FAKRA CONNECTORS AND CABLE ASSEMBLIES

Pasternack introduces its new line of FAKRA connectors and cable assemblies to support the wide-array of applications that benefit from the demanding mechanical and environmental automotive requirements that FAKRA connectors meet. The automotive industry created the FAKRA standard for a consistently high-performing, reliable and cost-effective RF connector. Using a standard metal SMB connector embedded within a plastic housing that is designed with multiple color-codes for easy identification, Pasternack's FAKRA connectors are designed to perform up to 4GHz at 50 Ω.

BROADBAND DIRECTIONAL COUPLERS, 800 – 2500 MHz

These new Directional Couplers cover all the most popular communication bands in one unit, and with higher power at up to 60W. Now available in N-Type or SMA Jack connectors, these new models are suitable for field or benchtop use.

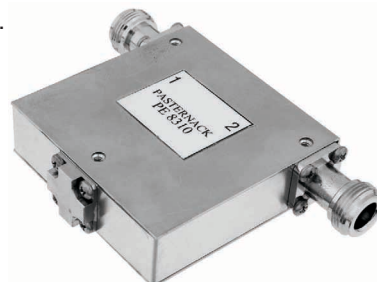

See Page 204 for Directional Couplers

Pricing From: \$299.95

N-TYPE CIRCULATORS & ISOLATORS

Pasternack now introduces its N-type Isolators and Circulators with N-Type connectors. Ferrite Isolators and Circulators are indispensable tools for the RF & Microwave engineer. The Isolator acts as a unidirectional trap, isolating a source and load so that any reflected energy at the load is trapped or dissipated. Circulators are also unidirectional, but circulate the flow of energy from each port to its clockwise adjacent port.

NEW PRODUCTS

UMCX Connectors and Cable Assemblies

Compatible with Hirose U.FL™ connectors, these connectors and cable assemblies are typically used in mobile phone, radio communication, measurement, GPS, wireless LAN and Bluetooth applications.

Pasternack's UMCX Connectors offer an extremely small footprint and low profile, making them one of the world's smallest and lightest coaxial connectors. Pasternack offers both pigtail and complete cable assemblies that come with standard terminations of SMA, MCX, and RP-SMA; or can be terminated with other standard Coaxial connectors upon request. Our cables are especially helpful for testing PC boards that utilize the Surface Mount Pasternack UMCX and Hirose U.FL™ series connectors. The cable assemblies utilize 1.13mm coax or RG178B/U coaxial cable. A Tactile locking mechanism allows mating connectors to snap into place. These ultra-miniature connectors provide operation up to 6GHz at 50 Ohms.

QUICK-DISCONNECT QD-SMA CABLE ASSEMBLIES

Pasternack's Quick-Disconnect Cable Assemblies are designed for Test environments that require rapid SMA connections. The QD-SMA is designed to push on and lock in place by sliding the shroud over the connector. Where enhanced VSWR measurements are required, an additional 1/8 turn of the QD-SMA will ensure lower VSWR performance. The QD-SMA Connector can be quickly removed by pulling on the shroud and sliding off the QD-SMA connector.

LMR® EQUIVALENT CABLE ASSEMBLIES

The Pasternack Wireless Data jumper series is ideal where PIM (Passive Intermodulation Distortion) is a concern, such as WiFi or GSM base station applications. The connectors are low PIM designs and the coax has a lightweight, low-loss construction. The cables are fully interchangeable with standard 7/16 DIN jumpers.

HIGH DEFINITION (HD) CABLE ASSEMBLIES

SEE PAGE 234 FOR MOUNTING HOLES

The HD Precision 75 Ohm cable assemblies are recommended for demanding applications where signal integrity is critical. The assemblies are designed around Pasternack's new PE-B159 Mini-59 coax cable, which provides improved impedance and phase stability over standard RG type assemblies. Typical applications include HDTV, satellite communications, and digital broadcast.

NEW FAKRA CONNECTORS

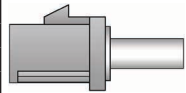

To keep RF interconnection costs low and ensure high levels of electrical and mechanical performance for telematic applications, the German and American automotive industries have standardized a high-performing, cost-effective RF connector based on the FAKRA and USCAR standards. Pasternack introduces its new line of FAKRA connectors and cable assemblies to support the wide-array of applications that benefit from the demanding mechanical and environmental automotive requirements that FAKRA connectors meet. Using a standard metal SMB connector embedded within a plastic housing that is designed with multiple color-codes for easy identification, FAKRA connectors are designed to perform up to 4GHz at 50 Ω.

HIGH DEFINITION (HD) CONNECTORS

SEE PAGE 234 FOR MOUNTING HOLES

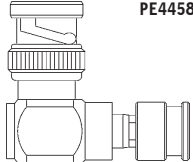

The new HD series is a professional-grade, 75 Ohm connector line designed for applications that include HDTV, satellite communications, and digital broadcast. The HD series connectors are designed around the popular Mini-59 type coaxial cables, such as Pasternack's new PE-B159.

The HD Precision connectors are designed specifically for Pasternack's PE-B159 and Belden's 1855A cables, while the HD Universal connectors are designed for generic 75 Ohm cables with a 23, 24 or 25 AWG center conductor.

HIGH DEFINITION (HD) CONNECTORS (cont'd)

SEE PAGE 234 FOR MOUNTING HOLES

The new HD series is a professional-grade, 75 Ohm connector line designed for applications that include HDTV, satellite communications, and digital broadcast. The HD series connectors are designed around the popular Mini-59 type coaxial cables, such as Pasternack's new PE-B159. The HD Precision connectors are designed specifically for Pasternack's PE-B159 and Belden's 1855A cables, while the HD Universal connectors are designed for generic 75 Ohm cables with a 23, 24 or 25 AWG center conductor.

PASTERNAK ENTERPRISES ROHS COMPLIANCE PROGRAM

What is RoHS Compliance?

The European Union set forth the RoHS (Restriction of Hazardous Substances) Directive to establish environmental guidelines and legislation to reduce the presence of six (6) materials deemed hazardous to the environment. To comply, products entering the EU must not have a homogeneous presence of these materials above the following levels by weight percentage:

- Lead (Pb) < 0.1%
- Mercury (Hg) < 0.1%
- Cadmium (Cd) < 0.01%
- Hexavalent Chromium (CrVI) < 0.1%
- Polybrominated Biphenyls (PBB) < 0.1%
- Polybrominated Diphenyl Esters (PBDE) < 0.1%

At Pasternack we recognize our responsibility as a supplier of coax connectors, cable assemblies, and components potentially used within electronic-based systems and products that are targeted for RoHS compliance. We are fully committed to offering RoHS compliance on the greatest majority of our products. We have completed a comprehensive evaluation and analysis program both internally and with our suppliers to establish and publish RoHS compliant statements for our products on our website.

Determining Pasternack RoHS Compliance

To determine if the product in our catalog is RoHS Compliant, please first refer to our website at www.Pasternack.com. For each part we have supplied an indicator of compliance using this symbol:

All products displaying this symbol on our website have been certified as RoHS Compliant. Click on this symbol to view the Certificate of RoHS Compliance for this product.

We recognize that you may have specific questions regarding RoHS certification on Pasternack's components and products. We will be happy to process all such requests and provide individual product RoHS information as quickly as possible. Please direct any such requests to Pasternack Enterprises Technical Support via email at TechSupport@Pasternack.com or by calling Toll-Free within North America at 1-866-PASTERNAK (866-727-8376). International customers please use +1-949-261-1920.

Methods Determining RoHS Compliance

RoHS Compliance is determined by a combination of supplier certification and engineering design verification. In most cases, Pasternack's products were determined to be RoHS Compliant. In many cases the Compliance was through a stated Exemption to the RoHS Directive. As a supplier of coaxial connectors, adapters, and RF components, Pasternack uses materials such as Brass and Stainless Steel which contain lead as a percentage of weight above the 0.1% threshold, but are allowed through the Exemptions as of the October 21st, 2005 RoHS Directive amendment. Pasternack uses these Exemptions to the RoHS Directive where applicable.

What are the Exemptions?

RoHS Directive text as of the Oct 21st, 2005 amendment is underlined, and how it applies to Pasternack products is indicated below each Exemption.

ANNEX to ROHS DIRECTIVE 2002/95/EC

"Applications of lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) which are exempted from the requirements of Article 4(1)":

5. Lead in glass of cathode ray tubes, electronic components and fluorescent tubes.
Some Pasternack products use resistive and/or dielectric inks that contain lead in a glass phase and fall under this exemption 5.
6. Lead as an alloying element in steel containing up to 0.35% lead by weight, aluminum containing up to 0.4% lead by weight and as a copper alloy containing up to 4% lead by weight.
Most Pasternack products use metal alloys that contain lead below the maximum concentration values specified under this exemption 6. Specifically: aluminum alloys, brass, stainless steel, beryllium copper & phosphor bronze.
7. Lead in solders for servers, storage and storage array systems, network infrastructure equipment for switching, signaling, transmission as well as network management for telecommunications.

All Pasternack coaxial cable assemblies are made using solder containing lead (unless lead-free solder is specified), and may be used in network infrastructure equipment and therefore would fall under this exemption 7. This exemption is application specific, however, and we therefore leave it up to our customer to determine whether this exemption applies to their application.

Lead-free solder is now available for all cable assemblies upon request or online at www.Pasternack.com.

Pasternack has loaded new part numbers for cable assemblies using lead-free solder on our website, using the format PE3xxxxLF-yy, where "xxxx" identifies the part using the existing corresponding item number, and "yy" identifies the length in inches. For example, PE3067LF-24 is the same as PE3067-24 (BNC Male to BNC Male, RG58C/U), except it uses lead-free solder to be fully ROHS Compliant.

Cable Assemblies and Non-Standard Products are also Non-Cancelable/Non-Refundable ("NC/NR"). Non-Standard Parts are defined as Products which are special orders, custom orders, orders for non-standard products, products not customarily in stock or orders for value-added products. In the event of cancellation or other withdrawal of an order for any reason and without limiting any other remedy which Pasternack may have as a result of such cancellation or other withdrawal, reasonable cancellation or restocking charges, which shall include all expenses then incurred and commitments made by Pasternack, shall be paid by Customer to Pasternack. If Pasternack reasonably believes that the Customer's ability to make payments may be impaired or if Customer fails to pay any invoice when due, Pasternack may suspend delivery of any order or any remaining balance thereof until such payment is made or cancel any order or any remaining balance thereof, and Customer will remain liable to pay for any Products already shipped and all Non-Standard Products ordered by Customer. Customer agrees to submit such financial information as Pasternack may reasonably require for determination of credit terms and/or continuation of credit terms. Checks are accepted subject to collection and the date of collection will be deemed the date of payment. Any check received from Customer may be applied by Pasternack against any obligation owing by Customer to Pasternack under this or any other contract, regardless of any statement appearing on or referring to such check, without discharging Customer's liability for any additional amounts owing by Customer to Pasternack. The acceptance by Pasternack of such check will not constitute a waiver of Pasternack's right to pursue the collection of any remaining balance. Invoices not paid when due will bear interest to date of payment at the annual rate of eighteen (18%) percent or such lower rate as may be the maximum permitted by law. If Customer fails to make payment when due, Pasternack may pursue any legal or equitable remedies, in which event Pasternack will be entitled to reimbursement for costs of collection and reasonable attorneys' fees.
