

ANTIQUE RADIO CLASSIFIED

VOLUME 12

OCTOBER 1995

NUMBER 10

The Other
OZARKAS

A.R.C. — THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS
OF OLD RADIOS AND RELATED ITEMS — PUBLISHED MONTHLY

ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, One River Road, P.O. Box 2, Carlisle, MA 01741. Second-class postage paid at Carlisle, MA, and additional mailing offices. Telephone: (508) 371-0512, 8:30 AM to 6:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$34.95 by Second Class mail and \$51.95 by First Class mail.

Annual foreign rates. By air: Canada - \$56.00, Mexico - \$56.00; Other foreign countries - \$98.00. Surface mail: Canada - \$45.00; Other foreign countries - \$50.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

STAFF:

Publisher and Editor: John V. Terrey
Production Manager: Scott J. Young
Office Manager: Lisa A. Friedrichs
Advertising Manager: Cindie Platias
Managing Editor: Dorothy Schecter
Radio Events Editor: Chris Frederickson
Publishing & Editorial Staff: Ray Bintliff, Dave Crocker, Dick Desjarlais, Bobby Lynn, Jean Melendian
Founding Publisher/Editor: Gary B. Schneider
Contributing Writers: Mike Adams, Richard L. Arnold, Ray Bintliff, Ron Boucher, Paul J. Bourbin, Norman S. Braithwaite, Dave Crocker, Alan S. Douglas, Richard C. Foster, Fred Gier, Jim Kreuzer, Ron Ramirez, Henry Rogers, Ian L. Sanders, Gary B. Schneider, Daniel Schoo, Dwane Stevens, Frank R. White, Ralph Williams

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

CONTACTING ANTIQUE RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, Federal, etc. items to street address: One River Road, Telephone: (508) 371-0512; Fax: (508) 371-7129

E-mail: ARCMagazine@aol.com

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. A.R.C. assumes that permission is given to edit and to publish all correspondence and articles received unless otherwise indicated.

DISPLAY AND BUSINESS CARD ADS - DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Since artwork is reduced to 63% in the printing process, originals must be the artwork size listed below. Do not send in artwork on art board or seed negatives. Ads should be typeset or typed neatly with a carbon ribbon, black ink (not pencil) on white. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Photos should be at an 85-line screen; otherwise, add \$14.00 per photo for screening. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)	
	H x W (inches)		H x W (inches)	
Full	12 7/16 x 7 1/2		7 3/4 x 4 3/4

1/2 V	12 7/16 x 3 9/16		7 3/4 x 2 1/4	
1/4	5 1/4 x 3 9/16		3 5/16 x 2 1/4	
1/8	2 5/8 x 3 9/16		1 5/8 x 2 1/4	
Business Card	2 x 3 3/4		1 1/4 x 2 3/8	

* Full page, 6-mos.: 1/2 due with order; 1/2 due in 3 mos. ** Full & 1/2 page, 12-mos.: 1/4 due with order; 1/4 due at 3, 6 & 9 mos.

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." U.S. stamps or cash are OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio ad restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request. Unless prior arrangements are made, all submitted materials may be edited, become the property of Antique Radio Classified and will not be returned. Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First or Second Class mail (Second Class is the way most magazines are mailed). The mailing of First Class copies is staggered over one to four days with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Second Class copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 26th of the month. First Class copies usually are received by the 5th of the month; copies by Second Class mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

Business card ads are limited to one per advertiser.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

EDITOR'S COMMENTS

Fall is a busy season for radio collectors — opportunities for buying, selling, and camaraderie abound. These activities remind us — as if we needed reminding — of the fun of the chase. It's A.R.C.'s good fortune when that chase leads to an article recording what the hunter has learned along the way.

Such is the case with Peter Burton's cover story on "The Other Ozarkas," which represents eight years of research. The striking Ozarka emblem on our cover may be familiar to many of you, but what you may not know is that your Viking, Belmont, Kroehler, etc. may be, in fact, an Ozarka.

In the 1930s, Ozarka Inc.'s financial difficulties led to Ozarka chassis ending up in cabinets made by other companies. This must have been quite a turnabout from Ozarka's heyday in the 1920s when over 4,000 part-time salesmen sold Ozarkas door-to-door after signing on to "The Ozarka Plan." This plan gave them 12 free service lessons, but only after they had purchased a demonstration instrument. Peter's ongoing research will no doubt start many of you on an investigation of your own sets.

Another research project, this one by Robert Enemark resulted in this month's article on a Silvertone shortwave receiver, Model 5656A. Robert suspects that this interesting 3-band set was made for Sears by Howard Radio.

Alan Douglas' series on vintage tube testers continues this month with coverage of military models. Alan reports that military tube testers are a good choice regardless of the manufacturer, since most were designed by Hickok, holder of the basic tube tester patent. Alan was spotted at the recent AWA meet carrying an early capacitance bridge under his arm — a clear sign that more early test equipment articles are sure to come from Alan.

Four meets and auctions from New Jersey to Ohio, Michigan and Illinois are covered this month. Our meet and auction coverage is designed both for those interested in seeing photos of the unique items that often show up at meets and for those who dive right into the auction prices. Unusual items at these events were a Hallicrafters S-1, a Cutting and Washington Type 12, an Adams Morgan RA-10, and an Atwater Kent "fan dial" set.

Radiofest 1995, held by the Antique Radio Club of Illinois is one of the largest meets in the U.S. Although hampered by rain, Radiofest once again lived up to its fine reputation. During a break in the rain, your editor counted almost 200 flea market vendors. Auction sales totaled nearly \$23,000, and the event was rounded out by an equipment contest, a banquet, and tours of the Muchow Museum.

The New Jersey Antique Radio Club swap meet and auction, held in July, had heat to contend with, but it also resulted in success. Auction totals were nearly \$10,000.

Auctions by Estes Auctions and Albrecht Auction Service featured items from crystal sets to the Art Deco period. A number of telegraph and ham items were auctioned also.

Thanks to Karl Ayer, Danny Gustafson, Richard Estes, Marvin Beeferman, Ray Chase, Ludwell Sibler, and Ray Engel for contributing to these reports.

Photo Review includes an assortment of items — advertising, test equipment, a Hallicrafters S-38 look-alike, and an attractive Sparton table model set. Our *Radio Miscellanea* page features reader feedback on past articles on the L.E. Knott Apparatus Co., the Freshman Master Speaker, and the Radio Hospital.

Ford Museum Radio Auction. Within a few days, many of us, including your editor, will be in Dearborn, Michigan, attending the Henry Ford Museum Radio Auction. (Look for a report on this pivotal auction in a coming issue.) At the AWA meet in Rochester, I spoke to auctioneer Richard Estes who encourages collectors to come both days, because the key items will be spread over October 7 and 8. Although there are nearly 3,000 items, many are individual tubes and parts, which will be combined into lots. Also, there will be lots of surprises since many of the items to be offered will be removed from storage for the first time in years. For your convenience, Estes Auctions will be accepting Visa and MasterCard for purchases.

A.R.C. Radio Bash. On Saturday evening following the Saturday auction session, A.R.C. is hosting its first "Radio Bash"! All collectors are invited. There will be nibbles, a cash bar, and a door prize. Stop by from 6:30 P.M. to 8:30 P.M. in the Edison Room at the Dearborn Inn to say "hi," mingle with your collector friends, and kibitz about your auction triumphs and disappointments. There will be a couple of display tables, so you are invited to bring along something to show.

Coming Radio Events. With over 50 events to choose from, October is full of activities for the radio collector. Of course, the highlight for many will be the auction at the Henry Ford Museum on October 7 and 8. A.R.C. also will be attending the Vintage Radio and Phonograph Society/AWA '95 convention in Texas in late October. See the *Coming Radio Events* pages for details on these and many other October activities.

Happy Collecting.

John V. Terrey, Editor

ON THE COVER

The Ozarka emblem on our cover is a handsome design found on 1920s models. It is also on the cover of a booklet in our archives outlining the wonders of being an Ozarka salesman. J. Matheson Bell, Ozarka's president, may not have had the key to success, but he certainly had an eye for design.

WITH THE COLLECTORS

The Other Ozarkas

BY PETER BURTON

A.R.C. always welcomes a new twist to an old story. Peter Burton's interest in Ozarka radios gives us just that in his research on off-brand radios made by Ozarka but sold under different names. You may be surprised to learn that one of your treasured sets is an Ozarka in disguise. (Editor)

Over the years much has been written about the Ozarka Radio Company of Chicago, Illinois, most of it by my friend Don Patterson in his *Radio Age* series. My research on this company takes a slightly different path — to those off-brand radios that were made by Ozarka and sold under different names. Some of these names I am sure you will recognize, but some may come as a surprise to you, as they did to me.

From 1922 to the end of 1932, Ozarka operated

successfully, using a fleet of self-employed entrepreneurs trained by J. Matheson Bell through a series of letters and home study courses. Bell intended to sell the finest radios through this enthusiastic group rather than through retail stores.

However, by the end of 1932, many radio companies had folded up and disappeared almost overnight. Faced with declining sales and creditor problems, Bell was forced to renege on his promise to his independent salesmen, and he began to sell radios and chassis to the retail trade. Using the name "Viking," he created a

(Continued on following page)

(The Other Ozarkas, continued)

series of radios which sold through department and other retail stores. Nevertheless, the end came quickly for Ozarka. In 1933, the bankrupt company was sold at auction, ending ten years of creative production.

Don Patterson has reported that J. Matheson Bell bought the repair portion of the business at the auction and re-established himself in the retail end of the business selling and repairing radios under his own name. The bulk of the remaining Ozarka radio parts and chassis were sold to the highest bidder.

For me, the unused chassis have become a research delight. Tracking down the different radio manufacturers that used the Ozarka chassis in their radios has kept me busy for years.

IDENTIFYING THE OZARKA CHASSIS

The Ozarka chassis can be identified in one of two ways. First, the logo trade name — "Viking"

Figure 11. A Viking Model 93. (Photo by John Case)

Figure 12. A Viking Model 93 rear view.

— appears on the license tag, as shown on the Viking Model 91 in Figure 1 and the Viking Gothic Model 91 in Figure 2. Second, the initials "O" and "A" may be found together, as shown on the rear tag of the Clago Super Defiance in Figure 3 and the Belmont Series 70, shown in Figure 4, or separated on either side of the tag, as on the Kroehler Model 93 in Figure 5.

The radios that I have identified so far and for which I have photographic evidence are the following: the Belmont Series 70, shown in Figure 6; the Clago Super Defiance, shown in Figure 7; the Kroehler Model 93, shown in Figure 8; the Viking Model 91, shown in Figure 9; the Viking Gothic Model 91, shown in Figure 10; the Viking Model 93, shown in Figures 11 and 12; the Viking Model

Figure 13. A Viking Model 93B. (Photo by Bill Jones)

Figure 14. A 9-tube Marshall. Note the escutcheon similarity to the Kroehler Model 93. (Photo by Wayne King)

93B, shown in Figure 13; the Marshall, model unknown, shown in Figure 14; the Clago Kingsbury, shown in Figure 15, and the Clago Heritage, shown in Figure 16.

Other manufacturers that I suspect used Ozarka chassis are Universal, R.K. Labs, Rada-Con, Fred Stein, Radio-Chron, and Howard. Drop me a card if you come across any others not on my list. The research continues.

Most challenging was the research on the Westminster Jr., made by Belmont Corp. of Chicago

Figure 15. A Clago Kingsbury. (Photo by Frank Heathcote)

Figure 16. A Clago Heritage.

and shown in Figure 17. The 4-tube set has an Ozarka tag but was not listed in any material I had collected. In Larsen's book *The Locator* and the *Mallory Radio Service Encyclopedia*, I found that the tube numbers showed only five manufacturers using this type of setup. The 4-tube setup could be found in Trav-Ler, High Frequency Labs, Howard, Insuline and Stewart-Warner radios.

The clue I needed came when I purchased the Belmont Tombstone shown in Figure 18. The esutcheon on this set, shown in Figure 19, is similar to the one on the Westminster, Jr., except that it has a Viking logo. Going back to my books, I found a 4-tube Belmont which used a Type 35 tube instead of a Type 51 tube as indicated on the other schematics. The chassis layout, knob location, and cabinet are a strong indication that my Westminster

Viking 91	(3) 24, 27, 45, 80
Viking 91 Gothic	(3) 24, 27, 45, 80

ster Jr. was made by Belmont, using an Ozarka-designed chassis. Tube complements for a variety of sets with Ozarka chassis are shown in Table I.

I continue to have a lot of enjoyment researching the "other Ozarkas." This research has introduced me to many collectors and new friends throughout the country. There is also the satisfaction of knowing that there are still some Ozarka "originals" around, such as the Ozarka Model 95, shown in Figure 20.

My special thanks to Don Patterson, Richard Foster, John Case, Frank Heathcote, and Bill Jones for their help with photographs. Many thanks to those of you who answered my ads in A.R.C. when I needed information. As with any project you set out to do, this one has changed with every new Ozarka I find. I am sure this story is not complete, but I couldn't wait to share with you my interesting findings.

(Peter Burton, Box 912, Belchertown, MA 01077)

Figure 20. An Ozarka 95. This beautiful radio, produced in Models 93, 94, and 95, can be found with both Ozarka and Viking escutcheons. (Photo by Richard Foster)

Peter Burton started collecting in 1975 after falling in love with a Zenith console Model 16A63 found at a church rummage sale. Having researched the Ozarka Radio Company for the past eight years, he has a large collection of original Ozarka papers and letters. He and his wife Pat are self-employed in the financial stationery business.

COMMUNICATIONS RECEIVERS

Silvertone 5656A Shortwave Receiver

BY ROBERT B. ENEMARK

This handsome 3-band set, shown in Figure 1, covers 0.54 to 18.5 MHz in a nicely ventilated, large, black, wrinkle cabinet 21" wide by 10" high and 11" deep. Its huge 6" back-lit dial has a 360 degree logging scale, the pointer of which moves 16 times as fast as the frequency dial pointer. The EC band is cream colored, as is the logging scale. The middle band is a nice, teal green, while the highest frequency band is a mustard yellow. This model was released for production in 1936, and probably sold with or without a cabinet.

I purchased this set in early 1989 from collector Leon Schimmel of Spanaway, Washington. He said it had been recabineted, and he thought it had been made for Sears by Howard Radio. A separate communication with Chuck Dachis — "The Hallicrafter Collector" — notes also that it was probably made by Howard. There are circular, black and chrome label bezels around each knob which appear to be identical to those on the Hallicrafters Super 7 and Super 8, S-7A and S-8A. Dachis writes that the latter were also made by Howard Radio, as were the Sky Chief S-14 and Sky Buddy 5T.

Collector Dan Mertz of Richland, Washington, sent me photos and sketches of his Hallicrafters Sky Master (quite rare), which he believes was also made by Howard. It's obvious that the large 7½-inch diameter, bronze bezel around its attractive dial is identical to the one on my Silvertone 5656A.

This receiver has the following tube line-up: Type 6K7 RF, 6L7 Mixer, 6C5 BFO, 6K7 IF, 6Q7 2nd Det., 6F6 output, and 5Y3 rectifier. The BFO is a separate sub assembly, so it probably was an optional item. The selectivity control located on the front panel mechanically changes the coupling of one IF coil to vary the bandwidth, much as is done in older Super Pros with two IFs. It would be interesting to compare this set with the Super 8 to see what may be identical.

In restoring the Silvertone 5656A, I added octagonal, old-style "communication" knobs, but the original ones may have been wooden like those on the S-7A and S-8A. The restored set took a second place award at the ARCA 1989 Convention. I would appreciate any additional information anyone may have on this set which is listed in Rider's Volume X, page 33.

Photo by Dave Crocker

(Robert B. Enemark, W1EC, PO Box 1607, Duxbury, MA 02331)

Robert B. Enemark has been a ham operator since 1941 and an antique radio collector since 1982. His particular interest is in pre-World War II shortwave sets and telegraph equipment. In 1980, he set up a museum display of early (French) ocean cable telegraph equipment which he restored to working condition in 1982. He has been awarded over 50 U.S. and foreign patents.

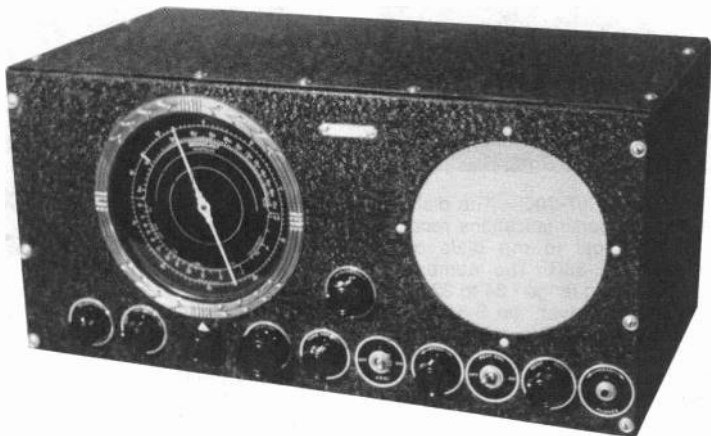

Figure 1. The small metal label at top center does say Silvertone, but this shortwave receiver may have been made for Sears by Howard.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

SYLVANIA SIGN – Advertising Sylvania loktal tubes, this radio service sign, ca. 1940-1941, also lights up. (Larry Chestnut – Ellington, CT)

SPARTON MODEL 594 – This attractive little 5-tube AC/DC set uses a resistance line cord to provide the proper voltages for the tube filaments. The finish and the grille cloth are original. (Bill Harris – Roanoke, TX)

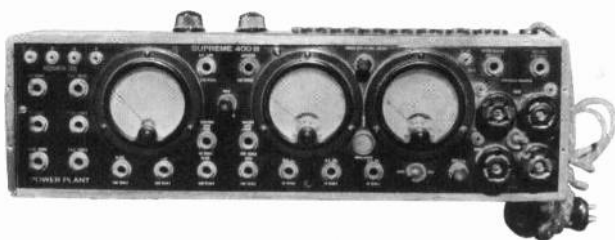

LAFAYETTE MODEL KT-200 – The dials on this Japanese-made communications receiver appear to be identical to the dials on a Hallicrafters Model S-38B. The number of bands (4) and the tuning range (.54 to 32 MHz) are also the same. However, the S-38B is an AC/DC set, while the KT-200 is AC, using tube Types 6BD6 (3), 6BE6 (2), 6AV6 (2), 6AR5 (1), and 5Y3 (1). The Lafayette is pictured with an optional external speaker, HE-11, which is a later piece of equipment sold in the early 1960s. (Doug Burskey – Mansfield, OH)

RAYTHEON MODEL RAY-DF – This unusual transistor radio was made in Japan and has 5 bands (AM-FM-VHF-MF-LF) with "DF" level meter and BFO. It also has a directional finder on top that turns 360 degrees. The set may have been designed for marine use. (Dave Mock – Montpelier, OH)

PHOTO REVIEW

SUPREME MODEL 400B -

This 1930s circuit tester in an oak cabinet has many uses for the radio serviceman, if one can judge by the number and variety of jacks, meters, and tube sockets. (*John Schehrer - Joplin, MO*)

RADIOLA MODEL AR-812 -

This 1924 "portable" is very large and heavy. Although carrying a separate horn speaker along with the set must have been awkward, the superheterodyne circuit, using 5 Type 99 tubes and a UX-120 in the last audio stage, makes the set a great performer! (*Greg Farmer - Fridley, MN*)

STROMBERG-CARLSON MODEL 370 -

Made in 1939, this set includes the Acoustical Labyrinth Baffling System, which was used in many of Stromberg-Carlson's top-of-the-line sets in the 1930s and 1940s. The 370 features

motor-driven electric tuning and selective IF bandwidth for treble control. Two Type 6L6 tubes are used in the output stage. (*Doug Burskey - Mansfield, OH*)

VINTAGE TEST EQUIPMENT

Vintage Tube Testers —Part 2 Military Models

BY ALAN S. DOUGLAS

This is the second of a series of four articles by Alan Douglas on vintage tube testers. The first, which dealt with the calibration of a Hickok tester, appeared in the July 1995 issue, pages 20-22. (Editor)

I admit to being a tube-tester junkie, with seven Hickoks, an enormous Weston analyzer, several emission models, and a few antiques. But one good tester is all anyone needs, and in view of the fact that no two testers ever agree, you're really better off doing all testing with the same model every time.

Since Hickok had the basic patent on the most practical circuit, many of the best models were made by that company. The main exceptions are the military models designed by Hickok but made later by other contractors.

Figure 1. The TV-7B tube tester, complete with instruction manual and accessories.

Since Hickok did not make a cheap tester other than the 820 model of 1960-1961, you're safe buying almost any you see, though I would avoid the ones designed mainly for TV tubes, with an array of sockets on the panel. I would also aim for the newer models, for reliability.

If you haunt hamfests and flea markets and read ads, you'll find your Hickok, but if you want something now, off the shelf, the military models are your best option. The most popular military model by far is the TV-7 up to TV-7D, all made during the 1950s, by a variety of contractors — Hickok, Supreme, Triplet, and Daven at least. Surplus prices on these have been going up every year, but considering the construc-

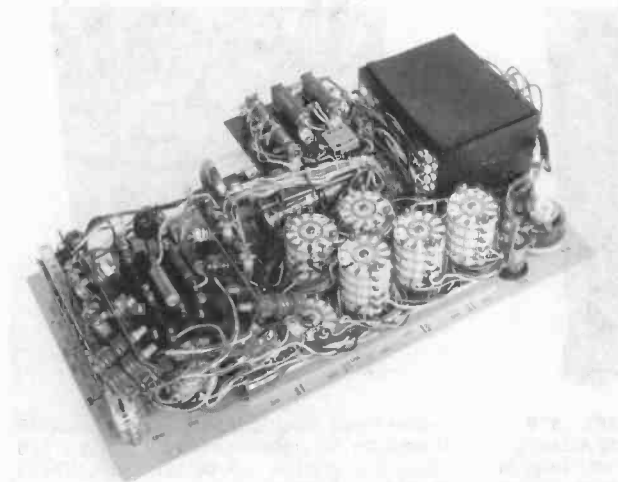

Figure 2. This interior view shows the rugged quality construction of the TV-7B.

Figure 3. The I-177A tube tester, complete with instruction manual. The date stamped on the inside cover of the case reads "MFP August, 1949."

tion quality, performance, parts availability, and so on, they're still real bargains.

I bought two from Fair Radio just to see what I'd get for \$110 — a TV-7 and a TV-7B. Figure 1 shows the TV-7B, front view, and Figure 2 shows the chassis components. While neither was perfect (two resistors in the TV-7 line-test circuit had changed value, and some technician had altered another precision resistor to compensate, rather than fix the real problem), both of them work now, and they even agree on Gm readings!

The TV-7 has only an arbitrary meter scale of 0-120, but there is a definite conversion factor for each range. B is 3000 micromhos full-scale, C is 6000, D is 15,000 and E is 30,000. Grid-signal voltage is reduced for the higher ranges.

An older military model is the I-177, shown in Figure 3, which was made during and just after World War II; it's a repackaged version of the Hickok 510/560. I bought mine for \$25 around 1962, probably my first purchase from Fair Radio. It worked fine, but, being an old design, wouldn't test most 7-pin miniature tubes or any 9-pin ones at all. There was an adapter made for it, but it cost as much as the tester. I got around that by buying a secondhand 6000A in 1966, which has just the opposite problem — no 4-, 5-, 6- or 7-pin sockets.

The TV-3 and TV-10 models, somewhat similar to the TV-7 but with roll charts, are less common but occasionally turn up. In some ways, though, the TV-7, with its separate book of tube settings is more likely to last, since roll charts get dog-eared with use

and can't really be repaired (you'll be sorry if you use sticky-tape on them). You can save most of the wear and tear on roll charts by making a one-page chart of most-commonly-tested tubes and attaching it inside the lid of your checker.

The TV-2 shown in Figure 4 and made by CBS-Columbia on a 1952 Army contract, was presumably designed by Hytron or its subsidiary, Air-King Products, before CBS bought Hytron in June 1951. The circuitry is standard Hickok, except for the addition of DC bias and screen supplies. Everything is metered, except plate current, but all the adjustments interact, so that setting up a tube is quite a chore. The TV-2 reads on "percent quality" rather than a calibrated value of Gm, making comparison with other testers difficult. And, in my example, the screen voltmeter read about 10% high, throwing the Gm readings off, despite its being hermetically sealed and not adjustable (I had to increase the multiplier resistor to recalibrate it). I wouldn't recommend the TV-2 as an "only" tester.

I'd love to hear from anyone involved in tube-tester design or production, and to locate an early-1930s Hickok in working order.

(Alan S. Douglas, PO Box 225, Pocasset, MA 02559)

Alan Douglas, an electrical engineer, has been interested in old radios since the age of ten. His extensive collection includes a library of 5,000 radio-related books and magazines, now occupying a special addition to his house. He has written well over 100 articles and papers for radio and engineering publications. His books, "Radio Manufacturers of the 1920's, Volumes 1, 2, and 3," are highly regarded resources for the radio collecting community.

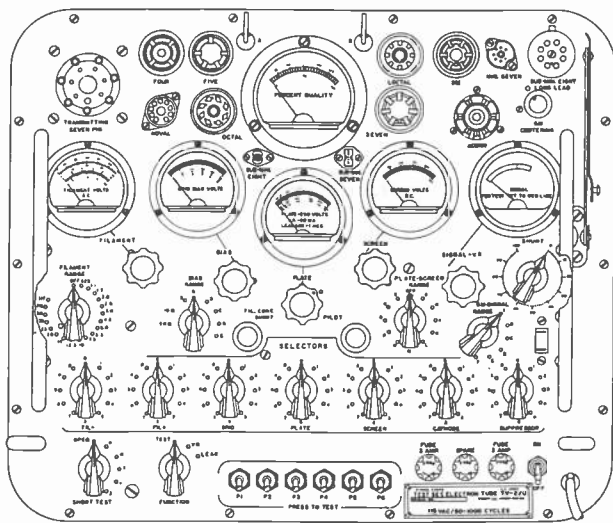

Figure 4. The imposing front panel layout of the TV-2 tube tester.

MEET & AUCTION REPORT

Antique Radio Club of Illinois Radiofest 1995 Elgin, Illinois — August 2-5, 1995

REPORTED BY KARL AYER, DANNY GUSTAFSON, AND JOHN TERREY

The Antique Radio Club of Illinois (ARCI) held its Radiofest 1995 from August 2-5, 1995, at the Holiday Inn Holidome and Convention Center in Elgin, Illinois. Of the 786 attendees and guests, 522 were registered vendors. Unfortunately, the event was tempered by persistent rain; however, radio people always persevere, and active trading went on whenever the sun came out. The rain also inspired some impromptu entertainment, including an informal concert by the "Split Level Ramblers," also known as "The Pink Toothbrush."

The flea market covered an extensive area on three sides of the hotel and expanded into a large adjacent field. On Friday morning during breaks in the clouds, your editor counted nearly 200 vendors set up for trade and defying the elements with a variety of colorful umbrellas and other rain gear.

Among the interesting presentations was one by A.R.C. contributor Daniel Schoo on the capabilities of the internet. Dan's *Beginner's Guide to the Internet* was available and has proved to be a good resource for antique radio collectors.

At the Thursday banquet, the speaker was old-time radio personality and historian Chuck Schaden. Chuck's enjoyable presentation includ-

A warning: Auction prices are not current values. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Sheltered from the rain are Jim Clark's offerings, including left to right, a Scott Philharmonic with a Thompson Minuetto on top; a Zenith 10-S-157 Zephyr; and a Zenith 71 in an ornate, custom cabinet with Brenda Clark (NFS) underneath.

ed clips from old shows, such as "Amos 'n' Andy," "Abbott and Costello," and "Jack Benny."

As in the past, Dr. Ralph Muchow kindly opened his museum for tours this year. Shuttle buses took hundreds of Radiofesters to view his vast collection.

The contest proved to be very interesting as it featured several items rarely seen at meets. Some are pictured on these pages.

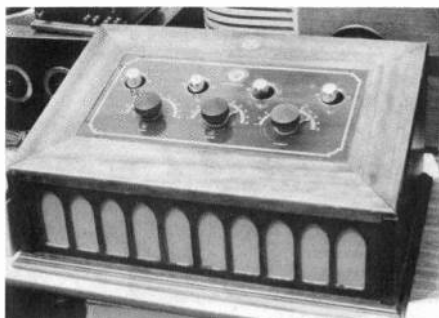

Of course, the coming Henry Ford Museum auction was a chief topic of conversation. The following quote, overheard by your editor, seems to summarize the level of interest generated by this event, "I'm going to be there, if only for the experience. This is going to be the auction of the decade, if not the century!"

This more immediate auction was a lively event with sales totaling \$22,955. Highlights included an Atwater Kent breadboard 12 with two cone speakers selling at \$1,050, an Atwater Kent Mod-

el 165 cathedral at \$325, a British Houston crystal set Type C Form A at \$350, a red and black Motorola Catalin at \$3,500, a trophy baseball radio at \$550, and a Zenith Trans-Oceanic R520A (olive drab), at \$325.

Estes Vintage Radio Auction Medina, Ohio — May 20, 1995

CONTRIBUTED BY RICHARD ESTES

Estes Auctions conducted a vintage radio auction at the Seville Antique Auction Barn in Medina, Ohio, on May 20, 1995. The sale totaled just under \$20,000, with 340 lots being sold. Prices were in the average range. Registered bidders numbered 125 from 9 states, while there were absentee bidders from Canada and Puerto Rico.

Highlights of the auction included an oak Victor phonograph selling at \$450, a Garod Commander Catalin at \$600, an L.S. Smith brass telegraph key at \$175, and a round wood Detrola tabletop at \$700.

In addition to the following partial list of items sold, many boxes of parts, pieces of test equipment, and miscellaneous items sold for \$5 to \$25.

Items from a private collection in Pennsylvania were featured in the next Estes Auctions sale at the Seville Antique Auction Barn on September 16, 1995. Now it's on to the big Henry Ford Museum Auction in Dearborn, Michigan, on October 7-8, 1995. A November date for the fall auction at the Seville Barn will be announced soon.

New Jersey Antique Radio Club Swap Meet and Auction — July 15, 1995

REPORTED BY MARVIN BEEFERMAN, RAY CHASE, AND LUDWELL SIBLEY

The New Jersey Antique Radio Club (NJARC) held its Summer Swap Meet and Auction at the Hightstown Country Club, Hightstown, N. J., on July 15, 1995. The event coincided with a heat wave bringing 102° temperature, but flea marketers turned out to the tune of 75 active tables.

No one tried to fry an egg on a metal radio. However, one member displaying a Lowenstein triple crystal detector outside under a transparent cover was shocked to find that the crystal mounting had melted! (Crystals are traditionally cast in Wood's metal, an alloy which turns liquid at 142°.)

Fortunately, the auction building was air-conditioned. A determined audience of 99 buyers took on 500 lots of goods. Half of the lots were listed in a catalog that had been distributed before the event. It included blocks of material from two estates, plus club-donation and members' offerings.

Under vigorous bidding and generally high prices, sales totaled \$9,800. One of the estates contained some rather fine early tubes, so revenue from tubes reached \$1,900. The top-drawing item was an Adams-Morgan Paragon RA-10 tuner at \$410. A group of three 1920s broadcast microphones fetched \$340. A Majestic 440 Deco-styled table set sold for \$300, as did a pair of Western Electric 205D tubes.

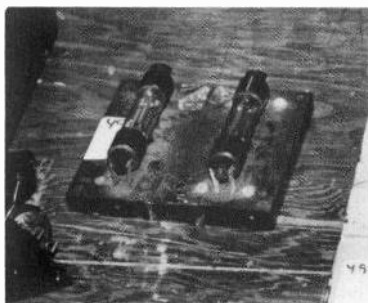

Members of the Mid-Atlantic Antique Radio Club (MAARC) supported the auction heavily. Sam Cannan, MAARC president, stayed on his feet for 4½ hours as auctioneer and moved the goods with enthusiasm and humor. Sammy Co-

hen, treasurer, and Mitch Cohen handled the finances on a laptop computer.

NJARC held its first equipment contest in this meet, drawing several entries of high quality in the two categories — "Battery Sets to 1926" and "AC Sets, Wood, 1927-41." Marvin Beeferman administered this contest.

Albrecht Vintage Radio Auction Vassar, Michigan — June 22, 1995

CONTRIBUTED BY RAY ENGEL

On June 22, 1995, the Albrecht Auction Service of Vassar, Michigan, conducted a vintage radio auction consisting of items from the estate of Leslie Consterdine, W8CUP. Advertised in A.R.C. and several amateur radio newsletters, the auction drew 50 to 75 active bidders. Amateur-related items dominated the list with Kenwood transceivers commanding the highest prices. A Kenwood TS-830 topped the list at \$525, followed by a TS-130V at \$265 and a TS-700A at \$250. According to the report, all items were clean and well maintained. A partial listing appears below.

RADIO MISCELLANEA

"Antique Radio Classified" invites its readers to contribute letters and information for inclusion in "Radio Miscellanea" and elsewhere in the magazine. The topic should be of general interest and sent to A.R.C., P.O. Box 2, Carlisle, MA 01741. All material submitted should be verified for accuracy and may be edited for publication, which is not guaranteed. See the masthead for more details.

More on L.E. Knott Apparatus Co.

In response to Wally Worth's article on the L.E. Knott Apparatus Co. (A.R.C., August 1995, p. 4), reader Tom French wrote that "L.E. Knott Apparatus of Cambridge may have sold some of the stuff made by E.R. Knott Machine of Boston, but I doubt there's much more of a connection."

Tom adds, "The end of the L.E. Knott Apparatus Co. came in 1929 when it was absorbed by the Central Scientific Co. of Chicago (CENCO). CENCO then used the former Knott building on Albany St. in Cambridge as its Eastern Division warehouse. Preferring a Boston location, CENCO accomplished this by using a Cambridge A Station, Boston, postal address for the Albany St. building."

To further distinguish between the two companies, Wally Worth has provided some additional clarification. L.E. Knott and E.R. Knott operations were separate companies, but it is likely that the two brothers struck some cooperative deals. L.E. Knott Apparatus Co. was the purveyor of laboratory equipment and some radio equipment. The E.R. Knott Machine Co. manufactured and sold radio parts, including the items illustrated in Figures 1 and 2 in the article.

The L.E. Knott Dynamic Model B horn speaker, shown in Figures 3 and 4 in the article, was manufactured by the E.R. Knott Machine Co., according to Richard Knott. It is likely that other radio equipment was manufactured by E.R. Knott and sold under the L.E. Knott name. (Editor)

Anthes Retirement

Dear Editor:

I have transistorized about 1,000 tubes for many good customers in the past three years. There has never been a single complaint from any of them; in fact, they have praised my work very highly. I greatly appreciate that. Due to a stroke I can no longer do this work very easily. However, if the customer loosens the tubes, I could do a few more. I have 100 modules left in stock, and when they are finished, I will buy no more parts. Please allow two or three weeks to do them instead of three days. Again, I appreciate all your past business.

Jacob Anthes, Glidden, WI

Zenith on CD Album Cover

Dear Editor:

Those who enjoy seeing an old radio nicely displayed in current promotional settings will enjoy the album cover photograph of Ricky Skaggs on the CD album "My Father's Son." The cover shows Ricky sitting on a couch with what appears to me to be a 1941 Zenith 7-S-558 console prominently in the background. Those good at identifying Zenith radios might want to take a look.

Charles R. Coombs, Albany, MO

Another Radio Hospital

Dear Editor:

Apparently, another company called "The Radio Hospital" was a dealer in wartime surplus. An ad in *Radio News* July 1947, page 160, is selling 12 ft., portable, government surplus radio antennas — "A Real \$15 Value Now Only \$4.95." The company was located on Lexington Ave. in New York City.

Dan Howard, Portland, OR

Freshman Master Speaker

Dear Editor:

Re: the question posed by Dave Crocker concerning the Freshman Master Speaker (July 1995), "Why would anyone offer a new horn speaker in 1927 when the paper cone speaker was successfully replacing the horn?"

Freshman had been advertising the Master horn speaker at least since the July 1926 issue of *Radio*, p. 60. This is the same ad reproduced in his excellent article, including the \$10 price. Introduction of the Master horn speaker in 1926 would have made little more sense in the face of the onslaught of advertising and sales of cone speakers by the likes of Crosley and Tower.

The Utah Super Flex horn was still being advertised as late as the spring of 1926 (*Citizen's Call Book*, p. 25), so Mr. Crocker may very well be correct that the Freshman Master Speaker was the result of a "quick fix" scheme by Utah and Freshman to use up surplus parts.

Other than built-in horn speakers in some Freshman models, the Master Speaker is, to my knowledge, the only speaker offered by the Charles Freeman Co.

Dale Davenport, Ft. Smith, AR

Seeks Veneer Repair Info

Dear Editor:

I would like to see an article on repairing veneer on radios. I do refinishing, but not veneers, although I get various "how-to's" from stores. I would like to hear from someone who does it.

Walter Mosley, Crosby, TX

Two reference books available from A.R.C. are "The Weekend Refinisher" and "Refinishing Old Furniture." Richard Foster, a professional woodworker who specializes in the restoration of antique radios, has written two articles for A.R.C. See January 1992, p. 21, and March 1992, p. 10. (Editor)

A.R.C. Makes My Day!

Dear Editor:

I want to thank you for making my day once every month. Most people don't realize what a formidable task it is to publish a small magazine such as yours on time every month.

Clement Richard, Laval, Quebec, Canada

CLASSIFIED ADVERTISEMENTS

WANTED: Any National Radio Institute Experiment (not lesson) booklets from before 1930. Robert Stapleford, 1800 S.W. Randolph Ave., Topeka, KS 66604

WANTED: World Radio Handbook, Broadcasting Yearbook, other radio station lists, before 1980. Ralph Marson, 8070 Busch, Centerline, MI 48015. (810) 754-3808

The Most Important Book Ever Written About Radio.

*In Commemoration
of Radio's
75th Anniversary*

Streamline Press announces the limited advance lithography of an extraordinary coffee-table collector's book – The Deluxe Edition of *Blast From The Past: A Pictorial History of Radio's First 75 Years*.

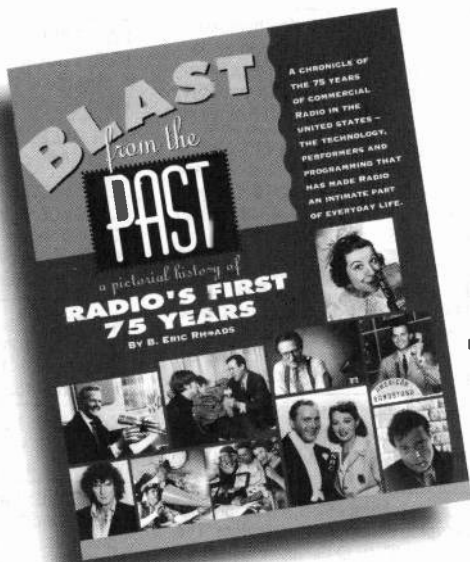

And NOW, during a limited advance publishing period, the first Deluxe Collector's Edition is available at a special discount price to commemorate the 75th anniversary issue of radio – only \$75.

UNPRECEDENTED PUBLISHING

The Deluxe Collector's Edition of *Blast From The Past: A Pictorial History of Radio's First 75 Years* is an undertaking of unparalleled proportion. Author B. Eric Rhoads has searched archives across America and found hundreds of rare, never-before-published historical photographs featuring radio from its early experimental stages, personalities of radio's golden era of the '30s and '40s, the first disc jockeys of the '50s, the boss jocks of the '60s, the start of underground radio in the '70s, and the personalities and talk show hosts of the '80s and '90s. This is a landmark in limited edition publishing with more than 900 rare photographs

Radio Restoration Parts

Vacuum Tube Repair Wafers

These tube repair wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact, but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage may usually be reduced without sacrificing volume or sensitivity. Performance will vary between radio models.

\$10.00/each (\$7.50/ea. 3 or more)

New Atwater Kent Breadboard Switch

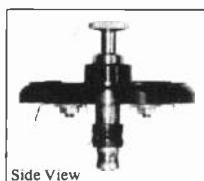

Exact replacement for Models:

9 • 9C • 10 • 10A • 10B • 10C • 12

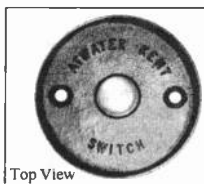

and all additional models with board mounted switch.

Newly manufactured under high pressure heat from the same type brown thermoset resin used in the original. Beryllium copper spring contacts are used for long, trouble-free life. Custom built knurl is used to exactly reproduce the original.

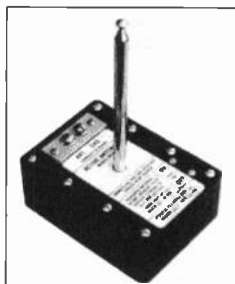

\$50.00/each

"We Turn Ideas Into Heirlooms"

WANTED
FOR MY BROADCASTING MUSEUM

Microphones, stands, call letter plates. Tube amplifiers, mixers, compressors, Hi-Fi equipment. Speakers, on-air lights, equalizers. Disk, wire & tape recorders. Blank recording disks. Catalogs, magazines, manuals. 16" transcriptions, turntables, arms, pickups. Early TV cameras & receivers. Elaborate console, deco, plastic, mirror, novelty & wireless radios. Jukeboxes & parts. Acoustic phonographs.

We are looking for all makes of equipment, and especially *Western Electric*, Telefunken, Neumann and RCA. The museum contains various duplicates and items surplus to our needs, and many of these articles are available for sale or trade. The collection is located in my Victorian seaside inn, The Caffrey House, situated on a bay next to the ocean, in the Southampton resort area of Long Island. A trade of equipment for a stay at the hotel is always encouraged.

"Do you know me?"

I started the world's first broadcasting station. I'm Charles Herrold, and between 1912 and 1917 I was sending music and news to an audience in San Jose, California, on a regular schedule. But while I may have been first, most people forgot all about me. Now there's hope; my story is told in this exciting new videotape from the creator of the award-winning PBS series 'Radio Collector.' It's available from the Perham Foundation. Don't leave home without it!"

"Broadcasting's Forgotten Father: The Charles Herrold Story"

VHS-Hi-Fi, close-captioned, \$29.95 plus \$3.50 S&H.

Order directly from the Perham Foundation,
101 First St., Suite 394, Los Altos, CA 94022.

Or call 1-800-771-KTEH and use your credit card.

All profits go to support the preservation of electronics history.

As it may be a long time before I find any of these sets, remember to call me if and when you can part with yours. I am putting together a broad collection of early broadcast and wireless equipment from many manufacturers, and adding to it each month. I buy single sets or collections - also, books, catalogs, manuals and other related documentation. Now that I have moved my business (A.R.C.) out of my home, I have roooooom!

Call and surprise me; make my day! - Please leave a message if my answering machine answers. Thanks.

John V. Terrey, 498 Cross Street, Carlisle, MA 01741 — (508) 369-9770

Signs and Promotions are Hot! We've gotten some from three area TV shops...others from collectors across the U.S. Here's an offering for your collection:

FOR SALE: 1953 Admiral TV Studio. 15" square red-white-black oversized envelope, features Disney's Peter Pan, with Sky King, Lonesome Pig, and Flight to Mars. Inside there's a "TV Studio" with 4 sets of punch out dolls; cameras, lights, & stage. Includes 31 page script, instructions, and "magic wand". These are great--don't miss 'em! **New from 1953...\$55 or 3/\$120**

FOR SALE: RCA Dealer Curtain panel. This is a fantastic piece of fabric 41" x 97", probably from the 1940s. Pink with green logo, with only minor fading. It was professionally cleaned and pressed. Makes a great wall hanging or table cover (maybe a "Hawaiian shirt"?). 4 panels available. **A rare item...\$155 each**

FOR SALE: Eveready Lamp Cabinet. This green metal unit has red and white lettering on both sides, and 18 drawers of about 120 bulbs. Great for the repairman...\$55

FOR SALE: IRC Resistor Cabinet. This silver metal cabinet has four drawers, with the IRC logo in yellow and blue on the top. Plus there's about 200 new and used resistors.....\$45

FOR SALE: Radio Dial Belts. General Cement's logo is screened in red on the side and front of this black metal cabinet. Includes 67 pg 1945 catalog and dial guide, plus measuring chart. It's packed with over 100 new-old-stock radio belts. **Holder plus belts..\$65**

FOR SALE: Admiral 1949 Dispenser! This is an unbelievable full size (34" high) cardboard replica of the bakelite Admiral console, with a clown on the screen! His mouth has a cutout to dispense balloons (you supply the balloons!). In great condition--how many of these dealer displays could have survived? **Priced at....\$185**

For Sale: "Silk" BANNERS

- SONY Banner:** 41"Wide x 22"Long, "SONY" in yellow, outlined in black, green, blue and red...\$35

- PHILCO:** 41"W x 20"L, "*New 1952 Philco TV with Colorado Tuner*" in yellow and white on blue...\$25
- PHILCO:** 41"Wide x 20"Long, "*New 1952 Philco TV*" in yellow and white on bright red fabric...\$30
- GE:** 58"W x 32"L, "*Compare GE Ultra Vision*" (shows TV screens), white and yellow on blue...\$30

CLASSIFIED ADVERTISING POLICY

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 22¢ each. See details below. Classified ads sent by mail, fax or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on page 2 for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on the inside front cover.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, I and l (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. See inside front cover for additional information.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET**, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

To encourage varied content of the ads, the same classified ad may be run only once per issue and for only two consecutive months. (To run an ad longer, use a boxed classified or display ad.)

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***

22¢ per word for extra words over 20 **plus**

10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only **one** ad each month.

Non-Subscribers:

38¢ per word **plus**

10¢ per word for shaded ad.

Please do not forget to send in the extra 22¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

33¢ per word for all words,* none free, **plus**

10¢ per word for each bold word **plus**

10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

44¢ per word for all words* **plus**

10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$14.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The **standard headings:** WANTED, FOR SALE, etc., count as **one word** each time used in an ad. **Name, address** and (one) **telephone number**, count as **6 words**, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.
