1. If your system buys fuel at the market or futures contract, please place an X by the following:
 Spot Market _____ Contract

As a combination of both
 X

2. Briefly describe your systems purchasing arrangement (is it competitively bid, off of OCS Contract, etc.)

The NFTA had successfully locked in fuel prices for the period SFY10 thru SFY12, saving the Authority \$2.5 million. SFY10 lock in prices were 21% unfavorable to actual market prices for 71% of our ULSD usage (Diesel 2), however, this was somewhat mitigated as we approached our supplier and were able to negotiate storage of fuel in their tanks, for delivery to the NFTA, at March, 2009 prices. We were able to purchase 756,000 gallons of ULSD (Diesel 2) at \$1.7057 and 210,000 gallons of ULSD (Diesel 1) at \$2.1092. These prices include all storage and delivery fees. This resulted in savings amounting to 27% of actual market prices for 29% of our ULSD usage (Diesel 2) and 22% of actual market prices for 74% of our ULSD (Diesel 1) usage. In May, 2010 we were able again to negotiate storage of our fuel in their tanks for SFY11. We were able to purchase 660,000 gallons (29% of usage) at \$2.19/gal, \$.01 less than our budgeted figure of \$2.20/gal for unblocked ULSD (Diesel 2) fuel. In June 2011, we successfully locked-in 504,000 gallons of ULSD (Diesel #2) at \$3.12/gal, \$0.09 less than our budgeted figure of \$3.19/gal and \$0.11/gal less than the existing market price. For SFY12, we have locked-in 588,000 gallons at \$3.07/gal and 378,000 gallons at \$3.23/gal. In May 2012, we successfully locked-in 640,000 gallons of ULSD (Diesel #2) at \$3.27/gal, and in June 2012 we locked-in a further 169,000 gallons at \$3.06/gal.
