Quick Sales Guide

Preparing for the next wave of cyberattacks

How Safe is Your Network?

Today, network attacks have become more sophisticated and targeted. Social networking applications have also opened up more channels for data breach than ever before. With the rise of BYOD (Bring Your Own Device), threats to business networks come from both outside and inside. It is now increasingly challenging for businesses to keep up with the changing threat landscape; and this is especially true for small-and medium-sized businesses, which do not have the staff and resources of larger corporations. Small-and medium-sized businesses need a solution that is efficient, inexpensive and provides an array of techniques to combat sophisticated network attacks.

Network Security that Works

Businesses deploy network security appliances for two main purposes: to protect company resources against a multitude of threats and to enable secured communications between multiple locations via Virtual Private Network (VPN). For many years, Zyxel's highly-acclaimed Unified Security Gateway (USG) Series has helped businesses satisfy all these demands. Fortifying businesses against a new generation of threats, Zyxel is offering a new line of ZyWALL ATP Firewall Series and Nebula SD-WAN solution that deliver unmatched capacity, performance and protection for businesses of all sizes. Visit Zyxel One Security page ([Home > Solution > One security](#)) for more resources and support.

ZyWALL ATP Next Generation Firewall

**Timely Defense
for Ultimate Protection**

Zyxel security solutions

ATP Firewalls

The ZyWALL ATP Firewall Series is empowered with smart cloud intelligence giving seamless protection against all those Advanced Persistent Threats, achieving ultimate in-depth defense of future unknown attacks.

VPN Firewalls

The ZyWALL VPN Firewall Series complies with GDPR regulations and features a robust VPN gateway with the ability to access enterprise information across the corporate sites and connect business partners, cloud providers as well as telecommuters.

UTM Firewalls

Zyxel's UTM Firewall Series offers businesses with robust, user-aware security all in one package. It offers multi-threat protection and effective policy enforcement through a wide range of mechanisms. The all-in-one design helps businesses to minimize management efforts and total cost of ownership (TCO) while maximizing network security.

Nebula SD-WAN

Combining the flexibility of cloud-based technology and its high-speed deployment benefit, the Nebula SD-WAN solution helps IT administrators to simplify branch network deployment. With the variety of optimization design for Internet connectivity and applications, the Nebula SD-WAN also enables the ZyWALL VPN Series to support online application growth, efficiency WAN bandwidth usage and increase network agility.

Nebula Cloud Managed Security Gateway

Built with remote management and ironclad security for organizations with increasing distributed sites, the Zyxel Nebula Cloud Managed Security Gateway Series provides extensive protection every small- to mid-size business would need.

Security Services and Licenses

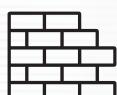

Flexible licensing options for your security devices. Choose the perfect one that best suit your business needs. Our security licenses include, but not limited to: security, connectivity, management & reporting and vertical solution licenses. Learn more about our flexible licensing options for your security devices. (Home > Product > Security Services and Licenses)

Security Services and Licenses

For purchase/renewal of licenses, go directly on our new e-commerce platform Zyxel Marketplace or contact our reseller.

Services	Key Features
Security Service	
Anti-Virus/Malware 	Scan files for viruses, Trojan, worms, malwares before they reach your network. <ul style="list-style-type: none">• Stream-based scan technology without file size limitation• Daily data feed of top-ranked threats
Anti-Spam/Email Security 	Fast detect with cloud-based database/mail fingerprints to block spam/phishing mail with malicious contents <ul style="list-style-type: none">• IP reputation filter provides low latency reaction• Support black/white listing for custom policies• Cloud-based database provide real-time protection
Web Filtering/Content Filtering 	Cloud-based real-time access control for inappropriate, unproductive, illegal and malicious websites <ul style="list-style-type: none">• Categorized website access management for increased efficiency• Granular policies controlled by IP address, user, group, or schedule
IDP/IPS 	Deep-packet inspection across all ports and protocols at gateway to against known attacks from network <ul style="list-style-type: none">• Shields vulnerabilities before they can be exploited and eliminates the operational pains of emergency patching• Customized signature support to create your own rules• Constant signature auto-updates
Application Patrol 	Automatically categorize and manage the network applications usage <ul style="list-style-type: none">• Granular policies control by IP address, user, group, schedule• Profile based policy to ensure network quality and easy manage business rule
Geo Enforcer 	Manage network traffic by mapping IP address to geographical regions to prevent fraud or cyber attacks <ul style="list-style-type: none">• Geographical visibility for traffic statistics and logs• IPv6 address support• Automatic IP/geography database update
Sandboxing 	Cloud-based sandbox technology against unknown threats <ul style="list-style-type: none">• Comprehensive inspection for a wide range file types• Cloud-based sandbox provide instant protection without needing a dedicated hardware or software upgrade
Reputation Filter 	Block botnet infection and prevent drive-by download from infected websites <ul style="list-style-type: none">• IP/URL feeds to detect/block botnet commands and control activities• Cloud-based URL feeds to block access to anomalous websites• IP-based reputation filter• Supports 10 Cyber Threat Categories• Inbound & Outbound traffic filtering• Blacklist and whitelist support

Services	Key Features
Vertical Solutions	
Hotspot Management	<ul style="list-style-type: none"> • Authentication with Wall Garden • Advertisement and SMS billing & free time service accounting for guest • Support SP350E printer manager support purple WiFi and third-party social log in • Billing replenishment 
Managed AP Service	<ul style="list-style-type: none"> • Integrated AP controller as central management to provide flexible deployment options • AP auto discovery and provisioning • AP forwarding compatibility 
Device High Availability Pro	<ul style="list-style-type: none"> • Device failure detection and notification • Configuration auto-sync and link monitoring • Smart handover through dedicated Heartbeat Link • NAT/Firewall/VPN Sessions synchronization 
VPN Client Software	
SecuExtender VPN Client	<ul style="list-style-type: none"> • Providing solutions of both SSL VPN and IPSec VPN remote access • Enhanced layered security incorporating Zyxel security appliances • Easy and intelligent installation 
Single Sign-On Service	
SSO Agent	<ul style="list-style-type: none"> • Simplified single sign in to multiple resources • Improved user experience without repetitive logging in between various web browsers • Secure communication via shared key encryption for data transmission protection • Login mechanism works with any protocol, not just HTTP 
Management & Analytics	
Cloud CNM SecuReporter	<ul style="list-style-type: none"> • Multidimensional analytics on abnormal behaviors • Cloud-based real-time monitoring and alerts • Effective event correlation and user behavior analytics • Intuitive dashboard and customizable report 
Nebula SD-WAN	
Nebula SD-WAN	<ul style="list-style-type: none"> • Advanced WAN technology boosts throughput performance • Improve network quality without extra bandwidth investment • Quick installation, remote control, and centralized monitoring

⁴: AV (with Express Mode) and IDP throughput measured using the industry standard HTTP performance test (1,460-byte HTTP packets). Testing done with multiple flows.

⁵: Maximum sessions measured using the industry standard IXIA IxLoad testing tool

⁶: Including Gateway-to-Gateway and Client-to-Gateway.

⁷: With ZyXEL service license to enable or extend the feature capacity.

⁸: This is the recommend maximum number of concurrent logged-in devices.

⁹: SafeSearch function in CF need to enable SSL inspection firstly and not for small business models.

¹⁰: With Hotspot Management license support

¹¹: The Speedtest result is conducted with 1Gbps WAN link in real world and it is subject to fluctuate due to quality of the ISP link.

*: The matrix was measured with SD-OS v10.02P1 firmware version.

¹: Actual performance may vary depending on network conditions and activated applications.

²: Maximum throughput based on RFC 2544 (1,518-byte UDP packets).

³: VPN throughput measured based on RFC 2544 (1,424-byte UDP packets).

⁴: Maximum sessions measured using the industry standard IXIA IxLoad testing tool.

⁵: Including Gateway-to-Gateway and Client-to-Gateway.

⁶: With Zyxel service license to enable or extend the feature capacity.

⁷: This is the recommend maximum number of concurrent logged-in devices.

⁸: SafeSearch function in Content Filtering need to first enable SSL inspection and not for small businesses.

⁹: With Hotspot Management license support.

¹⁰: ZyWALL VPN100 or above supports Device HA Pro once registered.

¹¹: After upgrading device firmware to SD-OS v10.02 and was transformed to SD-WAN mode.
