Subject: Policy Statement for Auburn Dam Proposed Revocation Hearing

Jul 8, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mrs. tami africa
3858 H St

Jul 8, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

It is time to align water rights with reality. The water rights for

the Auburn Dam should be assigned to other, now recognized issues, such as water for the environment. The environment needs more water to protect our salmon runs and endangered species. Please remember that the Bay Area is one of the top ten global "hotspots" for endangered plants, fish, and animals.

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project.

Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. If you have ever seen the American River in the vicinity of the proposed dam, then you know what a magnificent river it is. When I

fish there, I almost don't care if I catch any fish; the river is truly beautiful, and even though it is not pristine, it remains inspiring. I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mr. Gabriel Thoumi

P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Dr. Daniel Silver

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Ms. Sarah Richmond

Dear Ms. Doduc,

I am a Professional Geologist in California and used to live in Auburn (2001-2003). I have visited the site of the Auburn Dam many times. It

is an extremely unstable location for a dam. The bedrock is composed of weak metasediments and there is a real chance of significant earthquakes in the future.

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mr. Carroll Nast

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

I have personally visited the American River many times to paddle both the North Fork and the South fork. I have also visited the city of Auburn and enjoyed it's small town atmosphere. Revoking the water rights would be a step in the right direction. We don't need an Auburn dam.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mr. Rick McDaniel

I am a life-long boater and nature lover. This Dam would be a true environmental disaster. Sportsmen (and women) come from the entire globe to enjoy California's few remaining rivers. The River is worth more than a Dam. We GIVE A DAMN! (PARDON THE PUN). It is time to put John Dolittle in jail for his corruption, and its time to recind the whole idea of an "Auburn Dam". It was a tragedy to Dam the Stanislaus. THE WORLD CAN NOT AFFORD TO LOSE THE AMERICAN RIVER. I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

As California faces the potential of long term reductions in snowpack and changes in water delivery/storage capability in light of global warming, it is imperative that we look forward rather than backward in making major water infrastructure decisions. Water is limited now and will likely be more limited in the future. Therefore, we have to embrace solutions that fundamentally reduce demand as our primary option. That means investing in conservation instead of new storage. Many studies, including those circulated by Friends of the River, show that investments in conservation are a far more efficient use of water infrastructure dollars.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Ms. Carol Kuelper
3111 California St

Jul 8, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I DO NOT support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will be taking future options off the table that we may well need as California's population heads to 60 million people in the future. Futher, indications are that the Sierra snowpack may melt sooner each season necessitating further water storage.

If we don't expand water storage options, along with conservation, I fear that this will result in the loss of water to California's croplands and a commensurate decrease in agricultural production. I

would not like to see this as I value our ability to feed ourselves and would not want to see us put ourselves in the same situation with food that we currently have with oil. I urge you to consider future needs as you make your decision!

Sincerely,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Ms. Sandra Hiser

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. I have used the American River as a recreation and fishing site for many years and to lose that opportunity would cause me much distress.

The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated with this project, we can finally move on to using this water for truly beneficial purposes. I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Jul 9, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I, Barbara Hernesman, support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. By revoking these permits, it will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future.

Points not to be taken lightly:

The seismic danger of a large multi-use dam on the American River has been scientifically proven. The possible dam would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well.

These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated with this project, we can finally move on to using this water for truly beneficial purposes.

Subject: Policy Statement for Auburn Dam Proposed Revocation Hearing

Jul 9, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mr. Robert Frescuras

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project.

I am one of the many people who use the river recreationally. I see the next generation becoming more and more "indoor" people and I think we need to keep beautiful outdoor places alive or risk a vicious circle in which we lose valuable opportunities for future generations. By revoking the unused water rights permits associated with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Subject: Policy Statement for Auburn Dam Proposed Revocation Hearing

Jul 8, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Ms. Patricia Davis

Jul 9, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

Having spent years bike riding, hiking, picking blackberries, and

exploring in the Auburn Recreation Area, I would argue that the area is a much greater resource without the dam than it would be with it, especially since it promotes relatively low-impact, low energy use recreation (and there are plenty of other reservoirs nearby for those

who want to use their powerboats) and preserves some wonderful foothill habitat that can be enjoyed by so many people.

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

Dear Ms. Doduc,

I support the Water Board's proposed revocation of the water rights permits held by the Bureau of Reclamation for the Auburn Dam Project. Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future. Revocation will also help bring existing allocations in line with existing uses.

A large multi-use dam on the American River would drown 50 miles of river canyon visited by more than a million Californians annually for outdoor recreation. The dam would also destroy the river's rich environmental and cultural resources as well. These water permits have been held by the Bureau for over 35 years without action. Auburn Dam continues to have no financial support, insufficient legislative support, and because of seismic safety and environmental concerns, as well as inflating costs, is certainly not supported by most Californians. By revoking the unused water rights permits associated

with this project, we can finally move on to using this water for truly beneficial purposes.

I support the proposed revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mr. Brad Martin

Subject: Policy Statement for Auburn Dam Proposed Revocation Hearing

Jul 8, 2008

Ms. Tam M. Doduc
P.O. Box 2000
Sacramento, CA 95812-2000

Dear Ms. Doduc,

I strongly encourage you to support the Water Board's proposed revocation of water rights permits held by the Bureau of Reclamation for the Auburn Dam Project.

Revoking these permits will allow the water to be put to true beneficial use and will help ensure that the outstanding natural resources of the American River are protected for the future.

It has been decades since plans for the Auburn dam were initially dismissed as untenable. Earthquakes, environmental destruction, and a ballooning price tag (now estimated at \$10 billion!) prompted Congress to repeatedly reject authorization of the dam in the 1990s, and no new rationale or technology has revived it.

The era of big dams is over. Recognizing this, the Water Board proposes to revoke the water permits for the dam so that the water can be used to support the American River's outstanding fish, wildlife, and recreation values.

The Bureau has held the water permits for over 35 years without action. Auburn Dam continues to have no financial support and insufficient legislative support. Because of seismic safety and environmental concerns, as well as inflating costs, is not supported by most Californians.

I urge the revocation of permits 16209, 16210, 16211, and 16212 currently held by the Bureau of Reclamation.

Sincerely,

Mr. Donald Bartlett
