From the Publisher

Dear IMPD User:

Once again, Billboard is pleased to send you a copy of the 1988/89 edition of the **International Manufacturing & Packaging Directory**. The IMPD is compiled for people responsible for taking a music recording and/or a video film through the manufacturing and packaging process. Our goal is to provide you with a complete reference tool that simplifies the location of vendors and speeds the "process" of connecting you with the companies that can help you improve your business.

This is our second edition under this title (the directory was previously published under the name: Audio/Video/Tape Sourcebook). And over the past two years, we have made a number of changes, and I suspect we will continue to make changes in the future in a constant effort to improve the usefulness of this directory.

- Early this year we completely re-equipped our Nashville Directory Central operation with new and more powerful computers.
- In 1988, we opened a European data (listing) compilation center in Europe. This operation is personned by a multilingual staff and is significantly improving the quality of our international listings.
- Last year we added a new box-listing service, allowing small and new companies a low-point ad entry. This feature has also helped by breaking up the text of the directory, making it an easier-to-use reference tool; also, we are told it has helped IMPD users find new and improved processes and components for their products.

Compiling directories is never an easy task. You never get updates from all of the companies queried, and there is always a timing problem between changes in the marketplace and the two months it takes to compile, typeset, design, print and distribute a directory. So, it's at this point in these opening remarks that we always request users and advertisers alike to keep in touch with our Nashville Directory Central operation with regard to any and all listing errors or changes that they may be aware of. Throughout this directory, you will find the telephone number and address that may be used to advise us of these changes.

Lastly, I invite you to write to me with any recommended changes for next year's editions. We want to make sure the IMPD is serving your needs.

Happy referencing, and thank you.

Sincerely,

John Babcock, Jr.
Directory Publisher

U.S. Savings Bonds
guarantee
investment growth...

The employees at AT&T keep their future plans on target when they rely on the Payroll Savings Plan.

James Rodgers — "I've been buying bonds for 13 years and think that Savings Bonds are an excellent way to save. My eldest daughter will be starting college very soon and the bonds I've saved will help finance her education."

Irene Butryn — "I have five grandchildren and I have been purchasing six bonds per month, one for each grandchild and one for myself, since 1974."

Peter Cirillo — "I find that Savings Bonds are a convenient kind of savings and they build up very quickly and, when I need extra money they're there."

AGFA...Always the best choice.

The audio video professional—whether in production or duplication—demands the highest in quality coupled with the latest in technology.

Faced with a myriad of competing magnetic tape products, the professional must base his decision on **quality, reliability, consistency** and **technological superiority**. Having done this, the choice becomes obvious...AGFA.

AGFA is the “best choice” because we care about the needs of the audio video professional. As a tape manufacturer supplying all segments of the industry—production and duplication in both audio and video—we are attuned to these needs.

Our concern for quality matched with our technical expertise make AGFA magnetic tape products the best choice for the audio video professional.

THE SPEED OF SOUND

Fast Turnaround. Technidisc's superb quality metal mastering technology and robotic production ensure the fastest turnaround time in the industry. Our customer service representatives will schedule, monitor, and ship CD's on your timetable.

State-of-the-Art Capabilities. Our engineers designed and developed the systems and procedures used in the manufacture of the Technidisc CD. From order entry, through sophisticated computerized production management and quality control, to efficient packaging and shipping, Technidisc offers complete inhouse CD capabilities.

11 Years of Optical Disc Experience.

Technidisc has been deeply involved in the research and development of optical discs since 1976. We are one of the few manufacturers of videodiscs in America. All of our production systems are the end product of years of patient development. The result is competitive pricing, brilliant quality, and unmatched turnaround. Please call us today to find out how Technidisc can serve your CD needs.

Competitively Priced Audio Cassette Products.

For years we've been known as the leader in providing CØ cassettes and boxes to America's recording and blank load industries. Among our latest offering is the clear sonic and "high-tech" clear five-screw CØ cassettes pictured above. The internal design of these cassettes provides excellent azimuth and tracking. The external cosmetics make these cassettes look as good as they work. Lenco also offers soft poly Ampex style and Norelco display boxes. And, like all Lenco products, these are available from distribution warehouses in Los Angeles, Dallas, Nebraska, Atlanta and New York.

Lenco guarantees the finest competitively priced audio cassette products available, delivered where and when you need them. Call or write for prices and samples and see for yourself why we're the leader.

Bullets. Targets. And Dynamic Range.

DYNAMIC RANGE is the spread between maximum output level (MOL) and noise (tape hiss). It is a major criterion of tape quality because it shows the true capacity for music. Tapes with high output and high levels of tape hiss are really no better than low output tapes with low noise. It's the difference between output and noise that matters.

Take your best shot.

Everyone's looking for a bullet—a hit that shoots to the top of the charts. Because bullets mean sales and airplay. And bullets make stars of everyone involved.

But talent and hard work alone won't get you that bullet. Because in the end, you're only going to sound as good on cassette as the tape you use. So reach for the best tape you can lay your hands on.

Reach for the stars.

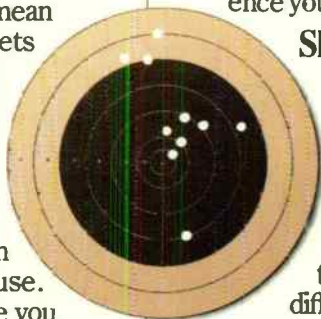

Reach for BASF Chrome. It's the tape that sets the standard. The tape that gave the pre-recorded cassette its badge of high fidelity. Because of its unique magnetic properties and complete freedom from the physical deformities that plague other magnetic

particles, only BASF Chrome can offer both crystalline high

© 1986 BASF Corporation Information Systems, Bedford, MA

frequencies and an astoundingly low level of tape hiss—with no compromise between the two. For a difference you can hear immediately.

Shots heard 'round the world.

Nothing brings out the clarity, the power, the subtlety of musical talent like BASF Chrome. And that BASF Chrome

difference is why as many as 40% of the top 10 pop albums have had cassette releases on BASF Chrome.

Chrome on the range.

The chart shows the dynamic capability of tapes at critical frequencies in the musical spectrum. Dynamic range is the room available for music between the limits of tape distortion and hiss. The more room the better. And over the full musical range, BASF Chrome is obviously—and audibly—superior to even the most highly acclaimed alternatives. BASF Chrome tape comes closest to the original studio master.

A choice of ammunition.

If you're aiming at the premium ferric or voice categories, BASF provides a tape for your best shot. BASF LHD delivers high output levels with minimum distortion or noise for the best ferric reproduction. And LNS is a voice grade tape so good it qualifies even for non-critical music.

So give it your best shot. Dial 1-800-225-4350 (East and South) or 1-800-225-3326 (Midwest or West). BASF has a bullet with your name on it.

WHEN RECORDING IS WHAT YOU DO, ONE TAPE IS TRUE

Whether it's your job to capture all the sound. Or focus on just the right visual. You need quality recordings. And one name in the world of recording stands true. 3M.

Because we stand by you — with the largest support force in the field. And stand behind you — with some of the most advanced research in the industry.

All to keep our standing — as number one in the world of the pro.

Supporting
the dream.

The R-DAT Revolution is Heating Up!

We're ready for it. Are you?

With its new concept, new format, and new profit potential, R-DAT is primed for market-wide impact. So the time to position yourself for front-line recording action is now. It's an extra competitive edge that duplicators can add at little expense... an edge with business benefits as crystal-clear as digital audio tape's incredible master-to-master sound.

What's more, as a full line supplier of R-DAT products, DIC Digital makes R-DAT readiness easy. With our complete selection of R-DAT

pancake reels and cassettes in 46-, 60-, 90-, and 120- minute formats, you'll be prepared to master all the new profit possibilities.

2 WAYS TO DUPLICATE YOUR MASTER AUDIO TAPE FOR DEMOS OR RETAIL SALES

AUDIO CASSETTES:

Eva-Tone is a full-service supplier, offering duplication from analog and digital masters, labeling, packaging, additional printing and complete mailing services. Write or call for your free copy of "Cassette Talk," our newsletter complete with information, specs, layout sheets and prices.

SOUNDSHEETS:

Use these low cost, thin, flexible vinyl recorded discs as audio pages in magazines, as direct mail inserts, as handouts at concerts or trade shows, or even as retail products. Write or call for your free copy of our Soundsheet Idea Kit, complete with information, samples, specs, layout sheets and prices. Then send your analog or digital master.

PRINTING, PACKAGING & MAILING:

Ask your Eva-Tone Representative about our commercial printing and mailing services, too. We just may be the full-service promotional supplier you've been looking for!

**EVERY MONTH, OVER
2,000,000 PEOPLE
IN THE WORLD
LISTEN TO
OUR TAPES
— WITH
PRAISE...**

Harmonic Hall is the leading audio cassette duplication company in the Far East. The production capacity is over 2,000,000 tapes per month, and still growing...

Because what people get are impeccable sound quality and excellent services at a competitive price. We have the most advance equipment and highly efficient and experienced engineers and in-house team.

Whether your tapes are musicals, self-taught program cassettes, or programmed tapes for industrial use, you are guaranteed the finest and exacting quality.

In addition, you can choose from a reservoir of cassette labellings and packagings...

WHEN YOU "PREMIERE"
YOUR NEXT PRODUCTION,
DON'T TRUST YOUR DUPLICATION
TO JUST ANYBODY...

THEY DON'T.

Premiere Video treats each duplication project as a major production. We're a leader in high quality video duplication, packaging, warehousing, and complete order fulfillment.

Our experienced production staff can play "starring roles" in the success of your releases, improving profits by eliminating costly problems while providing responsive service with competitive pricing.

For more information, call Larry Bennett or Michael Hartman
Toll-Free at 800/248-6646
or 313/464-4650 in Michigan.

DISC OR DAT ?

With the State-of-a-Higher-Art, Technetronics has established a reputation of excellence in Compact Disc manufacturing.

And now, Technetronics has become a one-stop digital manufacturer offering Digital Audio Tape replication.

SIMPLY THE FINEST
COMPACT DISC IN THE UNIVERSE...
GUARANTEED.

NOW YOU CAN HAVE BOTH
Technetronics

The Standard of Excellence in Digital Replication
CD/CDV/CD-ROM

P.O. Box 496, Matlack Industrial Park, Suite 300,
201 Carter Drive, West Chester, Pennsylvania 19381-0496
215/430-6800 Fax: 215/430-6804

For 12 months we've quietly built a worldwide network. Now, we're turning up the volume.

When we started Disctronics, our aim was to become the world's leading, independent CD manufacturer.

Which we achieved in 12 months.

So now, our network is in place, our annual production capacity is 65 million discs and we're the third largest CD manufacturer in the world.

Mainly because we realised right at the start that our clients would always want just one thing.

The right discs, in the right place, at the right time, at the right price.

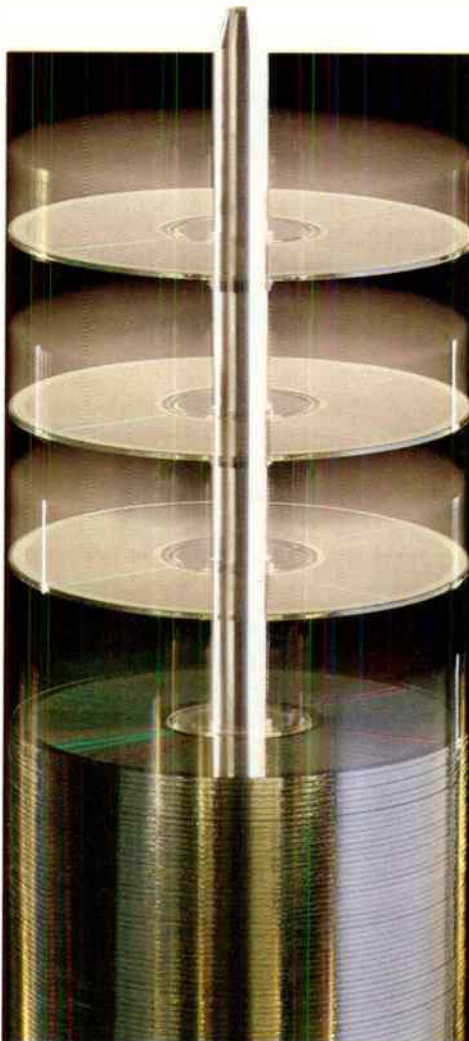

That's why we have 4 fully compatible plants. At Huntsville in Alabama, Anaheim in California, Southwater in England and Melbourne in Australia.

Full plant compatibility means that, if for any reason we can't produce your discs at the Disctronics plant near you, we simply shift production to one of the others.

In 24 hours.

It also means you have the option of simultaneous, worldwide releases.

All 4 plants are linked to each other

and our client service offices by a computer network, supporting the constant traffic in master tapes, stampers, discs, printed parts and retail packaging.

All 4 have in-house mastering facilities.

And all 4 have quality standards way above CD Audio's needs, because they produce CD-ROM as well. (And CD-ROM discs require enormously high standards.)

And you should also expect high standards from our client service.

Because we know we'll only remain the world's largest independent, as long as we live up to your expectations.

It's easy for you to prove we can.

Just call Cal Roberts in Los Angeles, (818) 953 7790, Michael Rosenbaum in New York, (212) 307 0746, Hywel Davies in London, (1) 222 6878, or Doug Bell in Sydney, (02) 269 3575.

They'll tell you all you need to know about our product and our service.

And they'll do it quietly.

Sound choice.

Makrolon CD-2000 polycarbonate from Mobay is the ideal material for the revolutionary new CD-ROM technology.

The plastic laser-read compact disk is rapidly becoming the digital information storage medium of choice for everything from music to masses of computer data. And the plastic material of choice for this exciting new development is Mobay's Makrolon CD-2000 polycarbonate.

Makrolon CD-2000 is the special super-clean polycarbonate resin designed to provide outstanding transparency and optical purity to assure a high transmission factor for the laser beam; minimal water absorption to help prevent warpage and possible read-out errors; high impact resistance; stiffness; and heat deflection temperature.

Makrolon CD-2000 resin also accurately

reproduces the intricate mold surface, can be molded with the extremely low stress level required for minimal optical distortion, and achieves extremely high flowability while maintaining polycarbonate's excellent mechanical properties.

For more information in the USA, contact Dr. H. Loewer at 412 777-2864. Or write Mobay Corporation, Plastics & Rubber Division, Mobay Road, Pittsburgh, PA 15205-9741.

**THIS C-ZERO CASSETTE
STANDS OUT FROM THE OTHERS.
WHY?**

Because it is a product of the latest technology using industrial robots and fully automatic assembly-lines coupled with the highest quality control standards.

Because it will be checked for dimensions, azimuth and cassette components.

Because it is engineered for high speed loading.

We are proud of it. If you've got tapes to market, we are glad to introduce to you the most outstanding C-Zero cassettes, and cassette parts/cassette moulds, and norelco boxes as well.

Another day, another 2,813 T-30s.

With one Sprinter® high-speed video duplicator, one Sony customer has turned out over a million video cassettes in two years—in real-time that's 137 years.

The Sprinter system assures consistent quality for every tape. With virtually no tracking errors or wow and flutter. It prints the exact pattern of magnetic information from the master onto the copy. And a magnetic footprint on each tape reduces labeling errors.

Sprinter systems require only one-sixth the labor, power and floor space of equivalent real-time equipment. And deliver the reliability and uptime performance you expect from Sony, the world leader in video technology.

So Sprinter systems turn out a lot more tapes with a lot less work. Save time and make money. And improve the quality of every tape you duplicate, seven days a week, year in, year out.

Want to see for yourself? Call the Sprinter group at (201) 930-6292 for an in-person or video-tape demonstration.

A FULL LINE OF RELIABLE OTARI LOADERS

REDUCE LOADING COSTS!

©1987 Otari

Maximize throughput and minimize equipment down-time with reliable, high quality loaders from Otari.

Otari's re-entry into the U.S. loader market means that you now have access to the industry's broadest line of video, audio, RDAT, and 8mm loaders, plus a full line of leadering machines.

Our success with all major tape manufacturers and our long-standing commitment to loader customers means you can rely on Otari for technical support, parts, and service.

Contact Otari for specifications and information on our full line.
From Otari; Technology You Can Trust. (415) 341-5900.

012.7.61.52.013.02 CD

Only product quality and production reliability guarantee success.

Discerning CD manufacturers have recognized these facts. That is why in 15 countries on 4 continents they have decided on the best: LEYBOLD, for good reason.

Advantages of LEYBOLD CD sputter coaters include:

- Highest yield
- Minimum space requirements
- Unique internal masking for I.D. and O.D.
- Flexibility: Compatible for 80, 120 or 130 mm discs, Audio CD, CD-ROM or CD-V
- Proven reliability
- Worldwide service
- Machines with capacities of 900 or 1500 CD's/hr

help in azimuth

CORRUGATED LINER: TWO DIFFERENT ELASTIC WAVE-FLEXIBILITIES

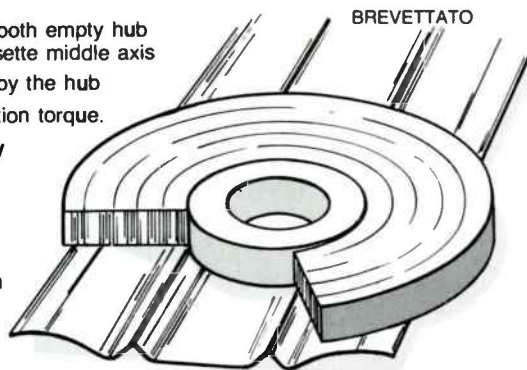

Inner wave: low flexibility

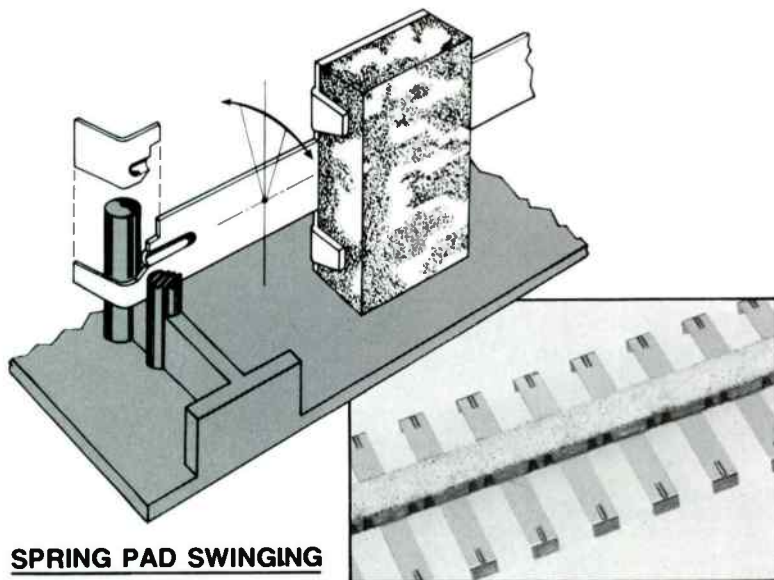

- simultaneous centering of both empty hub and full reel as to the cassette middle axis
- reel total mass supported by the hub
- maximum reduction of friction torque.

Outer wave: high flexibility

- loop by loop parallel tape alignment
- maximum reduction of telescopic effects (crests)
- minimum additional friction torque
- possible to omit graphite coating.

That is ATB's. For top quality results we rely on our customers' expertise.

SPRING PAD SWINGING ON BOSSES

Advantages as to the magnetic head plane.

- the spring pad is free to adjust itself to the best position
- uniform pressure on the tape
- orthogonal tape sliding (non skew).

NEW VHS REEL SPRING

J&F MILANO

ECONOMICAL ADVANTAGES

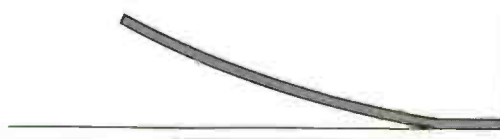

- saving of material by reducing width
- less weight, less volume.

FUNCTIONAL ADVANTAGES

- no more concentrated and outwards over cover stresses, but apportioned alternated and opposed ones;
- spring force on the reels in full compliance with international standard specifications (IEC-774).

ASSEMBLING ADVANTAGES

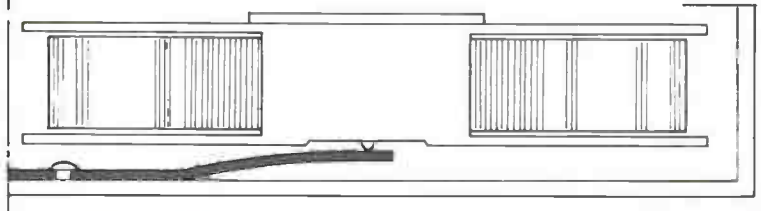

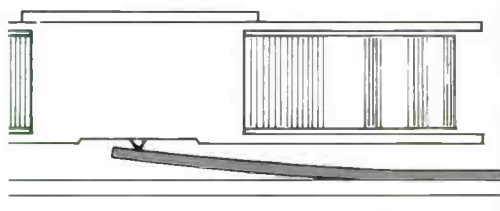

- reel spring free height reduced almost to a half;
- simple and rational packing for automatic feeding.

TRADITIONAL

THE MUSIC (AND NOTHING BUT THE MUSIC)

MASTERED
BY NIMBUS

When it's *your* music on the line, come to the CD manufacturer who always puts your music first—Nimbus Records.

At Nimbus we've done more than anybody to master CD manufacturing because we want your music to sound as good as it did when you recorded it. We've fine-tuned and improved every step of the CD replication process and back that up with absolute 100% quality control—so we guarantee 100% satisfaction.
No pops. No clicks. No hassles. Just your music.

More industry professionals are singing the praises of Nimbus than any other custom pressing facility. So when you want your music (and nothing but your music), come to Nimbus—The Music People.

FULL SERVICE CUSTOM PRESSING:

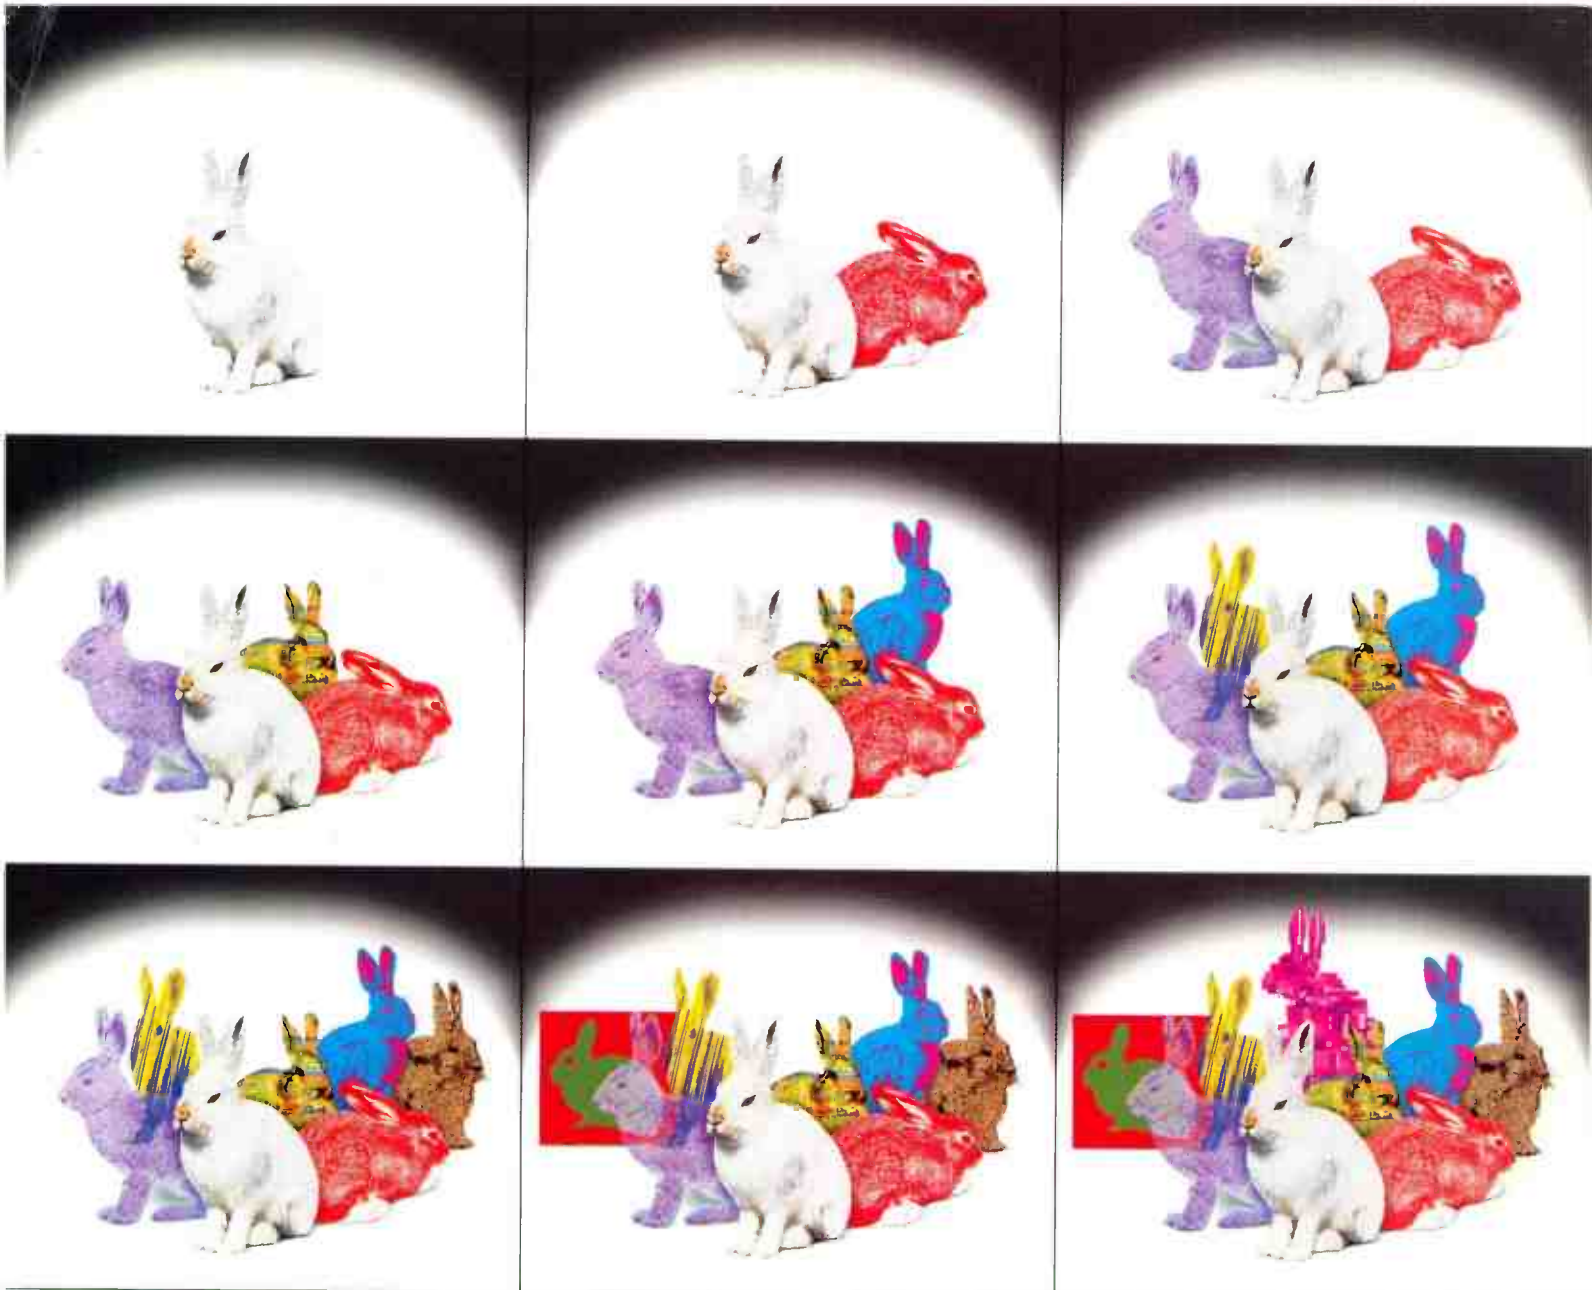

Mass CD replication—CD-Audio (including 3 inch and 5 inch CD singles), CD-ROM.

- Flawless digital and analogue mastering.
- Fast turn around time.
- Full range design, printing and packaging services.
- Four color picture discs and laser-etched graphics.
- Drop shipping and warehousing.

Generations to come will appreciate our new D-2 tape.

At Sony Professional Video-tape, one great idea keeps giving birth to others. Take the latest example of Sony brilliance: our new D-2 tape. A tape ideal for the complicated "layering" process used so prominently in postproduction today.

But to really appreciate D-2 is to appreciate the many generations of Sony tape preceding it. It all began with our 3/4" U-matic® Series. Even then our commitment to high quality was obvious. The "Strong As Sony" tradition is even more obvious in our latest KSP XBR, and BRS U-matics.

Then came the development of 1". First with V-16, and continuing with V1-K, Sony 1" has maintained an unwavering commitment to durability.

Next came 1/2" Betacam.* And again, toughness was the key trait inherited.

Now, with the evolution of digital technology, Sony is once more at the forefront of innovation. It started with

our D-1 tape. True to form, D-1 has enjoyed the durability of its predecessors.

Which brings us back to the latest generation of Sony brilliance. Our new D-2 tape. A digital tape so strong, you can add one generation of effect on top of another with no loss of picture quality.

No wonder generations to come will appreciate our new D-2 tape. Because at Sony Professional Videotape, we keep pulling one rabbit out of the hat after another.

SONY
THE ONE AND ONLY.
