ACKNOWLEDGMENTS—Henry S. Wulf, Chief of the Finance Branch, directed the preparation of this report under the general supervision of Vance Kane, Assistant Chief for Programs. David F. Patching coordinated data collection and review. Helen Anderson, Winifred H. Contee, Margaret M. King, and Charlene M. Sebold reviewed the retirement system data.

Linda Humphreys and Mildred Y. Keull performed the computer operations under the supervision of Judith H. Jennings, Chief of the Computer Utilization Branch.

Corrine Davis supervised the preparation of publication copy, assisted by Esther Fogwell and Ruth Samuels.

State and local officials throughout the country provided information for this phase of the 1982 Census of Governments. Their cooperation is gratefully acknowledged.

For information regarding data in this report, contact Vance Kane, Governments Division, Bureau of the Census, Washington, D.C. 20233 (301/763-7664).

The 1982 Census of Governments found a total of 2,559 State and local government employee-retirement systems. The total fiscal year 1981-82 revenues for these systems amounted to \$49.0 billion while their payments totaled \$18.3 billion. In the last month of their 1981-82 fiscal year, these government agencies: had a total membership of 11.6 million persons; had amassed financial assets totalling \$245.3 billion; paid recurrent benefits of \$1.3 billion to 2.9 million persons for an average monthly payment of \$440 per beneficiary.

As part of the 1982 Census of Governments, information was obtained on the membership, finances, benefit payments, and cash and security holdings of employee-retirement systems of State and local governments throughout the Nation. The findings presented in this publication are based mainly on reports furnished by these systems in response to a mail canvass survey. Each system was asked to report financial data for its fiscal year that ended between July 1, 1981, and June 30,

1982, and figures on system membership and benefit operations covering the last month of the fiscal year.

This report covers only those retirement systems which are sponsored by a recognized unit of government as defined by the Bureau of the Census, and whose membership is comprised of public employees compensated with public funds. There must be an identifiable employee retirement fund financed in whole or in part with public contributions. Direct payments to retired or disabled individuals by appropriation of general funds do not constitute a retirement system, and are excluded from this report. Payments to a private trustee or insurance carrier which administers the investments and benefit payments are also excluded as not being a government-administered retirement system (see Sources and Limitations of Data).

For this survey of retirement systems, like those taken in previous censuses, information was sought separately for two classes of members: (1) "Active members," consisting of covered persons currently employed by State and local governments; and (2) "Other (inactive) members," consisting of employees on military or other extended leave, as well as former employees who had acquired a vested right to receive retirement benefits at a subsequent time. Beneficiaries were not counted as members.

Comparative national totals concerning State and local government retirement systems in 1971-72, 1976-77, and 1981-82 are shown in table A.¹

¹The publications providing prior period data in this report are cited in the text discussion of "Sources and Limitations of Data."

ADMINISTERING GOVERNMENTS

Retirement systems administered by State governments in 1982 accounted for 87.4 percent of the membership, 78.8 percent of the financial assets, and 72.7 percent of all the recurrent benefit payments for State and locally administered systems. There are 190 State-administered systems compared with 197 systems reported in 1977. Eighty-two percent (1,935) of the 2,369 locally administered retirement systems are maintained by municipalities, and most of the remainder are associated with county and township governments.

The State-versus-local distinction that applies here pertains to responsibility for retirement system administration, rather than to employee coverage. Many of the State-operated systems cover employees of local governments rather than, or in addition to, covering personnel of the State government itself.

FINANCES OF RETIREMENT SYSTEMS

Table 2 shows that in fiscal 1981-82 State governments contributed \$9.1 billion and the local governments provided \$12.7 billion to finance employee-retirement systems. Employees contributed \$8.1 billion during the year, or about 37 percent as much as total government contributions (\$21.8 billion). Earnings on investments of the retirement systems totaled \$19.0 billion, up from \$7.7 billion in fiscal 1976-77. Combined receipts from all sources add up to \$49.0 billion. This sum is equivalent to an average of \$4,218 for each member of all systems compared with \$2,315 per member in fiscal 1976-77.

Benefit payments during fiscal 1981-82 totaled \$15.7 billion, an 86 percent increase over the 1976-77 amount of \$8.5 billion. This was equal to \$5,412 annually for each of the 2.9 million beneficiaries receiving continual (periodic) payments reported as of the end of fiscal 1981-82.

"Withdrawals," as reported in table 3, amounted to \$2.2 billion during fiscal 1981-82. This mainly represents the return, to members leaving the systems before retirement, of their contributions, accrued interest, plus in some instances a portion of employer contributions.

The \$428 million of "Other payments" reported in table 3 covers direct administrative costs and related incidental payments, as reported by the systems. For numerous systems, all or most administrative expenses are met directly by the government involved, so that such costs commonly are not reported on the census schedules that apply specifically to the retirement systems as such. In Census Bureau reporting on governmental finances, all administrative costs of retirement systems are treated as a general expenditure of the administering government, and only benefits and withdrawals paid by the systems are distinctively reported as "employee-retirement expenditure."

Receipts of State-administered systems amounted to \$37.9 billion in fiscal year 1981-82, as shown in table 3. Of this amount employee contributions totaled \$6.7 billion. Government contributions totaled \$15.8 billion, of which \$8.9 billion was

transferred by State governments to their own retirement systems and \$6.9 billion was paid by local governments to State systems to cover local member costs. Earnings on invested assets of the State systems amounted to \$15.5 billion. Investment earnings include any realized profits on investment transactions, less any net gains on investments sold, if recorded as receipts of the system.

For Census Bureau reporting on governmental finances, contributions by a particular government to an employee-retirement system it administers represent intragovernmental transactions. These amounts are netted out in arriving at a nonduplicative total of the government's revenue. Accordingly, the "employee-retirement revenue" of State governments in fiscal 1981-82 amounted to \$29.0 billion--i.e., the sum of all retirement system receipts except the \$8.9 billion in contributions by the State governments themselves.

Of the \$11.0 billion total local retirement systems revenue in fiscal year 1981-82, employee contributions were \$1.4 billion. Government contributions totaled \$6.0 billion, \$5.9 billion of which was contributed by the local governments. Earnings on investments of the local systems amounted to \$3.5 billion.

Cash and security holdings of all employee-retirement systems amounted to \$245.3 billion in fiscal 1981-82 as compared to \$123.5 billion in fiscal 1976-77. Cash and security holdings of State-administered systems rose from \$94.9 billion in fiscal 1976-77 to \$193.3 billion in fiscal 1981-82, and holdings of locally administered systems rose from \$28.6 billion to \$52.0 billion during the same period. As a percent of total holdings, State retirement systems held slightly less than 80 percent and local retirement systems slightly more than 20 percent in both fiscal years 1976-77 and 1981-82.

Assets of the retirement systems are concentrated in a relatively small number of large systems. About \$230 billion, or 94 percent of total assets, was reported for the 171 systems each of which had 5,000 members or more.

As shown in table 3 and text table B, investments in nongovernmental securities made up 73.8 percent of the total assets of these systems at the end of fiscal 1981-82, compared with 85.8 percent in 1976-77. Corporate stock holdings have increased 94 percent since 1976-77 and now comprise 22.1 percent of retirement system assets. The proportion of assets invested in corporate bonds decreased from 46.0 percent in 1976-77 to 34.3 percent in 1981-82. The proportion of financial assets represented by Federal Government securities has increased from 9.9 percent in 1976-77 to 22.4 percent in 1981-82. Prior to the 1977 Census, however, Federal securities included only United States Treasury securities, and Federal agency securities were included in nongovernmental securities. Retirement system investments in real property totaled \$1.8 billion at the end of fiscal 1981-82. Of that amount, \$489 million, or 27 percent, was held by locally administered systems.

MEMBERSHIP SIZE

Total membership of the retirement systems covered by this report has expanded from 9.1 million persons in 1971-72 to 11.6 million in 1981-82. This exceeds the rate of growth in total number of State and local government employees (up from 10.4 million persons in October 1971 to 13.1 million in October 1981), affording evidence that the increase in retirement system membership is due, in part, to an increase in the proportion of all State and local government personnel included in these retirement plans.

About 95 percent of all the persons participating in retirement systems of State and local governments belong to one of the 171 largest systems--those reporting a membership of 5,000 or more. At the other extreme, as shown in table 6, 66.5 percent of the total number of employee-retirement plans of State and local governments had fewer than 100 members enrolled at the end of fiscal 1981-82. These small systems accounted for less than one-half of 1 percent of the total membership of all public employee-retirement systems. These proportions generally resemble those reported for 1977 reflecting a continuation of the predominant role of large-membership systems, as well as the existence of numerous very small systems.

A membership-size distribution of all systems, by States, is presented in table 5, and figures for each individual system having 200 or more members appear in table 9. The five largest systems--one each in California and New York with more than 500,000 members, one in Texas with more than 400,000 members, and one each in Florida and Ohio with more than 300,000 members--accounted for more than 20 percent of the total membership of all systems.

Total State-by-State membership of all public employee-retirement systems ranged from over 1.1 million in California and New York to less than 25,000 in North Dakota.

COVERAGE CLASSES

Tables 6, 7, and 9 show retirement coverage data using class-coverage categories such as "General Coverage" or "Limited Coverage." These classifications represent the type of employees composing the membership of certain retirement systems (e.g., police, police and fire, education, all employees). Because of limitations imposed on the mailing format and on respondent burden, the 1982 census forms did not request this information. A thorough review of these data for prior censuses revealed virtually no change in this information over time. Therefore, these data represent, for the most part, the results of the fiscal 1976-77 survey in which respondents were asked to indicate the composition of employee classes. Only in those instances where circumstances dictated the possibility of change--a newly created system, merged systems, or major name change--did Census staff investigate and make the necessary changes to the data file.

The earliest retirement programs to be set up for public employees commonly were limited to special classes such as teachers, police officers, or firefighters. In 1981-82, limited-coverage systems comprised more than three-fourths of all employee-retirement systems, held about 44 percent of the financial assets of all systems combined, and made monthly benefit payments totaling \$628.2 million, or slightly less than one-half of all such payments. These proportions resemble those accounted for by limited-coverage systems in 1972 and 1977. Table C is a summary of the trends in distribution of total membership, by coverage class of system.

The expansion in general-coverage systems has been especially marked in State government administered systems. Of the 62 systems so classified in 1977 and 1982, the number of members increased to 6.4 million in 1982, up from 5.8 million in 1977. Most of these general-coverage State systems include local public employees in exclusive systems

or in mixed systems with employees of the State government itself.

Table C. Coverage of State and Local Government Employee-Retirement Systems: Fiscal Years 1981-82, 1976-77, and 1971-72

Type of system	Percent of total membership		
	1981-82	1976-77	1971-72
All systems.....	100.0	100.0	100.0
General coverage.....	63.5	62.0	58.9
Limited coverage.....	36.5	38.0	41.1
Teachers and other school employees....	30.1	33.3	35.3
Police and fire.....	2.9	3.2	3.5
Other.....	3.6	1.5	2.4

The concept of "general coverage," as applied in this report, is subject to a considerable range of meaning, even within the various sub-categories of State systems thus designated. Applicable statutes differ in the extent to which they provide for optional or mandatory application, agencies and departments included or excluded, kinds of employees and positions excepted, and other features.

One common type of exclusion from general-coverage systems has to do with persons who are members of, or eligible for membership in, some special-coverage system--e.g., for teachers, police officers, firefighters, or utility-system employees. In some instances, however, employees can elect coverage under one or the other system. Moreover, in a few jurisdictions a person may be covered in two separate systems, although such overlapping coverage is relatively rare.

As in 1977, more than four-fifths of the members of limited-coverage retirement systems administered by State and local governments are covered under one of 57 school employee or teacher retirement plans that are operated in 31 States. Eight State governments maintain separate retirement systems for teachers and for other school employees. The "School employees" category

under "limited-coverage systems" comprises both (a) very broadly based systems applying to school employees generally (including clerical and custodial employees, bus drivers, etc.), and (b) systems for school employees other than teachers.

Retirement systems classed as covering "Teachers" differ in the extent to which they include some nonteaching positions. Most of them require or permit coverage of professional, administrative, supervisory, and some kinds of clerical personnel. Generally, they exclude all or most custodial employees and employees engaged in auxiliary activities, such as bus transportation and school lunch programs. Consistent classification of these systems is complicated by the diverse definitions and usages relating to key terms such as "Teachers" and "Certificated employees." Therefore, there is no sharp line of distinction between some "Teachers" systems and particular "School-employees" systems.

Locally administered plans for teachers and school employees, distributed fairly widely at one time, are now found mainly in a few large school districts and in particular large municipalities which administer local public schools. The most notable example is in New York City. These local school retirement systems have 157,740 members.

In relation to all State and local government retirement plans, the special programs for police officers and firefighters altogether represented more than 66 percent of all systems in 1981-82. However, only 2.9 percent of total retirement system membership was covered by police and firefighter programs.

BENEFIT OPERATIONS

National totals on benefit operations of employee-retirement systems covering the last month of each system's fiscal 1981-82 are presented in tables 4 and 6. Benefit items reported exclude amounts that represent borrowing by members or withdrawals of contributions by members leaving the system before retirement.

Total periodic (continual) benefits for the month were \$1.3 billion. Payments by State-administered systems accounted for 72.7 percent

Table D. Summary of State and Local Government Employee-Retirement System Periodic Benefit Operations: Fiscal Years 1981-82, 1976-77, and 1971-72

Table E. Summary of Benefit Class Data for State and Local Government Employee-Retirement Systems: Fiscal Year 1981-82

Item	Total	Persons retired for age or length of service	Persons retired for disability	Survivors of former members
Beneficiaries:				
Number.....(1,000)...	2,897	2,404	250	244
Percent.....	100.0	83.0	8.6	8.4
Recurrent monthly benefit payments:				
Amount.....(millions of dollars)...	1,275.8	1,065.3	142.8	67.8
Percent.....	100.0	83.5	11.2	5.3
Average monthly benefit payments.....(dollars)...	440	443	571	278

of the total, compared with 70.6 percent for the corresponding period in 1976-77. However, the average payment of \$549 per beneficiary by the local systems continued to be larger than the \$410 paid by State systems. In fiscal year 1976-77 beneficiaries of local systems received an average payment of \$388 compared with an average of \$288 per beneficiary of State systems. Summary figures on recurrent benefit payments are shown in table D.

Of the 2.9 million persons receiving monthly benefit payments in 1981-82, 83 percent (2.4 million) were persons retired because of age or length of service. About 250,000 or 8.6 percent, were persons retired on account of disability. The other 244,000 beneficiaries (8.4 percent) were the survivors of former system members. Table E shows the distribution of beneficiaries and monthly payments in terms of these three benefit classes.

The 1981-82 survey counted monthly lump-sum payments totaling \$51.7 million made to 23,407 survivors of former members. This was equal to \$2,207 for each payee, a decrease from the fiscal 1976-77 average payment of \$2,833 per payee. Only a minor proportion of all retirement systems makes provision for distinctive lump-sum benefits of this kind.

RELATION TO FEDERAL SOCIAL SECURITY (OASDHI)

Before 1951, public employees were not eligible to participate in the Federal Social Security program (Old Age, Survivors, Disability, and Health

Insurance--i.e., OASDHI). Since then, however, a number of amendments to the Social Security Act have made social security coverage available under certain conditions to State and local government employees, including those who also participate in retirement systems of these governments. The applicable conditions of the law make it possible for social security coverage to apply to all members of such a retirement system or to only a portion of its membership.

Accordingly, in this survey each retirement system was asked to indicate the relationship of its coverage of its active membership to that of the Federal program, by reporting whether all of its active members, some but not all, or none of its active members were covered by the social security system as of the end of the retirement system's 1981-82 fiscal year.

Findings from this inquiry are summarized nationally in table 6, and the social security relationship reported by individual major systems is shown in table 9. Altogether, 394 systems reported such dual coverage of their entire active membership, numbering 2.7 million persons or 26.4 percent of the active membership total for all State and local retirement systems. An additional 152 systems reported that social security coverage applied to a portion of their active members. The remaining 2,013 systems reported no social security coverage for their active membership, totaling 4.4 million persons or 43.0 percent of the total for all State and local retirement systems. Comparative percentage distributions between 1971-72, 1976-77, and 1981-82 are presented in table F.

Table F. Summary of Federal Social Security Coverage by State and Local Government Employee-Retirement Systems: Fiscal Years 1981-82, 1976-77, and 1971-72

Type of system	Percent of systems			Percent of active membership

FEDERALLY ADMINISTERED EMPLOYEE-RETIREMENT SYSTEMS

Information was collected, where available, from employee-retirement systems administered by the Federal Government. The systems shown here are those that meet the same criteria as required of State and local systems, only at the Federal level. Systems which purchase annuities or pay retirees directly from annually appropriated general funds are excluded. The report shows data for these Federal systems as an exhibit only and excludes them entirely from any of the national or State totals for employee-retirement systems shown elsewhere in this report.

As of September 30, 1982, the four federally administered systems which responded to this survey covered approximately 2.6 million Federal employees. About 1.8 million beneficiaries received a total of \$1.7 billion during the month of September, 1982. Receipts of these Federal systems during the fiscal year totaled \$32.2 billion, with employees contributing \$4.3 billion, the Federal Government \$19.9 billion, and earnings on investments totaling \$8 billion. Benefit payments during the year totaled \$19 billion and withdrawals amounted to \$680 million.

Cash and security holdings of reporting federally administered systems totaled \$98.3 billion as of September 30, 1982. Of this total, \$32 million was in cash and deposits, and \$97.3 billion in Federal Government securities. Nongovernmental securities totaled \$996 million. Only the

Tennessee Valley Authority Retirement System is permitted to hold nongovernmental securities. The Civil Service Retirement System accounted for the vast majority of all Federal retirement systems membership and financial activities. Excluded from these tabulations are the Central Intelligence Agency Retirement System, for which all data are classified, the Military Retirement System, which pays its beneficiaries by direct appropriation, and the U.S. Tax Court Judges Survivors Annuity System.

Detailed information for the Federal systems included here is presented in table G.

SOURCES AND LIMITATIONS OF DATA

The initial universe of public-employee systems for the 1981-82 Census of Governments was established by using a number of different sources. Census staff began by updating the original 1977 Census of Governments universe data file with the 1981 annual survey of public-employee retirement system file. The revised listing then underwent a series of additions, deletions, and changes based on data from the 1981 annual survey of Governmental Finance. The governmental finance survey covered all State governments, all 39,000 general purpose local governments, all school district governments, and a sample of 4,700 special district governments which included any special district with 200 or more employees. The governmental finance survey data file provided an inde-

Table G. Membership and Financial Data of Federally Administered Retirement Systems: Fiscal Year 1981-82

pendent source to check the revised listing of public-employee retirement systems. In addition, listings which some State insurance trust administrators made available proved valuable resources in further refining the universe list. These research efforts resulted in the creation of a final universe mail file of approximately 3,000 retirement systems.

The same criteria developed for the 1977 Census of Governments retirement survey for inclusion of certain types of retirement systems were followed in the 1982 survey. Only those systems administered by the sponsoring State or local government, and subject to auditing controls of that government, are included in this survey. Retirement funds found to meet one or more of the following conditions were excluded from the survey: (1) All retirement contributions are forwarded as premiums for purchase of annuity policies from private insurance carriers; (2) the Teachers' Insurance and Annuity Association (TIAA) provides all public employee retirement coverage, without any supplemental coverage administered by the government; (3) all retirement benefits are paid directly from annually appropriated general funds.

Of the approximately 3,000 survey questionnaires mailed out, about 1,135 usable data responses were received. Data for an additional 1,180 local retirement systems were compiled from State government sources for Florida, Illinois, Minnesota, and Pennsylvania.

About 245 systems did not respond despite extensive followup correspondence and telephone calls. In each instance Census Bureau staff verified that the nonrespondent was an active system within the definition of the survey. The active membership of virtually all nonresponding systems was, according to available records, less than 200 employees. The file was systematically completed by using the most recent fiscal year available in census records.

In some cases Census Bureau representatives visited large systems to obtain the needed information. Other systems were compiled by Census Bureau personnel from audit reports supplied either by the retirement system officials or by the administering government.

The removal of approximately 500 retirement systems from the survey was due largely to consolidation of local systems with State-administered retirement funds in Colorado, Oklahoma, Pennsylvania, and Wisconsin. Other systems were removed when responses indicated they purchased annuity policies or payments to beneficiaries were made directly from general funds appropriated annually.

All responses were examined for reasonableness and internal consistency. Followup correspondence and telephone calls were used extensively to clear up instances of apparently incomplete or erroneous reporting.

Survey questionnaires called for two types of detail that apparently could not be accurately and consistently reported in all cases. One of these was the requested distinction between the

active members and other members of retirement systems. In some instances, the reported number of active members may include some system members who should not have been so counted. Information on the number of "Other" members apparently could not be developed on a consistent basis from available records by a number of systems. The other problem concerns the requested breakdown of recurrent beneficiaries and payment amounts according to the type of benefit involved. It seems likely that the predominant class (benefits to persons retired on account of age or length of service) includes some amounts that, with more refined basic record systems, would have been reported under one of the two other defined classes of recurrent benefits and beneficiaries (disability retirees or survivors). These problems are not limited to the 1981-82 data, but similarly affect retirement system figures from prior census surveys.

As pointed out in the foregoing discussion of "Coverage Classes," certain of the type-of-system groupings presented comprise retirement plans which differ considerably in scope and nature; thus, it should not be assumed that individual systems which show the same coverage-class designation in table 9 are closely comparable with one another in all respects.

Prior year statistics that appear in the report are from various Census Bureau publications, as follows: Data for 1977-78 through 1980-81, annual reports entitled Finances of Employee-Retirement Systems of State and Local Governments in (year); data for 1971-72, Employee-Retirement Systems of State and Local Governments (Vol. VI, No. 1 of the 1972 Census of Governments); data for 1976-77, Employee-Retirement Systems of State and Local Governments (Vol. VI, No. 1 of the 1977 Census of Governments). For these census years, the surveys are designed to cover all retirement systems of State and local governments, and gather data not only on the finances of such systems but other characteristics also--membership, coverage, and benefit operations. For other years, the cited sources supply only data based on a sample survey rather than a comprehensive enumeration.

ACKNOWLEDGMENTS

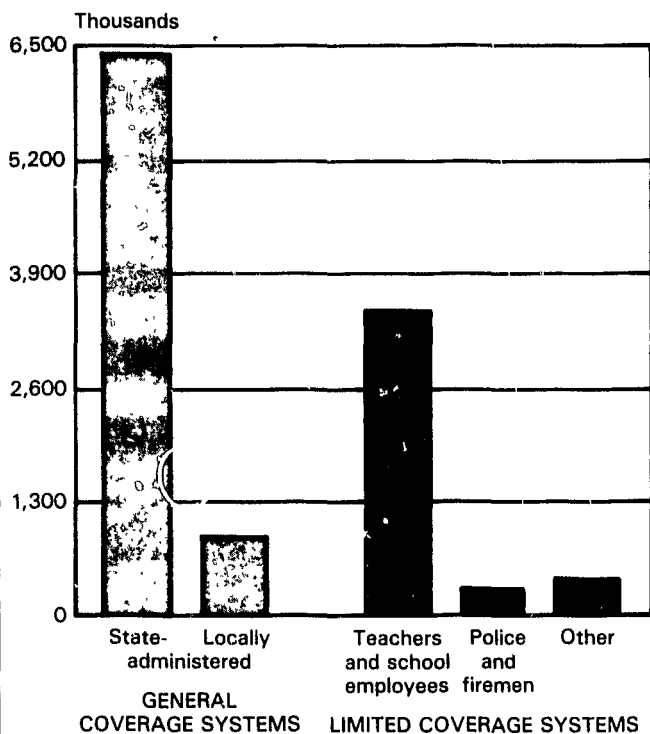

The generous cooperation of retirement system officials and employees in providing these data is gratefully acknowledged.

MEANING OF SYMBOLS

The symbols in the tables have the following meanings:

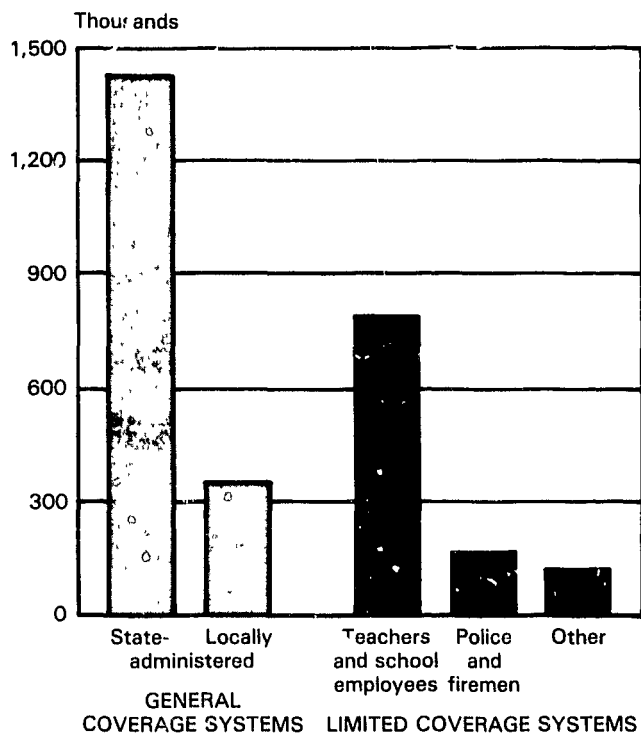

- * Data estimated.
- Represents zero or rounds to zero.
- (NA) Not available.
- r Revised.
- (X) Not applicable.

Note: Because of rounding, detail may not add to totals.

¹A number of State and local retirement systems did not provide sufficient benefit operations detail. Total "Beneficiaries receiving periodic benefits" and "Recurrent benefit payments for the month" was classed as "Persons retired on account of age or length of service" for these nonresponding systems. See also table 9.

Definitions of Selected Terms

Major categories for the Census Bureau's classification of governmental finances, as applied in this report, are defined below. Additional explanations and background information are provided in the introductory text.

Beneficiaries of Retirement System--Former active members retired on account of age, service, or disability, and survivors of deceased former active members, who are receiving regular or lump-sum payments from a retirement fund.

Benefits Paid--Retirement, disability, survivors' and other benefits.

Cash and Deposits--Cash on hand, demand and savings or time deposits, bank repurchase agreements and certificates of deposits.

Corporate Bonds--Includes at par value bonds, debentures, convertible bonds, and railroad equipment certificates.

Corporate Stocks--Includes at book value common and preferred stocks, warrants, and investment company shares.

Earnings from Investments--Interest, dividends, and other earnings on investments. Includes any recorded profits on investment transactions (gains on investments sold) less any recorded losses.

Employee Contributions--Revenue from contributions required of employees for financing government-administered employee-retirement systems.

Federal Agency Securities--Obligations of government owned agencies comprising Commodity Credit Corporation, Export-Import Bank, Federal Housing Administration, Government National Mortgage Association, Postal Service, and Tennessee Valley Authority. Securities of other Federal agencies are reported at Other Securities.

Federal Securities--Obligations of U.S. Treasury (including short-term notes) and Federal Financing Bank.

Federal Social Security--Federal benefit program provided by Old Age, Survivors, Disability, and Health Insurance (OASDI).

Fiscal Year--The 12-month period ending between July 1, 1981, and June 30, 1982, at the end of which the retirement fund determines its financial condition and the results of its operations and closes its books.

Government Contributions--Amounts received from State and local governments for financial support of retirement systems. Also includes any taxes credited directly to retirement funds.

Lump-sum Benefits--One-time payments made to survivors of deceased former active members of retirement systems in final settlements of all retirement fund obligations.

Members of Retirement System--Active members are current contributors to retirement fund. For noncontributory systems, includes current public employees who eventually would be eligible for benefits under the laws of the retirement system. Inactive members are former employees or employees on extended leave without pay who have retained retirement credits.

Other Securities--Includes commercial and finance company paper, securities issued by Federal Home Loan Banks, Federal Land Banks, Federal Intermediate Credit Banks, and Federal National Mortgage Association (FNMA), and all foreign and international securities. Also includes amounts held in pooled investment.

Periodic (Recurrent) Benefits--Benefits paid at defined intervals (usually monthly) and continuing during the lifetime of eligible retirees.

Retirement Fund--All accounts and reserves held by the administering government for receipts of contributions and payments of benefits to retirees or beneficiaries, as well as any amounts for administration of the retirement system.

State and Local Government Securities--Securities issued by State and local governments, including general obligation bonds, industrial revenue bonds, utility bonds, housing and hospital revenue bonds, and mortgage revenue bonds.

Withdrawals--Amounts paid to employees or former employees or their survivors, representing return of contributions made by employees during the period of their employment and any interest on such amounts.

PUBLICATION PROGRAM

The 1982 Census of Governments, similar to those taken every 5 years since 1957, covers four major subject fields relating to State and local governments—governmental organization, taxable property values, public employment, and governmental finances.

The results are being issued in one preliminary report and eight volumes, which are described below. Publications order forms for specific reports may be obtained by writing to the Data User Services Division, Customer Services Branch (Publications), Bureau of the Census, Washington, D.C. 20233.

PRELIMINARY REPORT

This report presents preliminary data from the Directory Survey of Local Governments on the number of governments by type.

Number 1. Governmental Units in 1982

VOLUME 1. GOVERNMENTAL ORGANIZATION—1 report (GC82(1))

Data are presented at the national level, by States, and for SMSA's on county, municipal, and township governments by size classes; on public school systems by size of enrollment, by grades provided, and by number of schools operated; and on special district governments by function performed. The report also includes a summary description of governmental structure in each State.

VOLUME 2. TAXABLE PROPERTY VALUES AND ASSESSMENT/SALES PRICE RATIOS—1 report (GC82(2))

This volume presents data on amounts of assessed value (gross and net) officially determined in 1981 for local general property taxation, for counties, and for each city having a 1980 population of 50,000 or more, with totals for States. The data include estimates of locally assessed realty distributed among major use categories.

The report also provides statistics, based on a sampling within 2,000 local assessing jurisdictions throughout the United States, on real properties involved in measurable sales during a 6-month period of 1981. Statistics include assessment-sales ratios and dispersion coefficients applicable to single-family (nonfarm) houses and certain other realty.

VOLUME 3. PUBLIC EMPLOYMENT—3 reports (GC82(3) 1 to 3)

Number 1. Employment of Major Local Governments—This report presents statistics on October 1982 employment and payrolls of individual major local governments. Data are presented individually for all county governments, municipalities (and townships in selected States) with 10,000 or more population, school systems with 5,000 or more enrollment, and special districts having 100 or more full-time employees.

Number 2. Compendium of Public Employment—This report is a comprehensive summary of public sector employment, payrolls, and employer costs for selected employee benefits as of October 1982. Employment and payroll data are shown by governmental function. Data are summarized nationally and by States. Local government statistics are also summarized for each county area; by population-size group for counties, municipalities, and townships; by enrollment-size group for school districts; and by employment-size group for special district governments.

Number 3. Labor-Management Relations in State and Local Governments—This report is a national and State-by-State summary of labor-management relations in State and local governments as of October 1982. Statistics include the number and percent of employees who belong to an employee organization; number of governments with a labor relations policy; number of contractual agreements and number of employees covered by contractual agreements; number of employee bargaining

units; and work stoppages which occurred between October 16, 1981, and October 15, 1982.

VOLUME 4. GOVERNMENTAL FINANCES—5 reports (GC82(4) 1 to 5)

This volume presents statistics on revenue, expenditure, debt, and financial assets of State and local governments.

Number 1. Finances of School Districts—Selected financial items are shown for enrollment-size groups of public school systems and individual school systems enrolling 5,000 or more pupils.

Number 2. Finances of Special Districts—Data are shown for selected large districts.

Number 3. Finances of County Governments—Selected financial items are shown for groups of counties, classified by population-size groups, and for individual county governments.

Number 4. Finances of Municipal and Township Governments—Selected financial items are reported for population-size groups of these governments and for individual municipalities and townships having 10,000 or more inhabitants.

Number 5. Compendium of Government Finances—This report is a comprehensive summary showing data for the Federal Government, individual States, and local governments by type of government, and data for State and local governments by States, including a breakdown by type of government. Data are given for county areas, per capita amounts, percentage distributions, and State rankings.

VOLUME 5. LOCAL GOVERNMENT IN METROPOLITAN AREAS—1 report (GC82(5))

This volume presents the census findings for standard metropolitan statistical areas (SMSA's) in three major subject fields: Numbers of local governments by type and size, local government employment and payrolls, and local government finances. Data are shown in terms of nationwide aggregates for population-size groups of SMSA's and for SMSA portion of each State, as well as for individual SMSA's and their component counties.

VOLUME 6. TOPICAL STUDIES—5 reports (GC82(6) 1 to 5)

This volume includes the following reports.

Number 1. Employee-Retirement Systems of State and Local Governments

Number 2. Governmental Statistics for Puerto Rico, Virgin Islands, Guam, and Northern Mariana Islands

Number 3. State Payments to Local Governments

Number 4. Historical Statistics on Governmental Finances and Employment

Number 5. Graphic Summary

VOLUME 7. GUIDE TO THE 1982 CENSUS OF GOVERNMENTS—1 report (GC82(7))

This report presents detailed samples of tables published in the 1982 Census of Governments report series.

VOLUME 8. PROCEDURAL HISTORY—1 report (GC82(8))

This report describes the procedures followed in planning and conducting the 1982 Census of Governments.
