUMBER
Assembly for Fairbanks Morse. Includes items 1 through 8 below.			7194MD
1	Propane Control Valve	1/2" NPT female with 1/8" NPT female hydraulic connection	7177
2	Master Cylinder, with Actuator lever	1/8" NPT hydraulic connection	7188
3	Hydraulic hose assembly	3/16" I.D. with 1/8" NPT male ends, 43 1/2" overall length	7194-1
4A	Bracket kit for Fairbanks Morse scales, complete with screws, washers, nuts, and instructions	----	7194M-3K
5	Can of hydraulic fluid, complete with filling spout	1 1/2 Ounce	7188-21
6	Propane filling hose assembly	1/2" I.D., with 1/2" NPT male ends. 50 1/2" overall length	7193-4
7	Quick-acting shut-off valve	1/2" NPT inlet X 1/4" NPT outlet	7901TB
8*	Soft nose cylinder connector	1/4" NPT male X POL male	7193D-10

*Any of the RegO hose end adapters for cylinder filling may be used with these systems.

Cylinders are manufactured to meet or exceed DOT Specification 4BA240 or 4BW240.

Order by phone: 800-922-0724

Locks

The easy to install 510 Saf-T-Lok securely locks POL service valves to prevent unauthorized hookups, reduce pilferage, and secures tanks after "out of gas" calls. Provides an effective credit control.

PART NO.	DESCRIPTION
510	POL-LOCK
510-K	POL-LOCK KEY
B531G & B827P-A0	POL Lock complete with lock and plug for LP outlet valve keyed alike (key not included)
S502K-C-BLUE	Key cut uniquely with code for each company.
S533G-LLVC-A0	1 3/4" ACME valve cap lock with brass cap and slip ring with lock keyed alike (key not included)

Tank and Cylinder Accessories

For use on cylinders during transportation. Also protects valve on construction sites as per DOT and OSHA requirements.

PART NO.	DESCRIPTION
1433	Screw cap, 3 1/2" thread
1406.1	Screw on collar (construction) fits over multivalve 3 1/2"
1406.2	Screw on collar (construction) fits over multivalve 3 1/8"

Break-away Locks

Hidden breakaway feature allows fire department or emergency response personnel access to valves, plant gates, etc. Lock shackle breaks away when struck with a hammer or chisel.

PART NUMBER	DESCRIPTION
500BRK	Break-away Lock; Keyed Alike

Locking Caps

Encloses ACME thread or handwheel on valve to prevent tampering.

RegO Service Valves for Dot Forklift Cylinders

9101P5

Designed specifically for vapor or liquid withdrawal service on DOT forklift containers. Valves with 1.5 GPM closing flow are for use in small and medium size lift truck applications, while those with 2.6 GPM closing flow are for large lift trucks and gantry crane type vehicles.

Cabinets

Construction

- All welded construction. No nuts and bolts to come loose.
- 1 1/2" angle frame.
- 1" angle shelves.
- 16 gauge steel roof.
- 16 gauge expanded metal sides and doors.

Features

- Lockable T-handle plus hasp for padlock.
- Tapered shelf front for easy cylinder placement.
- Heavy duty tubular hinge welded to frame and door.

33# Motor Fuel Cylinder Storage Cabinets – The "M" Series

Painted safety yellow rust inhibitor and includes 3 safety decals.

20# Cylinder Storage Cabinets – The "X" Series

Powder coated white. Other colors available and includes 2 safety decals plus place for sign. Sign not included.

Did you know we have many remote pick-up yards where you can get a tank in a hurry? Call for the locations nearest you.

Manchester DOT Cylinders

Manchester ASME and DOT 200 and 420 offer the best finish and features in the industry.

- Large 16" Diameter Collar
- Large Vented Collar & Foot Ring
- Full Load Lift-Lugs
- Armor-Clad III Powder Coat Paint
- All Threads Sealed with Blue Everseal
- Heavy-Duty Hinged Lid
- 4 Hole Head Design
- HPPE Plastic Lids – No Rust or Dents
- Colors Available
- Vacuum Pre-purged

Accessories for Motorfuel Tanks

RegO Relief Valves – Fully Internal “Pop Action”

8543 Series relief valves are designed for use as a primary relief valve in larger ASME motor fuel containers such as on buses, trucks and construction equipment.

8544 Series relief valves are designed for use as a primary relief valve in smaller ASME and DOT motor fuel containers such as on tractors, lift trucks, cars and taxicabs.

* Requires a 3/4" fill valve.

V13414

Underground Anchoring Equipment

For 500 and 1000 Gallon Tanks

Designed to secure both 500 and 1000 gallon U/G Tanks

PART NUMBER	DESCRIPTION
UG-KIT	(2) 1/2" X 15 FT CABLES (4) 1/2" X 6 TURNBUCKLES (6) 1/2" CABLE CLIPS (4) 1/2" X 9" X 15" ANCHORS

Minuteman Tank Anchoring System for Flood Plain Tiedown

High waters can dislodge unanchored tanks causing spills, environmental and property damage.

- Loose tanks may explode causing injuries.
- Buried tanks can be pushed to the surface by the buoyant effect of soil saturated by water.
- Floating tanks become battering rams causing property damage.

PART NO.	DESCRIPTION	USE
1346	36" Earth Anchor w/ 4" & 6" Disks	Dense / Normal Soil
1593	36" Earth Anchor w/ 4" & 6" Disks & Stabilizer	Dense / Medium Soil
1284	50" Earth Anchor w/ Double 4" Disks	Loose to Medium Soil
2391	Dry Concrete Anchor w/ Bolt Expansion Sleeve	Concrete - Dry
2010- Minute	Split Bolt and Nut	All Anchors
2365	Stainless Steel Sling w/ Sheathed Strap & Seals	For Vertical Cylinders
2375	Stainless Steel Strap 100ft Roll	Note: 120 gal. to 350 gal. tanks need 1 strap and 2 anchors. 351 gal. tanks to 1500 gal. tanks require 2 straps and 4 anchors.
2382	Strap Sheathing- 200 Feet	
2730	Minute Man Drive Machine	
2741	Minute Man Anchor Adapter

Magnesium Anode Bag

5, 9, and 17lb anode with 10ft X #12 gauge electrical lead attached. Bagged and boxed for shipping protection.

Part Numbers:
MG-5LB
MG-9LB
MG-17LB

Purge-It-Vac Adapter

- No labor
- No wasted propane

The purge-it-vac allows you to insert methanol and your first fill of propane without disconnecting the adapter. The purge-it vac adapter is easy to use and meets NPGA #133-899a) on the purging of LP-Gas containers.

Part Number: Purge-It-Vac

Anode Monitoring Station

When buried in the ground, provides a central point where 4 underground tank anodes can be monitored.

- ABS plastic shaft
- PVC terminal board
- Heavy-duty cast iron cover and collar

Part Number: NM-4

Electrode Extension

30" long intermediate electrode extension. Can be used with

MCM model ETM, I.A. and LC series meters or between the electrode and the standard electrode extension so that the electrode can be easily placed at the desired location inside manholes, water tanks, etc. Will fit through a 1" diameter augered hole.

Electrode Part Number: 16203 Cane Adapter Part Number: 16285

Anode Test Kit

Anode Test Kit includes:

- 6A half cell - reference electrode
- Digital multimeter w/wired probes
- Storage case

Part Number: ATK-1

Anode Splice

Utilized in conjunction with pre-mounted anode lead wires on Underground Tanks.

BSK-1

Includes burndy crimp and heat-shrink sleeve. Basic pliers or electrical crimp tool provide a solid connection.

PART NUMBER	DESCRIPTION
6A	6A Half Cell Reference Electrode (Flat Tip)
6B	6B Half Cell Reference Electrode (Pointed Tip)
16906	Copper Sulfate (12 oz.)
17105	Copper Sulfate Anti-Freeze
16281	Telescoping extension pole
16285	Bracket mounting adapter for telescoping extension pole
T&R50300	Copper Sulfate Crystals (1 lb. 3 oz.)
T&R50060	Flat tip assembly for 6A
TR50070	Pointed tip assembly for 6B
T&R50300	Copper sulfate crystals

Riser Pipe Clamp

Retrofit anode connection for existing or new underground tanks.

Part Number: RPC.1

Use the following legend for all signs and decals:

M	Metal (Aluminum)	A	6" Letters
S	Scotchlite Brand Reflective	B	4" Letters
V	Vinyl (Self-adhesive)	BB	3" Letters
P	Plastic	C	2" Letters
G	Magnetic	D	1" Letters

Cylinder Decals

DANGER - FLAMMABLE GAS UNDER PRESSURE - LEAKING LP-GAS CAN CAUSE A FIRE OR EXPLOSION IF IGNITED - CONTACT LP-GAS SUPPLIERS FOR REPAIRS OR DISPOSAL OF THIS CYLINDER OR UNUSED LP-GAS - FOR OUTDOOR USE ONLY - DO NOT USE OR STORE CYLINDER IN A BUILDING, GARAGE OR ENCLOSED AREA.

Customer Warning:

- Know the odor of LP-gas. Under certain circumstances, you may not be able to smell the odorant. If you hear or smell leaking LP-gas, immediately get everyone away from the cylinder and call the fire department.
- Caution your LP-gas supplier to:
 - purge the cylinder of trapped air prior to first filling
 - check the cylinder requalification date
 - be certain not to overfill the cylinder.
- LP-gas is heavier than air and can settle in low places while dissipating.
- Contact with the liquid contents of the cylinder will cause freeze burns to the skin.
- Do not allow children to tamper or play with the cylinder.
- When the cylinder is not connected for use, keep the valve turned off. If your cylinder valve looks like the POL TYPE (Figure 3) and is of 45 lb. LP-Gas capacity or less, the outlet must also be plugged.
- Do not use, store or transport cylinder where it could be exposed to high temperatures. Relief valve can open allowing a large amount of flammable gas to escape.
- When transporting, keep cylinder secured in an upright position with cylinder valve turned off. If the cylinder is of 45 lb. LP-Gas capacity or less and looks like the POL TYPE (Figure 3), the outlet must also be plugged.
- Self-contained outdoor cooking appliances must be limited to one cylinder of 20 lbs. LP-Gas capacity or less.

When Connecting for Use:

- Use only in compliance with applicable codes.
- Read and follow appliance manufacturer's instructions.
- Regulator has an external threaded coupling nut and the cylinder valve has large outside threads. Tighten the coupling nut by turning clockwise (TYPE 1-Figure 1).
- If regulator has a plug-in connection, pull valve sleeve back, insert male plug fully and release valve sleeve (TYPE 2-Figure 2). If the regulator has an external threaded coupling nut, it has left-hand threads and must be tightened by turning counter clockwise (POL TYPE-Figure 3).
- Turn off all valves on appliance.
- Do not check for gas leaks with a match or open flame.
- Apply soapy water at areas marked "X" after opening cylinder valve. If bubbles appear, close valve and have an LP-gas service person make needed repairs. Also check appliance valves and connections for leakage before lighting appliance.
- Light appliance(s) following manufacturer's instructions.
- When appliance(s) is not in use, keep cylinder valve closed.

DO NOT REMOVE, OBFUSCATE OR OBLITERATE THIS LABEL. EXCEPT AS AUTHORIZED BY NFPA 49 OR 49A 2.2 (in Canada).

DANGER - FLAMMABLE GAS UNDER PRESSURE - LEAKING LP-GAS CAN CAUSE A FIRE OR EXPLOSION IF IGNITED - CONTACT LP-GAS SUPPLIERS FOR REPAIRS OR DISPOSAL OF THIS CYLINDER OR UNUSED LP-GAS - FOR OUTDOOR USE ONLY - DO NOT USE OR STORE CYLINDER IN A BUILDING, GARAGE OR ENCLOSED AREA.

Customer Warning:

- Know the odor of LP-gas. Under certain circumstances, you may not be able to smell the odorant. If you hear or smell leaking LP-gas, immediately get everyone away from the cylinder and call the fire department.
- Caution your LP-gas supplier to:
 - purge the cylinder of trapped air prior to first filling
 - check the cylinder requalification date
 - be certain not to overfill the cylinder.
- LP-gas is heavier than air and can settle in low places while dissipating.
- Contact with the liquid contents of the cylinder will cause freeze burns to the skin.
- Do not allow children to tamper or play with the cylinder.
- When the cylinder is not connected for use, keep the valve turned off. If your cylinder valve looks like the POL TYPE (Figure 3) and is of 45 lb. LP-Gas capacity or less, the outlet must also be plugged.
- Do not use, store or transport cylinder where it could be exposed to high temperatures. Relief valve can open allowing a large amount of flammable gas to escape.
- When transporting, keep cylinder secured in an upright position with cylinder valve turned off. If the cylinder is of 45 lb. LP-Gas capacity or less and looks like the POL TYPE (Figure 3), the outlet must also be plugged.
- Self-contained outdoor cooking appliances must be limited to one cylinder of 20 lbs. LP-Gas capacity or less.

When Connecting for Use:

- Use only in compliance with applicable codes.
- Read and follow appliance manufacturer's instructions.
- Regulator has an external threaded coupling nut and the cylinder valve has large outside threads. Tighten the coupling nut by turning clockwise (TYPE 1-Figure 1).
- If regulator has a plug-in connection, pull valve sleeve back, insert male plug fully and release valve sleeve (TYPE 2-Figure 2). If the regulator has an external threaded coupling nut, it has left-hand threads and must be tightened by turning counter clockwise (POL TYPE-Figure 3).
- Turn off all valves on appliance.
- Do not check for gas leaks with a match or open flame.
- Apply soapy water at areas marked "X" after opening cylinder valve. If bubbles appear, close valve and have an LP-gas service person make needed repairs. Also check appliance valves and connections for leakage before lighting appliance.
- Light appliance(s) following manufacturer's instructions.
- When appliance(s) is not in use, keep cylinder valve closed.

DO NOT REMOVE, OBFUSCATE OR OBLITERATE THIS LABEL. EXCEPT AS AUTHORIZED BY NFPA 49 OR 49A 2.2 (in Canada).

Bulk Plant/Pump Stations Signs (cont.)

NO SMOKING
within 25' of filling

**Filling Procedures ASME
(Perm Mounted) Containers**

1. Only ASME containers having a minimum design pressure of 250 PSI or 200 PSI under U-68 or U-69 may be filled.
2. Check that container is not already full to proper loading point (is there a cloud of visible vapor discharging from the fixed liquid level gauge vent valve?)
3. Open liquid outlet valve on storage tank and valve in by-pass return line.
4. Connect hose to container fill valve.
5. Start pump.
6. Open vent valve of fixed liquid level gauge.
7. Open valve on end of hose.
8. If container fill valve is hand operated, open valve.
9. Fill until vapor coming from vent valve is visible, then immediately turn off hose end valve and close vent valve.
10. Shut off pump.
11. Turn off container valve if hand operated.
12. Disconnect hose.
13. Check container valves for leaks.

WHEN FILLING IS COMPLETED OR WHEN STATION IS UNATTENDED

1. Shut off pump.
2. Close valves at storage tank.
3. Coil hose on rack inside fence protected area and install dust cap or plug in hose filling adaptor.
4. Lock fence protected area to secure installation against tampering.

V-122
11" x 12"
Printed red

**Filling Procedure
Portable Cylinders**

1. Open liquid outlet valve on storage tank and valves in by-pass return line.
2. Connect hose to cylinder fill valve.
3. Start pump.
4. Open valve on cylinder.
5. Open valve on end of hose.
6. Close hose valve as soon as scale beam or indicator tips.
7. Close cylinder valve.
8. Disconnect hose.
9. Check weight. Bleed off overfill at a safe location.
10. Check container valves for leaks.

OPERATOR MUST BE IN ATTENDANCE
DURING ENTIRE FILLING PROCEDURE.

V-121
11" x 12"
Printed red

Does your valve look like this?

If not, it may not comply with national fire and safety standards. The handwheel pictured is part of an "OPD": Overfilling Prevention Device. An OPD is a safety feature that helps reduce the number of cylinders overfilled. Overfilling of cylinders can result in the release of propane through the relief valve when the propane expands through heating. It can also create higher pressure delivery to appliances through the piping system.

Here's the facts you need to know!

- ◆ 4# - 40# new cylinders* manufactured after October 1, 1998 must have the OPD. The manufacture date is stamped on the cylinder collar.
- ◆ 4# - 40# cylinders * requalified after October 1, 1998 must have the OPD installed. Requalification is required 12 years after manufacture date and every 5 years thereafter.
- ◆ After April 1, 2002, all cylinders* must have OPDs and cannot be refilled without them.

*Exception: All cylinders used in industrial truck service (including forklift truck cylinders) and/or those used for industrial welding and cutting gases are exempt from these requirements.

Be safe!
Call your propane dealer now to get your cylinder fitted with the OPD

Copyright Douglas Brown Products, Inc. 1998 Call 1-800-888-8845 and ask for catalog number 11-01-01

Do you have your OPD yet?

The Overfill Prevention Device (OPD) is a float-activated device designed to assist propane refilling to safe levels. In conformity with new codes, most consumer-style propane cylinders need to be equipped with the OPD.

Your cylinder may need an OPD as early as March, 1998!

For your safety the NFPA (National Fire Protection Association) has enacted the following code changes. Please read below to see if your cylinder is eligible for this code modification:

- ★ All DOT cylinders sizes 4# to 40# require an OPD. (Excludes any forklift, welding and cutting gas cylinders.)
- ★ Eligible DOT cylinders will require an OPD valve at DOT recertification beginning April 1998 through March, 2002. Recertification is a routine mechanical inspection that makes sure all components of a cylinder are free from defective parts and/or contaminants.
- ★ DOT recertification of a cylinder is required 12 years after the date of original manufacture, then every 5 years thereafter. (Photos at left demonstrate where to find this date stamp. Recertification dates also appear here.)
- ★ In April, 2002, all eligible cylinders will require an OPD Valve before filling.

Special cylinder identification stamp

New OPD valve

OPD stamped in brass

How to tell if your cylinder already has an OPD Valve:

Questions about your OPD valve? Ask your local propane distributor, or contact the consumer hotline: 1-800-296-0194

C16	3	3	230/460	1 1/2"	1"	18

(a) These motors are listed by Underwriters' Laboratories, Inc. and CSA for Class 1, Group D, explosion-proof service.

Accessory Options

PART NUMBER	DESCRIPTION
B166B-.75BAU-Y	3/4" bypass valve purchased with C-Model pump
B166B-1BAU-Y	1" bypass valve purchased with C-Model pump
SM-30	Motor mounted switch

Part Options

PART NUMBER	DESCRIPTION
113-CXA	Mechanical seal (Buna-N)
2555	3/4 hp, 60 Hz Coro-Flo motor (REPLACED BY PART #2556)
2556	1 hp, 60 Hz Coro-Flo motor
4261	2 hp, 50/60 Hz Coro-Flo motor
2557	3hp, 50/60 Hz Coro-Flo motor

Electrical Options

PART NUMBER	DESCRIPTION
2277-X1	Motor mounted manual starter
2277-X2	Wall mounted manual starter
2277-X3	Motor mounted manual starter-2 hp
2275-X1	Switch assembly with heater-3/4 hp
2275-X2	Switch assembly with heater-1 hp
2275-X3	Switch assembly with heater-2 hp

CAUTION: Always relieve pressure in the unit before attempting any repairs.

CAUTION: To help prevent shock or ignition of hazardous atmospheres, always disconnect and lock out power circuit.

Coro-Flo Pumps (Models 060 & 075 AutoGas)

PART NUMBER	DESCRIPTION	INLET	OUTLET	MOUNTING OPTIONS		
				PART NUMBER	DESCRIPTION	MAXIMUM MOTOR FRAME SIZE
FF060	Frame mounted ANSI flange	1 1/2" ANSI*	1" ANSI*	101-14	Mounting set-up for direct drive. Includes steel baseplate, flexible coupling, and coupling guard. (pump and motor not included)	184T, 215T, 256T
FF075						
FD060	Frame mounted DIN flange	40 mm PN40 DIN 2635	25 mm PN40 DIN 2635			
FD075						
DLF060**	Direct mount pump with C-Face frame ANSI flange	1 1/2" ANSI*	1" ANSI*			
DLF075**						
DLD060**	Direct mount pump with C-Face frame DIN flange	40 mm PN40 DIN 2635	25 mm PN40 DIN 2635			
DLD075**						

*All standard ANSI port sizes are 300 lbs.

**Accommodates NEMA motors up to and including 10 hp (215 TC frame size).

PART NUMBER	DESCRIPTION	MODEL REFERENCE
SINGLE PHASE APPLICATIONS		
HDPFF060-1P53	Pump, 101 mounting, B166B-1CAU, 5 hp Exp. 60Hz 3 ph motor and Variable frequency drive	FF060CD6A
HDPDLF060-1P53	Pump, coupling, B166B-1CAU and 5 hp Exp. 60 Hz 3 ph C-face motor and Variable frequency drive	DLF060CD6A
HDPFF060-1P51	Pump, 101 mounting, B166B-1CAU and 5 hp Exp. 60Hz 1 ph motor	FF060CD6A
HDPDLF060-1P51	Pump, coupling, B166B-1CAU and 5 hp Exp. 60 Hz 1 ph C-face motor	DLF060CD6A
HDPFF075-1P75	Pump, 101 mounting, B166B-1CAU, 7.5 hp Exp. 60Hz motor and Variable frequency drive	FF075CD6A
HDPDLF0075-1P75	Pump, coupling, B166B-1CAU and 7.5 hp Exp. 60 Hz C-face motor and Variable frequency drive	DLF075CD6A
THREE PHASE APPLICATIONS		
HDPFF060-3P53	Pump, 101 mounting, B166B-1CAU and 5 hp Exp. 60Hz 3 ph motor	FF060CD6A
HDPDLF060-3P53	Pump, coupling, B166B-1CAU and 5 hp Exp. 60 Hz 3 ph C-face motor	DLF060CD6A
HDPFF075-3P75	Pump, 101 mounting, B166B-1CAU, 7.5 hp Exp. 60Hz motor	FF075CD6A
DLF075CD6A	Pump, coupling, B166B-1CAU and 7.5 hp Exp. 60 Hz C-face motor	DLF075CD6A

Part Options

PART NUMBER	DESCRIPTION	WORKS FOR
6133-X1	Companion Flange Kit (FF/DLF)	
1345-2	Coupling (182/184 TC NEMA frame size)	DLF060/DLF075
1345-1	Coupling (213/215 TC NEMA frame size)	DLF060/DLF075
1345	Special bore coupling (all other NEMA and IEC size C-face motors)	DLF/DLD060/DLD075

Breakaway Stanchion Bulk Truck and Transport

Our B-STAN provides two 2" outlet breakaway protection for standard bulk truck loading. The B-STAN-D has three 2" outlets for combination transport unloading and bobtail loading using a common vapor connection.

PART NUMBER	DESCRIPTION
B-STAN	4" x 4" x 6' Stanchion w/ 2 outlet
B-STAN-D	4" x 4" x 6' Stanchion w/ 3 outlet

3-Way Dump Valve for ESV Systems

This 3-way valve can be used for remote shutdown on pneumatic ESV systems. The 3 openings provide for supply pressure in, line out to ESV or internal valves and exhaust. Can be piped as "Push to Close" or "Pull to Close."

Part Number: 3331

Nitrogen Regulator

Economical, compact single stage design provides efficient and dependable control of inert, nitrogen gas for pneumatic systems controlling internal and ESV systems. Solid brass construction. CGA 580 connects to our Nitro Tank.

Part Number: RHP400

Pull-Away Valves for Transfer Operations

Designed to provide pull-way protection for LP-gas and anhydrous ammonia transfer operations including transport and delivery truck loading and unloading, engine fuel container filling and miscellaneous cylinder filling operations.

Corken Compressors

Compressors are extremely versatile as they can be used to transfer liquids between tanks, off-load liquids, recover residual vapor and evacuate vapors for cylinder maintenance. Many propane tanks such as railcars and buried tanks have top unloading connections. A compressor can be the perfect solution for transferring liquids to and from such tanks.

Model Number
491-107

Add 107 to the model number to include the following: complete gas compressor bulk plant unit with pressure gauges, steel base plate, liquid trap, 4-way valve, strainer, interconnecting piping, adjustable driver slide base, V-belt drive and enclosed belt guard – ready to receive an electric motor driver. Relief valve not included. Corken suggests a 250 PSI relief.

Mechanical Specifications

SPECIFICATIONS	MODEL SIZE			
	91	291	491	691
Number of Stages	1	1	1	1
Number of Cylinders	1	2	2	2
Bore of Cylinder, Inches (cm)	3 (76.2)	3 (76.2)	4 (101.6)	4 1/2 (114.3)
Stroke, inches (cm)	2 1/2 (63.5)	2 1/2 (63.5)	3 (76.2)	4 (101.6)

COMPRESSORS & METERS

*Krug makes evacuating tanks in the field a snap...
saves wear and tear on your bobtails too!*

Krug Portable Compressor

Tank Evacuation Vapor Compressor

Save your expensive truck pump from damage when evacuating tanks in the field at an 8 to 15 GPM flow rate. Uses include on-site upgrading or downgrading size of storage in the field, and emptying cylinders or tanks in need of repair. This compressor transfers liquid by increasing vapor pressure in the tank being emptied and decreasing it in the tank being filled. The liquid can be moved into a bulk truck or another bulk tank.

Using a Portable LP-Gas Compressor

Use 30w or 40w Non-detergent motor oil.

PART NO.	FUEL	INLET/OUTLET
H50LPH	Propane	1/2" NPT
*K-GAS	Gasoline	1/2" NPT
*K-EPM	1 HP Explosion Proof Electric Motor	1/2" NPT

Purge-It-Vac Adapter

- No labor
- No wasted propane

The purge-it-vac allows you to insert methanol and your first fill of propane without disconnecting the adapter. The purge-it vac adapter is easy to use and meets NPGA #133-899a) on the purging of LP-Gas containers.

Part Number: Purge-It-Vac

Krug Hand Pump

Simple piston hand pump for uses in filling portable and motor fuel cylinders. Six gallon capacity at 40 strokes per minute. Can also be used to pump methanol into systems. No electricity required.

PART NUMBER	INLET	OUTLET
K-HP	1"FNPT	3/4" FNPT
K-HPRK	PUMP REPAIR KIT	-

Purge-It-Safe Cylinder Purge System

Part Number:
PURGE-IT-SAFE

Mounts with ease and makes purging of propane cylinders fast and easy! Utilizes vapor as per Pamphlet 58. 3-way valve system includes:

- RegO 3-way valve--A7853A
- Regulator with gauge--597FA
- 4' vent pipe
- Hose 12' with POL fill (2)

Purge Kit LP

Mounts with ease and makes purging of propane cylinders fast and easy! 3-Way Valve utilizes vapor as per Pamphlet 58.

Part Number: PurgeKitLP

Pump Station Hose

Completely assembled and ready to use! Dispenser hose 1/2" x 18' with RegO Snap Acting Valve and POL Fill Adapter.

Part Number: PS-Hose

Ventur-Evac and Hose Kit

Developed and tested to provide safe, efficient and reliable use, the Ventur-Evac is the answer to the age old problem of propane tank evacuation.

Part Number: VENTUR-EVAC

Works with the Ventur-Evac.

Kit Includes

(1 each): 3121, 3127U, 3175B, 7550P
7590U-10, LPH-1/2X50P, LPH-3/4X50P, M498-4/2

(2 each): 3171A, 3175, 5765D,
600115, 600120, 80-104-01

Part Number: VENTUR-EVAC HOSE KIT

Liquid Meters

Designed for retail sales dispensing units, the Liqua-Tech Model LPM-102 offers the widest flow range (3-18gpm) available in a meter this size and contains all required accessories including vapor eliminator, strainer and differential valve. ATC available.

Non-locking insulated unions in the Pipe and Fittings Section.

Vapor Meters

Domestic and Commercial Meters

American Meter has a full line of vapor meters. Domestic and commercial meters are compact, lightweight, rugged die-cast aluminum alloy construction. Meters are temperature compensated for accurate measurement.

We carry a complete line of new and reconditioned vapor meters from 3/4" to 4" size. All meters are fully guaranteed for two years from date of installation.

Vapor Meters

Regulator Assembly LV4403B66RA REG, 6266B-3/4 Valve 2-4" Nipples

Save time and money with our assembled angle regulator manifold. Perfect for vapor meter installations.

PART NUMBER	SIZE
RP-750	3/4"
RP-750-NB	3/4"

Assembled Pump Station Cabinet

Now available fully assembled and ready to go!

Components

- Cabinet
- Tank Stands
- Corken Pump C12 with Switch
- Bypass Valve
- Liqua-Tech Meter
- Scale
- Piping Kit

Part Number: D2A-KIT-ALUM

Piping Kit includes:

- Internal Valve 1 1/4"
- Hydrostatic Relief Valve
- Angle Valve 3/4"
- Excess Flow Valve 3/4"
- Pullaway Valve 3/4"
- Y Strainer
- Flex Connector
- Forged Steel Fittings
- Schedule 80 Nipples

Pump Station Cabinet

Protect your pump, meter and scale with this dispensing cabinet.

Dimensions:

Height 45" • Width 45" • Depth 44"

Part Number: D-2-A ALUM

Cabinet Piping Kit

Includes all valves, hoses, strainer, flex line, fittings and nipples but not the major components.*

Part Number: TTC-K

*TTC-K does not include cabinet, stands, pump with switch and bypass, meter or scale.

Dispensing Cabinets

Protect your pump and meter!

Dimensions:

Height 56 1/2" • Width 34 1/2" • Depth 16 1/2"

Cabinet only

Part Number: D-1-ALUM

Assembled Compact Pump Station Cabinet Components

- Cabinet
- Tank Stands
- Corken Pump C12 with Switch
- Bypass Valve
- Liqua-Tech Meter
- Piping Kit includes Internal Valve 1/14"

Part Number: D1-KIT-ALUM (not pictured) **Special Order**

Custom Cabinets available for other applications.

G-1851-A03	Type 1 QCC x 1/4 MPT Green	71,000-200,000
G-1851-A04	Type 1 QCC x 1/4 MPT Red	201,000-400,000

QCC Type 1 Purge Fitting

Allows quick purging of QCC Type I Connection

Part Number: G-1850

Fill Adapter for Gas Mate II & Quick Disconnect Valve

Part Number: F276329

Gas Grill "Quick Connect"

1/4" Male Pipe x Male Plug

Part Number: F276328

QCC Dust Cap

Dust cap with lanyard for all QCC valves.

Part Number: DC-QCC1

POL Plug

Red plug cylinder valve with warning tag.

Part Number: 737-5

Gas Grill "Quick Connect Kit"

(POL x Connection, 1/4" x Plug) Eliminates wrenches; fits on all refillable propane cylinders. Provides plug in/plug out use of appliances such as torches, heaters, cookers, etc.

Part Number: F276330

Stationary Tank Inverter

- Capable of handling up to 420 lb cylinder
- 6 position
- Non-marring pads
- Safety-chain
- 4000# hydraulic jack
- 10,000# Strap
- Twin 100# adapter
- Factory assembled & tested

Part Number: DOT-INV.

RegO Hose End Connectors for DOT Cylinder Filling

PART NO.	USE	CONNECTION		MATERIALS
		INLET	OUTLET	
7193D-10	DOT Cylinders with POL Connections	1/4" M.NPT	M. POL (CGA 510)	Brass and Stainless Steel
7193U-10	DOT Cylinders with POL Connections	1/4" M.NPT	Type I Conn (1 5/16" F. ACME)	Brass
7193L-10A	DOT Fork Lift Cylinders	1/4" M.NPT	1 1/4" F.ACME	Brass

RegO Adapter for DOT Cylinder Filling

PART NO.	APPLICATION	CONNECTION		MATERIALS
		INLET	OUTLET	
7193T-10	Converts 7193D-10 Adapter from POL to a Type 1 Connection	F. POL CGA 510	Type 1 Conn (1 5/16" F. ACME)	Brass

RegO Quick-acting Valves for Cylinder Filling Hoses

Provides fast, convenient shut-off and fast opening.

PART NO.	CONNECTION		BODY MATERIAL	FLOW AT 1 PSIG (CV) PRESSURE DROP*
	INLET	OUTLET		
7901TB	1/2" F.NPT	1/4" F.NPT	Brass	1.95 GPM

* To obtain approximate flow at other than 1 PSIG pressure drop, multiply flow in table by square root of pressure drop. Example: 7901TB @ 9 PSIG = 1.95 x √9 = 5.85 GPM/propane. For NH3 flow, multiple propane flow by .90.

Adapts POL filler coupling to motor fuel tanks or multivalves.

PART NO.	DESCRIPTION
MSCP-901H	F POL x 1-3/4" F.ACME adapter

Call our Tech Service Department for installation guides or training.

The EZTC717 Tank Carrier

EZTC717

Features:

- 360° Turning Radius
- Eaton Hydrostatic Transmission
- Cushioned Connection Points
- Automatic Emergency Shut Off
- 4-ply agricultural type tires
- Two 6,500 lbs breaking strength nylon straps with ratchet for wheel jack assembly
- One 18,000 lb breaking strength nylon straps with ratchet for power assembly

Specifications:

Weight: 419 Lbs
Height: 64 1/2" to top of Handle
Overall Width: 62"
Length: 67"
Construction: 100% Aluminum
Lift Capacity: 2,300 lbs

Handles horizontal ASME tanks up to 1,000 gallon capacity.

Tank and Cylinder Movers

RTC420NG3

Part Number: RTC420NG3 (pictured left)

Motorized dolly with gear drive transaxle for 420 LB (100 gal.) D.O.T. cylinders and 120 gal. horizontal storage tanks. One forward and one reverse gear. 5.0 HP Honda engine, Peerless transaxle.

RTC420M2

Part Number: RTC420M2 (pictured left)

Manual dolly for 420 LB D.O.T cylinders. Three wheel cart with strap, ratchet and hood grab strap for easy attachment. Single handle bar design.

RTC120

Part Number: RTC120 (pictured right)

The RTC120 Adapter is a separate attachment that allows the RTC420 to spot 120 gal. horizontal ASME tanks. Kit includes adapter, strap, ratchet modifications, installation and operating instructions.

Hand Trucks

Part Number HT7-900-4P

Ideal for 420LB cylinders.

Tire and Wheel

Part Number: 101222

Motor Fuel Cylinder Cart

The RTC33-Scoop 33 LB. Motor Fuel Cylinder Dolly safely transports four stacked cylinders without the use of chain or straps to hold the cylinders on the cart. Scoop and go! Ideal for cylinder delivery trucks, loading docks, gas houses and factories.

Part Number: RTC33-SCOOP

Spare Tire Part Number: 354DC-TIRE

RTC33-SCOOP

Part Number HT7325-2

Ideal for 100, 200 or 300LB cylinders.

Tire and Wheel

Part Number: 101222

We have the tools you need to do the job right the first time!

Slings and Ratchet Straps

Permaloc Cable Bridle Slings

Galvanized aircraft quality, lifts up to 1000 gallon tanks.

2 Leg Sling

Lifting capacity 4,400 lbs. @60° angle.

Other lengths available.

Special orders and other sizes available upon request

PART NUMBERS	DESCRIPTION
5X5X2	3/8" x 5' cables
5X5X2S	3/8" x 5' nylon straps
7X7X2	3/8" x 7' cables
7X7X2S	3/8" x 7' nylon straps
10X10X2	3/8" x 10' cables
10X10X2S	3/8" x 10' nylon straps

Round Slings

Useful in lifting cylinder and tanks up to 1,000 gallons.

Part Number: VR1X12 (12' Long)

Part Number: VR3X14 (14' Long)

Other sizes and lengths available.

See tag on strap for lifting capacity.

Tank-Jak

The Tank-Jak is designed to provide a portable means of lifting propane tanks for leveling, painting, etc.

Lifting Capacity: 3000 LBS

Jack Travel: 13"

Part Number: TANK-JAK

Wood Safety Plugs

In the event of a valve being sheared off, hammering in a wood safety plug will allow you to remove the tank to a safe area.

PART NO.	DESCRIPTION
WP3/4X12	3/4" X 12" - Truck
WP1-1/2X12	1-1/2" X 12" - Truck
WP2-1/2X12	2-1/2" X 12" - Truck

Gauging Reamer Kit

Have the correct size reamer when you need it. Our kit contains 1 each of GR5020-GR5090 five cornered reamers in a slim plastic case.

PART NO.	DESCRIPTION
G5000	Gauging Reamer Kit
G6000	Plastic Case Only - Empty

Broaches and Pin Vises

Tapered Broaches

PART NUMBER	SIZE
GB1008	Tapered from .008" to .017"
GB1010	Tapered from .010" to .017"
GB1012	Tapered from .012" to .017"
GB3015	Tapered from .003" TO .013" A must for cleaning Pilot Orifices.

TL050 Burner Broach

For reaming and cleaning ports. Will fit with TL061 handpiece or TL072 pin vise. Tapers from 1/8" square. Tough and durable.

TL072 Pin Vise for Gauging Drills

For holding large and small gauging drills securely while reaming, prevents spinning. This tool is a must when using gauging drills.

Our press check adapter on page 113 is a low-cost alternative to expensive gadgets now on the market.

Flaring Tools

Rolo-Flair Tool

2.6033	Flairing Tool	3/16", 1/4", 5/16", 3/8", 1/2", 5/8"

Universal Flaring Tool

PART NO.	DESCRIPTION	TUBE SIZE O.D.
525-845	Flairing Tool	3/16" - 5/8"

One opening fits all sizes

Universal Two-Hand Bender for Soft Tubing

- Precision bends soft tubing up to 180° without crimping
- Use on 1/4" to 5/8" soft and medium-soft copper, brass, aluminum, steel and stainless steel tubing
- Marked at 30°, 45°, 60°, 90°, 120°, 135°, 150° and 180° for accuracy
- Lightweight, easy to handle with handles that prevent bruised and pinched knuckles!

Tube Cutter

Rollers have flair cut-off grooves, fold away reamer and spare cutting wheel.

7.0010

2.5142	1/2" O.D. Bender
2.5136	5/8" O.D. Bender

Orifice Kits and Gauging Drill Sets

Orifice Adapter Kit

This adapter kit will renew 80-90% of all orifices. Allows you to also adapt a natural gas orifice down to a smaller LP gas size. An essential item for your serviceman. Includes all tools needed to assemble MI100 adapters: Kit contains 100 each pf MI100-72; 1 each TL061, TL062, TL063, TL064, TL070 and TL074. In a plastic box.

PART NO.	DESCRIPTION
MIK100	Master Adapter Kit
SC100	Case only for MIK100
MI-100	#72 Orifice for MIK100

MI-131 – Serviceman's Orifice Assortment Kit

MI-135 – Special LP Plug and Cap Orifice Kit

G-4080 Gauging Drill Set

Durable heavy gauge plastic case with clasp, contains set of 41 gauging drills, sizes 40 through 80. Plus 1 G-3020 tapered broach. Snug fit can not fall out. Quick and easy drill removal and replacement.

Part Number: G-4080

G1939 Gauging Drill Set

Same as above, contains 21 drill sizes 19 through 39

Part Number: G1939

Leak Test

Dual Range UL-Tube and Inclined Manometer

Use as a regular U-tube manometer to read high-range pressure on the right leg, or as an inclined manometer to read low-range pressure on the bottom leg. Simply incline manometer until fluid level reads zero. No spirt level required. Magnetic clips hold the gauge in position on steel duct surface.

Part Number: 1227-16

Dual Range Manometer

Low Pressure Test Adapter

Flare fitting unit for testing pressure in copper tubing lines, when test connection on appliance is not accessible.

FOR USE WITH MANOMETER

PART NUMBER	DESCRIPTION
1328	3/8" O.D. Flare
1331	1/2" O.D. Flare
1332	5/8" O.D. Flare

Water Manometer

Includes: 2 magnetic mounting clips, tube clamp, 2 plastic carrying plugs, and 2 flexible plastic tubing connectors for attachment of 2 ft. 5/16" latex tubing. Fluorescent green dye concentrate furnished.

Part Number: 1222-16

Above water manometer with 2 ft. latex tubing.

Part Number: 1222-16-K

Manometer Kit

Kit includes 1211-16 slack-tube manometer, carrying case, green wetting agent, adapters and 3' hose. Manometers are as accurate as the finest laboratory "U" gauges—yet they are made to roll up compactly for easy carrying and to withstand rough usage.

Manometer Part Number: 1212

Hose Part Number: LATEX

Serviceman's Friend

For use with manometer and other applications. One end of fitting has 1/8" pipe thread, 1/4" pipe thread and special 5/16" x 32 thread. Opposite end has regular hose fitting, also 1/8" straight pipe thread. Hose can be used on either end.

Part Number: TL-051

Magnehelic Gauge

High accuracy within 2% of full scale. Frictionless Magnehelic® gage movement, it quickly indicates low air or non-corrosive gas pressures (either positive, vacuum or differential). Resists shock, vibration and over-pressures. No manometer fluid to evaporate, freeze or cause toxic or leveling problems.

Part Number: 2020

Pressure Gauge Snubber

Pressure snubber protects gauge from damaging surges and moderates pulsating at the gauge. Pressure snubber 1/4" male x 1/4" female with #54 drill hole.

Part Number: B25-G

Gauge Oil Red for Manometers

1 pint bottle

Freeze point -65°F

Part Number: A103

Pressure Gauge Adapter

Adapter with 1/4" gauge opening for indicating outlet pressure of a first stage regulator. 1/2" MNPT x 1/2" FNPT Adapter.

Part Number: 1494-1

Leak Test

85PC-02

MSCP-TRV

Press Check Adapter

Designed for installation in 1/8" FP threaded opening, the PRESS-CHECK Adapter is the key to testing the gas distribution system without breaking the line. UL approved for use in propane vapor systems.

- Check Valve is UL approved for LPG service.
- Ambient temperature range -400 f to +2120 f.
- Operating pressure of 125# PSIG.
- Closing cap provides additional seal of 125# PSIG and is protected by a tamper resistant cap over.

High Pressure Test Assembly

Provides for easy and accurate high pressure tests that conform with gas check procedures.
HPTK-2 Test assembly w/POL Hose Inlet

Low Pressure Test Kit

Kit includes a pressure gauge reading 0-35" W.C., plastic case and 30" long rubber tubing with bell end.

Part Number: 2434A

Replacement Parts

PART NUMBER	DESCRIPTION
2434A-11	Rubber Hose Tip
MSCP-CONE1-M	Rubber Cone Tip

High Pressure Test Assembly

For air testing of piping systems includes brass test block 3/4" female pipe x air valve and cap, and high pressure gauge.

Part Number: MSCP-HPTA-30

Range: 0-30

Gauge: PSI

High Pressure Test Block

MPOL x FPOL test block with 0-300 PSI gauge and bleeder.

Part Number: 2962

Emergency Response Kit

A complete package in a special toolbox that improves your ability to respond to propane emergencies. It is recommended for placement with key personnel in your company so that emergency response time is kept to a minimum.

Part Number: ERK-1 (Complete Kit)

Digital Manometers

TPI 600 Series

A convenient way for service and utility personnel to isolate difficult pressure troubles on propane and natural gas systems with a versatility that allows you to perform many critical safety checks with a single instrument.

PART NUMBER	INPUT TYPE	UNITS OF PRESSURE	RECORD MIN/MAX
610	Single	Single Unit of Pressure	Yes
620	Dual - Differential	Single Unit of Pressure	Yes

Accessories

PART NO.	DESCRIPTION
A901	Soft carrying case with shoulder strap

Applications

- Adjust appliance regulators
- Set delivery pressure
- Shut in Test
- Furnace pressure switches

Residential Gas Detectors

PART NO.	DETECTS	FEATURES
LP200	Natural Gas, Butane Propane	12 volt plug in
HS80504	Carbon Monoxide, Natural Gas, Propane	Eliminates false alarms, detector is tamper proof, self-diagnostic assures the unit is operating properly, two independent alarms

Digital Multimeters

Digital Clamp Meter

Measures: line and control circuit voltage, current draw of electric circuits, inrush current of motors, relays, and solenoids, and resistance of components. Tests: continuity in circuits and wires.

Part Number: 265

PART NUMBER	DIMENSIONS
120	6 x 3x 2
133	7.75 x 3.75 x 2.25

Combustible Gas Detectors

Part Number HXG-2D

- Meets UL 913 intrinsic safety
- 10 ppm sensitivity
- Instant response
- Electronic tick rate control
- Settable alarm
- Visual and Audible leak indicator
- 16" Gooseneck
- Soft zippered carrying case

Bar Probe Part Number: 28-44

Wohler Gas Sniffer

- Highly sensitive and quick responsive Gas Sniffer
- Additional LED lighting turns on automatically in dark places
- Twelve levels gas concentration, from 0 to 1200 ppm
- Acoustic signal and vibration alarm to display even the smallest leaks

Part Number: GS300

Wohler Digital Manometer

- Easy one button operation
- Extra wide pressure range
- Quick response time
- Switch on - Measure - Finished

Part Number: DM2000

Wohler Combustion Analyzer

- 48 month warranty
- Displays up to 14 measurement readings
- Intuitive to operate via on-screen keyboard
- Multistage filter technology incl. water stop filter

Part Number: 8390

Inspection Mirror, Seal Press, and Pilot Cleaning Pump

2" x 3 1/2" Inspection Mirror

Swivel head allows mirror to be positioned at any angle. Safely inspect relief valves and burners.

Part Number: 72-561

Hand Seal Press

Engraved digits. Maximum 3 digits per die. Required in most states to re-seal registers.

PART NO.	SIZE
HSP	5" Hand Seal Press
MS-8	8" Lead Meter Seal

Dies sold separately

Anode Test

Potential Meter

Performs required test for anodes, in a very simple manner.

Part Number: 4108

Closed Circuit Adapter

Used to make closed circuit tests of thermocouples and thermopiles with suitable millivolt test meters.

Thermocouple Adapter Part Number: 10-038

Anode Test Kit

Includes:

- 6A half cell – reference electrode
- Digital multimeter w/wired probes
- Storage case

Part Number: ATK-1

PART NUMBER	DESCRIPTION
6A	6A Half Cell Reference Electrode
16906	Copper Sulfate
17105	Copper Sulfate Anti-Freeze
T&R50060	Flat tip assembly for 6A
T&R50070	Pointed tip assembly for 6B
T&R50300	Copper sulfate crystals
T&R50404	Shunt .001 OHM orange

Freeze Valve

Used to test for water content.

AT-1000 Freeze Valve with AT-1016 Filter, AT-1011 Screen and AT-1019 Retaining Ring.

Part Number: AT1000

TEST IT Test Kit

Used to test propane deliveries for hydrogen sulfide, ammonia, oil and heavy hydrocarbons. Comes complete with instructions.

Part Number: PTK-1

PTK-1

PART NUMBER	DESCRIPTION
PTK-1	Complete TEST IT Test Kit
5-769-5	Utility Clamp
03-409-10B	Squeeze Bottle
11-838-21	8 oz. Plastic Bottle with Lid
13-5225-01	Litmus Paper, Red (for ammonia)
05-622	Centrifuge Tube
08-562-5B	Graduated Cylinder
T-415	6-1/2" Curved Tweezers
9-65081	Plastic Carrying Case
FP-1	Protective Foam Packaging
EP-1	V2 Sheet, Medium Emery Paper
GW-4	Number 4 Ground Wire
23-173	Monkey Grip Gloves
PTK-IN	TEST IT Instruction Sheet
13-5335-01	Lead Acetate Paper (for hydrogen sulfate)

Pipe Thread & Gasket Sealer

PLS2 Premium Thread Gasket Sealer

PART NO.	DESCRIPTION
PLS2-1/4PT	1/4 pint with brush top
PLS2-1PT	1 pint with brush top

Gasoila Soft Set with Teflon

PART NO.	DESCRIPTION
SS04	1/4 pint with brush top
SS08	1/2 pint with brush top
SS16	1 pint with brush top

Gasoila-NT

One pint with brush top blue, non-Teflon, grit-free sealant. Can be used on all metals.

Part Number: NT16

Free All

PART NO.	DESCRIPTION
FA06	Free All- Industrial strength deep penetrating oil. 6 oz..

Tape II Teflon Tape

PART NO.	DESCRIPTION
TT61	1/2" x 520" teflon thread sealer tape
TT54	3/4" x 520" teflon thread sealer tape
1901D	Tape Teflon 1/2" x 520"
1901E	Tape Teflon 3/4" x 520"
YT71	Tape, Yellow 1/2" x 520"
YT75	Tape, Yellow 1" x 520"
ZT13	Tape Teflon 3/4" x 520"
TT54	Tape Teflon 3/4" x 520"

Sherlock 5-Second Leak Detector

- Ideal for use with pressurized gas system.
- Ultra-sensitive to low pressure, minute leaks. Retains bubbles; bubble size indicates leak rate.
- Safe for use on polyethylene pipe and fittings as outlined in ASTM test D-1693.
- Service temperature range: -10° F to +160° F
- Wettable: fluid stays on metal longer, it can be used on vertical surfaces.

Part Number: 800-LS5

For Extra Cold Applications, use Extra Low Temp good to -55° F.

Part Number: 800-ELS5

PART NO.	SIZE	TYPE
300-L32	1 Pint Empty	Brush Top
800-LS3	1 Pint Empty	Spray Bottle
800-LS5	1 Gallon Low Temp	Jug
800-LS5-55	55 Gallon Low Temp	Drum
800-ELS5	1 Gallon Extra Low Temp	Jug

Manual Propane Flare Tower

PFM-25

PFM-16LPS

- Flare Up to 529 Gallons/HR
- No Electricity Required
- Compact & Portable Design
- Quick & Easy Setup
- Simple to Use
- Great for Emergency Evacuation Situations
- Stable & Sturdy Construction
- Made in the USA

PART NUMBER	DESCRIPTION
PFM-16LPS	1/2" Manual Flare
PFM-25	25' Hose Extension Kit

Gloves and Protective Sprays

Leather Palm Glove

General duty protective leather glove. Tuff stretch design—one size fits all. Packed 12 pairs per case.

Part Number: NO.1

Edmont Raised Finish Monkey Grip Glove

Provides excellent grip for easier, safer handling of wet and dry materials. Tough vinyl coating resists chemicals and abrasion. Comfortable non-woven lining to keep wetness on the outside, warmth and dryness inside. Orange colored, raised finish, large only.

Part Number: 23-173

Winter Tuf-Duk Glove

Same as above, with foam insulated fit and flexibility for non-slip handling of cylinders and for driving. Jersey lined for comfort, vinyl impregnated. Brown palm; yellow back.

Part Number: 31-791T-M (Medium)

Hydrex Gloves

Inner lining helps absorb excess perspiration during prolonged use keeping hands cooler, while significantly reducing hand fatigue. Cut resistant.

Part Number: 11-435-09

Part Number: 11-435-10

Halt! Dog Repellent

Complete with belt clip.

Part Number: HALT

Buy by the case and save!

Twelve 1½ ounce cans per case

Part Number: HALT-CASE

Bee Bopper

Wasp and Hornet Spray.

Part Number: BEEBOPPER

Buy by the case and save!

Twelve 14 ounce cans per case.

Part Number: BEEBOP-CASE

Tub O'Towels

Knocks out paint, ink, grease, tar and other tough messes. Gentle on hands and environmentally friendly.

Part Number: TUB O TOWELS

Fire Extinguishers

Amerex Fire Extinguishers

Multi-Purpose Dry Chemical
ABC Stored Pressure Fire Extinguishers-
For Use On Bobtails And Transports

- Multi-Purpose
- Dry Chemical
- ABC Rated
- All Steel
- Approved For Use On Propane Trucks

Paint and Underground Tank Protection

Brushes

Wood Handle • Bristle Brush

2" Part Number: 603-2

3" Part Number: 603-3

4" Part Number: 603-4

Metal Paint Tray

- Heavy Duty
- Extra Deep
- Ladder Rack Legs

Part Number: 7645

Roller Frames

Heavy duty 5 wire cage frame for more even paint coverage. Plastic handle with threaded pistol grip.

Part Number: 7411

Rollers

9" Synthetic fabric roller with phenolic core for no solvent penetration.

Part Number: 7312-9

- Meets current OSHA & DOT specifications
- Proven performance with tanks
- Superb quality
- Conforms to VOC Regulations

Tank Inspection and Recertification Tools

Methanol Injector

For use in the field on containers suspected of having moisture in them.

- Holds 5 ounces
- Empties in 5-10 strokes
- Check valve prevents backflow of propane pressure.

PART NUMBER	DESCRIPTION
METH-INJ	Methanol Injector W/Soft Hose Handwheel POL

CONTAINER TYPE	MINIMUM VOLUME METHANOL REQUIRED
100LB DOT Cylinder	1/8 pt. (2 fl. ozs.)
420LB DOT Cylinder	1/2 pt. (8 fl. ozs.)
500 gal. tank	5 pts. (2 1/2 qts.)
1000 gal. tank	10 pts. (1 1/4 gal.)
2000 gal. tank	20 pts. (2 1/2 gal.)

* Important - Avoid substitutes - they will not work. The secret of the effectiveness of methanol over all other alcohol is its high affinity for water plus a boiling point lower than all other alcohols, and most important: a boiling point lower than water.

Gravity Methanol Injector

- Easy to Use
- Inexpensive
- 1 Quart Capacity
- Connects to Vapor Equalizing Valve of ASME Tanks

Part Number: I-100

Pit Gauge

For accurate and convenient measuring of cylinder rust pits, gouges and dents as required for D.O.T. visual inspection of gas cylinders. Highly polished stainless steel gauge comes in pocket size leather case.

Fast and easy way to check rust pits.

Model # PG-1

Scribe with bent points .005 & .010

907A	1 1/8"
908	1 1/4"
909	1 7/16"
909A	1 1/2"

OPD Wrench

- Quickens installation and removal of QCC-1 cylinder valves from DOT containers
- Works on all style 1 (QCC-1) valves and fixed handwheel OPDs (mandated for all 5 to 40LB cylinders)
- Bleed orifice safety feature indicates pressure remaining in the cylinder before removing the valve
- Made from tough, durable alloy and forged steel

Part Number: TW-3

Wall Cylinder Vise Model CV-1

- Holds up to an 18" diameter cylinder
- Flexible heavy-duty, non-slip nylon straps prevent damage to cylinders
- Parts tray included
- Ships UPS!
- Minimal floor space needed

Part Number: CV-1

Cylinder Vise Model CVM-200

Holds 12" - 15" diameter sizes with easily adjustable snap-action latching and removable inserts.

Can be mounted on post or wall.

Part Number: CVM-200

Also available:
Optional Mounting Base,
Part Number: CVM 200-S

The Anatomy of a Hannay Hose Reel

- 1 **Bearings:** Weight of spool and hose is supported by bearings.
 - 1a **Back Bearing**
 - 1b **Front Bearing**
- 2 **Disc Rolled:** Edges prevent hose damage and add rigidity to disc. Additional strength is provided by a concentric rib.
- 3 **Drum:** Roll formed steel with full length weld.
- 4 **Tie Rods:** Join discs and drum to form spool. Reinforced with pipe spacers for rigidity and strength.
- 5 **Chain and Sprocket Drive:** Provides smooth positive rewinding on powered reels.
- 6 **Rewind Motor:** Electric rewind motor is shown. Compressed air or hydraulic motors can be used.
- 7 **Hub Assembly:** Includes the fluid hub, the outlet riser and the reel axle. Fluid passes from the swivel joint inlet through the hub assembly, to the hose.
 - 7a **Outlet Riser:** Contoured to match the curve of the reel drum so hose will wrap smoothly.
 - 7b **Fluid Hub**
- 8 **Swivel Joint Inlet:** Permits reel to rotate freely while connected to the fluid source. Joint is not used as a bearing. Straight or 90 degree swivel joints are available for most models. (Flexible connector must be used between swivel joint and inlet piping or warranty will be void.)
- 9 **Brake/Rewind Assembly:** Bevel gear rewind has an adjustable tension brake. Rewind and braking device vary with different models.

General Specifications of Hannay Hose Reels

Construction: Frames, discs and drum are fabricated of heavy gauge steel. Bearings are self aligning. Malleable iron and steel are used for hose reel hub assembly, outlet riser and swivel joints. Stainless steel, aluminum, bronze and other alloys, and special swivel joint packing, can be supplied to meet special requirements.

Finish: Standard finish is oven cured enamel. Finishes other than standard, such as special primers, polished aluminum, unpolished stainless steel and hot dipped galvanized may be specified at extra cost.

Temperatures & Pressures: Standard reel construction will handle most liquids or gases at temperatures ranging from -20 degrees to +400 degrees F (-29 degrees to +204 degrees C). Operating pressures available up to 10,000 psi (695 BAR) depending on the specific reel series. These operating pressures and temperatures are shown on descriptive pages in each product catalog. Reels to operate at pressures and temperatures other than standard are available at extra cost.

Shipping: Reels are shipped completely assembled, ready to install. Installation instructions are supplied with each reel.

Coated Copper Tubing

Copper has proven to be reliable and economical for propane installations for over 30 years. Now take the next step toward safer installations.

Advantages of coated copper tubing:

- Line marked for identification
- Marked for easy measuring
- Easy installation (labor savings)
- Flexible
- Fewer joints/fittings
- One person installation
- Minimal inventory space required
- No power needed to install

EASY TO IDENTIFY

- Permanent yellow polyethylene coating
- Continuous line marking
- Traceable back to origin of manufacturing
- Mill test reports available upon request

EASY TO INSTALL

- No additional training required for installation
- Flexible
- Easy to join
- Compact size
- Requires smaller and fewer tools than steel pipe
- Cleaner than threaded steel pipe

COST EFFICIENT

- Most economical line-marked tubing on the market
- Minimal labor costs due to quick and easy installation
- No on-site sleeving required for underground gas lines

RECYCLABLE

- Copper is fully recyclable

Refrigeration (O.D) Coated Copper Application Low Pressure	
PART NUMBER	DESCRIPTION
CCR-3/8X50	3/8" x 50'
CCR-3/8X100	3/8" x 100'
CCR-1/2X50	1/2" x 50'
CCR-1/2X100	1/2" x 100'
CCR-5/8X50	5/8" x 50'
CCR-5/8X100	5/8" x 100'

TYPE L (I.D.) Coated Copper Application High Pressure (UG)	
PART NUMBER	DESCRIPTION
CCL-1/4X60	1/4" x 60'
CCL-3/8X60	3/8" x 60'
CCL-3/8X100	3/8" x 100'
CCL-1/2X60	1/2" x 60'
CCL-1/2X100	1/2" x 100'
CCL-5/8X60	5/8" x 60'

Pipe Strap - Copper

Part Number: A440-1/2

J Clips for Copper Tubing

PART NUMBER	O.D. TUBE SIZE
MSCP-#1-J-CLIP	3/8" & 1/2" OD
MSCP-#2-J-CLIP	5/8" OD

Tube Talon Holder

PART NUMBER	HOLDER SIZE	O.D. TUBE SIZE
555-1	3/8"	1/2" Copper Tubing
555-2	1/2"	5/8" Copper Tubing
555-3	1/2"	1/2" CSST

PIPES & FITTINGS

However you need to get there – copper, coated copper, CSST or polyethylene pipe – we've got it for you.

Copper Tubing

Copper Refrigeration Tubing

For second stage pressure and indoor applications only. Measured in Outside Diameter (O.D.)

PART NUMBER		O.D.	I.D.	WALL
50 FT COIL	100 FT COIL

TYK-1/2-60	TYK-1/2-100	1/2"	5/8"	0.049

Polyethylene Pipe

Polyethylene Pipe is a safe, economical system of running underground gas line that has been approved since 1979. Plastic Gas Pipe can be joined using mechanical fittings, butt fusion, socket fusion, sidewall fusion or electrofusion and should not be used with pressures exceeding 30 PSI. Pipe is manufactured and rated according to the following guidelines ASTM D 2513, ASTM F 678, ASTM D 3350, ASTM D 1248.

Copper Termination Flange

Transitions the copper tube back to standard pipe, reducing the amount of tubing required for a job and protecting the line from damage.

Part Number: 71900

Electrofusion Systems

Couplings have wide fusion zones and can be re-fused in case of electrical power interruption. The widest range of sizes available.

Call for more information on Electrofusion Systems.

LP Gas Vapor Line Sizing for Polyethylene Tubing

Sizing for vapor between 1st and 2nd stage regulators allowing a pressure drop of 1 PSI at 10 PSI setting.

* Note: The above numbers were calculated by using the Mueller formula (Mueller Co. - Decatur, IL) for high pressure installations of smooth pipe such as plastic, copper, brass, etc. carrying gas at pressures greater than 1 psig.

Easy-to-install Permasert System

1 Cut the tubing so that the end is square.

2 Wipe the tubing with a dry clean cloth & inspect for defects

3 Insert tube and rotate in chamfer tool until tube bottoms out.

4 Mark the stab depth.

5 Stab tubing into the coupling until it bottoms out.

6 Pressure test the finished joint according to your standard operating procedure.

Note: This quick-install image guide is for reference only. Permasert 2.0 couplings require training on the complete installation procedure before installing any Permasert 2.0 product.

TracPipe Gas Piping – CSST

Counterstrike The First Flexible Gas Piping Available to Provide Enhanced Protection From Lightning. CounterStrike is a TracPipe patent-pending CSST innovation that is engineered to significantly decrease the potential for lightning induced damage to fuel gas piping systems.

FGP-CS-500-250

PART NUMBER	SIZE	REEL LENGTH
FGP-CS-375	3/8"	250 ft
FGP-CS-500	1/2"	100 ft / 250 ft
FGP-CS-750	3/4"	100 ft / 250 ft

EHD (Effective Hydraulic Diameter) A relative measure of Flow Capacity; This number is used to compare individual sizes between different manufactures. The higher the EHD number the greater flow capacity of the piping.

Sizing Table for Propane at 2 PSI

Maximum Capacity of Omegaflex Tracpipe™ in Thousands of BTU per Hour Propane Gas

Gas Pressure: 2 PSI Pressure Drop: 1 psi (based on a 1.52 Specific Gravity Gas)

SIZE	(EHD)	10	25	30	40	50	75	80	100	150	200	250	300	400	500

Table does not include effect of pressure drop across the line regulator. If regulator loss exceeds 3/4 PSI (based on 8 inch outlet pressure) Do not use this chart. Pressure drops across a regulator vary with flow rate. FGP-REG-3P has a 3/4 PSI drop at a flow of 161 cubic feet per hour. CAUTION: capacities shown in table may exceed maximum capacity for a selected regulator.

EHD (Effective Hydraulic Diameter) A relative measure of Flow Capacity; This number is used to compare individual sizes between different manufactures. The higher the EHD number the greater flow capacity of the piping

** Ball valve not included

Gas Connectors for Commercial Equipment

Dormont exclusive design is comprised of a corrugated stainless steel hose encased in a stainless steel braid and covered in a thick PVC coating. For moveable applications, a quick disconnect coupling is attached enabling commercial cooking equipment to be easily and safely disconnected for cleaning and service. A restraining device is required for moveable applications.

Twin Stage Regulator

The first stage features a lever arm design that improves both the efficiency and regulation. Combined with the second stage regulator, the overall performance assures even smoother and more continuous flow of gas to all appliances.

SPECIFICATIONS:

- Inlet: 1/4" FPT
- Outlet: 3/8" FPT
- 160,000 BTU Capacity

PART NUMBER	DESCRIPTION
290-GR9950	Vent Over Outlet
299-GR9959	9 O'clock Vent

Automatic Changeover Regulators

Combination automatic changeover two-stage regulator. Suitable for home and mobile homes. Empty containers may be replaced without interruption of gas service.

SPECIFICATIONS:

RegO regulators fit the bill.*

Rubber Pigtails

The flexible thermoplastic hose material used on pigtails and high pressure hoses is rated at 350 lbs working pressure and has a burst rating of 1750 PSI. End fittings are secured in place with proven, four jaw crimped, copper rings. Together they offer an assembly that meets all applicable UL and C.S.A. tests and requirements. All assemblies up to 60 inches in length are dual (UL and CSA Listed).

Bulk Storage Gauges

Rochester Magnetel

The 6340 series Magnetel Liquid Level Gauges are designed to accurately determine the percentage of tank volume in stationary storage applications. Gauges are U.L. listed for LP Gas and NH3 service. These models incorporate a zinc-plated steel counterbalance and a Alinco magnet with head and all other wetted parts made from 300 stainless steel. Gauges include gasket and set of 8 mounting studs and nuts.

PART NUMBER	DESCRIPTION
R6342-11-108	8" Dial, End Mount 108" Tank
6342-11-130	8" Dial, End Mount 130" Tank
6342-11-84	8" Dial, End Mount 84" Tank
22-29	2 1/2" M.NPT. Adapter*
5305	2" M.NPT Adapter
R0044-0403	Nut for Magnetel Bolt
R0056-00404	1/2" Magnetel Mounting Bolt
R0003-00005	8" Replacement Dial Glass
R0015-00010	Gasket, 8" Glass (2 required)
R0093-00403	8" Dial Chamber Mounting Bracket
R0015-00019	Spiral Wound Gasket

Rochester Rough Rider

The M6300 Rough Rider series gauges are designed to withstand the vibration and shock of mobile service. They provide unsurpassed service life in over-the-road transport of LP Gas and NH3 liquids. The M6300 provides continuous reading of tank contents in percentage of tank capacity. They include a zinc-plated steel counterbalance and an Alinco magnet with all other wetted parts made of 300 stainless steel.

PART NUMBER	DESCRIPTION
M6339-11-72	4" Dial, 72" Truck Tank
M6339-11-79	4" Dial, 79" Truck Tank
5-1262	Replacement 4" Dial Chamber
22-29	2 1/2" M.NPT. Adapter
5305	2" M.NPT Adapter*
R009300001	4" Dial Chamber Mounting Bracket
R0015-00451	Gasket, 4" Glass
R0015-00019	Spiral Wound Gasket
R0040-00413	4" Dial Screw

Squibb Master Visible

These float gauges feature a large 10" hermetically sealed dial face with a chrome retainer. Extremely heavy duty construction for storage tanks. Other sizes available. Gauges include spiroallic gasket and 8 mounting bolts.

PART NUMBER	DESCRIPTION
MD360C	10" Dial End Mount 108" Tank
MD430B	10" Dial End Mount 130" Tank
130219	Mounting Bolts
5305	2" M.NPT Adapter*
130035	Replacement 10" Dial
130040	Spiroallic Gasket
130201	10" Replacement Glass

* Requires specially ordered gauge with 2" dial float bulb.

The Roadmaster from Squibb Visible

Uniquely designed to withstand the tough shock and vibration associated with mobile service. Incorporates a special spring designed to substantially reduce stress on conventional float type gauges on mobile applications. 4" easy viewing dial. Ideal for new or replacement installations.

PART NUMBER	DESCRIPTION
RM1833	72" Diameter Mobile Tank
RM2438	84" Diameter Mobile Tank

Underground Storage Tank Gauges Available

Red Dragon Torches

Kit contains torch, hose, POL fitting, needle valve and spark lighter. Roofing and hand torch kits also contain regulator and gauge.

KIT NUMBER	TORCH ONLY	BTU/HR	OVERALL LENGTH	TYPE
VT2-23C	-	100,000	27 1/2"	Vapor

Nu-Way Torches

Cast Iron Head, Pipe Handle Adjusting Valve

PART NUMBER	BTU/HR	LENGTH
5-V	500,000	24"

*Whatever the job is we've got the torch to handle it.
From 26,000 BTUs to a whopping 500,000 BTUs.*

Manchester Propane Handburners

PART NUMBER	DESCRIPTION
8012	8 ft weed burning torch (similar design to 8061)
8061*	3 ft torch, hose, POL power jet 750,000 BTU
8062*	2 ft torch, hose, POL handi-boy 500,000 BTU
8069	Replacement handle

* Bubble pack kit

Gas Match Lighters

GM-3X

15" flexible nozzle bends into any shape, never blows out.
Part Number: GM-3X

GM-3

Long continuous spark, battery operated. Refillable.
Part Number: GM-3

GM-4

Medium refillable, white.
Part Number: GM-4

Multi-Fill Butane

Part Number: REFILL
2.75 oz.

OUTDOOR PRODUCTS

Everybody needs a Buddy. The Mr. Buddy heater uses revolutionary new heating technology. Check it out!

Mr. Heater / Propane Camping Heater

Portable Buddy

Instant Heat. Anytime! Anywhere!

- Safe for indoor and outdoor use
- 4,000 and 9,000 BTUs
- Heats up to 250 square feet
- ODS system
- Uses 1lb. disposable cylinder (not included) 3 to 6 hours
- AGA approved
- Optional hose with connector for use on 20lb. cylinder

Part Number: MH9B

Part Number: MH18B 18,000 BTU

Buddy FLEX® Heater

We updated our design to feature optimized wind barrier and

- pilot shield for maximum protection
- Safe for indoor and outdoor use
- Indoor Safe Radiant Heater
- 11,000 BTU Omni-directional Mesh Burner
- Integrated Heater and Accessory Controls
- Quick Connect Accessory Rail system
- Patented Thermal Shut-down System
- Integrated storage compartments

Part Number: MHBBFLEX

Mr. Heater / Propane Camping Accessories

High Pressure Regulator with POL

Most commonly used on torches, fish cookers, smokers or other high pressure appliances.

Part Number: F273719

90 Degree Elbow (POL x 1"-20 Throwaway Cylinder Male)

Allows appliances designed for use on throwaway cylinder.

Part Number: F273760

LP Gas Cylinder Adapter with Handwheel

Allows appliances designed for use on throwaway cylinders, and with a hose/regulator assembly.

LP Gas Cylinder Adapter without Handwheel

Part Number: F276132

LP Gas Adapter Tee

Conveniently use your camper/trailer propane supply for lanterns, or tabletop barbecue at parks, campsites, rest stops, etc.

Part Number: F273751

Propane Cylinder "Y" with Handwheel (2 1" - 20 Outlets)

Allows two appliances to be hooked up to a 20lb cylinder.

Part Number: F271715

30" Distribution/Lantern Post (3 1" - 20 Outlets)

Use with F273710 - 11 hose assembly. Hook up 3 appliances to a single refillable 20lb propane cylinder.

Part Number: FL271731

Mr. Heater / Propane Camping Accessories

Post Adapter Valve

Allows use of 9/16" left hand hose assembly.

Part Number: F271725

Brass Cap

Fits all distribution posts, adapter tees, etc.; keeps dust and dirt from inside fittings.

Part Number: F276400

Propane "Y" Female Adapter with Handwheel (2-Female POLs x POL)

Allows two appliances to be hooked up to a bulk cylinder. (Use with F273701-02.)

Part Number: F271735

TankFoot Tank Stabilizer

Fits 20lb, 30lb, and 40lb tanks; reduces risk of tipping cylinder while transporting in your RV, pick-up, car etc.

Part Number: TF-01

Low Pressure Regulator with POL (straight) (POL Inlet x 3/8" FP Outlet)

11" WC low pressure regulator will operate barbecue grills and low pressure appliances.

Part Number: F276136

outlet

Low Pressure Regulator with POL (90 degrees)

11" WC low pressure regulator designed with 90 degree angle; will operate all standard barbecue grills and appliances.

Part Number: F273759

12' Natural Gas Patio Hose Assembly (3/8" Female Pipe Thread x 3/8" Male Flare Quick Connect/ Disconnect with Dust Plug and Cap)

Most commonly used on connecting natural gas barbecue grills attached to decks or patios to the supply from a house.

Part Number: F273720

22" Universal Replacement Barbecue Hose and Regulator Assembly (POL x 3/8" Female Flare)

Fits most propane gas grills.

Part Number: F271160

As above with Type 1 QCC connection instead of POL

Part Number: F271161

5' Hose Assembly (3/8" Female Pipe x 3/8" Male Pipe Thread)

Common assembly hose for hooking up low pressure appliances.

Part Number: F276124

24" Universal Barbecue Hose Assembly (3/8" Male Pipe and 3/8" Female Flare)

Fits most standard barbecue gas grills.

Part Number: F273716

5' Hose Assembly (1/4" Male Pipe Thread x 1/4" Female Pipe Thread)

Most commonly used on weed burner, torch, fish cooker assembly.

Part Number: F273717

5' Propane Hose Assembly (1/4" Male Pipe Thread x 3/8" Female Flare)

Replaces most hose assemblies between regulator and fish cooker/smoker, torches, or other appliances.

Part Number: F273707

Hose Assembly (Soft Nose Excess Flow POL with Handwheel x Swivel 1"-20 Male Throwing Cylinder Adapter)

Mr. Heater's most popular hose; permits the use of larger propane cylinders on appliances designed for use with small disposable cylinders; convenient hand tightened swivel both ends.

5' Hose Assembly Part Number: F273701

12' Hose Assembly Part Number: F273702

Propane Hose/Regulator Assembly (Regulator with POL and Handwheel x 3/8" Female Flair)

Connects low pressure portable propane appliances to a 20 lb. cylinder.

5' - Part Number: F273071

12' - Part Number: F273072

Hose Assembly (Swivel 1"-20 Male Throwing Cylinder Thread x Swivel 1"-20 Female Throwing Cylinder Thread)

Use with most distribution posts or "T" or "Y" connectors as well as 1 lb disposable cylinders.

5' - Part Number: F273710

12' - Part Number: F273711

5' Appliance Extension Hose (9/16" - 18LH Thread, Female Fittings both ends)

Combine with Mr. Heater (F276154) nipple to make longer lengths;

use with F276129, F276130 to assemble F276122-23.

Part Number: F276148

15' Propane Appliance Extension Hose Assembly (3/8" Male Pipe Thread x 3/8" Female Pipe Thread) (3/8" ID High Pressure Hose)

Use as an extension hose for portable propane appliances.

Part Number: F271470

As above with 1/4" Male Pipe Thread x 1/4" Female Pipe Thread (1/4" ID High Pressure Hose) - **Part Number: F271474**

OUTDOOR PRODUCTS

Don't forget to check our Heater and Hearth catalog for more items to enhance your summer.

Mr. Heater Brass Fittings and Accessories

POL with "O" Ring Seal without Handwheel (Brass POL Nut x 1/4" Male Pipe)
Fits all refillable propane cylinders and appliances with 1/4" female pipe inlet.
Part Number: F276139
As above with handwheel –
Part Number: F273756

1" - 20 Female Throwaway Cylinder Adapter x 1/4" Male Pipe Thread
Part Number: F273754

1" - 20 Male Throwaway Cylinder Adapter x 1/4" Male Pipe Thread
Part Number: F273755

9/16" - 18 Left Hand POL With Restricted Flow with Handwheel
Part Number: F273757
As above without handwheel (wrench tighten)
Part Number: F276129

1" - 20 Male Throwaway Cylinder Adapter x 1/4" Female Pipe Thread
Part Number: F276140

Propane "Steak Saver" Adapter (Female Throwaway Cylinder Thread x Female P.O.L. and QCC-1)
Most commonly used with 1 lb. bottles to grills or distribution posts to grills.
Part Number: F276171

9/16" - 18 Left Hand Male Fittings
1/4" Male Pipe x 9/16" - 18 Left Hand Male
Part Number: F276152

Appliance End Fitting (Coupling Nut x 1/4" Male Pipe Thread)
For type 1 (QCC-1) gas grill systems. For appliances with 80,000 BTUs or less.
Part Number: F276495

3/8" Male Pipe x 9/16" - 18 Left Hand Male
Part Number: F276153

9/16" - 18 Left Hand Male Both Ends Male x 9/16"
Part Number: F276154

Quick Connectors

Quick Connector (1/4" Female Pipe x 1/4" Excess Flow Male Pipe)
Use with F276134, F276139, and F276140. CSA certified; UL listed.
Part Number: F276186

Cylinder Fill Plug - Gas Mate II
Allows filling of cylinder with quick connect (Gas Mate II F276330) kit in use. Please note: most LP filling stations have this plug.
Part Number: F276329

Quick Connector (3/8" Female Pipe x 3/8" Male Pipe)
CSA certified; UL listed.
Part Number: F276187

Gas Mate II "Quick Connect" Kit (POL x Connection) (1/4" x plug)
Eliminates wrenches; fits on all refillable propane cylinders; provides plug in/plug out use of appliances such as torches, heaters, cookers, etc.
Part Number: F276330

Propane or Natural Gas 1/4" Quick Connector with Shutoff Valve and Excess Flow Plug
(1/4" Male Pipe Thread x 1/4" Female Pipe Thread)
CSA certified; UL Approved.
Part Number: F276181

Gas Mate II "Quick Connect" Socket (only) (POL x Quick Connect)
Quick connect for those spare refillable cylinders. See F276330 description above.
Part Number: F276334

Propane or Natural Gas Connector (1/4" Male Pipe Thread x 1/4" Female Pipe Thread)
Part Number: F276190

Propane or Natural Gas Mate II Male Full Flow Plug (1/4" Male Pipe Thread x Male Plug)
For all appliances and all BTUs or high pressure appliances. Can be used with F276334 or can replace excess flow plug in F276186 and F276330 kits.
Part Number: F276281

Propane or Natural Gas Male Excess Flow Plug
(1/4" Male Pipe Thread x Male Plug Quick Connect Fitting) for appliances 80,000 BTUs or less. For use with F276334. CSA certified; UL Approved
Part Number: F276328

Mr. Heater Standard Replacement Parts

Safety Shutoff With orifice for all Mr. Heaters. **Part Number: F273116**

12.5" Thermocouple Lead Fits most Mr. Heater models. **Part Number: F273117**

Grid Screen Kit For most Mr. Heaters. **Part Number: F273164**

Hi-Med-Lo Regulator and Soft Nose Tank Union Assembly For MH12T, MH24T, and MH42T. **Part Number: F273606**

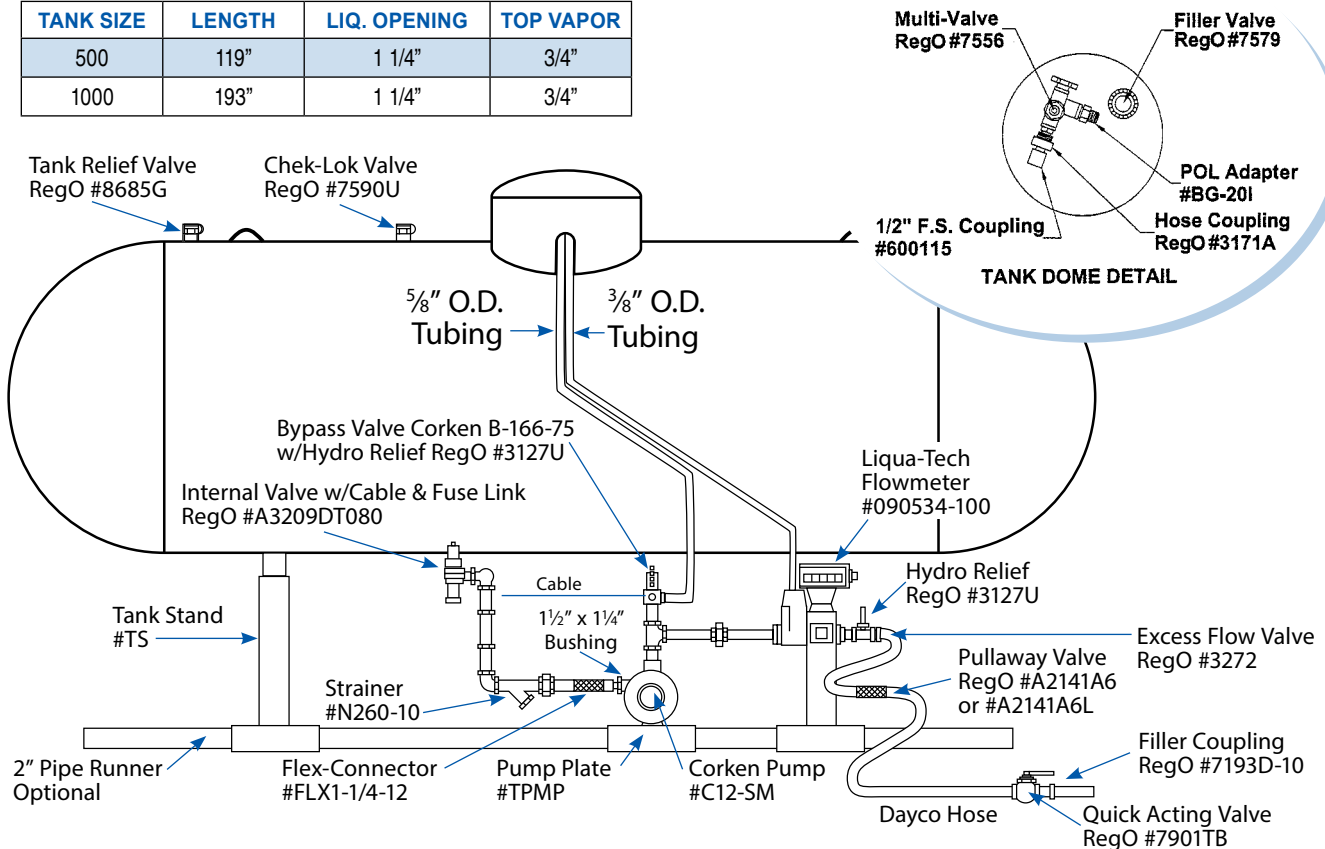

Hi-Med-Lo Regulator For MH12, MH12C. **Part Number: F273607**

Plastic Stand For 16.4 oz. and 14.3 oz. disposable cylinders. **Part Number: F275217**

Pump Station Tank Set Up

Tanks for Pump Stations

TANK SIZE	LENGTH	LIQ. OPENING	TOP VAPOR
500	119"	1 1/4"	3/4"
1000	193"	1 1/4"	3/4"

General Information for Pumping Station Design

1. Choose the proper size tank for the operation, with a 1000 gallon tank for a large industrial motor fueling or a 500 gallon tank for a small 20 LB. refilling.
2. Always use a tank with a bottom withdrawal, preferably a new one. If a used tank is to be used, remove as many heavy ends as possible.
3. Size the pump to the operation. Try to consider future expansion. If a meter is to be used, be sure to use a large enough pump, such as a Corken C12 or larger C13 or C14.
4. Couple the pump to an external by-pass, DO NOT rely on an internal by-pass on the pump.
5. If a meter is to be used be sure it is designed for the operation. Use Liqua-Tech LPM102 or Liquid Controls MA4.
6. Piping should be the same size as your pumps and meters, never smaller. Schedule 80 pipe and Type K copper tubing is required.
7. Safety is a major consideration. Be sure a fire extinguisher and proper warnings and decals are used.

Call or contact your Sales Representative at Tarantin Industries for further help in designing the best possible system for your operation.

To convert to gallons multiply cubic feet by the lbs factor, and then divide the result by 36.28

Measuring Tank-to-Soil Cathodic Protection Potentials On Propane Tanks

Equipment: Digital Voltmeter, Test leads, Reference Electrode (Copper/Copper Sulfate half cell)

STEP 1:

Using a digital voltmeter select the 2 volt DC scale, Contact red test lead to the tank test point or an uncoated metallic area of the tank, preferably to the uncoated fill pipe. (Do not connect to shroud.) Note: If using a two-input analog meter, black lead will be connected to tank.

STEP 2:

Contact the black test lead from the meter to a charged reference electrode. (see charging electrode below) Note: If using a two-input analog meter, contact red lead to reference electrode.

STEP 3:

Remove protective cap from porous plug at bottom end of electrode. Place porous plug end into native earth directly above buried tank. Moisten soil with water or dig plug into soil if difficulty is encountered obtaining a reading.

STEP 4:

Observe meter reading and record. Reading should be at least -.850v or above. For other applicable criteria refer to NACE Standards RP0285-95 and RP0169-96, Corrosion Control of Underground Storage Tank Systems and Control of External Corrosion on Underground or Submerged Metallic Piping Systems.

Note: It is recognized through NACE that all readings be recorded as negative.

Charging Reference Electrode:

STEP 1:

Unscrew and remove porous plug end of new reference electrode. Add deionized or distilled water to the copper sulfate crystals, filling electrode completely. The solution will turn blue in color and there should always be excess crystals at the bottom of the tube. DO NOT USE TAP WATER.

STEP 2:

Replace porous plug end of electrode and place in an upright position so that the porous plug end is facing in the down position and let stand for 15 minutes before use. This will allow the porous plug to become completely saturated before use. Caution: Do not allow electrode to contact oil, road salts, or other substances that may contaminate the solution by absorption through porous plug.

Do not allow electrode to freeze.

DISTANCE: 20 feet
If copper piping is chosen see "Copper Piping" for size & part number

Piping & Tubing Sizing Instructions

This method will assure the selection of the correct sizes of piping and tubing for LP Gas vapor systems. Piping between first and second stage regulators is considered, as well as low pressure (inches water column) piping between second stage, single stage, or integral twin stage regulators and appliances.

INSTRUCTIONS:

- Determine the total gas demand for the system by adding up the BTU/hr input from the appliance nameplates and adding demand as appropriate for future appliances.
- Second stage or integral twin stage piping:
 - Measure length of piping required from outlet of regulator to the appliance furthest away. No other length is necessary to do the sizing.
 - Make a simple sketch of the piping, as shown.
 - Determine the capacity to be handled by each section of piping. For example, the capacity of the line between A & B must handle the total demand of appliances A, B, & C; the capacity of the line from c to d must handle only appliance B, etc.
 - Select proper size of tubing or pipe for each

section of piping, using values in BTU/hr for the length determined from step #2-A. If exact length is not on chart, use next longer length. Do not use any other length for this purpose! Simply select the size that shows at least as much capacity as needed for each piping section.

- For piping between first and second stage regulators
 - For a system with only one second stage regulator, measure length of piping required between outlet of first stage and inlet of second stage regulators. Select piping or tubing required.
 - For systems with multiple second stage regulators, measure length of piping required to reach the second stage regulator that is furthest away. Make a simple sketch, and size each leg of piping using the table using values shown in column corresponding to the length as measured above, same as when handling second stage piping.

See Piping & Tubing Selection Guide Poster For Examples and Reference Tables or Rego's LP-GAS Serviceman's Manual L-545

Then Choose Your Pigtails, Nuts, Fittings & Risers

PIGTAILS:

TYPE	SIZE	PART #
1/4" x POL	3/8" tube x 12"	913JS12
1/4" x POL	1/4" tube x 12"	912JS12

TABLE 3

See Rego's LP-GAS Serviceman's Manual L-545 for Examples & Reference Tables

PIPING AND TUBING Quick Reference Guide

Gas piping and regulator installation should be done by a qualified technician. Improper installation can cause property damage and/or personal injury can occur.

Example 1: Determine the sizes of piping or tubing required for the twin-stage LP-Gas installation shown:

Total piping length = 84 ft (use Table 3 @ 90 ft)
 From a to b, demand = 38,000 + 35,000 + 35,000 = 108,000 BTU/hr; use 1" pipe
 From b to c, demand = 38,000 + 35,000 = 73,000 BTU/hr; use 1/2" pipe or 3/4" tubing
 From c to d, demand = 35,000 BTU/hr; use 1/2" pipe or 5/8" tubing
 From c to e, demand = 38,000 BTU/hr; use 1/2" pipe or 5/8" tubing
 From b to f, demand = 30,000 BTU/hr; use 1/2" pipe or 1/2" tubing

Example 2: Determine the sizes of piping or tubing required for the two-stage LP-Gas installation shown:
Total first stage piping length = 26 feet; first stage regulator setting is 10 PSIG (use Table 1 or 2 @ 30 ft)
 From aa to a, demand = 338,000 BTU/hr; use 1 1/2" pipe, 1/2" tubing, or 1/2" T plastic pipe.

Total second stage piping length = 58 feet (use Table 3 @ 60 ft)
 From a to b, demand = 338,000 BTU/hr; use 1" pipe
 From b to c, demand = 138,000 BTU/hr; use 3/4" pipe or 7/8" tubing
 From c to d, demand = 100,000 BTU/hr; use 1/2" pipe or 3/4" tubing
 From d to e, demand = 35,000 BTU/hr; use 1/2" pipe or 1/2" tubing
 From b to f, demand = 200,000 BTU/hr; use 3/4" pipe or 7/8" tubing
 From c to g, demand = 38,000 BTU/hr; use 1/2" pipe or 1/2" tubing
 From d to h, demand = 65,000 BTU/hr; use 1/2" pipe or 5/8" tubing

*Total length of piping from outlet of first stage regulator to inlet of second stage regulator (or to inlet of second stage regulator furthest away).

Notes: 1) To allow 2 PSIG pressure drop, multiply total gas demand by .707, and use capacities from table.

2) For different first stage pressures, multiply total gas demand by the following factors, and use capacities from table.

Ex: 1,000,000 BTU load at 5 PSI: 1,000,000 (1.2) = 1,200,000 BTU then use chart bases on 1,200,000 BTU

Quick Reference Guide For Perfection

Permasert® Polyethylene Mechanical Fittings and Risers

Make sure you are thoroughly trained before you attempt any regulator installations. Improper conditions or procedures can cause accidents resulting in property damage and personal injury.

Polyethylene piping systems shall be limited to: 1) Vapor service not exceeding 30 psig 2) Installation outdoors and underground with a minimum of 18" of cover, except the cover may be reduced to 12", if external damage to the pipe is not likely to result. Check your local codes.

TWIN STAGE REGULATOR

Quick Reference Guide For **REGO** MASTER DISTRIBUTOR Regulators

Make sure you are thoroughly trained before you attempt any regulator installation or maintenance. Improper conditions or procedures can cause accidents resulting in property damage and personal injury.

BTU Load

100,000 btu/hr.

DISTANCE: 10 feet
PIPE SIZE: 1/2" CTS
Poly pipe or copper tubing @ 11" water column regulator set pressure

PIPE SIZE: 5/8" copper tubing @ 11" water column regulator set pressure

PIPE SIZE: 3/4" IPS Poly pipe @ 11" water column regulator set pressure

DISTANCE: 35 feet

DISTANCE: 100 feet

If copper piping is chosen see "Copper Piping" for size & part number

REGULATOR:

LV404B39
FPOL x 1/2 MPT

200,000 btu/hr.

DISTANCE: 10 feet
PIPE SIZE: 5/8" copper tubing @ 11" water column regulator set pressure

PIPE SIZE: 3/4" IPS Poly pipe @ 11" water column regulator set pressure

DISTANCE: 50 feet

If copper piping is chosen see "Copper Piping" for size & part number

REGULATOR:

LV404B39
FPOL x 1/2 MPT

300,000 btu/hr.

DISTANCE: 30 feet
PIPE SIZE: 3/4" IPS Poly pipe @ 11" water column regulator set pressure

PIPE SIZE: 1" IPS Poly pipe @ 11" water column regulator set pressure

DISTANCE: 70 feet

If copper piping is chosen see "Copper Piping" for size & part number

REGULATOR:

LV404B96
FPOL x 3/4 MPT

400,000 btu/hr.

DISTANCE: 20 feet
PIPE SIZE: 3/4" IPS Poly pipe @ 11" water column regulator set pressure

PIPE SIZE: 1" IPS Poly pipe @ 11" water column regulator set pressure

DISTANCE: 20 feet

If copper piping is chosen see "Copper Piping" for size & part number

REGULATOR:

LV404B96
FPOL x 3/4 MPT

Piping & Tubing Sizing Instructions

This method will assure the selection of the correct sizes of piping and tubing for LP gas vapor systems. Piping between first and second stage regulators is considered, as well as low pressure (inches water column) piping between second stage, single stage, or integral twin stage regulators and appliances.

INSTRUCTIONS:

- Determine the total gas demand for the system by adding up the BTU/hr input from the appliance nameplates and adding demand as appropriate for future appliances.
- Second stage or integral twin stage piping:
 - Measure length of piping required from outlet of regulator to the appliance furthest away. No other length is necessary to do the sizing.
 - Make a simple sketch of the piping, as shown.
 - Determine the capacity to be handled by each section of piping. For example, the capacity of the line between A & B must handle the total demand of appliances A, B, & C; the capacity of the line from c to d must handle only appliance B, etc.
 - Select proper size of tubing or pipe for each

section of piping, using values in BTU/hr for the length determined from step #2-A. If exact length is not on chart, use next longer length. Do not use any other length for this purpose! Simply select the size that shows at least as much capacity as needed for each piping section.

- For piping between first and second stage regulators

A. For a system with only one second stage regulator, measure length of piping required between outlet of first stage and inlet of second stage regulators. Select piping or tubing required.

B. For systems with multiple second stage regulators, measure length of piping required to reach the second stage regulator that is furthest away. Make a simple sketch, and size each leg of piping using the table using values shown in column corresponding to the length as measured above, same as when handling second stage piping.

See Piping & Tubing Selection Guide Poster For Examples and Reference Tables or Rego's LP-GAS Serviceman's Manual L-545

See Rego's LP-GAS Serviceman's Manual L-545 for Examples & Reference Tables

Then Choose Your Pigtails, Nuts, Fittings & Risers

PIGTAILS:

TYPE	SIZE	PART #

Filler Valve Repair Kits:
 For L7579: L7579-80 Contains: Gaskets, seat disc and retainer assembly & spring.
 For L7647: L7647-80 Filler Valve Washers Pkg. of 25 A2697-20R

Service Valve Repair Kits:
 For G8475RL: 19104-50 Contains: MultiBonnet assembly, handwheel, nameplate, and self-tapping screw.
 Prior to 1962: 8100-50 Contains: Bonnet assembly.
 For 1370, 1480 Series, 2593/K, 2594/K Series: 3100-81K Contains: Bonnet and stem assembly

Domestic Tank Gauges

HOW TO ORDER A GAUGE:

- Determine Tank Type: Above Ground Under Ground
- Determine Gauge Head Type:

- JR - 4 bolt SR - 4 bolt 1-1/4" Thread 1" Thread
- A = 2-1/32 A = 2-1/2

- Determine Tank Diameter: D = _____"
- From Tank Data Plate or Measure Circumference (in inches) and divide by 3.14

- Determine Riser Height: H = _____"
- Note: Riser height is the distance, in inches, from tank surface to top of mounting flange or coupling for gauge.

- Determine Mounting Position:
- Top Mount Angle Mount
 Side Mount End Mount

Note: Pivot point of float must be at center line of tank.

OR BUILD YOUR OWN WITH THE NEW R3G ADJUSTABLE LIQUID LEVEL GAUGE

in Junior & Senior Sizes:

- Select the Gauge Support Assembly
 - Select a Float:
- Common Junior & Senior Float Assemblies - Top Mount

3. Assembly Instructions: Located to the right of the gauge OR the KIT Option:

Part #6287-00001K
 Includes: 1 Support Assembly (Jr. 4-Bolt) and 4 Float Assemblies to fit one 24", 30", 32", or 37.5" above ground tank.

VAPORIZER INSTALLATION

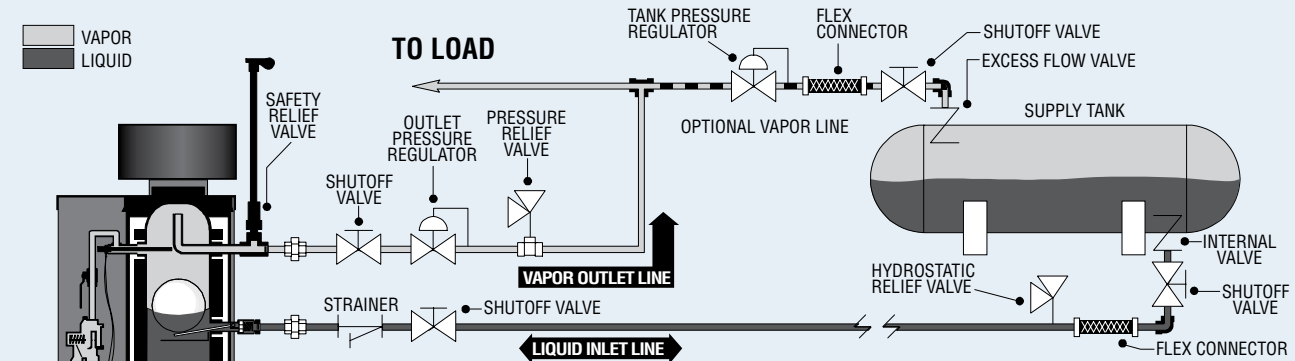

(front side)

Quick Reference Guide For Vaporizers

Make sure you are thoroughly trained before you attempt any vaporizer installations. Improper conditions or procedures can cause accidents resulting in property damage and personal injury.

ALWAYS FOLLOW ORIGINAL EQUIPMENT MANUFACTURER'S GUIDELINES.

Typical Installation - Principal Features and Operating Characteristics

NOTES:

1. Equipment, piping and installation must be in accordance with provisions of NFPA58, and all applicable state, provincial and local codes.
2. Liquid pump may be required to provide sufficient pressure to inlet of vaporizer during conditions of low tank pressure.
3. Outlet pressure regulator should be no more than 24 inches from vaporizer outlet and located at or above centerline of vaporizer outlet.
4. Set tank pressure regulator 2 PSI lower than outlet pressure regulator.
5. Do not install a separator, dripleg or other liquid trap upstream of outlet pressure regulator.
6. Regulator outlet must be adjusted to a pressure below the vapor pressure of the saturated LP-Gas at lowest operating temperature or vapor may reliquefy in downstream piping.
7. Liquid piping system must allow for occasional reverse flow toward supply tank to prevent excessive pressures during operation.
8. Use proper excess flow for piping size transitions.

Why Use a Vaporizer?

- Pressure in the tank drops too low during cold weather.
- Storage is not big enough to supply the load under all conditions.
- Space restrictions do not allow for installations of additional tanks.
- Regulations will not allow a big enough tank or enough storage to handle the load with natural vaporization.
- Having a vaporizer eliminates recondensation of vapor to liquid in the supply lines.
- The storage tanks do not need to be kept 60-75% full during cold weather.

Vaporizer Liquid Line Sizing

GPH	DISTANCE - FROM STORAGE TO VAPORIZER, IN FEET					
	25'	50'	75'	100'	150'	200'
50	3/4"	3/4"	3/4"	3/4"	3/4"	3/4"
80	3/4"	3/4"	3/4"	3/4"	3/4"	3/4"
120	3/4"	3/4"	3/4"	3/4"	3/4"	3/4"
200	1"	1"	1"	1"	1"	1"
400	1"	1"	1"	1 1/4"	1 1/4"	1 1/4"
600	1"	1 1/4"	1 1/4"	1 1/4"	1 1/4"	1 1/2"
800	1 1/4"	1 1/4"	1 1/4"	1 1/4"	1 1/2"	1 1/2"
1000	1 1/4"	1 1/4"	1 1/2"	1 1/2"	1 1/2"	1 1/2"

1. Equivalent pipe lengths must be added for restrictions such as pipe fittings and valves, then added to total feet of pipe
 2. Chart is based on a pressure drop of 1 PSI
 3. Consult engineering for larger vaporizers or longer pipe runs

VAPORIZER INSTALLATION

(back side)

Quick Reference Guide For Vaporizers

Make sure you are thoroughly trained before you attempt any vaporizer installations. Improper conditions or procedures can cause accidents resulting in property damage and personal injury.

REGULATOR INSTALLATION GUIDELINES

RECOMMENDED INSTALLATION

NOT RECOMMENDED

No isolation valve or pressure gauges.

NOT RECOMMENDED

Regulator lower than vaporizer outlet.

NOT RECOMMENDED

Regulator too far from vaporizer

DRIP LEG INSTALLATION GUIDELINES

RECOMMENDED CONFIGURATION

Drip leg installed on low pressure side.

NOT RECOMMENDED

Not ideal configuration of drip leg.

NOT RECOMMENDED

Vapor will recondense at no flow condition

ONE 40/40H VAPORIZER IS EQUAL TO ...

MY TRUCK WON'T PUMP!

This troubleshooting flow chart is provided as a condensed collection of various manufacturers' instructions. Use of this flow chart should NOT replace any specific warnings or installation and operation instructions provided from any manufacturer of equipment utilized on your truck. Make sure you are properly and thoroughly trained before attempting any repair, maintenance, or diagnostics. Perform any troubleshooting, repairs, or installations in accordance with each specific manufacturer's installation and operation instructions and procedures including your company's safety policy. Improper conditions or procedures can cause accidents resulting in property damage and personal injury.

WARNING: Before disassembly of any piping, hoses, or component connections, ensure all tank, piping, and equipment internal pressures have been purged of any pressure. Pressure must be at 00 (zero) PSI. Close all appropriate liquid and vapor lines between components and liquid or gas pressure sources, such as cargo tank, supply lines and discharge lines. Ensure that all sections of the tank, supply/discharge lines, and components (including pumps and meters) are purged of any pressure. Refer to each manufacturer's instructions for proper procedures. All activities must comply with NFPA 58, DOT, and all authorities having jurisdiction.

MY TRUCK WON'T PUMP!

MY TRUCK WON'T PUMP

USE EXTREME CARE AT ALL TIMES WHEN WORKING AROUND YOUR VEHICLE!

Watch out for drive shafts and moving parts. It is common knowledge that serious injury can result if any part of one's body or clothing is caught in moving machinery.

If you manually open the Flomatic® valve, you are responsible for safely unloading the liquid and closing the valve when you're through. If this procedure is being followed, under no circumstances must the valve be left unattended. The valve must never be permanently held in the open position.

*Tanks equipped with obsolete 8484 & 8484A series valve can be retained in service. Please call your Tarantin for information.

Seal cap made of tough, resilient molded plastic. Protects threads and internal working parts. Caps are designed to contain normal tank pressures, and must be kept on valves at all times.

Long-wearing gasket permits handtight connection of cap and hose coupling

Safety groove is designed to shear below the ACME thread, leaving the valve seats closed and unaffected if the delivery truck pulls away with the hose connected.

Seat disc of special synthetic composition is extra thick for longer life.

Valve guide is precision machined to assure positive seal

Exclusive swing-away lower back check valve for extra fast filling is provided on Models 6579 and 6587. Differs from conventional design by swiveling to a vertical position when opened.

Seal cap made of tough, resilient molded plastic. Protects threads and internal working parts. Caps are designed to contain normal tank pressures, and must be kept on valves at all times.

Long-wearing gasket permits hand-tight connection of cap and hose coupling.

Seat disc of special synthetic composition is extra thick for longer life.

Valve guide is precision machined to assure positive seal.

	19101-50	Bonnet; stem and seat disc assembly; small handwheel; self-tapping screw

Design Features of the MultiBonnet®

Features & Benefits

The MultiBonnet® is designed to allow quick and easy repair of bonnet packings in certain Multivalves® and service valves on active propane systems. It allows you to repair valve bonnet stem o-ring leaks in minutes, without interrupting gas service to your customers.

- Eliminates the need to evacuate tanks or cylinders to repair the MultiBonnet® packing.
- Two section design allows repair of MultiBonnet® assemblies on active propane systems without interruption in gas service or shutting off appliances downstream. This helps to prevent time consuming relighting of pilots, special appointments, and call backs.
- Cost of replacing the MultiBonnet® packing is only 1/3 as much as replacing a complete bonnet assembly—not including time cost savings, which can be substantial.
- Available on certain new Multivalves® and service valves as well as repair assemblies for many existing Rego® valves.
- UL listed as a component of valve assembly.

Here's How The MultiBonnet® Works

- When the valve is fully open, only the lower stem will rise and backseat against the teflon washer which isolates the upper packing.
- This allows you to remove the upper packing nut, which contains the o-rings, and replace it while the valve is fully open and gas service not interrupted.

Q. What valves can you use Multibonnet® on as a replacement?

A. Any valve that has the letter "R" suffix designation and the following:
6532A 6533A 6542A 6543A 7556VR G8475V
G8475W 8555D 8593A 9101C 9101D 9300Y
