Dedication

Gary Anderson July 1941 - March 1993

This Annual Financial Report is dedicated to the late Gary Anderson who served on the Board of Trustees since 1981. His death was a great loss to a great many. His presence and dedicated service will be sadly missed.

Certificate of Achievement for Excellence in Financial Reporting

Presented to

Teachers' Retirement System of the State of Illinois

For its Component Unit Financial Report for the Fiscal Year Ended June 30, 1992

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose component unit financial reports (CUFRs) achieve the highest standards in government accounting and financial reporting.

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a certificate of Achievement for Excellence in Financial Reporting to the Teachers' Retirement System of the State of Illinois for its Component Unit Annual Financial Report for the fiscal year ended June 30, 1992. The Certificate of Achievement is a prestigious award for recognizing conformance with the highest standards for preparation of state and local government financial reports.

To be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized component unit financial report, whose contents conform to program standards. The report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is walld for a period of one year. TRS has received the certificate for the last four consecutive fiscal years. We believe this annual financial report continues to conform to the Certificate of Achievement program requirements and will be submitted to the GFOA for review.

Executive Director

P.O. Box 19253, 2815 West Washington Springfield, Illinois 62794-9253 217/753-0311

Robert Daniels Executive Director

The management of the Teachers' Retirement System of the State of Illinois presents the Component Unit Financial Report for the Year Ended June 30, 1993. This report consists of six major sections: an introduction, the financial statements and notes, a summary of actuarial valuations, a membership and benefits section, an investments summary with an investment listing. This report is added to the State of Illinois Comprehensive Annual Financial Report. It is the responsibility of TRS management to ensure the accuracy and completeness of this report and that all material disclosures have been made. To the best of our knowledge, the information presented in this report is accurate and presents fairly the financial position and operations of TRS as of June 30, 1993.

Major Initiatives

The enactment and implementation of the 5&5 Early Retirement Incentive was the most prominent of the many accomplishments of FY 93. This incentive, the largest of its kind within U.S. public pension systems, allowed eligible TRS members to purchase up to five years of service credit. With this purchase, the same number of years is added to the member's age. The combined service and age enhancement allowed thousands of members to retire early with increased benefits. The incentive presented an early retirement opportunity to nearly 28,000 members.

Spurred by the need to prepare for this massive retirement incentive, TRS implemented automated calculation programs which generate benefit estimates and retirement benefit amounts—thus removing the rigorous hours of manual calculation, verification and checking. A detailed project narrative provided on page 8 outlines this and the other related accomplishments and challenges brought by this legislation and TRS's response.

The Illinois Pension Code was amended to provide parity for certain death and disability benefit recipients who engaged in part-time or substitute teaching after the onset of a disability. The change benefitted a total of 73 recipients who received retroactive adjustments based on the new law. The average benefit increase was \$2,800 annually. Other code amendments have allowed members to purchase optional service credit for leaves of absence occurring before 1963 and allowed dependent beneficiaries to become eligible for benefits without the expense of a judicial determination. Changes in federal tax laws required

TRS to apply mandatory 20 percent withholding of certain lump-sum distributions.

The management structure of TRS underwent a reorganization to more closely align related functions and streamline the operations of the System.

Although the year brought many rewarding challenges, it also made ever more evident the seriousness of the System's economic outlook. The state's unfunded liability to the five public pension funds continued to grow dramatically in FY 93 to an unprecedented \$14.4 billion. The state's unfunded liability to TRS alone constitutes \$7.6 billion of that total. The System remained in a negative cash flow situation, forced for the second consecutive year, to apply investment income toward the payment of member benefits. With continued

Investments

As trustee for members' funds, the System is responsible for investment of the fund under the prudent person standard. This standard permits the System to allocate trust funds across a broad group of asset classes, including stocks, bonds and real estate.

The System's total fund, time-weighted rate of return was 11.56 percent. Annualized three-year and five-year total returns of 9.42 percent and 10.61 percent, respectively, continue to outperform the rate of inflation for these periods, 3.57 percent and 4.09 percent, respectively. The System's long-term objective, to exceed the rate of inflation by 3 percent, has been achieved for both the three-year and five-year periods.

"ERI repesents the largest early out program ever offered in U.S. public pension systems. It opened the retirement window to an unprecedented 28,000 teachers."

inadequate state funding levels, the anticipated insolvency date of the fund is estimated at the year 2014.

The escalating cost of health care and increasing enrollments of eligible annuitants continues to challenge the TRS health plan. TRS currently pays 75 percent of the premium cost for annuitants, but the subsidy cost far exceeds the revenues set aside by the Illinois Pension Code for this purpose. TRS is examining legislation and other initiatives to provide health insurance coverage to TRS health plan participants.

Financial Information

The System uses a series of internal controls to monitor and safeguard the System's assets and promote the efficient operation of the System. TRS undergoes an annual external audit conducted by special assistant auditors for the Illinois Office of the Auditor General in addition to the reviews conducted regularly by the System's Internal Auditor. The System's annual operating budget is evaluated and approved by the TRS Board of Trustees.

The financial statements of TRS, presented on pages 14 and 15, are prepared in accordance with the generally accepted accounting principles (GAAP) within the guidelines established by the Government Accounting Standards Board (GASB).

Investment income and realized gain of \$1,142.6 million were positive contributors to the fund's financial status during FY 93. Investments totaled \$11.7 billion at market value on June 30, 1993.

Economic Condition and Outlook

State funding of the employer cost as required by law would maintain the unfunded pension benefit obligation at a fixed dollar amount; however, the state has continually failed to fund the System on this basis. Prior to 1982, the state funded the System through reimbursement of benefit payments. Since 1982, funding levels have ranged from 37 to 66 percent of benefit payments. Despite the 1989 passage of Senate Bill 95 requiring the state to pay off its unfunded pension benefit obligation to TRS by the year 2036, the state's appropriation has consistently fallen short of the required funding levels each year. The result is a \$7.6 billion unfunded liability to TRS, a \$759 million increase from FY 92.

The System continues to urge the Governor and the General Assembly to increase state appropriations in recognition of its actuarial funding needs. The System must currently rely heavily on the performance of investments to ensure benefits are fully paid. The continuation of this negative cash flow situation will seriously jeopardize pension benefits guaranteed by the Illinois Constitution.

Revenues and Funding

Three major sources fund the System: member contributions, investment income and employer contributions in the form of appropriations from the State of Illinois and a smaller portion from federal sources. Total assets available to pay benefits grew to \$10.9 billion in FY 93.

Member contributions are the major source of funding and come from approximately 126,000 members who contribute 8 percent of their earnings each year. In FY 93, member contributions to the TRS trust fund totalled \$363 million, a \$12 million increase from the \$351 million contributed in FY 92. The System invests these assets to create the second source of income: investment income.

Investment income in FY 93 was up \$27 million from FY 92 to \$520.1 million. As of June 30, 1993, the total fund, time-weighted rate of return was 11.56 percent. In FY 93, \$75 million of investment returns were used to provide benefits-a compensatory measure resulting from continued underfunding of TRS by the State of Illinois. This represents the second consecutive year of the use of investment earnings to pay benefits; in FY 92, \$50 million of investment earnings was used for benefits payments. A detailed discussion of investment performance and holdings is included in the Investment Summary portion of this report.

Appropriations from the state and contributions paid from federal funds make up the third funding source. Contributions from employers via state appropriations to the System for FY 93 were \$269.9 million. State appropriations remained constant from FY 92 to FY 93 while federal program contributions were \$2.5 million higher.

Revenues (in millions)

Source of revenue			Increase/(Decrease)		
The same of the sa	1993	1992	Amount	Percent	
Member Contributions	\$ 363	\$ 351	\$ 12	3.4%	
Employer Contributions	305	272	33	12.1%	
Investment Income plus realized gain on					
investments	1,143	1,114	29	2.5%	
TOTAL	\$ 1,811	\$ 1,737	\$ 74	18.0%	

Expenses

Expenditures of TRS consist of payments of retirement benefits, refunds, health insurance subsidies and administrative expenses. During FY 93, benefit payments rose \$64 million from FY 92 to \$678 million. The increase is attributable to an increase in the number of retirees and the 3 percent annual increase in benefits. A 32.1 percent increase of \$9 million in health insurance premium payments was due to increased membership and premium increases. Administrative expenses in FY 93 constituted only 1 percent of the System's total expenses.

Expenses			Increase	/(Decrease)
	1993	1992	Amount	Percent
Benefit Payments	\$ 678	\$ 614	\$ 64	10.6
Health Insurance	37	28	9	32.1
Refunds	19	19	0	0.0
Administrative	10	12	(2)	(20.0)
TOTAL	\$ 744	\$ 673	\$ 71	22.7

Independent Audit

TRS is audited annually by special assistant auditors hired by the Illinois Auditor General. Each year, the financial statements, records and internal controls of TRS are examined by these external auditors. Every other year, a compliance audit for the previous two years is performed to ensure compliance with applicable statutes and codes. The Report of Independent Public Accountants is contained on page 13 of this report.

Awards

TRS participates in the Government Finance Officers Association (GFOA) Certificate of Achievement for Excellence in Financial Reporting program and has received the award in each of the last four years. This report has been prepared in accordance with the requirements established by the GFOA for preparation of a Component Unit Annual Financial Report and will again be submitted to GFOA for certification this year.

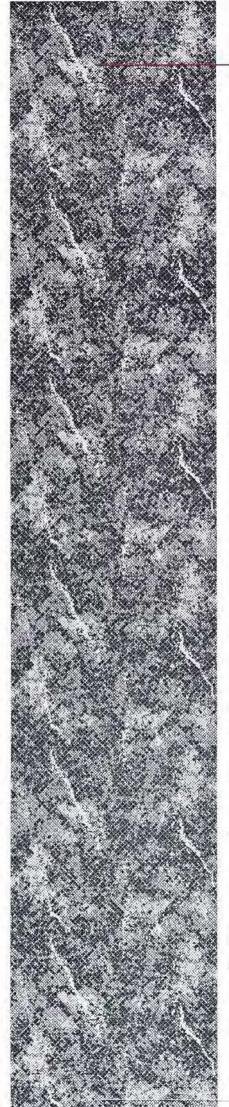

Acknowledgments

This report reflects the efforts of TRS staff under the leadership of the Board of Trustees and the Executive Director. The Accounting Department, with the assistance of the Public Information Administrator, compiled the report. It is intended to provide complete and reliable information as a basis for making management decisions, as a means of determining compliance with legal provisions and as a means for determining responsible stewardship for the assets contributed by the members and their employers.

This report is being provided to members of the General Assembly and all Illinois school districts outside of the City of Chicago as well as being made available to members and retired members upon request. We hope that you find this report informative and helpful. In closing, I am pleased to present the Component Unit Annual Financial Report for Year Ended June 30, 1993, for the Teachers' Retirement

System of the State of Illinois.

Robert Daniels Executive Director

Early Retirement Incentive

The commitment of the Teachers' Retirement System is—and always has been—to provide the optimum in personalized service to its members. The Early Retirement Incentive (made available by Public Act 87-0273) presented the singlemost comprehensive challenge to maintain this level of service ever experienced by TRS.

With the first draft of the Early Retirement Incentive (ERI), TRS sprang into action, outlining impact expectations, problem statements and action plans. Staff size was increased through temporary employment contracts and the addition of permanent staff. Existing resources were evaluated and upgraded where needed to accommodate the anticipated workload.

In preparation for this incentive, TRS began implementing automated processes to replace the previous manual procedures. Given the anticipated magnitude of ERI, manual processing was an impossibility. TRS staff produced-in a matter of months-the System's first automated retirement benefit estimate calculation program allowing members calling from a touch-tone phone to enter salary and service credit information and generate a benefit estimate. A copy of the estimate was mailed to the member the following day. Previously the estimate process required calculation, verification and checking by TRS staff prior to being mailed to the member, a process taking up to four days.

The automation of the retirement benefit calculation allowed the System to expedite the processing of retirement and transfer applicants to payroll more quickly and efficiently than ever before. The complex series of calculations including checks and verifications

now takes only 5 minutes, compared to the 20 minutes taken when processed manually. Other automated processes which streamlined the services offered during ERI included the automation of a number of letters and logging and tracking systems for member's records and retirement applications.

The automation efforts of TRS staff have been recognized by Cincom Communications, Inc. who featured TRS in an client success story circulated inter-

nationally. Cincom Communications manufactures the software used by TRS in formulating all of these automated processes.

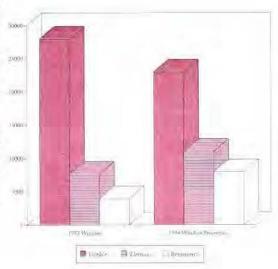

An extensive informational campaign was prepared prior to the bill's passage and was ready for implementation as the bill was signed by Governor Edgar in January A toll-free information/election line managed the phenomenal levels of telephone traffic, responding to nearly 30,000 phone calls during the first window period.

Within days of the Governor's signature, a packet of materials including a benefit estimate was sent to each to eligible member. The packet outlined the incentive in detail and provided step-by-step instructions for the election and retirement processes.

An interactive video teleconference was another key component in this campaign. Members of TRS staff, working in conjunction with Western Illinois University's Satellite Education Network, conducted the 90-minute live and interactive presentation which was broadcast to satellite locations statewide. In some areas, the program was carried by cable companies directly into the homes of members. Following the broadcast, videotapes of the presentation were available for purchase.

These months of preparation proved to be very successful. Under the incentive's first two-month window, nearly 8,000 members elected to retire under ERI. Over 3,900 members retired at the close of the 1992-93 school year, compared to an average of 2,500 in previous years. Nearly all of these members received their first annuity payment by November 1, 1993.

ERI Participation

A record of 4,699 TRS members began their retirement benefits during the summer of 1993. "We met a great challenge, handling roughly three times our normal summer workload," said Bob Daniels, Executive Director of TRS.

"Using a new, automated benefit calculation system designed by our own information systems staff, we processed record volumes efficiently and effectively," Daniels said.

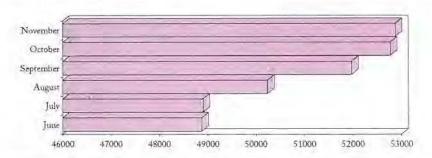

About 1,400 to 1,600 members retire in a typical summer, but the number soared in 1993 because of the first year of the 5&5 early retirement incentive. Here are the details:

- 3,927 persons retired under 5&5
- 742 persons took regular retirements
- · 30 persons retired using the early retirement option.

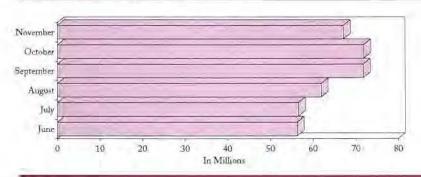

Some 7,655 persons filed 5&5 elections in 1993. TRS officials expect as many as 11,000 of the 23,000 eligible teachers will make an election during the final 1994 5&5 window. Up to 8,000 additional members may actually retire using the 5&5 incentive in the 1994 window.

ARTHUR ANDERSEN & CO.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

Honorable William G. Holland Auditor General State of Illinois

Board of Trustees Teachers' Retirement System of the State of Illinois

We have audited, as Special Assistant Auditors for the Auditor General, the accompanying statements of financial position of the TEACHERS' RETIREMENT SYSTEM OF THE STATE OF ILLINOIS (the "System") as of June 30, 1993 and 1992, and the related statements of revenue and expense and changes in net assets for the years then ended. These financial statements and the supplemental schedules referred to below are the responsibility of the System's management. Our responsibility is to express an opinion on these financial statements and supplemental schedules based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Teachers' Retirement System of the State of Illinois as of June 30, 1993 and 1992, and the results of its operations and the changes in its net assets for the years then ended, in conformity with generally accepted accounting principles.

Our audits were made for the purpose of forming an opinion on the financial statements taken as a whole. The schedules of supplementary financial information listed in the table of contents are presented for purposes of additional analysis and are not a required part of the financial statements of Teachers' Retirement System of the State of Illinois. Such information has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly presented in all material respects in relation to the financial statements taken as a whole. The supplementary financial information for the years 1984 through 1990 has been derived from financial statements audited by other auditors, whose reports thereon expressed an unqualified opinion.

ARTHUR ANDERSEN & CO.

Chicago, Illinois, October 8, 1993

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of accounting: The financial statements of the Teachers' Retirement System of the State of Illinois (the System or TRS) are prepared using the accrual basis of accounting.

Investments accounting: Investments are valued on the basis of cost. Gain or loss on the sale of investments is determined based on average cost for stocks and identified cost for debt securities. Investment income is shown as net of investment expenses. Gain or loss on real estate is recognized upon sale and for market declines judged to be other than temporary. Real estate investments are valued at historical cost, subject to adjustment for market declines judged to be other than temporary. No provision for depreciation has been made because real estate is treated as an investment asset.

Investments authorized: Through the Board of Trustees, as authorized in the Illinois Pension Code (40 ILCS 5/16-101 et seq.), the System serves as fiduciary for the members' trust funds and is responsible for investment of such funds under authority of the "prudent person rule." The prudent person rule establishes a standard for all fiduciaries by specifying fiduciary responsibility with regard to the members' trust funds.

Equipment: Equipment is stated on the basis of historical cost. Provisions for depreciation are computed by the straight-line method, based upon the estimated useful lives of the assets. Equipment is assigned a useful life of three to ten years while vehicles are assigned a five-year life.

Transfers: The transfers category reflects transfers of members' accumulated contributions to other pension systems.

Administrative expenses: This category includes \$71,309 for accrued compensated absences for FY93.

Prior Period Reclassification: Prior year amounts have been reclassified on a basis consistent with the current year presentation.

NOTE B

PLAN DESCRIPTION

The System is the administrator of a cost-sharing multiple-employer public employee retirement plan. Members of the System consist of all teachers employed in the public common schools of Illinois outside of Chicago. The System was established by the State of Illinois and is governed by the Illinois Pension Code (40 ILCS 5/16-101, et seq.). The System is a component unit of the State of Illinois and is included in the state's financial statements as a pension trust fund.

The System has developed criteria to determine whether other entities should be included within its financial reporting entity. The criteria include, but are not limited to, whether the System exercises oversight responsibility on financial interdependence, selection of governing authority, designation of management, ability to significantly influence operations and accountability for fiscal matters, scope of public service and special financing arrangements.

Based on these criteria, the System has no other entities included in these financial statements.

Members are employed by 1,088 school districts and special districts. Member contributions are remitted by each employer district to the System. These employers are responsible only for employer contributions for teachers paid from federal and trust funds and for the employer's portions of the early retirement option and the early retirement incentive contributions. The State of Illinois provides employer contributions to fund the System. State contributions are appropriated annually and have not met statutory funding of

normal cost and amortization of the unfunded pension benefit obligation over a forty-year period with a seven-year phase-in as prescribed in Public Act 86-0273.

At June 30, 1993, the TF employers consisted of:	RS-covered	At June 30, 1993, the Syste membership consisted of:	em

State agencies	32	Inactive members	25,000
	1,088	Current members	125,770
			200,624

Terminated and current members are estimated based on the latest available data.

The System provides retirement benefits, health insurance, death benefits and disability benefits. A member qualifies for an age retirement annuity after attaining one of the following: age 62 with five years of service credit; age 60 with ten years; age 55 with 20 years. If retirement occurs between age 55 and 60 with less than 35 years of service, the annuity will be reduced at the rate of 1/2 percent for each month the member is under age 60. A member age 55 with less than 35 years of service credit may use the early retirement option to avoid a discount for early retirement if retirement occurs before July 1, 1995, and within six months of the last day of service requiring contributions and if the member and employer both make a one-time contribution to the System. A member with less than 5 years of creditable service is entitled to a single-sum benefit payable upon attainment of age 65.

Public Act 87-1265 provides an early retirement incentive known as 5&5. The retirement windows are June 1 through September 1 in 1993 and 1994. Retirements may be delayed by the employer until 1995 if more than 30 percent of those eligible retire in 1994. Employees may purchase up to five years of additional service and receive an equal number of years of age. Employees contribute 4 percent of the highest salary used in the calculation of final average salary for each year purchased, and employers contribute 20 percent for each year purchased. Employer contributions can be made in either a lump sum, over five years in quarterly installments, or under a different schedule approved by the TRS Board of Trustees.

A retirement benefit is determined by the average salary of the four highest consecutive salary rates within the last ten years of creditable service and the percentage of average salary to which the member is entitled. This percentage is determined by the following formula: 1.67 percent for each of the first ten years, plus 1.9 percent for each of the next ten years, plus 2.1 percent for each of the next ten years, plus 2.3 percent for each year over 30. The maximum retirement benefit, 75 percent of average salary, is achieved with 38 years of service. Each annuitant who retired after 1969 or made a qualifying contribution receives an annual 3 percent increase in the current retirement benefit beginning January 1 following attainment of age 61 or following the first anniversary in retirement, whichever is later.

Member contributions, established by statute, are 8 percent of earnings allocated as follows: 6 1/2 percent for retirement, 1/2 percent for post-retirement increases and 1 percent for death benefits. If a member leaves covered employment, the System will refund a member's contributions upon request. The refund consists of actual contributions excluding the 1 percent death benefit contribution.

NOTEC

At June 30, 1993, the bank balance and carrying amount of the System's deposits were \$58,545,000 and \$2,246,000, respectively. Of the bank balance, \$56,625,000 was on deposit with the State Treasurer. The System's investments are categorized to give an indication of the level of risk at year end. Category 1 includes investments that are insured or registered or for which the securities are held by the System or its agent in the System's name. Category 2 includes uninsured and unregistered investments for which the securities are held by the counter-party in the System's name. Category 3 includes uninsured and unregistered investments for which the securities are held by the counter-party but not in the System's name.

Total Investments	\$11,049,325,000	\$9,865,840,000	\$11,714,339,000	\$10,493,714,000

The System has nonrecourse mortgages totaling \$213,754,000 and \$164,485,000 on real estate equities at June 30, 1993 and 1992, respectively. The amount reported for real estate equity is net of these mortgages, which mature on various dates through the year 2017.

The real estate equity category includes \$344,519,000 and \$170,087,000 of mortgages receivable which are fully secured by the properties at June 30, 1993 and 1992, respectively.

The System participates in a securities lending program whereby securities are loaned to brokers and, in return, receives collateral of amounts slightly in excess of the market value of securities loaned. Collateral consists solely of cash, letters of credit and government securities which are held by or reinvested at the discretion of the master trustee. As of June 30, 1993 and 1992, TRS had outstanding loaned investment securities having a market value of approximately \$859,089,000 and \$551,924,000, respectively, against which it had received collateral of approximately \$913,552,000 and \$621,346,000 respectively. The System has instructed the master trustee to direct \$156,895,000 of the collateral received from securities lending to be invested in floating rate debt securities collateralized by real estate investments which results in a note payable from TRS. Income from securities lending was \$3,419,000 in FY 93 and \$3,241,000 in FY 92 and is included in Investment Income-Other.

In general, there has been a decline nationally in the value of real estate properties. Losses in market value judged to be other than temporary have been recognized in TRS' financial statements through the creation of a Reserve for Real Estate account which has a balance of \$23,607,000 which is netted against the Investments category as of June 30, 1993. Management believes that other declines in appraised values are temporary in relation to the expected holding periods of the investments.

NOTE D

FUNDING STATUS AND PROGRESS

The pension benefit obligation is a standardized disclosure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee services to date. The measure is the actuarial present value of credited projected benefits and is intended to help users to assess the System's funding status on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons with other public employee retirement systems.

The pension benefit obligation is determined as of June 30, 1993 and 1992. Significant actuarial assumptions are summarized as follows:

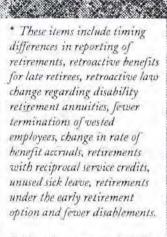

- The present value of future pension payments is computed using a discount rate of 8 percent. The discount rate represents the estimated long-term rate of return on current and future investments.
- Future pension payments reflect an assumption of a 4 percent salary increase due to inflation and a 3.4 percent salary increase for merit adjustments.
- Future pension payments include post-retirement increases based on 3
 percent of the pension payment of the previous year,

An experience analysis is required by statute to determine the adequacy of actuarial assumptions regarding mortality, service and compensation experience. The most recent experience analysis was performed for the four-year period ending June 30, 1992. Based on this analysis, there were minor changes in actuarial assumptions. During the period between experience analyses, the actuary develops annual actuarial estimates based upon the annual valuations.

A reconciliation of the unfunded pension benefit obligation for the years ended June 30, 1993 and 1992 is summarized below:

	1993	1992
Unfunded pension benefit obligation at	Francisco Proprieta	50 100 100 100
beginning of year Additions (deductions):	\$6,847,391,000	\$6,394,212,000

Amendments: For FY 93: 624 retirements under the		
TRS early retirement incentive program	38,589,000	
For FY 92: Military service purchases		2,500,000
State employees' early retirement incentive p	rogram -	5,000,000
Addition to health care reserves	21,600,000	21,600,000
Change in actuarial assumptions: Revised assumptions for active and disabled mortality and for incidence of disability	12,544,000	
Actuarial losses (gains) compared to assumpti		
Salary increases	237,332,000	110,583,000
Investment income	(351,089,000)	(407,712,000)
New entrant loss	23,543,000	
Mortality loss	20,987,000	**
Prior service credits	26,025,000	**
Other	178,220,000	197,690,000
Net additions	758,909,000	453,179,000
Unfunded pension benefit obligation at year's en	nd \$7,606,300,000	\$6,847,391,000

Assuming 30 percent utilization of the early retirement incentive by eligible employees over the next two years, it is anticipated that the unfunded pension benefit obligation will increase by an additional \$172.8 million in 1993 dollars.

[&]quot;These items were included in the Other category in FY 92 and cannot be individually identified.

Employer contributions made by the State of Illinois are based on annual appropriations and are not actuarially determined. The largest source of state appropriations is made from the Common School Fund (1993 - \$225,850,000; 1992 - \$225,850,000).

Another source of state contributions is the State Pensions Fund (1993 - \$38,851,000; 1992 - \$6,641,000) which represents a distribution to the System of money escheated to the state.

The third source of employer contributions are federal and trust contributions. School districts and special districts make these contributions for teachers paid from federal and trust funds. Amounts received from these sources were \$17,202,000 in 1993 and \$14,698,000 in 1992.

Total contributions from these three sources (the Common School Fund, the State Pensions Fund and federal/trust funds) were \$281,903,000 in 1993 and \$247,189,000 in 1992. These amounts represented 6.7 and 6.2 percent of annual covered payroll, respectively.

There are two other sources of employer contributions which are not counted towards the employer's funding obligation because the costs of the benefits to which they apply are not included in the calculation of the annual funding requirement. The state's General Revenue Fund appropriations to reimburse the System for certain minimum and supplemental benefits were \$5,194,000 in 1993 and \$5,684,000 in 1992. School district contributions for the employer's cost under the early retirement option were \$18,269,000 in 1993 and \$19,503,000 in 1992.

Total contributions from employers from all sources, including the state's General Revenue Fund appropriations and school district contributions from the early retirement option, were \$305,974,000 in 1993 and \$272,376,000 in 1992. Included in total contributions for 1993 are early retirement incentive contributions totalling \$607,000. These amounts represented 7.3 percent of annual covered payroll in 1993 and 6.8 percent in 1992.

In 1989, the Illinois General Assembly passed Public Act 86-0273 which required a level of funding of the System that would pay normal costs as determined by the actuaries plus amortization of the unfunded pension benefit obligation over 40 years after a seven-year phase-in. However, the General Assembly did not appropriate money to provide the required level of funding in any of the phase-in years.

It should be noted that Public Act 86-0273 establishes a funding plan that, even if adhered to, would not conform with official accounting pronouncements, particularly Accounting Board Principles Opinion #8 (APB #8) "Accounting for the Cost of Pension Plans." The following schedules illustrate requirements and contributions computed in accordance with Public Act 86-0273 and are significantly different than the funding requirements and contributions presented in the actuarial section and Note I of this report that are computed in accordance with APB #8.

		(In Thousan	nds of Dollars)		
Fiscal Year	Normal Cost	Amortization	Total Requirement	Actual Contribution (CS, SPF, Fed)	Shortfall
1990	\$208,398	\$ 74,571	\$282,969	\$269,028	\$ 13,941
1991	216,783	112,548	329,331	269,879	59,452
1992	244,108	156,874	400,982	247,189	153,793
1993	279,754	215,259	495,013	281,903	213,110
1994	297,491	275,136	572,627	280,355*	292,272

The underfunding in fiscal years 1990 through 1994 makes it difficult to comply with the phase-in schedule to a 40-year amortization. Total employer contributions will have to be significantly higher in fiscal years 1995 and 1996. State contribution requirements would be reduced by any amounts received from federal and trust funds.

		(In Thousa	nds of Dollars)

1996	4,712,000	330,311	421,724	752,035

NOTEF

PENSION DISCLOSURE FOR TRS AS AN EMPLOYER

All of the System's full-time employees who are not eligible for another state-sponsored retirement plan participate in the State Employees' Retirement System (SERS), which is a component unit of the State of Illinois reporting entity. The SERS is a single-employer defined benefit public employee retirement system (PERS) in which state agencies, including the System, participate on a cost-sharing basis. The financial position and result of operations of the SERS for FY 93 and FY 92 and the related GASB Statement 5: "Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers" disclosures are included in the State's Comprehensive Annual Financial Report for years ended June 30, 1993, and 1992, respectively. The SERS also issues a separate component unit financial report (CUFR).

A summary of SERS benefit provisions, changes in benefit provisions, employee eligibility requirements including eligibility for vesting and the authority under which benefit provisions are established, is included as an integral part of the SERS CUFR. Also included is a discussion of employer and employee obligations to contribute, the authority under which those obligations are established, as well as an explanation of the pension benefit obligation. The amount shown below as "pension benefit obligation" is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increases, estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits.

The pension benefit obligation at June 30, 1993, and June 30, 1992, for the SERS as a whole, determined through an actuarial valuation at that date was \$6,044.5 million and \$5,600.8 million, respectively. The SERS net assets available for benefits on these respective dates (valued at cost) were \$3,496.5 million and \$3,278.2 million, leaving unfunded pension benefit obligations of \$2,548.0 million and \$2,322.6 million. The System's FY 93 and FY 92 contribution requirements represented .15 percent and .12 percent, respectively, of total contributions required of all state agency/department employers participating in SERS.

Ten-year historical trend information designed to provide information about SERS progress made in accumulating sufficient assets to pay benefits when due is presented in its separately issued CUFRs for the years ended June 30, 1993, and June 30, 1992, respectively.

Pertinent financial information relating to the System's participation in SERS is summarized as follows:

The System's covered payrolls under SERS for FY 93 and FY 92 were \$3.6 million and \$3.1 million and the payrolls for all System employees were \$4.3 million and \$3.5 million, respectively.

The System's (i.e., the employer's) actuarially determined contribution requirements for FY 93 and FY 92 were \$175.3 thousand and \$146.9 thousand, respectively, or 4.87% and 4.74% of the System's covered payrolls. For FY 93, the System's and employees' contributions actually made were \$183.2 thousand and \$144.1 thousand, respectively, which represents 5.1% and 4.0%, respectively, of the current year covered payroll. For FY 92, the System's and employees' contributions actually made were \$148.1 thousand and \$125.2 thousand, respectively, which represents 4.8% and 4.0%, respectively, of the covered payroll.

The balances in the reserve accounts at June 30, 1993, and June 30, 1992, were as follows:

	Year End	led June 30
	1993	1992
Members' accumulated contributions	\$ 3,958,054,256	\$ 3,624,340,256
Post-retirement increases:		
Minimum retirement allowance	1,681,886	1,571,212
Supplementary payments	451,011	422,660
Health insurance	63,098,877	74,534,435
Employers' contributions	6,856,303,970	6,111,093,437
Total reserves	\$10,879,590,000	\$ 9,811,962,000
Unfunded pension benefit obligation	on 7,606,300,000	6,847,391,000
Pension Benefit Obligation	\$18,485,890,000	\$16,659,353,000

These statutory reserve accounts are maintained in accordance with provisions of 40 ILCS 5/16-101 et seq. (1993). Final reserve allocations cannot be made until annual update processing is completed in early FY 94.

Total reserves should equal the actuarial value of assets (cost value).

Members' Accumulated Contributions: This reserve accumulates, with 6 percent interest, the contributions by members prior to retirement. Contributions are made by salary deduction (6 1/2 percent of salary) and are fully refundable upon withdrawal from the System, excluding interest credited thereon. The interest accrued is refundable only in the event of death. Interest is credited as of the date of retirement or death of those retiring or dving during the year, and as of the end of the fiscal year for all other members. Interest is computed annually based upon the individual member balance in the reserve at the beginning of the fiscal year.

Minimum Retirement Allowance: In 1974, a minimum retirement allowance equal to \$15 per month for each year of creditable service at retirement, up to a maximum of \$450 per month for 30 or more years of credited service was established. To qualify, annuitants are required to make a one-time contribution which is credited to the

reserve. Interest at 6 percent is credited to the reserve annually, based upon the average reserve balance. The State of Illinois also appropriates funds necessary to pay the minimum benefits provided in the legislation. All benefits paid under this program are charged to the reserve.

Supplementary Payments: In 1961, legislation was enacted to provide for increased annuities to members then retired who met certain specified requirements.

Annuitants were required to make a one-time contribution which was credited to this reserve. The State of Illinois also appropriates funds which are credited to the reserve. Interest at 6 percent is credited to the reserve annually, based upon the average reserve balance. The annuity increases resulting from this legislation are charged to the reserve.

Health Insurance: 40 ILCS 5/ 16-153.4 (1993) authorizes the Health Insurance Reserve. The Board of Trustees is authorized to transfer up to \$20 million annually from its investment earnings in excess of 4 percent per annum. Interest is credited to this account at a rate of 8 percent annually based on the System's actuarial rate of return assumption. Health insurance benefits paid to the System's members are charged to the reserve.

Employer's Contribution: This reserve serves as a clearing account for income and expenses of the System. The reserve is credited with contributions from the State of Illinois not specifically allocated to other reserves, member and employer contributions, income from invested assets of the System, the interest portion of the accumulated contributions of members granted refunds and contributions from annuitants who qualify for automatic annual increases in annuity. The reserve is charged with amounts necessary to be transferred to the Members' Accumulated Contribution Reserve, all amounts necessary to be refunded to withdrawing members, all benefits paid to temporarily or accidentally disabled members, all death benefits paid, all health insurance costs and survivor benefit contributions refunded to annuitants.

NOTE H

POST-RETIREMENT HEALTH CARE BENEFITS

In addition to the pension benefits described in Note B, TRS provides post-retirement health care benefits, in accordance with state statutes, to all members receiving a monthly benefit from the System. Currently, there are 49,854 members receiving monthly annuity benefits, of which 22,947 are enrolled in the TRS health plan. TRS subsidizes 75 percent of the premium for these enrolled members. During the year, TRS paid \$37.5 million in premiums for enrolled members.

NOTEI

HISTORICAL TREND INFORMATION

Supplemental schedules of historical trend information are presented below. These are designed to provide information on the System's progress in accumulating assets to pay benefits when due.

1993	10,880	18,486	58.9	7,606	4,189	181.6

Analysis of the dollar amounts of net assets available for benefits, pension obligation and unfunded pension benefit obligation in isolation can be misleading. Expressing the net assets available for benefits as a percentage of the pension benefit obligation provides one indication of funding status on a going-concern basis. Analysis of this percentage over time indicates whether the System is becoming financially stronger or weaker. Generally, the greater this percentage, the stronger the system. Trends in unfunded pension benefit obligation and annual covered payroll are both affected by inflation. Expressing the unfunded pension benefit obligation as a percentage of annual covered payroll approximately adjusts for the effects of inflation and aids analysis of progress made in accumulating sufficient assets to pay benefits when due. Generally, the smaller this percentage, the stronger the system.

SUPPLEMENTAL SCHEDULES

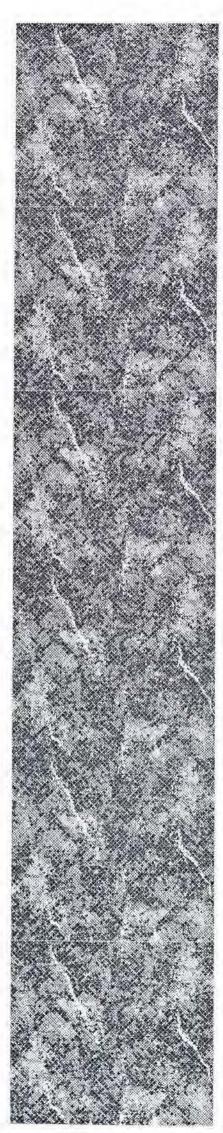

Administrative expenses for the years ended June 30, 1993 and 1992, are summarized below:

	1993	1992
Personal services	\$5,455,000	\$4,273,000
Professional services	1,274,000	671,000
Postage	312,000	253,000

October 13, 1993

Board of Trustees Teachers' Retirement System of the State of Illinois 2815 West Washington Street Springfield, Illinois 62794

Subject: Pension Benefit Obligation as of June 30, 1993

Ladies & Gentlemen:

Based upon our annual actuarial valuation of the Teachers' Retirement System of the State of Illinois, we have determined the pension benefit obligation of the System to be \$18,485,890,000 as of June 30, 1993. The valuation was performed in accordance with generally accepted actuarial principles and procedures, using the projected unit-credit actuarial cost method.

The June 30, 1993 valuation reflects revised actuarial assumptions for rates of mortality amongst active and disabled employees, and rates of disability amongst active employees. The effect of these assumption changes was to increase the pension benefit obligation by \$12,544,000.

Included in the pension benefit obligation of \$18,485,890,000 as of June 30, 1993 is an amount of \$41,331,000 due to amendments to the Pension Code which were enacted during the fiscal year 1992/93. The amount of \$41,331,000 is on account of 624 retirements under the Early Retirement Incentive (ERI) program.

The actuarial valuation was based on a census of retired members as of June 30, 1993, and a census of active and inactive members as of June 30, 1992, which were submitted to us by the System. While we did not verify the data at their source, we did perform tests for internal consistency and reasonability in relation to the data submitted for the previous valuation. We also understand that the outside auditor of the System has made an examination of the membership data.

The valuation is based on the benefit provisions of TRS in effect on June 30, 1993. The actuarial assumptions used in the valuation are those specified by the Board of Trustees of the System based on recommendations made by the actuary.

In our opinion, the amount of \$18,485,890,000 is a fair representation of the pension benefit obligation of the System as of June 30, 1993.

Respectfully submitted,

John W. Thompson Consulting Actuary

Actuarial information provides insights to the kinds of obligations that have been incurred under the System. Various measures of financial condition are used to gauge the state's progress in covering the cost of those benefits and the System's ability to meet its obligations.

This section explains various types of actuarial information and measures of financial condition. It contains some discussion of the effects of the early retirement incentive (ERI) due to the initial retirements under that provision during the first month of the first window period. Additional effects will be measured in future valuations. Most of the discussion centers on employer contribution levels.

The System complies with the reporting requirements issued by the Governmental Accounting Standards Board in November 1986 under Statement Number 5: Disclosure of Pension Information by Public Employee Retirement Systems and State and Local Governmental Employers. This statement prescribes financial disclosure requirements for public employee retiree systems and includes a standardized measure of the pension benefit obligation. The System uses this standardized measure for determining funding requirements and for financial reporting. The actuarial terminology used in GASB Statement Number 5 is used consistently for all financial and funding exhibits.

Annual Actuarial Valuation

The purpose of the annual valuation is to measure the System's total liability for all benefits earned to date. The types of obligations are categorized in the table shown below. Net assets are subtracted from the pension benefit obligation to obtain the System's unfunded benefit obligation. Net assets divided by the pension benefit obligation yields the funded ratio.

An increasing funded ratio is one indicator of an improvement in financial condition. The TRS funded ratio (at book value) for FY 93 is unchanged from the FY 92 valuation.

Actuarial Valuation	Year End	ed June 30
(In Millions of Dollars)	1993	1992
Pension benefit obligation:		
Retirees and beneficiaries currently receiving benefits	\$ 7,511	\$ 6,338
Terminated employees not yet receiving benefits	308	283
Current employees:		
Accumulated employee contributions	2,710	2,503
Employer-financed vested	2,690	2,512
Employer-financed nonvested	5,267	5,023
Total pension benefit obligation	18,486	16,659
Net assets available for benefits	10,880	9,812
Unfunded pension benefit obligation	\$ 7,606	\$ 6,847
Funded Ratio	58.9%	58.9%

Sources of Contributions

There are three sources of contributions to the System's trust fund: investment income, member contributions and employer contributions. Collectively, the three sources affect the funded ratio and the solvency test (page 32). Individually, however, employer contributions are the most important indication of the employer's commitment to the long-term stability of the fund. (See Employer's Normal Cost plus Interest, page 30, and Reconciliation of the Unfunded Pension Benefit Obligation, page 31.)

Investment income depends on asset allocation and market conditions. For TRS, this source has been the most significant source of income for several years.

Member contributions (8% of salary) are specified under the Illinois Pension Code (40 ILCS 5/16-152) and are the most stable source of

Employer contributions are also specified under the statute. The State of Illinois is the "employer" in most cases, although contributions may also come from federal sources. The state, which should be the most significant source of TRS income, has never complied with statutory funding requirements and uses the amounts due the five state retirement systems to support other state programs. Members, however, must comply with statutory requirements.

Pension Funding Task Force.

TRS will be an active participant in a special task force on state pension funding and benefits. The task force, created by Senate foint Resolution 44 in 1993, is charged with recommending to the Governor and the General Assembly methods of resolving the unfunded liability of the state pension systems. The proposals of this task force are likely to attract considerable attention over the next year.

Retirement benefits earned during employment are part of the payroll expense for each employee. Sound budgeting practices should be followed so that when an employee retires, the accumulated fund is sufficient to cover the cost of the benefits payable to that employee. The obligation for that employee's benefits should not be passed on to future administrations or taxpayers. If state contributions remain level, the System's actuaries estimate the System would be insolvent by 2014. The state constitution would require current state revenues to be used to pay benefits (approximately \$3 billion annually by the time of insolvency).

Senate Bill 95

On August 23, 1989, Public Act 86-0273 (SB 95) was enacted and provides for amortization of the System's unfunded pension benefit obligation over 40 years after a seven-year phase in. Implementation of this legislation would provide financial stability for the System by funding benefits on a more rational and systematic basis than current practice; however, the state has never complied with these funding requirements, nor will it in FY 94. Note E in the Notes to the Financial Statements (page 21) shows the shortfall each year since FY 90. The difference between state funding levels and actuarial funding (even a phase-in to actuarial funding like SB 95) becomes larger the longer compliance is delayed. A lawsuit which would require the state to comply with the SB 95 funding requirements will be heard by the Illinois Court of Appeals.

Employer's Normal Cost plus Interest

The employer's normal cost is the amount needed to cover the employer's share of the cost of benefits earned by active members during the year. The interest payment is the amount needed to stabilize the unfunded pension benefit obligation. If the employer contributes normal cost plus interest and all of the System's actuarial assumptions (page 34) exactly match its experience, the unfunded liability would not change. However, the funding shortfalls under this measure in FY 93 and FY 92 have added over a half billion dollars to the unfunded pension benefit obligation each year. This is the single most important factor explaining the change in the System's unfunded benefit obligation. (See Reconciliation of the Unfunded Pension Benefit Obligation, page 31.)

Employer's Normal Cost plus Interest	Year Ended June 3				
(In Millions of Dollars)	1993	1992			
Employer's normal cost Interest on unfunded pension benefit	\$ 285	\$ 259			
obligation at beginning of year	548	512			
Total employer's cost	833	771			
Deduct employer contributions:					
State of Illinois*	265	232			
Federal and trust funds	17	15			
Total employer contributions	282	237			
Employer's cost in excess of contributions	\$ 551	\$ 524			

^{*} State contributions exclude minimum and supplemental benefits not included in actuarial costs.

Reconciliation of Unfunded Pension Benefit Obligation

The table below details the reasons the System's unfunded pension benefit obligation changed during FY 93 and FY 92. The amounts shown represent the differences between actuarial assumptions and experience. Although very large actuarial gains in investment earnings were experienced both years, even larger funding shortfalls occurred. (See Employer's Normal Cost plus Interest, page 30.) The other factors listed contributed to the net additions to the unfunded pension benefit obligation shown in the table.

Reconciliation of Unfunded Pension Benefit Obligation	(In Millions Year Ended June 3		
-	1993	1992	
Unfunded pension benefit			
obligation at beginning of year	\$6,847	\$6,394	
Additions (deductions)			
Employer cost in excess of contributions	551	524	
Plan amendments			
624 ERI retirements (PA 87-1265)	39	-	
Military service purchases (PA 87-0794)	-	2	
100 ERI retirements (PA 87-0014)	. 7	2 5	
Addition to health care reserves	22	22	
Changes in demographic experience due to			
FY 1989 - 1992 experience analysis	13	-	
Actuarial losses (gains) compared to experience			
Salary increases	-237	111	
Investment income	(351)	(408)	
New entrant loss	23	*	
Lower than expected mortality	21	*	
Purchases of prior service credits	26	*	
Other **	178	197	
Net additions	759	453	
Unfunded pension benefit obligation at end of year	\$ 7,606	\$ 6,847	

These items were included in the Other category in FY 92 and cannot be individually identified.

FY 93 actuarial gains and losses resulted from the following: average salaries increased by 9.1 percent, compared to the composite 7.4 percent assumption, and the actuarial investment return (including interest, dividends and realized gains) was 11.6 percent, compared to the 8 percent assumption.

[&]quot; For FY 93, "Other" includes:

a. 1,411 retirements occurred in May and June of 1992 but were not reported to the actuary until June 30, 1993.

b. Retroactive benefits for late retirees (50-100 late retirements annually).

c. Retroactive law change allowing change in disability retirement annuity to service retirement.

d. Fewer terminations of vested employees than expected.

e. Change in rate of benefit accruals from certified normal cost rate.

f. Retirement with reciprocal service credits.

g. Retirements with unused sick leave,

b. Retirements under the early retirement option.

i. Fewer disablements than expected.

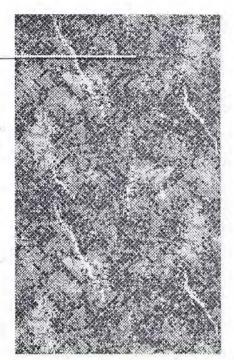

Historical Tests of Financial Condition

The Solvency Test exhibit compares the plan's net assets with the member's contributions, the amount necessary to cover the present value of benefits currently being paid, and the employer's portion of future benefits for active members. It measures the System's ability to cover different types of obligations if the plan were terminated.

Column 1 represents the value of members' accumulated contributions. Column 2 represents the amount necessary to pay participants currently receiving benefits. Column 3 represents the employer's portion of future benefits for active members. The columns are arranged in order that the assets would be used to cover certain types of obligations. In other words, employee contributions would be refunded first, amounts due for current beneficiaries would be covered second and the employer's obligation for active members would be covered last. Columns 1 and 2 should be fully covered by assets. The portion of Column 3 which is covered by assets should increase over time but has decreased since FY 89.

The Payroll Percentages table facilitates various types of comparisons. Showing the System's unfunded pension benefit obligation as a percent of payroll (Column 3) is a standard measure of the relative size of the unfunded pension benefit obligation. Generally, a system that is growing stronger will show this percentage decreasing. For TRS, however, this percentage is increasing. The actuarially required employer's cost under normal cost plus interest (Column 8) shows the amount the employer would need to contribute each year to cover its portion of the benefits earned by active members during the year and stabilize the System's unfunded liability. The largest portion of the increase in this percentage is due to the interest payment that would be needed on the unfunded liability. Employer contributions as a percent of payroll (Column 10) show that the System's contributions relative to payroll and actuarial funding requirements have dropped steadily over time.

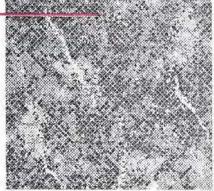

Payroll I	Percentages							(1	n Millions of	Dollars)

Funded ratio: Net assets divided by pension benefit obligation.

[&]quot;The System's actuaries conducted analyses for the four-year periods ended June 30, 1981, June 30, 1985, and June 30, 1992; and for the three-year period ended June 30, 1988. The effects of these analyses were reflected in the pension benefit obligation for the years ended June 30, 1982, June 30, 1987, and June 30, 1993, respectively; there was no effect on the pension henefit obligation resulting from the three-year period ended June 30, 1988.

Actuarial Assumptions & Methods

Actuarial Background Information

Inflation assumption: 4 percent per annum (included in investment return and earnings progression assumptions).

Investment return: 8 percent per annum, compounded annually.

Retirement age: Graduated rates for active members. Inactive members are assumed to retire at age 62. Sample annual rates of retirement per 1,000 participants for active members follow.

Age	Male	Female
55	97	97
60	270	180
65	365	330
70	1,000	1,000

Mortality: Active participants and nondisabled pensioners - UP 1984 Table, set back six years.

Disability: Sample annual rates per 1,000 participants follow.

Age	Male	Female
20	0.4	0.7
30	0.4	0.8
40	0.6	1.2
50	1.2	2.4
60	4.0	8.0
75	6.0	12.0

Separation: Graduated rates based on age and sex variations.

Earnings progression: Merit and longevity increases, adjusted for inflation. Approximates 7.4 percent per year to earliest date of retirement eligibility. Sample annual percentage increases follow.

Age	Male and Female	
20	9.7 %	
30	8.6	
40	7.5	
50	6.9	
60	6.7	

Actuarial Cost Method: Projected unit credit. Gains and losses are reflected in the unfunded pension benefit obligation.

Asset valuation method: Cost value.

Actuarial Assumptions

An estimate of the pension benefit obligation is obtained each year through the actuarial valuation. Actuaries make demographic assumptions (for salary and service credit), economic assumptions (for salary increases and interest rates) and decrement assumptions (for mortality and disability rates). These actuarial assumptions are used to make projections that will be used in the actuarial valuation.

The actuary constructs a set of assumptions based on the past experience of plan participants and the experiences of other groups with similar characteristics. After taking this historical view, the actuary looks forward to judge how costs incurred under the plan are likely to be affected by future events. A lengthy timeframe is involved because the projections include estimates for factors that will affect even young active members and their survivors.

Experience never coincides exactly with these projections. Differences that occur between assumptions and experience are called actuarial gains and losses. Each year, the actuary reconciles the differences between major actuarial factors and experience in the process of explaining the change in the system's unfunded pension benefit obligation. The actuary may also recommend changes in actuarial assumptions before the next experience analysis.

Experience Analysis

At least once every four years, the actuary conducts an experience analysis to determine how closely the assumptions reflect what actually transpired. A review for the period July 1, 1988, through June 30, 1992, was recently completed. As a result of this analysis, minor changes in assumptions were adopted by the Board of Trustees and used in the FY 93 valuation. The net effect of these changes was a \$12.5 million increase in the pension benefit obligation (an increase of less than 0.1 percent).

The changes in assumptions and their effects on the System's unfunded pension obligation are shown below:

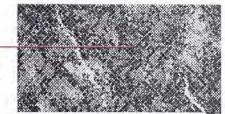

Revision in rates of mortality among active members	Millions \$ 22.0
Revision in rates of mortality among disability retirements	(9.6)
Extension of rates of disability retirement to age 60-69 (instead of normal retirement)	0.2
Net Increase in the Unfunded Pension Benefit Obligation	\$ 12.5

Actuarial Cost Method and Valuation

An important step in an actuarial valuation is the application of a cost method assigning portions of the total value of benefits to past, present and future periods of employee service. This allocation is accomplished by the development of normal cost and the pension benefit obligation. Normal cost is the annual cost of benefits earned by members during the year. The pension benefit obligation is a standardized disclosure of the present value of pension benefits and includes the effects of projected benefit increases.

There are several accepted actuarial cost methods. The actuarial cost method used by the System is projected unit credit. The normal cost for the year ending June 30, 1993, was 14.8 percent of payroll. Eight percent of normal cost was paid by the members' contributions. The remaining 6.8 percent was the employer's portion of the normal cost. The actual employer contribution was only 6.7 percent of payroll. Therefore, no payment was made on the unfunded pension benefit obligation.

The TRS Funding Summary below shows employer contributions in relation to statutory funding requirements (other than PA 86-0273) under the Illinois Pension Code.

TRS Funding Summary

1993	833	5	838	402	287	551	115

^{* 9.6} percent of member payroll - the amount required by Section 16-158 of the Illinois Pension Code.

The TRS Cash Flow Summary shows the difference between the sum of member contributions and employer contributions and benefit payments, refunds and current expenses. (For this purpose, other sources of employer contributions which do not count towards meeting the System's actuarial requirements are included.)

FY 92 was the first year that System expenses exceeded member and employer contributions-\$50 million of investment income had to be used to pay benefits and other expenses. In FY 93, the state's continued underfunding required the System to use \$75 million in investment income for this purpose. (A \$36 million non-cash expense resulted in a negative value for FY 90.) The use of investment income for expenses is particularly serious for a system like TRS because the state's failure to appropriate statutorily required amounts has made it very dependent on investment earnings. Earnings used to pay benefits cannot be reinvested to build a secure retirement trust fund.

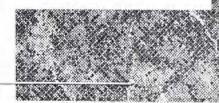

Cash Flow: Member and Employer Contributions Minus Expenses (Benefits, refunds and current expenses)

(In Millions)

System expense in FY 90 includes \$35.5 million in non-cash expense.

Membership profile

All certificated Illinois public school employees outside the city of Chicago are members of TRS. These members include full and part-time employees, subject to certain limitations as outlined in the "Plan Summary" on page 42.

TRS members are employed by 1,088 employers including public school districts.

System members do not contribute to Social Security; however, many earned coverage by that system through non-TRS employment. All TRS members hired after March 31, 1986, are required to contribute to Medicare.

As of June 30, 1992, the most current fiscal year statistics available, there were 126,220 TRS members, a 3 percent increase from the 122,793 members on June 30, 1991.

The average TRS member on June 30, 1992, was 43 years old. The average age of the member population has remained relatively stable for the past five years, although active member age had shown a steady increase since the early 1970s.

Fifty-four percent of the active member population was in the 35-49 age group during FY 92 compared to 45 percent of total membership in this same age group ten years ago. Despite this large percentage of educators moving toward retirement, there is a marked decrease in the number of teachers entering the field in the last ten years. During FY 83, 3.1 percent of the total membership were age 20 to 24. In FY 92, this age group composed only 2.2 percent of the total member population.

The number of active members who choose to work after age 55 has risen steadily in the past decade, from 10 percent during FY 83 to 12 percent in FY 92.

Contributions

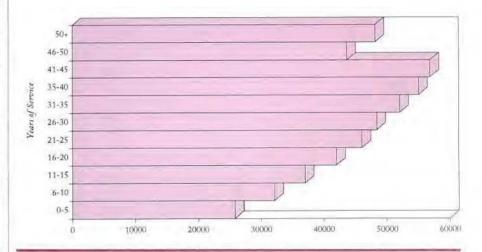

Active members contributed \$363 million as their required 8 percent of salary to the System, up 3 percent from FY 92.

The average annual salary for active members rose 5.3 percent from FY 91 to FY 92, from \$35,321 to \$37,193. Since FY 83, this figure has increased by

62.6 percent from \$22,877. Generally, the more years of service the member accrues, the higher salary he or she earns. Peak salaries averaging \$56,869 during FY 92 were earned by 47 members in the 41-45 years of service category, while those with under six years of service averaged \$25,882 annually.

Average Annual Salary

Full and Part-time members as of June 30, 1992

Member refunds

Members who withdraw from active service with the System may apply for a refund four months after the last day of teaching. The refund includes accumulated retirement contributions, exclusive of the 1 percent survivor benefit contribution, and accumulated interest.

The System paid 2,037 former members \$8.2 million in refunds of retirement contributions during FY 93. This is a decrease from the \$9.4 million paid in refunds in the previous year. The total number of refunds decreased 13 percent, from 2,353 in FY 92.

A refund of the 1 percent survivor benefit contribution was paid to 377 retired members in FY 93, down from 437 members who received this refund in FY 92. A total of \$1.7 million was paid for this refund, which is granted to retired members who do not have a beneficiary deemed a dependent under the Illinois Pension Code and who request the refund. Acceptance of this refund terminates the retired member's eligibility for survivor benefit coverage from the System.

Counseling services

The System maintains two offices, in Springfield and Lisle, to serve members throughout the state. During FY 93, the TRS offices received over 52,000 phone calls. In addition, staff members sent out nearly 175,000 letters and conducted office consultations with an average of 300 members monthly.

Individual retirement conferences are held around the state each year by the System's benefits counselors. During FY 93, 106 members attended these conferences. An additional 6,901 members attended group meetings held by TRS around the state.

A series of guides designed for members, retired members and employers is published annually by the System. In addition, bulletins and newsletters are mailed to these audiences with current information concerning benefits, legislation and System administration.

Individual member statements of account are mailed annually to all members. These present up-to-date information on each member's TRS contributions and service.

Benefits Information

As a trust fund for its members and annuitants, TRS provides retirement annuities and disability and survivor benefits. The System also administers the TRS Health and Prescription Drug Insurance Plan. These benefits are in the System's plan as outlined in the Illinois Pension Code (40 ILCS 5/16-101 et seq.

Plan design

The TRS plan is designed to pay specific benefits in amounts that are set forth by Illinois law. This design may only be changed by action of the Illinois General Assembly and the Governor. Benefits cannot be modified without a change in the TRS plan design.

Retirement benefits

During FY 93, the TRS plan provided retirement benefits for 43,195 annuitants. The average benefit of \$1,256 was up 7 percent from \$1,174 on June 30, 1992.

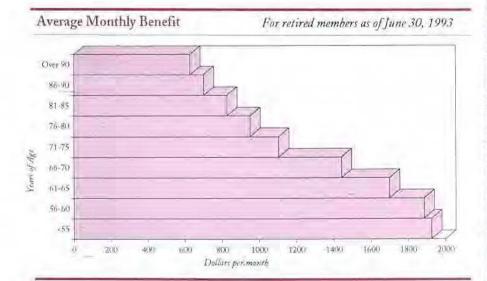

TRS Annuitant Profile		
Average Age:		72
Average Yeara of Service:		26.77
Average Annuity:	\$	1,256
Average Original Annuity:	S	1,001
Average Years in Retiremen	it:	12.3

Overall, the System paid \$633.7 million in retirement annuities in FY 93, up 11 percent from FY 92. The number of annuitants receiving benefits rose during FY 93, up 1,048 from June 30, 1992. The System offers anyone receiving a monthly benefit, including retired members and survivor benefits recipients, electronic funds transfer of TRS annuity payments with participating financial institutions. At the end of FY 93, 34,007 of the total 48,922 benefit recipients were participating in the direct deposit program. This represents 69.5 percent of all benefit participants.

Although the annuity for those members in retirement less than five years is higher than average at \$1,781, this amount drops to below the overall average after ten years in retirementmembers retired between 11 and 15 years receive an average benefit of only \$1,111, below the \$ 1,256 average.

Average annuity also decreases as the retired member's age increases. Retirees aged 55 through 59 receive an average annuity of \$1,884 monthly, while those age 80 and over receive an average of only \$759.

Of the 2,450 TRS members who retired during FY 93, the average age was 60, average service, 27.8 and the average monthly benefit, \$1,848. These members retired with an average salary of \$38,493.27, a slight decrease from FY 92 retiree salaries.

Early Retirement Option

Members who are 55 or older and have 20 or more years of service may choose the early retirement option to avoid a reduction in their annuity if they retire before earning 35 years of service. Enacted in 1980, this option allows the member and employer to make a onetime contribution to TRS and avoid a reduced annuity. Current law calls for an end to the early retirement option after June 30, 1995. A nondiscounted annuity is granted to members with 35 or more years of service with no contributions required from either the member or the employer.

Use of this early retirement option decreased in FY 93 due to the introduction of the early retirement incentive.

Early Retirement Incentive

The early retirement incentive, made available through Public Act 87-1265, allows members who are at least 50 but less than 55 years of age with at least 15 years of service or age 55 or older with at least five years of service to purchase up to five years of additional service and acquire an age enhancement of an equal number of years. The law specifies two window periods for election and retirement under the incentive, the first during FY 93 and the second during FY 94 although a smaller percentage of retirements may occur in FY 95 through the employer's right to delay some retirements.

As of June 30, 1993, 7,638 members had elected to retire under ERI. Of these elections, 2,824 had submitted retirement applications

ent Optio	on		As of June 30
ents ERO	ERO % of Total	Average Payment	Average Salary

627	29.9	8,339	40,746
631	24.8	8,456	42,291

Disability benefits

Disability payments of \$9.8 million were made by the System during FY 93, up 7.7 percent from FY 92. A total of 1,017 disability benefits were paid to members whose average age was 55 and average years of service was 16.8.

There were 348 new disability benefits paid during FY 93 with an average benefit of \$ 1,198. Of these new claims, 32 percent were for pregnancy-related disabilities, 14 percent for cancer and tumors, 5 percent for mental illness, another 5 percent for heart and circulatory problems, 5 percent for dislocated and ruptured disks and 1 percent for AIDS. Other disabilities accounted for the remainder of the claims.

Survivor benefits

Average monthly survivor benefits of \$484 were paid to 5,642 survivors of TRS members and annuitants in FY 93. The average age of the deceased was 73. There were 552 new claims during the year for monthly benefits and the average monthly benefit for FY 93 claims was \$595. Total payments rose from \$30.7 million in FY 92 to \$34.4 million in FY93.

Health insurance

Since 1981, the System has provided health and prescription drug insurance. The plan, administered by Blue Cross/Blue Shield, is available to annuitants electing coverage. Annuitants may also enroll their dependents.

Coverage options

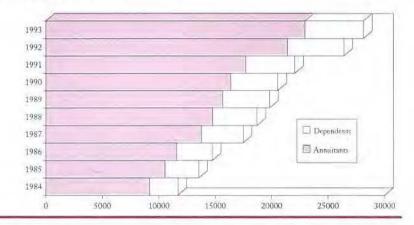

For annuitants and their dependents who qualify for Medicare, TRS provides Medicare supplement coverage. After the \$300 yearly deductible, the plan pays the balance of all claims that are reasonable and customary that Medicare does not pay. As of June 30, 1993, 16,167 members and 3,627 dependents were enrolled in this option.

Annuitants who do not qualify for free Medicare Part A coverage at age 65 may elect the Special Coverage Option. This option provides coverage for both hospital and physician services. It pays

Health Plan Enrollment

9,604

19.9

46,447

all claims that are reasonable and customary after a \$300 deductible and 80%-20% coinsurance of the next \$10,000 of covered expenses and 100 percent coverage thereafter. As of June 30, 1993, 1,291 annuitants and dependents were enrolled in this option.

Annuitants and their dependents under 65 are offered a major medical plan which provides coverage for both hospital and physician services. On June 30, 1993, 5,502 annuitants and 1,558 dependents were enrolled in this plan.

Premiums

The System pays 75 percent of the cost of the premium for participating annuitants; however, dependent premiums are the responsibility of the annuitants.

Reserve Account

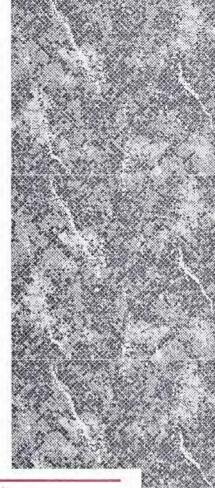

The System maintains a Health Insurance Reserve Account for the purpose of paying the System's 75 percent share for enrolled annuitants. On June 30, 1992, the reserve fund balance was \$74.5 million. During FY 93, the account was credited with the maximum allowable transfer of \$20 million plus \$6 million interest earned. Premium payments of \$37.5 million were charged to the account leaving a June 30, 1993, reserve fund balance of \$63 million.

For the second consecutive year, the reserve fund balance failed to increase—are sult of the \$20 million transfer limit, the recent increase to a 75 percent premium subsidy and increased premiums and enrollment.

TRS	Subsidy Payr	nents	
Fiscal	Year		
1981	109,689	1987	5,409,000
1982	627,000	1988	6,823,000
1983	1,503,000	1989	8,346,000
1984	2,412,000	1990	10,331,000
1985	3,094,000	1991	15,142,000
1986	4,800,000	1992	27,717,000
		1993	37,498,000

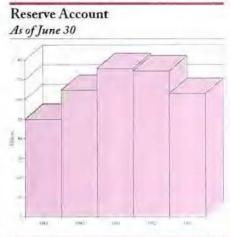

Under the Illinois Pension Code, the System can transfer up to \$20 million dollars from investment earnings into the Reserve Account annually. Interest accrues on the balance and the resulting balance is used to meet the System's 75 percent premium subsidy payments.

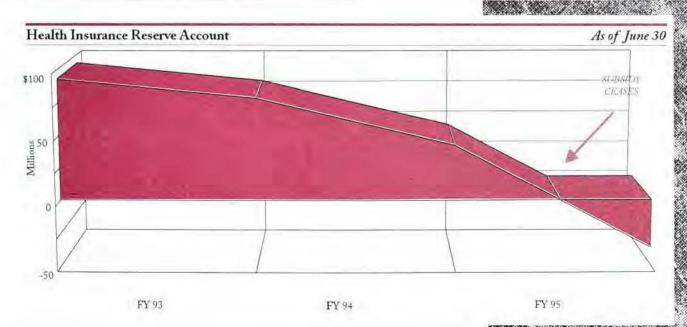

Continuation of this downward trend may result in insufficient funds as early as February 1995. The Teachers' Retirement System is actively encouraging the General Assembly to readdress this issue and to explore options to ensure continuing coverage to TRS annuitants.

Administration

The Teachers' Retirement System was created and is governed by 40 Illinois Compiled Statues beginning with Chap. 5, Section 16-101. A Board of Trustees, comprised of the State Superintendent of Education, four persons appointed by the Governor, four elected members of the System and one elected annuitant, is authorized to carry out provisions of the Article. This Board appoints an Executive Director responsible for the detailed administration of the System.

Revenue

Three primary sources of revenue for the System are contributions from active members, appropriations from the State of Illinois and investment income. The required member contribution rate is 8 percent of gross earnings, designated as follows: 6 1/2 percent for retirement annuity, 1/2 percent for post-retirement increases and 1 percent for death benefits.

Membership

Membership in the System is mandatory for all individuals certified under the provisions of The School Code of Illinois and employed in positions requiring certification in the public schools of Illinois (outside Chicago). Beginning July 1, 1990, TRS-covered employment includes all substitute and parttime teaching positions.

Service Credit

A member is granted one year of credit for 170 paid days but not more than one year during a fiscal year ending June 30. Subject to limitations, optional credit is granted for substitute or part-time teaching prior to July 1, 1990, out-of-system service, an official leave of absence, reduction in force, and military service and related educational training. Such service requires additional contributions. Up to one year of credit is also added at retirement for unused, uncompensated sick leave days established with former employers.

Disability Benefits

A member with at least three years of creditable service disabled while employed as a teacher or within 90 days of such employment may be eligible for benefits if two licensed physicians verify the disability. However, no benefit will be paid while the member is entitled to receive salary (regular or sick leave) from the employer. In the case of disability due to pregnancy, only one physician must verify the disability. Part-time and substitute teachers must work as teachers for at least 340 hours in either the school year in which the disability occurs or the preceding school year to be eligible for disability benefits.

Disability benefits are 40 percent of the greater of the contract salary rate in effect at the time the benefit becomes payable or the annual contract rate on the date the disability commenced. The member continues to earn service credit while receiving disability benefits.

A disability retirement annuity is available for members who are receiving a disability benefit. This benefit pays 35 percent of the salary used in calculating disability benefits or the amount computed by the retirement annuity formula, whichever is greater.

Occupational disability benefits are available to members disabled due to a duty-related accident or illness. This benefit pays 60 percent of the greater of the contract salary rate in effect at the time the benefit becomes payable or the annual contract rate on the date the disability commenced reduced by any amounts payable under a workers' compensation program. Service credit is earned during periods of occupational disability.

On January 1 following the fourth anniversary of the granting of disability, occupational disability or disability retirement benefits, the benefit increases 7 percent. Thereafter, the benefit increases 3 percent of the current benefit annually.

Death Benefits

Death benefits consist of a return of the member's accumulated contributions and the payment of survivor benefits.

Accumulated contributions are the member's contributions to the System plus the interest required by statute. Survivors of members receive a return of accumulated contributions. Survivors of annuitants receive accumulated contributions minus the amount received as retirement annuity.

Survivors of members are eligible for survivor benefits if death occurs while the member is employed as a teacher, during the first year following termination of employment, while on a creditable leave of absence, or while in receipt of disability or occupational disability benefits. Survivors of inactive members not meeting these requirements but with 20 years of service are eligible for survivor benefits calculated as though the member had been in retirement. Beneficiaries of annuitants who contributed to the survivor benefit program and did not withdraw those contributions are also eligible for survivor benefits.

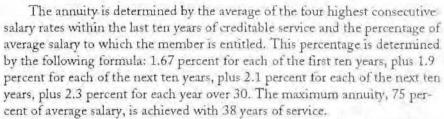

Survivor benefits are payable in one of two forms. A lump-sum settlement is available to dependent and nondependent beneficiaries. For active members, it consists of a cash settlement based on the final salary rate as a teacher. For retired members, the benefit is based on the greater of the higher annual salary rate within the last four years of service reduced by 1/6 for each year or partial year in retirement, survivor benefit contributions or \$3,000.

Monthly benefits are payable to dependent beneficiaries of annuitants and members with 1 1/2 years of credit and at least 60 days of creditable service during the 18 months preceding death. The System provides a 3 percent increase in the currently payable monthly survivor benefit on January 1 following the granting of the benefit for survivors of an annuitant and on January 1 following the first anniversary of the granting of the benefit for survivors of a member.

If a member retired or is retiring and has no spouse or eligible child, he or she may take a refund of actual survivor benefit contributions, waiving all rights to have survivor benefits paid to beneficiaries; however, designated beneficiaries remain eligible for a return of the member's excess accumulated contributions (if any) upon the annuitant's death. To restore eligibility for survivor benefits, the annuitant must return to contributing service for at least one year and repay the refund with interest.

Retirement Benefits

A member qualifies for a retirement annuity after attaining one of the following: age 62 with 5 years of service credit; age 60 with 10 years; or age 55 with 20 years. If retirement occurs between ages 55 and 60 with less than 35 years of service, the annuity will be reduced at the rate of 1/2 percent for each month the member is under age 60. A member age 55 with less than 35 years may use the early retirement option to avoid a discount for early retirement if retirement occurs before July 1, 1995, application for retirement occurs within six months of the last day of service requiring contributions, and the member and the employer both make a one-time contribution to the System. Substitute teachers must teach 85 or more days in a school term with one employer to be eligible for the early retirement option.

An actuarial calculation is used if a member has no service after July 1, 1947, or if it provides a greater benefit. This calculation is based on interest and mortality rate factors which are subject to change.

A member with fewer than five years of creditable service who taught after July 1, 1947, is eligible to receive a single-sum retirement benefit at age 65. The benefit is the actuarial equivalent of a life annuity consisting of 1.67 of final average salary for each year of creditable service. To be eligible, the member must terminate TRS-covered employment.

Post-Retirement Increase

The System provides 3 percent compounded annual increases in the age or disability retirement annuity for qualifying annuitants beginning the later of: January 1 following the attainment of age 61 or January 1 following the first anniversary in retirement.

Refunds

The System will refund a member's contributions provided the member has officially resigned from a position requiring System membership, has not been reemployed in such a position, and submits the refund application not earlier than four months after termination of employment. The refund consists of all retirement contributions made by the member excluding interest and the 1 percent death benefit contribution. When the member accepts a refund, he or she forfeits all credit with the System. The credit may be reestablished if the member returns to teaching in a position requiring contributions to the System for one year and repays the refund with interest.

TRS Health and Prescription Drug Insurance Plan

Annuitants and beneficiaries of the System and their eligible dependents may enroll in the TRS Health and Prescription Drug Insurance Plan. This partially subsidized plan covers hospital and physicians' medical expenses and prescription drugs.

Special Conditions

Any member convicted of a felony related to or in connection with teaching is not eligible for TRS benefits; however, that member may receive a refund of contributions.

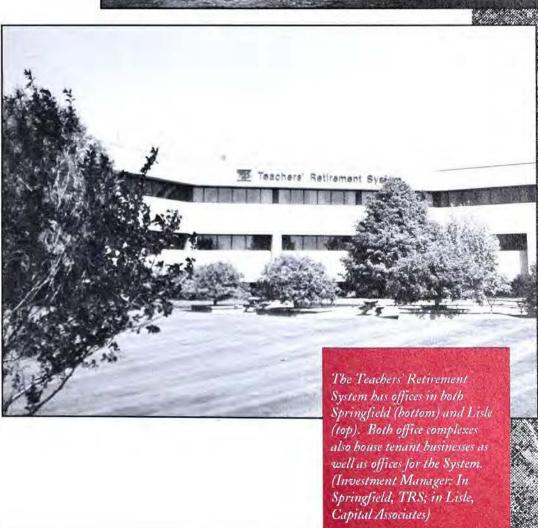

Conditions involving a claim for benefits may require further clarification. If any conflicts arise between material in this summary and that of the law, the law takes precedence.

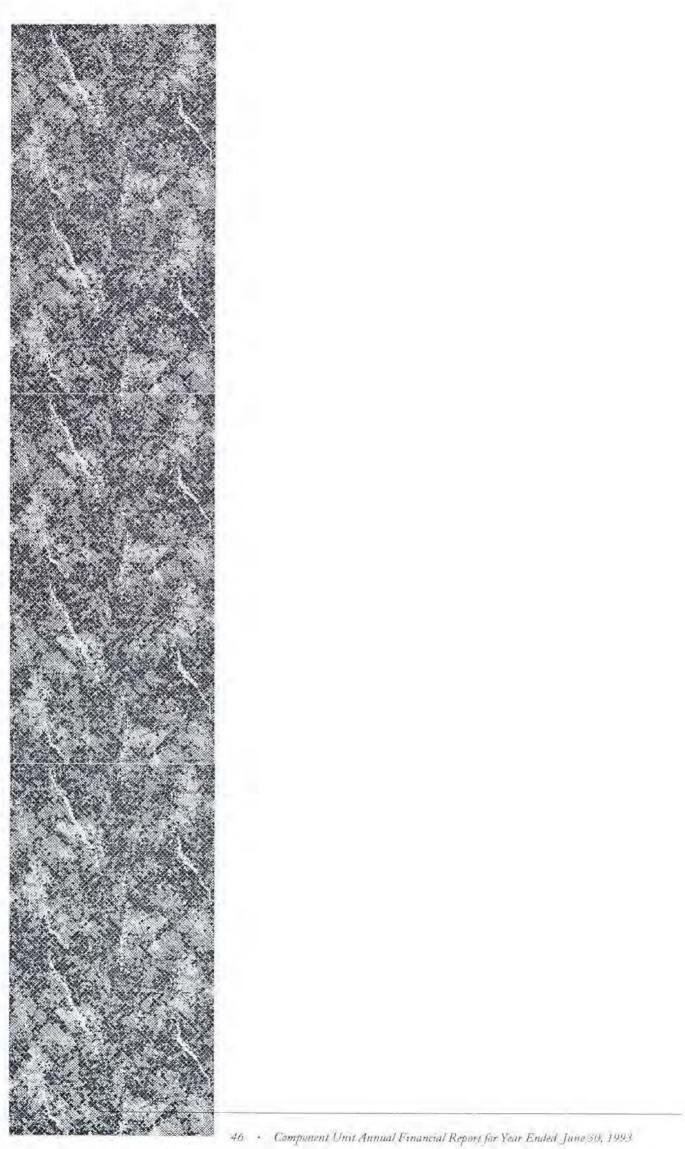

Continuity of Credit within Illinois

TRS is one of 13 systems included in the provisions of the Retirement Systems Reciprocal Act which assures continuous pension credit for public employment in Illinois.

Introduction

The mission of the Teachers' Retirement System, to provide retirement security for members, is facilitated by management of the trust fund's investment portfolio, which totaled \$11.7 billion at market value on June 30, 1993. The System serves as fiduciary for the members' trust fund and is responsible for investment of the fund under authority of the prudent person rule which establishes a standard that fiduciaries shall prudently discharge their duties solely in the interests of fund participants and beneficiaries. By permitting optimal diversification of assets within the fund, the prudent person standard has enabled the System to enhance control over fund risk and return parameters. The prudent person standard also permits the System to establish an investment policy based solely upon member characteristics, plan characteristics, financial requirements of the trust fund and a particular risk/reward tradeoff.

The System has established a longrange Statement of Investment Objectives and Policies for managing and monitoring the fund. The investment policy establishes the fund's investment objective, to provide the greatest possible long-term benefits to members of the System by maximizing the total rate of return on investments within prudent parameters of risk. The investment policy also defines the responsibilities of the fiduciaries with respect to the fund, the statutory investment authority under the prudent person rule, the level of acceptable risk, asset restrictions, investment performance objectives and the guidelines within which outside investment managers operate.

The System's investment performance objective is to achieve an annualized 3% total rate of return in excess of the rate of inflation over a long-term period of time. In addition, each asset class is expected to outperform various representative market indices.

The fund is managed by professional investment management firms based on statutory investment authority under the prudent person rule and investment policy guidelines adopted by the Board of Trustees. The System's staff coordinates and monitors the investments of the trust fund's assets and assists the Board of Trustees in the formulation and implementation of investment policy and long-term investment strategy.

Asset Class/Manager Composition

Asset allocation is a risk management process designed to construct the optimal long-term asset mix which achieves a specific set of investment objectives. Of all the components of investment policy formulation, asset allocation on a secular basis will have the most impact on long-term total rate of return. Consequently, the establishment of allocations across the major asset classes is the most important decision in the pension investment management process.

Diversification is the key to effective risk management. Large institutional portfolios, such as the System's, tend to be well diversified within the asset classes utilized. Therefore, although most investment managers of specific asset classes focus on security selection, specific securities held will not have nearly as much impact on total performance as will the overall level of particular asset class commitments.

Management of asset class allocations and diversification of investment approaches (active core, active specialty, index funds) has enabled the System to more effectively control the fund's risk/reward parameters.

Diversification by asset class, investment approach, and investment manager style provides the System with a greater expected rate of return while minimizing the risk of negative returns from adverse short-term changes in the capital markets.

At June 30, 1993, the System's asset class allocations and diversification by investment approach were:

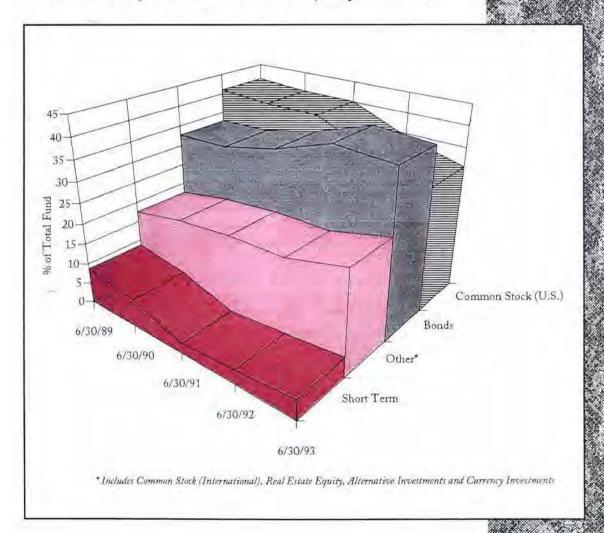

Percent of Total Fund								
Asset Class	Active	Index	Total					
Common Stock-U.S.	25.9	4.5	30.4					
Bonds	36.1	3.7	39.8					
Short-Term Investments	4.0	1.0	5.0					
Currency Investments	0.6	0.0	0.6					
Common Stock								
—International	8.1	1.0	9.1					
Real Estate	13.6	0.0	13.6					
Alternative Investments	1.5	0.0	1.5					
Total	89.8	10.2	100.0					

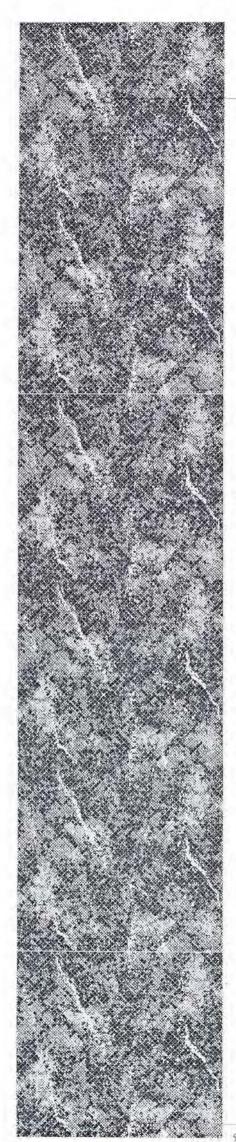

During FY93, the System's U.S. common stock holdings decreased to 30.4% of the total fund, from 34.2% a year earlier. International common stock allocations increased to 9.1% from 7.4% of the total fund, leaving fiscal yearend total common stock holdings at 39.5% of the total fund.

Bonds decreased to 39.8% of the total fund from 40.7% a year earlier. This was largely attributable to the positive returns of the bond managers in a falling interest rate environment, and the reallocation from bonds to real estate.

Real estate equities represented 13.6% of the total fund at fiscal year's end. This compares to 12.0% from the previous fiscal year's end.

The fund's five-year asset class allocation history is represented below.

The System has established relationships with investment management firms which utilize a diversity of management approaches. This policy tends to complement the diversification of asset classes. The managers have discretionary authority in the selection and retention of investments, subject to the provisions of the statutory investment authority and the Statement of Investment Objectives and Policies.

The System achieved a higher level of risk management capability during FY93 by continuing implementation of a long-term strategic plan designed to achieve a specific set of investment objectives. A globally diversified, multiple asset class, balanced-fund portfolio was designed in order to construct the optimal long-term asset mix. On June 30, 1993, the following external firms were employed by the System:

INVESTMENT RESULTS

Asset Class/Market Indices Returns

During FY93, international common stock, was the best performing asset class as represented by the Europe, Australia and Far East (EAFE) Index which returned 20.5%. U.S. common stock was the next best performing asset class as represented by the the S&P 500 Index and the Wilshire 5000 Index which returned 13.6% and 16.2% respectively. Domestic Bonds returned 12.0% as represented by the Salomon Broad Investment Grade (BIG) Index. Non-U.S. dollar bonds as represented by the Salomon Non-U.S. dollar bond Index, returned 8.0%. Short-term investments, represented by 91-day Treasury Bills, returned 3.2%. All major asset classes and market indices except real estate outperformed the 3.0% annual rate of inflation as represented by the Consumer Price Index (CPI).

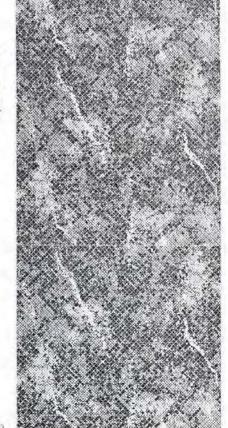

Asset Class Cumulative Return by Representative Indices

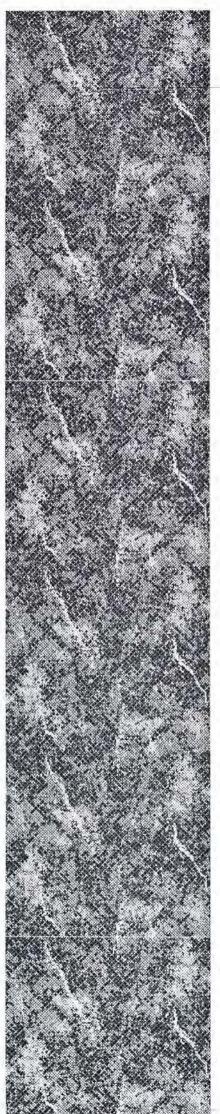

Source: Harris Trust and Savings Bank

Total Fund Results

The System's total fund time-weighted rate of return for FY93 of 11.6% was primarily attributable to the strength of the bond and stock markets. The System's total fund annualized three-year and five-year returns of 9.4% and 10.6%, respectively, continue to outperform the rate of inflation for these periods, 3.6% and 4.1%, respectively. The System's long-term objective, to exceed the rate of inflation by 3%, has been achieved for the three and five-year periods.

U.S. Equity Results and Profile

U.S. equity manager objectives are to achieve a total investment return 6% in excess of the rate of inflation and in excess of the Standard & Poor's (S&P) 500 Stock Index on an annualized basis over a three to five-year period or market cycle. In addition, the Wilshire 5000 Index is informally used as a total equity portfolio benchmark since it is more representative of the aggregate U.S. equity market. The 5000 stocks within the Wilshire 5000 Index, more so than the 500 stocks within the S&P 500 Index, are highly diversified across the various equity market sectors and industries, and have highly diversified financial characteristics and risk factors which ultimately influence the total return.

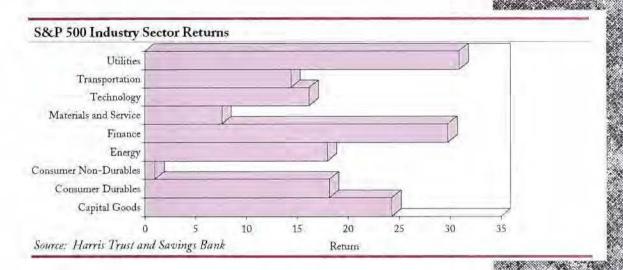

During FY93, the System's portfolio of U.S. common stocks returned 14.7% compared to the S&P 500 return of 13.6% and the Wilshire 5000 return of 16.2%. For three- and five-years, U.S. common stocks generated annualized returns of 11.8% and 13.5%, respectively, comparable to the S&P 500 returns of 11.5% and 14.2% for the three-year and five-year periods, respectively. The portfolio's U.S. common stocks performed sightly less favorably when compared with the three-and five-year Wilshire 5000 returns of 12.3% and 13.9%, respectively.

At fiscal year end, 39.7% of the System's investment portfolio was assigned to U.S. equity managers, including short-term investments, compared to 40.7% the prior fiscal year end. Within the U.S. common stock asset class, 5.3% of the asset class was allocated to an S&P 500 Index Fund. The remaining 94.7% of the U.S. common stock asset class was allocated to active and enhanced index fund investment manager relationships. During FY93, the market value of assets assigned to U.S. equity managers increased from \$4.258 billion to \$4.641 billion due to \$609 million of dividend income/appreciation and \$226 million of reallocations from the U.S. equity asset class to other asset classes.

Major sector diversification changes took place during FY93 in the portfolio's U.S. common stocks. The following listing summarizes these changes and also provides a comparison with the S&P 500 and the Wilshire 5000 Indices:

	Ju	ne 30, 19	93	Ju	June 30, 1992

All S&P 500 industry sectors provided positive rates of return during FY93, with Finance (29.8%), Capital Goods (24.3%), and Utilities (30.9%) the leading industry sector performers.

U.S. equity managers made stock selection adjustments to their accounts during FY93, as evidenced by the following comparison of equity portfolio characteristics with the S&P 500 and the Wilshire 5000 Indices:

International Equity Results

International equity manager objectives are to achieve a total annual investment return 6% in excess of the rate of inflation and in excess of the EAFE Index over longer time periods. During FY93, the portfolio's international common stocks returned 7.5%, as compared to a return of 20.5% for the 18 country foreign equity market EAFE Index.

The System's wide margin of underperformance against the benchmark EAFE Index is attributable primarily to the systematic underweighting of the Japan component of the international equity portfolio. The Japanese market substantially underperformed EAFE both in local currency and in U.S. dollar terms over the one-year period, while the TRS fund, maintaining its cautious view on Japanese equities, held only 32.6% of its foreign equities in Japan as compared to 48.4% Japan weighting in the EAFE Index.

The basket of EAFE currencies appreciated by 2.4% over the 12 months ended June 1993, which increased a 18.1% EAFE return in local (foreign) currency terms to 20.5% in U.S. dollar terms. The System's currency exposure managers also contributed to the excess return above the EAFE Index. At fiscal year end, 10.5% of the asset class was allocated to an EAFE Index Fund. The remaining 89.5% of the asset class was allocated to active managers. During FY93, the market value of assets assigned to international equity increased from \$904 million to \$1.202 billion due to \$102 million of market value appreciation and \$196 million of reallocations from other asset classes.

Alternative Investments Results

Alternative investments returned 5.7% during FY93. A representative alternative investments index is not available for relative performance comparison. Over the long term, however, and as a result of its higher risk orientation, alternative investments is expected to provide annualized returns over 10% in excess of returns provided by the S&P 500 and Wilshire 5000 Indices. On June 30, 1993, the System had a market value of \$250 million invested in six venture capital limited partnerships and one farmland partnership.

Fixed Income Results and Profile

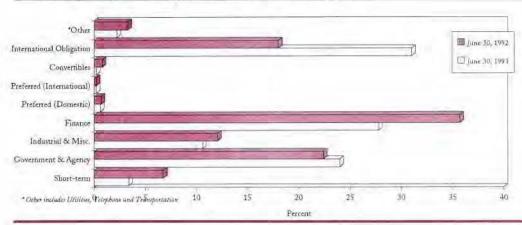

Fixed income manager objectives are to achieve a total investment return 2% in excess of the rate of inflation and in excess of the bond market, as measured by the Salomon Broad Investment Grade (Salomon BIG) Index, on an annualized basis over a three to five-year period, or a market cycle. During FY93, the System's bond portfolio, including all fixed income instruments with maturities greater than one year, generated a 13.7% total return, compared to the 12.0% return of the Salomon BIG Index.

The total funds under management by fixed income managers, including short-term investments, generated a 13.5% total return during FY93. For a three-and five-year period, bonds generated 13.8% and 12.5% annualized returns, respectively, as compared to 12.3% and 11.5%, respectively for the BIG Index. During FY93, the market value of total assets assigned to fixed income managers, including short-term investments, increased from \$3.709 billion to \$4.083 billion due to \$493 million in interest income/appreciation and reallocation of \$119 million from the bond asset class to other asset classes.

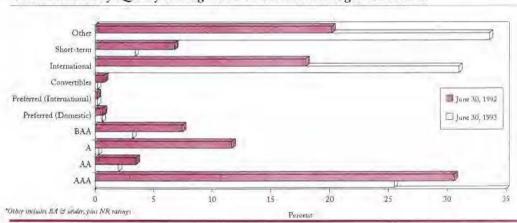

Fixed income assets invested in the international marketplace comprised \$1.231 billion of the \$4.083 billion market value of total assets assigned to fixed income managers at fiscal year end. The System's international fixed income managers returned 14,1% in fiscal 1993, versus the benchmark Salomon Brothers Non-U.S. Dollar Bond Index, which returned 8.0%.

The exhibits on the following page reflect changes made within fixed income manager portfolios during FY93 with regard to diversification by issuer type and quality ratings, as well as the underlying bond portfolio characteristics (excluding short-term investments) primarily affecting total return.

Real Estate Equity Investment Results

Real estate equity investments made by the System's four closed-end fund managers and five separate account managers returned -0.5% during FY93. The income component of the total return was 5.2%, while capital depreciation accounted for -5.7%.

The closed-end funds' total return of -2.5% underperformed the -0.3% total return of the separate accounts. Over the long term, the real estate equity investment objective is to achieve a total investment return 6% in excess of the rate of inflation. During FY93, the market value of assets assigned to the System's real estate investment managers increased from \$1.293 billion to \$1.599 billion. This increase resulted from \$86 million in income/reinvested income, \$324 million of reallocations from other asset classes to the real estate asset class, and a reduction of \$104 million for market value depreciation. The System will continue to progress toward a 15% asset allocation target for the real estate equity asset class over the next one to two years.

0.000

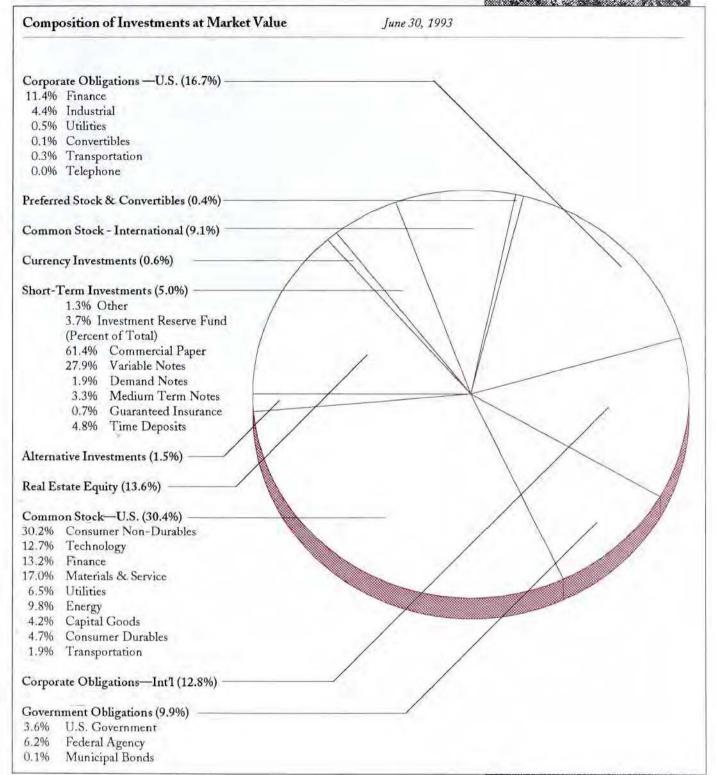

Short-Term Investment Results

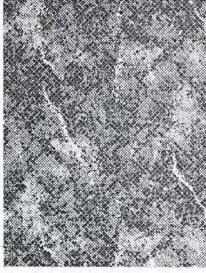

The investment management firms use discretion in allocating funds to short-term investments as part of their asset allocation strategies within the respective asset classes. Managers confine portfolio investment to typical short-term investments, such as U.S. Treasury Bills, certificates of deposit, bankers acceptances and commercial paper, and commingled short-term investment funds.

As an asset class, the System's short-term investments generated a total return of 4.3%, during FY93. For the five years ended June 30, 1993, short-term investments returned 5.5%, underperforming the 13.5% return of U.S. common stocks and the 12.5% return of bonds.
