DIGITAL WATCHDOG CAMERAS	DW-BJC2P	<p>Convergence to Pixel server brings metadata from any TCP/IP enabled device seamlessly into a DW Spectrum. The C2P solution is used to normalize all TCP/IP metadata received at the edge of the network into a common integration framework. By normalizing all metadata at the edge of the network the DW Spectrum Client then becomes the head-end for monitoring all TCP/IP connected sensors and devices, while also ensuring all metadata is stored time synchronized with the DW Spectrum video. The common integration framework provides the user with a common set of both real-time and forensic analysis tools that are common to all TCP/IP device integrations. Interfaces include POS, RFID, Access Control, LPR, ATM, Weigh Scales, Bar Code</p>	Each	\$ 5,069.50	100%
